He was worth 20*l.* a week, he said, as a *wire*—that is, a picker of ladies' pockets.
Mayhew, *London Labour and London Poor*, I. 410.

9. A fiber of eowweb, a fine platinum wire, or a line upon glass, fixed in the focus of a telescope, to aid in comparing the positions of objects.—**Barbed, beaded, dead wire**. See the adjectives.—**Binding-wire**. See *binding*.—**Compound telegraph-wire**, a wire composed of a steel center surrounded by a copper tube, the object being to obtain the necessary conductivity and strength with less material than is required when iron wire is used.—**Dovetail wire**, a wire having a wedge-shaped section.—**Earth wire**. See *earth-wire*.—**Filling the wire**, in *teleg.*, putting such a number of stations on one wire that it is occupied during the whole day.—**Gold wire**, a wire formed of a core of silver covered with gold. It may be drawn out to the fineness of thread.—**Ground-wire**. Same as *earth-wire*.—**Hollow wire**, in *goldsmithing*, small tubes used for making joints, as in the cases of watches, etc.—**Latten live, phantom wire**. See the qualifying words.—**Leading-in wire**, the wire which makes connection between a telegraph-line and a telegraph-office.—**Open wires**, in *teleg.*, exposed or overhead bare wires. Also sometimes used for *open circuit*.—**Saddle wire**, a telegraph-wire carried on insulators fixed directly to the tops of the poles.—**Taped wires**, wires covered with tape for insulation or weather-protection.—**Telodynamic wire**, a wire used to transmit force or power, as in giving motion to a machine from a countershaft or from the driving-pulley of an engine.—**To pull or work** (the) *wires*. See *wire-pulling*.—**Under-takers' wire**, a kind of insulated wire the use of which was at one time authorized by the fire-insurance underwriters for electric-lighting purposes. The name was given because of the defective quality or insulation of this wire and the consequent danger in its use. [Collog.]—**Wire-covering machine**, a machine for covering wire with a finer wire or with thread.—**Wire of Lapland**, a shining slender material made from the sinews of the reindeer, soaked in water, beaten, and spun into a sort of thread of great strength. These threads are dipped in melted tin, and drawn through a horn with a hole in it. The Laplanders use this wire for embroidering their clothes.—**Wire-twisting machine**, a machine or tool for joining ends of wire, as sections of fencing- or telegraph-wire, etc., by twisting them on each other.—**Woven-wire lathing**. See *lathing*.

II. *a.* Made of wire; consisting of or fitted with wires: as, a *wire* sieve; a *wire* bird-cage.

He did him to the *wire*-window,
As fast as he could gang.
Fire of Prendraught (Child's Ballads, VI. 180).

Wire armor. Same as *chain-mail*. See *mail*, 3.—**Wire belting**, belts or straps for machinery, made of wire instead of leather.—**Wire bent**. See *bent* 2.—**Wire bridge**. (a) Same as *suspension-bridge*. See *bridge* 1 (with *cut*). (b) In *elect.*, a kind of Wheatstone bridge in which two adjacent resistances are formed by a wire which can be divided in any ratio by means of a sliding contact and a graduated scale.—**Wire cables**. See *cable*.—**Wire cartridge**, a cartridge for a shotgun, having the charge of shot enclosed in a network of wire to concentrate the discharge.

Wire cartridges are woven wire receptacles in which shot are mixed with bone dust. *Sportsman's Gazetteer*, p. 568.

Wire cloth. See *cloth*.—**Wire entanglements**, in *fort.* See *entanglement*.—**Wire fence**, gauze, guard, gun. See the nouns.—**Wire mattress**. See *mattress*.—**Wire rope**. See *rope* 1.—**Wire-spring coiling-machine**, a machine for making spiral metal springs.—**Wire stitch**. See *stitch*, 9.—**Wire wheel**. See *wheel* 1.

wire² (*wir*), *v.*; pret. and pp. *wired*, ppr. *wiring*. [*< wira*, *n.*] **I. trans.** 1. To bind, fit, or otherwise provide with wire; put wire in, on, around, through, etc.: as, to *wire* corks in bottling liquors; to *wire* beads; to *wire* a fence; to *wire* a bird-skin, as in taxidermy; to *wire* a house for electric lighting.

As bats at the *wired* window of a dairy,
They beat their vans.
Shelley, *Witch of Atlas*, xvi.

In 1711 the coats used to be *wired* to make them stick out. *J. Ashton*, *Social Life in Reign of Queen Anne*, l. 151.

Many of the houses built during the past two years were *wired* when constructed.
Electric Rev. (Amer.), XV. 4.

2. To snare by means of a wire: as, to *wire* a bird.

Donald Caird can *wire* a nankin,
Kens the wiles o' dun-deer ataukin'.
Scott, *Donald Caird's Come Again*.

3. To send through a telegraphic wire; send by telegraph, as a message; telegraph: as, *wire* a reply. [Colloq.]

The coronation of the Emperor of Austria as King of Hungary, the canonization of saints of Rome, were . . . cabled to New York, just as the Washington news is *wired* to the same place. *Athenæum*, No. 2154, p. 207.

4. To be wound or bound about like wire; encircle. [Rare.]

But, as the Vine her lovely Elm doth *wire*,
Grasp both our Hearts, and flame with fresh Desire.
Howell, Letters, i. l. 14.

5. In *surg.*, to maintain the ends of (a fractured bone) in close apposition by means of wire passed through holes drilled in the bone.

II. intrans. 1. To flow in currents as thin as wire. [Rare.]

Then in small streams (through all the isle *wiring*)
Sends it to every part, both heat and life inspiring.
P. Fletcher, Purple Island, iv.

2. To communicate by means of a telegraphic wire; telegraph.

I told her in what way I had learned of her accident and her whereabouts, and I added that I had *wired* to her husband. *D. Christie Murray*, Weaker Vessel, xxxiii.

To *wire away*. Same as to *wire in*. [Slang.]

Nevertheless, in one fashion or another he "keeps *wiring away*," stopping now and then to listen as well as his throbbing pulses will allow.

Fortnightly Rev., N. S., XLIII. 93.

To *wire in*, to apply one's self closely and perseveringly to anything; press forward; go ahead. [Slang.]

wire² (wir), *n.* A corruption of *wear*.

wire-bent (wir'bent), *n.* Same as *mat-grass*, 2.

wire-bird (wir'bêrd), *n.* A species of plover.

[At St. Helena] are a few Wild Goats, a kind of Rock Pigeon, and a species of Plover called the "*Wire Bird*."

W. W. Greener, The Gull, p. 657.

wire-cutter (wir'kut'êr), *n.* A form of nippers with sharp edges or blades, for cutting wire.

wired (wird), *a.* [*< wire + -ed²*]. 1. In *ornith.*, having wires or wiry feathers: chiefly in composition: as, the twelve-*wired* bird of paradise. Compare *wire-tailed*, and see *wire¹*, n., 6, and cuts under *Selencides*, *thread-tailed*, *Trochilidæ*, and *Videstrelida*.—2. In *croquet*, protected or obstructed by an intervening wire.

wire-dancer (wir'dân'sêr), *n.* One who dances or performs other feats upon a wire stretched at some distance above the ground. Compare *rope-dancer*.

Mr. Maddox, the celebrated *wire-dancer*, . . . had also been engaged as an auxiliary to the same theatre.

Baker, Biographia Dramatica (ed. 1811), I. 127.

wire-dancing (wir'dân'sing), *n.* The performance or the profession of a wire-dancer.

Wire-dancing, at least so much of it as I have seen exhibited, appears to me to be misnamed; it consists rather of various feats of balancing, the actor sitting, standing, lying, or walking upon the wire, which at the same time is usually swung backwards and forwards.

Strutt, Sports and Pastimes, p. 316.

wiredraw (wir'drâ), *v.*; pret. *wiredrew*, pp. *wiredrawn*, ppr. *wiredrawing*. **I. trans.** 1. To draw (metal) out into wire; especially, to form into wire, as a metal, by forcibly pulling through a series of holes gradually decreasing in diameter.—2. To draw out to greater length; extend in quantity or time; stretch, especially to excess; prolong; protract.

A hungry chirurgeon often produces and *wire-draws* his cure.

Barton, Anat. of Mel., p. 276.

He never desisted from pulling his Beard till he had *wiredrawn* it down to his Feet.

Maunderell, Aleppo to Jerusalem, p. 42.

3. To draw out into excessive tenuity or subtlety, as a thought, argument, or discourse; spin out, especially by useless refinements, hair-splitting, or the like; render prolix at the expense of force and clearness.

The devil perhaps may want his due if authority be not reviled against, and a long schismatical oration hypocritically stretched out to the rabble of their disobedient and unlicked auditors, who . . . do extol the vapourous matter with a *wire-drawn* speech and louting courtesy.

Tom Nash his Ghost, p. 3.

What they call improvement is generally . . . spinning out their Author's sense till 'tis *wiredrawn*: that is, weak and slender.

Felton, On the Classics (ed. 1715), p. 163.

The development of those principles (special pleading) produced such a . . . erop of . . . *wiredrawn* distinctions that the most subtle intellect found it difficult to understand them.

Forsyth, Hortensius, p. 341.

4. To stretch or strain unwarrantably; wrest; pervert; distort.

You injuriously *Wire-draw* him to Presbyters, and foist in (Seniores and prapostios) which are farre from the clause and matter. *Ep. Hall*, Def. of Humb. Remonst., § 8.

Nor am I for forcing, or *wiredrawing* the sense of the text so as to make it designedly foretell the King's death.

South, Sermons, V. ii.

I have been wrongfully accused, and my sense been *wiredrawn* into blasphemy.

Dryden.

5. To beguile; cheat.

To *Wire draw*, . . . to decoy a Man, or get somewhat out of him.

Bailey, 1731.

6. In the steam-engine, to draw off (steam) by one or more small apertures, materially reducing its pressure after the passage.

II. intrans. To follow the profession, practice, or methods of a wiredrawer; especially, to use unwarrantable methods; pervert; cheat.

Thou hast land and thousands, which thou spend'st, And flung'st away, and yet it flows in double, I purchas'd, wrung, and *wire-draw'd* for my wealth, Lost, and was cozen'd. *Beau. and Fl.*, Scornful Lady, v.

wiredrawer (wir'drâ'êr), *n.* [*< wiredraw + -er¹*]. 1. One who or that which draws metal into wire.

Yet they will take upon them to displace a bishop and learned divines, and place in their room weavers and *wire-drawers*.

Tom Nash his Ghost, p. 9.

Then again they [wires] are nealed the third time, . . . and delivered to the small *Wire Drawers*.

Ray, Eng. Words (ed. 1691), p. 195.

2. Figuratively, one who spins out unduly; one who carries a matter into useless subtleties, with or without perversion of meaning.

Either shut me out for a Wrangler, or cast me off for a *Wiredrawer*.

Lily, Euphues, Anat. of Wit, p. 106.

3. A stinging, grasping person. *Halliwel*.

wiredrawing (wir'drâ'ing), *n.* [Verbal *n.* of *wiredraw*, *v.*]. 1. The act or art of extending ductile metals into wire.

The metal is first hammered into a bar, and then passed successively through a series of holes in a hardened steel plate, gradually diminishing in diameter until the requisite degree of fineness is attained. Extremely fine gold and platinum wires for the spider-lines of telescope-microscopes are formed by coating the metal with silver, and then drawing it down to a great tenuity through a draw-plate the holes of which are made in a diamond or ruby. The silver is then removed by nitric acid, leaving an almost invisible interior wire, which has been attenuated to a diameter of only $\frac{1}{1000}$ inch.

2. Figuratively, the act of drawing out an argument or a discussion to prolixity and attenuation by useless refinements, distinctions, disquisitions, etc.

The counsel on the other side declared that such twisting, such *wiredrawing*, was never seen in a court of justice.

Macaulay.

Out of all that rubbish of Arab idolatries, . . . rumours and hypotheses of Greek and Jews, with their idle *wiredrawings*, this wild man of the Desert [Mahomet] . . . had seen into the kernel of the matter.

Carlyle, Hero-Worship, ii.

Wiredrawing-bench, an apparatus for wiredrawing, consisting of a reel on which the wire to be drawn is wound, a draw-plate and stand, and a cone-shaped drum actuated by bevel-gearing.

wire-edge (wir'êj), *n.* A thin, wire-like edge formed on a cutting-tool by over-sharpening it on one side, which causes the edge to turn over slightly toward the other side.

wire-edged (wir'êjd), *a.* Having a wire-edge.

The tool to be ground . . . will . . . become *wire-edged*.

Campin, Hand-turning, p. 41.

wire-finder (wir'fin'dêr), *n.* A kind of telephonic detector employed to find the wires belonging to different circuits, etc. It has a magnet between the poles of which the wire is held; near the magnet is a short ear-tube with ferrotopy diaphragm; and a pulsating or interrupted current sent through the wire causes the diaphragm to sound.

wire-gage (wir'gâj), *n.* See *gage²*.

wire-grass (wir'grâs), *n.* 1. A species of meadow-grass, *Poa compressa*, native in the Old World, naturalized in North America. It is sometimes mistaken for the Kentucky blue-grass, *Poa pratensis*, but is well distinguished by its shorter leaves and smaller dense panicle, and its flattened wiry culms which are decumbent and less tall. Also called *English blue-grass*.

2. A valued forage grass, *Eleusine Indica*, perhaps native in India, now widely distributed in warm and temperate regions; it is common southward in the United States. It has thick succulent stems with radiating spikes at the summit. Also *crab-grass*, *yard-grass*, and *dog's-tail*.

3. One of various other grasses, as the Bermuda grass, *Cynodon Dactylon* (see *grass*), *Sporobolus junceus*, and species of *Aristida* in the southern United States, and *Paspalum filiforme* in the West Indies.

wiregrub (wir'grub), *n.* A wireworm.

wire-heel (wir'hêl), *n.* A certain defect and disease in the feet of a horse or other beast.

wireman (wir'man), *n.*; pl. *wiremen* (-men). A man who puts up and looks after wires, as for the telegraph, telephone, or electric lighting.

Linemen and *wiremen* were in great demand in New York last week.

Elect. Rev. (Amer.), XVII. 286.

wire-micrometer (wir'mi-krom'e-têr), *n.* A micrometer with fine wires arranged in parallel and intersecting series across the field of the instrument.

wire-pan (wir'pan), *n.* A pan with a bottom made of wire cloth, used for baking cake, etc.

wire-pegger (wir'peg'êr), *n.* In *shoe-manuf.*, a nailing- or pegging-machine for cutting wire pegs from a continuous wire and driving them into shoe-soles; a wire-nailing machine. Compare *pegger* and *nailing-machine*.

wire-puller (wir'pûl'êr), *n.* 1. One who pulls the wires, as of a puppet. Hence—2. One who operates by secret means; one who exercises a powerful but secret influence; an intriguer.

It was useless now to bribe the Comitia, to work with clubs and *wire-pullers*.

Froude, Cæsar, p. 369.

One of the great English political parties, and naturally the party supporting the Government in power, holds a conference of gentlemen to whom I hope I may without offense apply the American name *wire-pullers*.

Maine, Pop. Government, iv.

wire-pulling (wir'pûl'ing), *n.* 1. The act of pulling the wires, as of a puppet or other mechanical contrivance. Hence—2. The rousing, guiding, and controlling of any organization or body of persons, especially a political party, by underhand influence or management; intrigue, especially political intrigue.

wirer (wir'êr), *n.* [*< wire + -er¹*]. One who wires; specifically, one who uses wires to snare game.

The nightly *wirer* of their innocent hare.
Tennyson, Aylmer's Field.

wire-road (wir'röd), *n.* Same as *wirerway*. *E. H. Knight*.

wire-sewed (wir'söd), *a.* Sewed with wire instead of thread; noting books and pamphlets.

wire-shafted (wir'shâf'ted), *a.* Devoid of webs for most or all the length of its shaft, as a feather; wired, as a bird. See *wire-tailed*, and cut under *Selencides*.

wire-silver (wir'sil'vêr), *n.* Native silver in slender wire-like forms.

wiresmith (wir'smith), *n.* One who makes metal into wire, especially by beating or hammering.

Wire was obtained by hammering up strips of metal, and the artificers thus employed were termed in the trade *wire-smiths*.

The Engineer, LXVII. 209.

wire-stitched (wir'sticht), *a.* Noting pamphlets, etc., that are fastened with wire.

wire-straightener (wir'strât'nêr), *n.* An apparatus for removing bends from wire, as from that which has been coiled. The wire is pulled forcibly between three or more fixed points not in line.

wire-stretcher (wir'strech'êr), *n.* A hand-tool for clasp the loose ends of wires in fences and telegraph-wires, for the purpose of holding and drawing them together to make a joint.

wire-tailed (wir'tâld), *a.* Having wiry or wire-shafted tail-feathers, as the thread-tailed swallow, *Uromitis filiferus*. See cuts under *thread-tailed*, *Trochilidæ*, *Videstrelida*, and *Vidua*.

wire-tramway (wir'tram'wâ), *n.* Same as *wireway*. *E. H. Knight*.

wire-twist (wir'twist'), *n.* A kind of gun-barrel made of a ribbon of iron and steel coiled around a mandrel and welded. The ribbon is made by welding together laminæ of iron and steel, or two qualities of iron, and drawing the resulting bar between rollers. *E. H. Knight*.

wireway (wir'wâ), *n.* A system of transportation by the agency of traveling or stationary wires. Wireways are used for carrying stone, ores, clay, coal, etc., from mines to docks or railroad stations, or from docks to coal-yards, or from sewage construction-works to docks or dumping-grounds, etc. The most common form is an endless traveling wire rope, supported on posts placed at intervals along the way, or, in some instances, supported only at each end, as in the crossing of rivers or ravines, or the descent of mountain-sides. Smaller ways employ fixed wires on which travel light baskets for conveying money and packages in shops. In the traveling-wire systems the freight is placed in buckets or skips hung on the wire and traveling along with it. Arrangements are made for automatic loading, starting, stopping, unloading, and switching to branch wires. Some of the traveling-wire lines used in mines are several miles long. In short lines, as in cash-carrier systems, the traveling basket, ball, or car is sometimes moved by raising one end of the wire, when the car rolls down to the cashier's desk. See *cash-carrier* and *telephage*. Also called *wire-road*, *wire-tramway*.

wire-weed (wir-wêd), *n.* The knot-grass *Polygonum aviculare*. *Britten and Holland*. [Prov. Eng.]

wirework (wir'wêrk), *n.* [= Icel. *wira-wirki*, wirework, filigree-work; as *wire¹ + work, n.*] Fabrics made of wire, such as wire gauze and wire cloth, or objects made of wire, such as bird-cages and sponge-racks.

Penned off with netted *wirework*, in the clear, bright Rhone flood, are places for the swans and ducks.

Richardson, A Girdle Round the Earth, xv.

wire-worker (wir'wér'kér), *n.* 1. One who manufactures articles from wire.—2. Same as *wire-puller*.

wire-working (wir'wér'king), *n.* 1. The manufacture of wire, or of articles requiring wire.—2. Same as *wire-pulling*.

wireworks (wir'wérks), *n. pl. and sing.* An establishment where wire is made or fitted to some specific use.

wireworm (wir'wérm), *n.* 1. The slender hard-bodied larva of any one of the elick-beetles or snapping-beetles of the family *Elateridae*. Some of these larvae live under the loose bark of dying trees and in old logs and stumps, while many live underground, and feed on the roots of cereals and on other crops. They remain in the larval state two or more years, and are among the worst enemies of the crops in North America and Europe. Also *wiregrub*.

Wheat-wireworm (Larva of *Agriotes mancus*).

2. A myriapod of the genus *Julus* or of an allied genus; a galley-worm. [U. S.]—3. A parasitic worm of sheep, *Strongylus contortulus*.—**Hop-wireworm**, *Agriotes lineatus*. [Eng.]—**Wheat-wireworm**, *Agriotes mancus*. See cut above. [U. S.]
wire-wove (wir'wōv), *a.* Noting a glazed paper of fine quality, used chiefly for letter-paper.
wirily (wir'i-li), *adv.* In a wiry manner; like wire.

My grandfather, albeit spare, was *wirily* elastic.
Landor, Imag. Conv., Queen Elizabeth, Cecil, Anjou, and Fénélon.

wiriness (wir'i-nes), *n.* The state or character of being wiry.

wiring (wir'ing), *n.* [Verbal *n.* of *wire*, *v.*] 1. In *surg.*, the holding in apposition of the ends of a fractured bone by means of wire passed through holes drilled in the bony substance: a method employed most frequently in cases of fractured patella, in which bony union is especially difficult to obtain.—2. In *taxidermy*, the setting or fixing of the skin on a wire framework or the insertion of a wire in any member: as, the *wiring* of the legs was faulty.

wiring-machine (wir'ing-mā-shēn'), *n.* 1. A hand-tool for fastening the wire staples of a Venetian blind to the slats.—2. A bench and tool for securing wire fastenings to soda-water bottles. It holds the cork in position while the fastening is put in place.—3. A tinmen's tool for bending the edges of tin plate over a wire.

wiring-press (wir'ing-pres), *n.* A press for wiring pieced tinware. *E. H. Knight*.

wiriwa, *n.* [African.] One of the African colies or mouse-birds, *Colius senegalensis*.

wirk, **wirket**, *v. and n.* Obsolete spellings of *work*.

wirry, *v. t.* An obsolete spelling of *worry*.

Wirsung's canal or duct, The pancreatic duct.

wiry (wir'i), *a.* [*wire* + *-y*.] 1. Made of wire; in the form of wire.

Come down, come down, my bonny bird, . . .
Your cage shall be of *wiry* gould,
Whar now it's but the wand,
Lord William (Child's Ballads, III, 20).

For caught, and cag'd, and starv'd to death,
In dylog sighs my little breath
Soon pass'd the *wiry* grate.
Couper, On a Goldfinch Starved to Death in His Cage.

2. Resembling wire; especially, tough and flexible; of persons, lean and sinewy.

Here on its *wiry* stem, in rigid bloom,
Grows the salt lavender that lacks perfume.
Crabbe, Works, IV, 216.

A little *wiry* sergeant of meek demeanour and strong sense.
Dickens, Detective Police.

She was *wiry*, and strong, and nimble.
Trolope, Last Chronicle of Barset, xxxvii.

She had a light, trim, *wiry* figure, especially adapted to those feats of skill which depend on balance.
Whyte Melville, White Rose, II, viii.

Wiry pulse. See *pulse*.

wis¹, *a.* [*ME. wis*, certain, sure, for certain, *to wisse*, certainly, *mid wisse*, with certainty; = *leel. riss*, certain, = *Sw. riss*, certain (*riss*, certainly), = *Dan. ris*, certain (*rist*, certainly); in *AS. D.* and *G.* the word appears with a prefix, *AS. gewis* = *D. gewis* = *G. gewiss*, certain, certainly: see *wis²*, *wis³*, *iwis*.] Certain; sure; especially in the phrases *to wisse*, for certain, certainly; *mid wisse*, with certainty.

That wit thou *wisse*.
Legend of St. Catherine (ed. Morton), I, 1543.

wis², *adv.* [Early mod. E. (dial.) *wusse*; < *ME. wis*, by aphesis from *iwis*: see *iwis*.] Certainly; truly; indeed: same as *iwis*.

"No, *wis*," quod he, "myn owen nece dere."
Chaucer, Troilus, ii, 474.

Knowell. Why, I hope you will not a-hawking now, will you?
Stephen. No, *wusse*; but I'll practise aginst next year, unclé.
B. Jonson, Every Man in His Humour, i, 1.

wis³, *v.* A spurious word, arising from a misunderstanding of the Middle English adverb *wis*, often written *i-wis*, and in Middle English manuscripts *i wis*, *I wis*, whence it has been taken as the pronoun *I* with a verb *wis*, vaguely regarded as connected with *wit* (which has a preterit *wist*). See *iwis*, and, for the real verb, see *wit*!

Which book, advisedly read, and diligently followed but one year at home in England, would do a young gentleman more good, *I wis*, than three years' travell abroad.
Ascham, The Scholemaster, p. 65.

Where my morning haunts are he *wisess* not.
Milton, Apology for Smeectymnus.

wisard^t, *n. and a.* An obsolete spelling of *wizard*.

wisdom (wiz'dum), *n.* [*ME. wisdom*, *wysdom*, *wisedom*, < *AS. wísdóm*, *wísdóm* (= *OS. wísdóm* = *OFries. wísdóm* = *MD. wíjsdom* = *OHG. MHG. wístuom*, *wisdom*, knowledge, judgment, *G. weissthum*, knowledge, = *leel. wísdóm* = *Sw. Dan. rísdóm*, *wísdóm*), < *wis*, wise, + *dom*, condition: see *wis¹* and *-dom*.] 1. The property of being wise; the power or faculty of forming the fittest and truest judgment in any matter presented for consideration; a combination of discernment, discretion, and sagacity, or similar qualities and faculties, involving also a certain amount of knowledge, especially the knowledge of men and things gained by experience. It is often used in a sense nearly synonymous with *discretion*, or with *prudence*, but both of these are strictly only particular phases of wisdom. Frequently *wisdom* implies little more than sound and sober common-sense: hence it is often opposed to *folly*.

Than seide thei, be comen assent, thei wolde counseile with Meryn, that hadde grete *wisdom*.
Merlin (E. E. T. S.), i, 95.

The beste *wysdom* that I Can ys to doe well & drede no man.
Booke of Precedence (E. E. T. S.), extra ser., i, 68.

That which moveth God to work is goodness, and that which ordereth his work is *wisdom*, and that which perfecteth his work is power.
Hooker.

If you go on thus, you will kill yourself;
And 'tis not *wisdom* thus to second grief
Against yourself.
Shak., Much Ado, v, 1, 2.

When I arraigned the *wisdom* of Providence, I only showed my own ignorance.
Goldsmith, Asem.

If old age is even a state of suffering, it is a state of superior *wisdom*, in which man avoids all the rash and foolish things he does in his youth.
Sydney Smith, in Lady Holland, vi.

2. Human learning; knowledge of arts and sciences; erudition.

Moses was learned in all the *wisdom* of the Egyptians.
Acts vi, 22.

The Doctors laden with so many badges or cognisances of *wisdom*.
Foote (Arber's Eng. Garner, I, 105).

3. With possessive pronouns used as a personification (like "your highness," etc.).

Viola. I saw thee late at the Count Orsino's.
Clown. . . . I think I saw your *wisdom* there.
Shak., T. N., iii, 1, 47.

Do, my good fools, my honest pious coxcombs,
My wary fools too! have I caught your *wisdoms*?
Fletcher, Wife for a Month, iv, 1.

4. A wise saying or act; a wise thing.

They which do eate or drinke, hauyng those *wisdomes* euer in sighte, . . . may sussitate some disputation or reasonyng wherby some part of tyme shall be sawed whiche els . . . wolde be idely consumed.
Sir T. Elyot, The Governour, ii, 3.

One of her many *wisdoms*. *Mrs. H. Jackson*, Ramona, i.

5. Skill; skillfulness.

And I have filled him with the spirit of God, in *wisdom*, and in understanding, and in knowledge, and in all manner of workmanship.
Ex. xxxi, 3.

[In Scripture the word is sometimes specifically used, especially in Paul's Epistles, in an opprobrious sense to designate the theological speculations (1 Cor. i, 19, 20) or rhetorical arts (1 Cor. ii, 5) current among the Greeks and Romans in the first century; sometimes in a good sense to designate spiritual perception of, accompanied with obedience to, the divine law (Prov. iii, 13; Acts vi, 3). Sometimes (as in Prov. viii.) it has personal attributes assigned to it.]

Book of Wisdom of Jesus. See *Ecclesiasticus*.—**Book of Wisdom of Solomon**, one of the deutero-canonical books of the Old Testament. (See *deutero-canonical* and *Apocrypha*.) Tradition ascribes its authorship to Solomon; but by most modern Protestant theologians it is attributed to an Alexandrian Jew of the first or second century b. c. The shorter title *Wisdom*, or *Book of Wisdom*, is commonly applied to this book, but not to *Ecclesiasticus*. Abbreviated *Wisd.*—**Salt of wisdom**. Same as *ad alenbroth* (which see, under *ad*).—**Syn. 1.** Knowledge, *Prudence*, *Wisdom*, *Discretion*, *Providence*, *Forecast*, *Provision*. *Knowledge* has several steps, as the perception of facts, the accumulation of facts, and familiarity by experience, but it does not include action, nor the

power of judging what is best in ends to be pursued or in means for attaining those ends. *Prudence* is sometimes the power of judging what are the best means for attaining desired ends; it may be a word or action, or it may be simply the power to avoid danger. It implies deliberation and care, whether in acting or refraining from action. *Wisdom* chooses not only the best means but also the best ends; it is thus far higher than *prudence*, which may by choosing wrong ends go altogether astray; hence also it is often used in the Bible for piety. As compared with *knowledge*, it sees more deeply into the heart of things and more broadly and comprehensively sums up relations, draws conclusions, and acts upon them; hence a man may abound in *knowledge* and be very deficient in *wisdom*, or he may have a practical *wisdom* with a comparatively small stock of *knowledge*. *Discretion* is the power to judge critically what is correct and proper, sometimes without suggesting action, but more often in view of action proposed or possible. Like *prudence* the word implies great caution, and takes for granted that a man will not act contrary to what he knows. *Providence* looks much further ahead than *prudence* or *discretion*, and plans and acts according to what it sees. It may be remarked that *provision*, which is from the same root as *providence* and *prudence*, is primarily a word of action, while they are only secondarily so. *Forecast* is a grave word for looking carefully forward to the consequences of present situations and decisions; it implies, like all these words except *knowledge*, that one will act according to what he can make out of the future. See *cautious*, *astute*, and *genius*.

I wisdom dwell with prudence, and find out *knowledge* of witty inventions.
Prov. viii, 12.

Knowledge and *wisdom*, far from being one, have ofttimes no connexion. *Knowledge* dwells in heads replete with thoughts of other men; *Wisdom* in minds attentive to their own. *Knowledge*, a rude, unprofitable mass, The mere materials with which *Wisdom* builds, Till smooth'd, and squar'd, and fitted to its place, Does but encumber whom it seems t' enrich. *Knowledge* is proud that he has learn'd so much; *Wisdom* is humble that he knows no more.
Couper, Task, vi, 58.

Men of god *dyscretiyoune*
Suld excuse and loue *Huchowne*,
That cunning was in literature.
Wyntown, quoted in Destruction of Troy (E. E. T. S.), [Pref., p. xxv.

4. A disease in cattle, consisting in inflamma-
tion and supuration of the interdigital tissues,
most commonly of the hind feet. It may be due
to the irritation of dirt, to overgrowth of the hoof, or
other causes. Also called *foul in the foot*. Also *wisp*.

To cure a Bullock that hath the *Whisp* (that is lame be-
tween the Clees).

Aubrey, Misc., p. 138.

Buckle, Essays (Progress of Knowledge), p. 195.

Wistaria (wis-tā'ri-ä), *n.* [NL. (Nuttall, 1818),
named in honor of Caspar *Wistar*, an American
anatomist (1761-1818).] 1. A genus of legu-
minous plants, of the tribe *Galegeæ* and subtribe
Tephrosieæ. It is characterized by having papilion-
aceous flowers in terminal racemes, with a smooth style and
stamens usually completely diadelphous, and by a coria-
ceous readily dehiscent legume, the last character separ-
ating it from the large tropical Old World genus *Millettia*.
There are 2 or 3 species, natives of North America, China,
and Japan. They are lofty climbing shrubs with odd-pin-
nate leaves, entire feather-veined and reticulated leaflets,
and small stipules. The handsome purplish flowers form
terminal pendent racemes. They are much cultivated in
America, commonly under the generic name (sometimes
erroneously *Wisteria*); in England they are often known
as *kidney-bean tree*, in Australia as *grape flower vine*. *W.*
Chinensis, the Chinese, and *W. frutescens*, the American
wistaria, are much used in the United States to cover ver-
andas and walls. The latter is a native of swamp-margins
from Virginia to Illinois and southward, and develops its
flowers at the same time with the leaves, instead of before
them, as in *W. Chinensis*. *W. Japonica*, by some thought
not a distinct species, is commonly trained in Japan hori-
zontally on trellises over pleasure-seats as an ornamental
shade; it sometimes lives more than a century.
2. [*l. c.*] A plant of this genus.

wistful (wist'fūl), *a.* [Prob. for **wistful*, based
on the older adverb *wistly*, which is prob. for
whistly. The assumption that *wistful* stands for
wishful is untenable; for the required change
wishful > **wistful* > *wistful* could not occur in the
mod. E. period, particularly with *wishful* itself
remaining in use; but the sense 'longing' ap-
pears to have arisen in part from association
with *wishful*. It is to be noted that *wistful* in
the earliest instance quoted (Browne) does not
mean, as some dictionaries give it, merely 'ob-
servant' or 'attentive,' and that its later uses
are more or less indefinite, indicating that it
was orig. a poetical word, based on some other,
which other is prob. *wistly* for *whistly* as here

assumed.] 1. Silent; hushed; standing in mute
attention.

In sullen mutt'rings chid

The artlesse songsters, that their musicke still

Should charme the sweet dale and the *wistfull* hill.

W. Browne, Britannia's Pastorals, ii. 2.

This commanding creature . . . put on such a resig-
nation in her countenance, and bore the whispers of all
around the court with such a pretty uneasiness, . . . until
she was perfectly confused by meeting something so *wis-*
tful in all she encountered. *Steele*, Spectator, No. 113.

2. Full of thoughts; contemplative; musing;
pensive.

Why, Grubbinol, dost thou so *wistful* seem?

There's sorrow in thy look.

Gay, Shepherd's Week, Friday.

3. Wishful; longing.

Lifting up one of my sashes, [I] cast many a *wistful*, mel-
ancholy look towards the sea.

Swift, Gulliver's Travels, ii. 8.

No poet has expressed more vividly than Shelley the
wistful eagerness of the human spirit to interpret the
riddle of the universe. *E. Dowden*, Shelley, l. 75.

wistfully (wist'fūl-i), *adv.* In a wistful man-
ner; pensively; earnestly; longingly; wish-
fully.

With that, he fell again to pry

Through perspective more *wistfully*.

S. Butler, Hudibras, II. iii. 458.

The captive's miserable solace of gazing *wistfully* upon
the world from which he is excluded.

Ireing, Sketch-Book, p. 112.

Doubtless there is nothing sinful in gazing *wistfully* at
the marvellous providences of God's moral governance,
and wishing to understand them.

J. H. Newman, Parochial Sermons, i. 204.

wistfulness (wist'fūl-nes), *n.* The state or
property of being wistful.**wistless** (wist'les), *a.* [Irreg. *< wist*, known:
see *wit¹*. Cf. *wistful* and *-less*.] Not knowing;
ignorant (of); unwitting (of). [Rare.]

Wistless what I did, half from the sheath

Drew its glittering blade. *Southey*, Joan of Arc, l.

wistly! (wist'yī), *adv.* [Prob. for *whistly*, i. e.
'silently,' which sense suits the earliest quota-
tions (cf. "And her eyes on all my motions with a
mute observance hung," *Tennyson*, *Locksley
Hall*); the change of *hw* to *w* is very common
in England, and may well have been assisted in
this instance by association with *wist*, pret. of
wit, and with *wish*; but to derive *wistly* from
either *wist* or *wish* (as if for *wishedly*) is con-
trary to sound theory and to the actual use of
the word. *Wistly* in the "Mir. for Mags.," given
as the "same as *wistly*," may be truly *wistly*, *<*
wish + -ly². The same considerations apply to
wistful, which appears to stand for **whistful*.]
1. Silently; with mute attention; earnestly.

Robyn behelde our comly kynge

Wistly in the face.

Lytell Geste of Robyn Hode (Child's Ballads, V. 115).

Speaking it, he *wistly* look'd on me;

As who should say, "I would thou wert the man
That would divorce this terror from my heart."

Shak., Rich. II., v. 4. 7.

For I'll go turn my tub against the sun,

And *wistly* mark how higher planets run,

Contemplating their hidden motion.

Marston, Satires, v. 171.

Shak., Pericles, iv. 4. 31.

(The phrase to *wit* is now used chiefly to call attention to
some particular, or as introductory to a detailed state-
ment of what has been just before mentioned generally,
and is equivalent to 'namely,' 'that is to say': as, there
were three present—to *wit*, Mr. Brown, Mr. Green, and
Mr. Black.

In *Chiu*le was the order and manner in old days to

If a man is honest, it detracts nothing from his merits
to say he had the *wit* to see that honesty is the best policy.
E. Dicey, Victor Emmanuel, p. 112.

2. Mind; understanding; intellect; reason; in
the plural, the faculties or powers of the mind
or intellect; senses; as, to be out of one's *wits*;
he has all his *wits* about him.

So my *witte* wex and wanyed til I a fole wex,

That honestly yee mowe your own met kerve.
Babees Book (E. E. T. S.), p. 6.

What strength cannot do, man's *wit*—being the most
forcible engine—hath often effected.
Raleigh (Arber's Eng. Garner, I. 16).

5. Imagination; the imaginative faculty.
[Rare.]

'*Wit* in the poet . . . is no other than the faculty of imagi-
nation in the writer, which . . . searches over all the
memory for the species or ideas of those things which it
designs to represent.'
Dryden, Annus Mirabilis, To Sir R. Howard.

6. The keen perception and apt expression of
those connections between ideas which awaken
pleasure and especially amusement. See the
quotations and the synonyms.

True *wit* consists in the resemblance of ideas. . . . But
every resemblance of ideas is not what we call *wit*, and it
must be such an one that gives delight and surprise to the
reader. Where the likeness is obvious, it creates no sur-
prise, and is not *wit*. Thus, when a poet tells us that the
bosom of his mistress is as white as snow, there is no *wit*
in the comparison; but when he adds, with a sigh, it is as
cold too, it then grows into *wit*. *Addison*.

Wit lying most in the assemblage of ideas, and putting
those together with quickness and variety wherein can be
found any resemblance or congruity, thereby to make up
pleasant pictures and agreeable visions in the fancy.
Locke, Human Understanding, II. xi. 2.

In *wit*, if by *wit* be meant the power of perceiving ana-
logies between things which appear to have nothing in
common, he never had an equal. *Macaulay*, Bacon.

7†. Conceit; idea; thought; design; scheme;
plan.

To senden him into som fer contree
Ther as this Jasoun may destroyed be;
This was his *wit*. *Chaucer*, Good Women, l. 1420.

Was 'not a pretty *wit* of mine, master poet, to have had
him rode into Puckeridge with a horn before him?
Dekker and Webster, Northward Ho, v. 1.

At one's *wit*'s end. See *end*.—Kind *wit*. See *kind*.—
The five *wits*, the five senses; in general, the faculties of
the mind. The five wits have been fancifully enumerated
as common wit, imagination, fantasy, estimation, memory.

The deedly synnes that becu entred into thyn herte by
thy *five wittes*. *Chaucer*, Tale of Melibeus.

If thy *wits* run the wild-goose chase, I have done, for thou
hast more of the wild-goose in one of thy *wits* than . . .
I have in my whole *five*. *Shak.*, R. and J., ii. 4. 77, 78.

Alone and warming his *five wits*,
The white owl in the beltry sits.
Tennyson, The Owl.

To drive to one's *wit*'s end. See *drive*.—To have
one's *wits* in a creed. See *creed*.—To live by one's
wits, to live by temporary shifts or expedients, as one
without regular means of living.

Addison sent to beg Gay, who was then *living* by his
wits about town, to come to Holland House.
Macaulay, Addison.

6. *Syn. 6. Wit, Humor*. In writers down to the time of
Pope *wit* generally meant the serious kind of *wit*.

Serious *wit* is . . . neither more nor less than quick
wisdom. *Burnet*.

Look, he's winding up the watch of his *wit*; by and by
it will strike. *Shak.*, Tempest, ii. 1. 13.

In more recent use *wit* in the singular generally implies
comic *wit*; in that sense it is different from *humor*. One
principal difference is that *wit* always lies in some form
of words, while *humor* may be expressed by manner, as a
smile, a grimace, an attitude. Underlying this is the
fact, consistent with the original meaning of the words,
that *humor* goes more deeply into the nature of the
thought, while *wit* catches pleasing but occult or far-
fetched resemblances between things really unlike: a
good pun shows *wit*; Irving's "History of New York"
is a piece of sustained *humor*, the *humor* lying in the
portrayal of character, the nature of the incidents, etc.
Again, "Wit may, I think, be regarded as a purely in-
tellectual process, while *humor* is a sense of the ridicu-
lous controlled by feeling, and coexistent often with the
gentlest and deepest pathos" (*H. Reed*, Lects. on Eng.
Lit., xi. 357). Hence *humor* is always kind, while *wit*
may be unkind in the extreme: Swift's "Travels of Gulliver"
is much too severe a satire to be called a work of *humor*.
It is essential to the effect of *wit* that the form in which it
is expressed should be brief; *humor* may be heightened in
its effect by expansion into full forms of statement, de-
scription, etc. *Wit* more often than *humor* depends upon
passing circumstances for its effect.

The best and most agreeable specimen of English *humor*
(it is *humor* in contrast to *wit*) which belongs to that
period is Steele's invention, and Addison's use, of the
character of Sir Roger de Coverley. . . . The same species
of pure, genial, wise, and healthful *humor* has been sus-
tained in the incomparable "Vicar of Wakefield," and in
the writings of our countryman Washington Irving.
H. Reed, Lects. on Eng. Lit., xi. 369.

While *wit* is a purely intellectual thing, into every act
of the humorous mind there is an influx of the moral
nature; rays, direct or refracted, from the will and the
affections, from the disposition and the temperament, en-
ter into all *humor*; and thence it is that *humor* is of a
diffusive quality, pervading an entire course of thought;
while *wit*—because it has no existence apart from certain
logical relations of thought which are definitely assign-
able, and can be counted even—is always punctually con-
centrated within the circle of a few words. *De Quincey*.

Dr. Trusler says that *wit* relates to the matter, *humor*
to the manner; that our old comedies abounded with *wit*,
and our old actors with *humor*; that *humor* always ex-
cites laughter but *wit* does not; that a fellow of *humor*
will set a whole company in a roar, but that there is a
smartness in *wit* which cuts while it pleases. *Wit*, he
adds, always implies sense and abilities, while *humor*
does not; *humor* is chiefly relished by the vulgar, but
education is requisite to comprehend *wit*.
Fleming, Vocab. Philos.

It is no uncommon thing to hear "He has *humor* rather
than *wit*." Here the expression commonly means pleasur-
ful; for whoever has *humor* has *wit*, although it does not
follow that whoever has *wit* has *humor*. *Humor* is *wit*
appertaining to character, and indulges in breadth of
drollery rather than in play and brilliancy of point. *Wit*
vibrates and spirits; *humor* springs up exuberantly as
from a fountain and runs out. In Congreve you wonder
what he will say next; in Addison you repose on what is
said, listening with assured expectation of something con-
genial and pertinent. *Landon*.

Small room for Fancy's many chorded lyre,
For *Wit*'s bright rockets with their trains of fire.
O. W. Holmes, An After-Dinner Poem.

I am not speaking of the fun of the book [Don Quixote],
of which there is plenty, and sometimes boisterous enough,
but of that deeper and more delicate quality, suggestive
of remote analogies and essential incongruities, which
alone deserves the name of *humor*. *Lowell*, Don Quixote.

witan (wit'an), *n. pl.* [AS., pl. of *wita* (ME. *wite, wote, wete*), a man of knowledge, member of a council or parliament: see *wit²*.] In *Anglo-Saxon hist.*, members of the witenagemot.

As *witan* from every quarter of the land stood about his throne, men realized how the King of Wessex had risen into the King of England.
J. R. Green, Conq. of Eng., p. 215.

Thou art the mightiest wite in England, man;
 Thy voice will lead the *Witan*.
Tennyson, Harold, il. 2.

witch¹ (wich), *n.* [*< ME. wicche, wicche, wicche, wiche, a witch (man or woman), < AS. wicca, m., wicce, f. (pl. wicean in both genders), a sorcerer or sorceress, a wizard or witch, = Fries. wikke = LG. wikke, a witch; cf. Icel. vitki, m., a witch, wizard, prob. after AS.; prob. a reduction, with shortened vowel and assimilation of consonants (tg > tk > kk, in AS. written cc), of AS. wita, a synepointed form of wita, witega, a seer, prophet, soothsayer, magician (cf. *deaful-witga, 'devil prophet,' wizard*) (= OHG. wizago, wizago, a prophet, soothsayer), < *witig, seeing, a form parallel to wita (with short vowel), knowing, witan, know, *witan, see: see *wit¹*, and cf. *witty*. The notion that *witch* is a fem. form is usually accompanied by the notion that the corresponding masc. is *wizard* (the two words forming one of the pairs of masc. and fem. cor-relatives given in the grammars); but *witch* is historically masc. as well as fem. (being indeed orig., in the AS. form *witga*, only masc.), and *wizard* has no immediate relation to *witch*. Cf. *wiseacre*, ult. < OHG. wizago, and so a doublet of *witch*. Hence ult. (< AS. *wicca*) ME. *wikke, wicke, evil, wicked, and wikked, wikked*, wicked: see *wick¹* and *wikked¹*. The change of form (AS. *wicca* < *witga*) is paralleled by a similar change in *orchard* (AS. *orocard* < *orogard* < *ort-gard*), and the development of sense ('wicked,' 'wicked') is in keeping with the history of other words which have become ultimately associated with popular superstitions—superstition, whether religious or etymological, tending to pervert or distort the forms and meanings of words.] 1. A person (of either sex) given to the black art; a sorcerer; a conjurer; a wizard; later and more particularly, a woman supposed to have formed a compact with the devil or with evil spirits, and to be able by their aid to operate supernaturally; one who practises sorcery or enchantment; a sorceress.*

"Crucifige," quod a cacchepolle. "I wazante hym a wicche!"
Piers Plouman (B), xviii. 40.

There was a man in that citee, whos name was Symount, a wicche.
Wyclif, Acts viii. 9.

Devil or devil's dam, I'll conjure thee:
 Blood will I draw on thee; thou art a *witch*.
Shak., 1 Hen. VI., l. 5. 6.

When a Country-wench cannot get her Butter to come, she says, The *Witch* is in her Churn.
Selden, Table-Talk, p. 82.

2. An old, ugly, and crabbed or malignant woman; a hag; a crone: a term of abuse.

Foul wrinkled *witch*, what makest thou in my sight?
Shak., Rich. III., l. 3. 164.

3. A fascinating woman; a woman, especially a young woman or a girl, possessed of peculiar attractions, whether of beauty or of manners; a bewitching or charming young woman or girl. [Colloq.]—4. A charm or spell. [Rare.]

If a man but dally by her feet,
 He thinks it straight a *witch* to charm his daughter.
Greene, George-a-Greene, p. 262. (Davies.)

5. A petrel: doubtless so called from its incessant flight, often kept up in the dark.—6. A water-witch.—7. The pole, pole-dab, or Craig-fluke, a kind of flatfish.—**Black witch**. Same as *ans* (which see, with *cut*). *P. H. Gosse, (Jamaica.)*—**The riding of the witch**. See *riding¹*.—**White witch** or **wizard**, a witch or wizard of a beneficent or good-natured disposition.

Sorcerers are too common; cunning men, wizards, and white-witches, as they call them, in every village.
Burton, Anat. of Mel., p. 271.

And, like white witches, mischievously good.
Dryden, The Medal, l. 62.

Witches' Sabbath. See *Sabbath, 5.*—**Witch of Agneal**, in *math.* a plane curve discussed by Donna Maria Gaetana Agnesi, professor of mathematics in the University of Bologna, who died a nun in 1799. It consists of a straight

line together with a cubic to which that line is the inflectional asymptote, this cubic having an anode at infinity in a direction perpendicular to the line. If $x = 0$ is the equation of the line, $(y c)^2 + 1 = (c x)^2$ is that of the cubic. The area of the curve is four times that of the circle having four-point contact with the cubic and two-point contact with the line. Also called *versiera*.

witch¹ (wich), *v. t.* [*< ME. wicchen, wicchen, wichen, < AS. wiccian, bewitch; cf. D. LG. wicken = Icel. vitka, soothsay, divino; from the noun. Cf. bewitch.*] 1. To bewitch; fascinate; enchant.

Ne schuld he with wicchecraft be wicched neuer more.
William of Paterne (E. E. T. S.), l. 4427.

For she has given me poison in a kiss—
 She had it 'twixt her lips—and with her eyes
 She witches people.
Beau. and Fl., King and No King, iii. 1.

Thou hast witted me, rogue.
B. Jonson, Alchemist, il. 1.

2. To work by charms or witchcraft; effect, cause, or bring by or as by witchcraft.

Did not she *witch* the devil into my son-in-law, when he killed my poor daughter?
Ford and Dekker, Witch of Edmonton, v. 2.

And so in one evening Elery witted himself into the good graces of every one in the simple parsonage; and when Tina at last appeared she found him reigning king of the circle.
H. B. Stowe, Oldtown, p. 492.

All round, upon the river's slippery edge,
Witching to deeper calm the drowsy tide,
 Whispers and leans the breeze-entangling sedge.
Lowell, Indian-Summer Reverie.

witch² (wich), *n.* [Also, in comp., *wich, wych, weech*; < ME. *wicche*, < AS. *wice*, the sorb or service-tree; appar. applied to several trees with pendulous branches, < *wican* (pp. *wicean*), bend, yield: see *wcak*. witch-chick (wich'chik), *n.* A swallow: from an old superstition. See *swallow-struck*. Also *witchuck* and *witch-hag*.

witchcraft (wich'kráft), *n.* [*< ME. wiccheecraft, < AS. wiccecraft, wiccraft, witchcraft, < wicca, m., wicce, f., witch, + craft, craft: see witch¹ and craft¹.*] 1. The practices of witches; sorcery; a supernatural power which persons were formerly supposed to obtain by entering into compact with the devil. The belief in witchcraft was common in Europe till the sixteenth century, and maintained its ground with tolerable firmness till the middle of the seventeenth century; indeed it is not altogether extinct even at the present day. Numbers of reputed witches were formerly condemned to be burned. One conspicuous outbreak of popular excitement over supposed demoulcal manifestations took place about 1692 in New England, especially in and near Salem.

There was thane an Enchantour in the Contree, that deled with *Wyche craft*, that men clepen *Taknis*.
Mandeville, Travels, p. 132.

Now the arrival of Sir William Phips to the government of New-England was at a time when . . . scores of poor people had newly fallen under a prodigious possession of devils, which it was then generally thought had been by *witchcrafts* introduced. *C. Mather, Mag. Christ., il. 13.*

2. Extraordinary power; irresistible influence; fascination; witchery.

You have *witchcraft* in your lips, Kate.
Shak., Hen. V., v. 2. 301.

There's *witchcraft* in thy language, in thy face,
 In thy demeanours. *Ford, Lover's Melancholy, iv. 3.*

The subtle *witchcraft* of his tongue
 Unlocked the hearts of those who keep
 Gold, the world's bond of slavery.
Shelley, Rosalind and Helen.

witch-doctor (wich'dok'tor), *n.* Same as *medicine-man*. *Encyc. Brit., XIII. 820.*

witch-elm (wich'elm), *n.* [Also *wich-elm*, and archaically *wych-elm*; also *wecch-elm*; < *witch² + elm*. In this word and *witch-hazel*, the archaic spelling is most affected in modern use.] An elm, *Ulmus montana*, of hilly districts in western and northern Europe and northern Asia; the common wild elm of Scotland, Ireland, and the northern and western parts of England. It is less tall than the common English elm (*U. campestris*), but is a considerable tree, of picturesque habit, the trunk branching naturally near the base, the leaves broadly ovate. The wood has the fine-grained, tough, and elastic quality of *U. campestris*, and is preferred for bent work,

as in boat-building. In southeastern England a variety of the common elm is also called by this name.

The *witch-elm* that shades Saint Fillan's Spring.
Scott, L. of the I., l. 1. Int.

Witch-elms that counterchange the floor
 Of this flat lawn with dusk and bright.
Tennyson, In Memoriam, lxxxix.

witches'-broom (wich'ez-bröm), *n.* A popular name for the broom-like tufts of branches developed on the silver-fir, birch, cherry, and other trees in consequence of the attack of a uredineous fungus, *Peridermium clatinum*.

witches'-butter (wich'ez-but'er), *n.* An alga. See *Nostoc, 2*.

witches'-thimble (wich'ez-thim'bl), *n.* See *thimble* and *Silene*.

witchet (wich'et), *n.* [Origin obscure.] A rounding-plane.

witch-finder (wich'fin'dèr), *n.* A professional discoverer of witches, whose services were sometimes employed when the persecution of so-called witches was in vogue.

He [Matthew Hopkins] then set up as "*Witch Finder General*," and, on the invitation of several towns, made journeys for the discovery of witches through Essex, Suffolk, Norfolk, and Huntingdonshire. . . . Supposed witches were urged to confess, and on the strength of their own confession were hanged.
Dict. Nat. Biog., XXVII. 336.

witch-grass (wich'grás), *n.* 1. Same as *old-witch grass*.—2. The quitch-grass or couch-grass, *Agropyrum repens*.

witch-hag (wich'hag), *n.* Same as *witch-chick*.
witch-hazel (wich'ház'l), *n.* [Also *wich-hazel, wych-hazel*; < *witch² + hazel*. Cf. *witch-elm*.] 1. The witch- or wych-elm, *Ulmus montana*, its broad leaves resembling those of hazel. [Prov. Eng.]—2. A shrub or small tree, *Hamamelis Virginiana*, of eastern North America. It is noticeable for its flowers with four yellow strap-shaped petals, appearing when the leaves are falling, the fruit, which is a woody capsule, ripening the next season. The leaves

Branch with Fruits of Witch-hazel (*Hamamelis Virginiana*).
a, male flower; *b*, fruit.

are broad and straight-veined, wavy-margined. The leaves and bark of witch-hazel abound in tannin, and the bark affords also a reputed sedative application for various cases of external inflammation. The leaves are said to possess similar properties, and an infusion of them is given internally for bowel-complaints and hemorrhages. While witch-hazel is now much in vogue as a cure for bruises and sprains, as also for various internal difficulties, and is even officially recognized, its real virtue, if any, is still quite in doubt.

witching (wich'ing), *n.* [*< ME. wicching, wicching*; verbal *n.* of *witch¹, v.*] The practices of witches; enchantment.

witching (wich'ing), *p. a.* 1. Bewitching; suited to enchantment or witchcraft; weird.

'Tis now the very *witching* time of night,
 When churchyards yawn. *Shak., Hamlet, iii. 2. 406.*

2. Fascinating; enchanting.

witenagemot (wit'e-nā-ge-mōt'), *n.* [AS. *witena gemōt*, 'counselors' moot': *witena*, gen. pl. of *wita*, *wēota*, *gewita*, a man of knowledge, a counselor; *gemōt*, moot or meet, assembly, council, parliament: see *wit*² and *moot*¹.] In *Anglo-Saxon hist.*, the great national council or parliament, consisting of the king with his dependents and friends and sometimes the members of his family, the ealdormen, the bishops, and other ecclesiastics. This council, which met frequently, constituted the highest court of judicature in the kingdom. It was summoned by the king in any political emergency, and its concurrence was necessary in many important measures, such as the deciding of war, the levying of extraordinary taxes, grants of land in certain cases, election and (in many instances) deposition of kings.

The old Germanic tradition, which associated "the wise men" in royal action, gave a constitutional ground to the powers which the *Witenagemot* exercised more and more as English society took a more and more aristocratic form; and it thus came to share with the crown in the higher justice, in the imposition of taxes, the making of laws, the conclusion of treaties, the control of war, the disposal of public lands, the appointment of bishops and great officers of state. There were times when it claimed even to elect or depose a king.

J. R. Green, *Conq. of Eng.*, p. 216.

witerlicher, witerliit, *adv.* See *witferly*.

witfish (wit'fish), *n.* Same as *whitfish*.

wold¹ (wōld), *n.* [Formerly also *wōld*; also dial. *old*; < *ME.* *wold*, *wald*, < *AS.* *wæald*, *wald*, a wood, forest, = *OS.* *OFries.* *wald* = *D.* *wouald* = *OHG.* *wald*, *MHG.* *walt*, *G.* *wald*, a wood, forest (> *OF.* *gaut*, brushwood?), = *Icecl.* *völlr* (gen. *vallar* for **valdar*), a field, plain; perhaps orig. a hunting-ground, considered as 'a possession,' and so connected with *AS.* *geweald* (= *G.* *gewalt* = *Icecl.* *wald*), power, dominion, < *wæaldan*, etc., rule, possess: see *wield*. Cf. *Gr.* *ἀλωος* (for **Fαλτωος*), a grove. Cf. *wæald*.] An open tract of country; a down. The wolds of Yorkshire and Lincolnshire are high, rolling districts bare of woods, and exactly similar, both topographically and geologically, to the downs of the more southern parts of England. The Cotswold Hills, in Gloucestershire, closely resemble the downs of Kent and Sussex and the wolds of Yorkshire and Lincolnshire in every respect except the geological age of the formations by which they are underlain, which, in the case of the Cotswolds, is a calcareous rock of Jurassic, and not of Cretaceous age, as is the case with the other-mentioned wolds and downs.

Who sees not a great difference betwixt . . . the *Wolds* in Lincolnshire and the Fens? *Barton*, *Anat. of Mel.*, p. 259.

wolf (wūlf), *n.*; pl. *wolves* (wūlvz). [*ME.* *wolf*, *wulf*, *wlfe* (pl. *wolves*, *wulves*, *wolces*, *wulfes*), < *AS.* *wulf* (pl. *wulfas*) = *OS.* *wulf* = *OFries.* *wolf* = *D.* *wolf* = *MLG.* *wulf* = *OHG.* *MHG.* *G.* *wolf* = *Icecl.* *úlfr* (for **vulfr*) = *Sw.* *ulf* = *Dan.* *ulv* = *Goth.* *wulfs* = *OBulg.* *vŭlkŭ* = *Russ.* *vŭlkŭ* = *Lith.* *wilkas* = *L.* *lupus* (> *It.* *lupo* = *Sp.* *lupo* = *F.* *loup*) = *Gr.* *λύκος* = *Skt.* *vrika*, a wolf; orig. type prob. **walka*, **warka*, altered variously into **wlaka* (*Gr.* *λύκος*), **wlapa* (*L.* *lupus*), **walpa* (*AS.* *wulf*, etc.), orig. 'tearer, render,' < *√ wark*, *Skt.* *√ vragech*, tear, *Gr.* *ἐλκεν*, pull. *L.* *vulpes*, fox, is prob. not connected. *Wolf*, as a complimentary term for a warrior, is a constituent of many E. and G. names, as in *Adolph*, 'noble-wolf,' *Rudolph*, 'glory-wolf,' etc. Cf. *werwolf*, *lupine*¹, *lycanthropy*, etc.] 1. A digitigrade carnivorous canine quadruped, *Canis lupus*, of the lupine or thooid series of *Canidae*; hence, some similar animal. The common wolf of Europe, etc., is yellowish or fulvous-gray, with harsh strong hair, erect pointed ears, and the tail straight or nearly so. The height at the shoulder is from 27 to 29 inches. Wolves are swift of foot, crafty, and rapacious, and destructive enemies to the sheep-cote and farm-yard; they associate in packs to hunt the larger quadrupeds, as the deer, the elk, etc. When hard pressed with hunger these packs not infrequently attack isolated travelers, and have been known even to enter villages and carry off children. In general, however, wolves are cowardly and stealthy, approaching sheepfolds and farm-buildings only at dead of night, making a rapid retreat if in the least dis-

turbed by a dog or a man, and exhibiting great cunning in the avoidance of traps. Wolves are still numerous in some parts of Europe, as France, Hungary, Spain, Turkey, and Russia; they probably ceased to exist in England about the end of the fifteenth century, and in Scotland in the first part of the eighteenth century; the latter date probably marks also the disappearance of wolves in Ireland. The wolves of North America are of two very distinct species. One of these is scarcely different from the European, but is generally regarded as a variety, under the name of *C. l. occidentalis*. The usual color is a grizzled gray, but it sports in many colors, as reddish and blackish. Most strains of the American wolf are larger and stouter than those of Europe. The gray wolf is also called the *buffalo-wolf*, from its former abundance in the buffalo-range, and *timber-wolf*, as distinguished from the prairie-wolf or coyote, *Canis latrans*, a much smaller and very different animal, which lives chiefly in open country, in burrows in the ground, and in some respects resembles the jackal. (See *coyote*, with *cut.*) Yet other wolves, of rather numerous species, inhabit most parts of the world; some grade into jackals (see *Thous*), others toward foxes (see *fox-wolf*); and most of them interbreed easily with some varieties of the dog of the countries they respectively inhabit, the dog itself being a composite of a mixed wolf ancestry (see *wolf-dog*, 2).

2. A person noted for ravenousness, cruelty, cunning, or the like: used in opprobrium.

Rescued in Orleans from the English *wolves*.
Shak., 1 *Iten*. VI. (ed. Knight), l. 6. 2.

3. In *entom.*: (a) A small naked caterpillar, the larva of *Tinea granella*, the wolf-moth, which infests granaries. (b) The larva of a bot-fly; a warble.—4. A tuberculous excrescence which rapidly eats away the flesh. See *lupus*¹, 3.

A tree that cureth the *wolve* with the shalings of the wood groweth in these parts. *Takluyt's Voyages*, l. 364.

If God should send a cancer upon thy face, or a *wolf* into thy side, if he should spread a crust of leprosy upon thy skin, what wouldst thou give to be but as now thou art?
Jer. Taylor, *Holy Living*, ii. 6.

5. In *music*: (a) The harsh discord heard in certain chords of keyboard-instruments, especially the organ, when tuned on some system of unequal temperament. In the mean-tone system, as usually applied, five intervals in each octave were discordant—namely, G²-E³, B-E³, F²-B³, C²-F³, and G²-C³. Under the modern system of equal temperament, the wolf is evenly distributed, and so practically unnoticed. (b) A chord or interval in which such a discord appears. (c) In instruments of the viol class, a discordant or false vibration in a string when stopped at a certain point, usually due to a defect in the structure or adjustment of the

instrument. Sometimes called *wolf-note*.—6.

A wooden fence placed across a ditch in the corner of a field, to prevent cattle from straying into another field by means of the ditch.

Halliwell. [Local, Eng.]—7. Same as *willow*².

See *strand-wolf*.—Tasmanian wolf, a marsupial of Tasmania, the thylacine dasyure, *Thylacinus cynocephalus*; same as *zebra-wolf*. See *cut* under *thylacine*.—To cry wolf, to raise a false alarm: in allusion to the shepherd boy in a well-known fable.—To have a wolf by the ears, to have a difficult task.

He found himself so intrigued that it was like a *wolf* by the ears; he could neither hold it nor let it go; and, for certain, it bit him at last.

Roger North, *Lord Guilford*, II. 2. (*Davies*.)

To have a wolf in the stomach, to eat ravenously. *Halliwell*.—To keep the wolf from the door, to keep out hunger or want.—To see a wolf, to lose one's voice: in allusion to the belief of the ancients (see *Virgil*, *Eel*. ix.) that if a man saw a wolf before the wolf saw him he lost his voice, at least for a time.

"What! are you mute?" I said—a waggish guest,
"Perhaps she's seen a *wolf*," rejoined in jest.

Fawkes, *tr.* of *Idylliums* of Theocritus, xv.

"Our young companion has seen a *wolf*," said Lady Hameline, alluding to an ancient superstition, "and has lost his tongue in consequence."

Scott, *Quentin Durward*, xviii.

wolfberry (wūlf'ber'i), *n.*; pl. *wolfberries* (-iz). A shrub, *Symphoricarpos occidentalis*, of northern North America, in the United States ranging from Michigan and Illinois to the Rocky Mountains. It is sometimes cultivated for ornament, mainly on account of its white berries, which are borne in axillary and terminal spikes.

wolf-dog (wūlf'dog), *n.* 1. A large stout dog of no particular variety, kept to guard sheep, cattle, etc., and destroy wolves.—2. A dog bred, or supposed to be bred, between a dog and a wolf. Such hybrids are of constant occurrence among the dogs kept by North American Indians; and instances of the reversion of the dog to the feral state in western North America are recorded.

wolf-eel (wūlf'ēl), *n.* The wolf-fish.

Wolfenbüttel fragments. See *fragment*.

wolfer (wūlf'ēr), *n.* [*cut* *wolf* + *-er*¹.] One who hunts wolves; a professional wolf-killer.

Wolfia (wūlf'i-ä), *n.* [*NL.* (Horkel, 1839), named after N. M. von Wolff (1724-84), a German physician.] A genus of monocotyledonous plants, of the order *Lemnaceae*, distinguished from *Lemna*, the other genus, by one-celled anthers and by the absence of roots. The 12 species are chiefly tropical, occurring in Europe, India, Africa, and America, and extending north into the United States; they are commonly globose, sometimes conical or flattish, with a proliferous base, and produce minute flowers from chinks in the surface, each flower consisting of a single stamen or ovary without any spathe or other envelop. They are known, like *Lemna*, as *duckweed*, and are remarkable for their almost microscopic size, being esteemed the smallest of flowering plants.

Wolfian¹ (wūlf'i-an), *a.* Same as *Wolfian*¹.

Wolfian² (wūlf'i-an), *a.* [*K. F. Wolff* (see *def.*) + *-ian*.] Of or pertaining to K. F. Wolff (1733-94), a German anatomist and physiologist; in *anat.*, *physiol.*, and *zool.*, noting certain structures of vertebrate animals.—**Wolfian bodies**, the primordial kidneys or renal organs in all vertebrates, excepting probably the lancelets; the so-called false kidneys, in all the higher vertebrates (*Mammalia* and *Saurapsida*) preceding and performing the functions of true kidneys until replaced by the latter, but among *Ichthyopsida*, as fishes, persisting and constituting the permanent renal organs.—**Wolfian ducts**. See *ductus Wolffii*, under *ductus*.

wolf-fish (wūlf'fish), *n.* A teleostean acanthopterygian fish, *Anarrhichas lupus*: so called from its ferocious aspect and habits. It is found around the coasts of Great Britain, where it attains a length of 6 or 7 feet, but in southern seas it is said to reach a much greater size. The mouth is armed with strong sharp teeth, the inner series forming blunt grind-

ers adapted for crushing the mollusks and crustaceans on which it feeds. The ventral fins are absent; the color is brownish-gray, spotted and striped with brown over the upper parts, while the belly is white. The flesh is palatable, and is largely eaten in Iceland, while the skin is durable, and is manufactured into a kind of shagreen. When taken in a net it attacks its captors ferociously, and unless stunned by a blow on the head is capable of doing great damage with its powerful teeth. Also called *sea-cat*, *catfish*, *wolf-eel*, and *sea-wolf*. See cut under *Anarrhichas*.

Wolfian¹ (wŭl'fī-an), *a.* [*<* C. Wolff (see def.) + *-ian*.] Pertaining to the philosophy of Christian Wolff (1679-1754), which is Leibnitzianism diluted with common sense and dressed as a modified scholasticism, more systematic and more Euclidean than that of the middle ages. Though not profound, Wolff's philosophy met the wants of Germany, which it dominated for about fifty years, beginning with 1724. Also *Wolfian*.

Wolfian² (wŭl'fī-an), *a.* [*<* F. A. Wolf (see def.) + *-ian*.] Pertaining to or promulgated by F. A. Wolf, a German philologist (1759-1824).—**Wolfian theory**, a theory put forward by Wolf in his "Prolegomena" in 1795, to the effect that the Iliad and Odyssey cannot be the works of one man, Homer, because writing was unknown at the time that these poems are said to have been composed. He supposes, therefore, that the Iliad and Odyssey consist of ballads or episodes, the work of different men, collected and arranged in a more or less consistent and homogeneous whole in the sixth century B. C. The ballads could have been preserved by the recitation of strolling minstrels.

Wolfianism (wŭl'fī-an-iz-m), *n.* [*<* *Wolfian*¹ + *-ism*.] The system of Wolfian philosophy. See *Wolfian*¹.

wolfing (wŭl'fing), *n.* [Verbal *n.* of *wolf*, *v.*] The occupation or industry of taking wolves for their pelts. Wolfing is extensively practised in winter in some parts of the United States, as Montana and the Dakotas. The wolves are destroyed chiefly by poisoning with atryehnine.

wolfish (wŭl'fish), *a.* [Formerly also *wolrsh*; *<* *wolf* + *-ish*¹.] 1. Like a wolf; having the qualities or traits of a wolf; savage; ravening: as, a *wolfish* visage; *wolfish* designs.

Thy desires
Are *wolfish*, bloody, starved, and ravenous.
Shak., *M. of V.*, iv. 1. 138.

Bane to thy *wolfish* nature! *B. Jonson*, *Volpone*, v. 8.
Good master, let it warn you; though we have hitherto
pass'd by these man-Tygers, these *wolfish* Outlaws safely,
early and late, as not worth their malice.

Brome, *Queen's Exchange*, ii.

2. Hungry as a wolf is supposed to be; ravenous. [*Colloq.*]

wolfishly (wŭl'fish-li), *adv.* In a wolfish manner.
wolfkin (wŭl'fīn), *n.* [*<* *wolf* + *-kin*.] A young or small wolf.

"Was this your instructions, *wolfkin*?" (for she called
me lambkin). *Richardson*, *Pamela*, I. 144.
Kite and kestrel, wolf and *wolfkin*.

Tennyson, *Boadicea*.

wolfing (wŭl'fing), *n.* [*<* *wolf* + *-ing*¹.] A young wolf; a wolfkin.

Young children were thrown in, their mothers vainly
pleading: "Wolfings," answered the Company of Marat,
"who would grow to be wolves."

Carlyle, *French Rev.*, III. v. 3.

wolf-moth (wŭl'fōth), *n.* A cosmopolitan grain-pest, *Tinea granella*, a small creamy-white moth with brown spots on the wings, whose small white larvæ infest stored grain. See *wolf*, *n.*, 3 (*a*), and cut under *corn-moth*.

wolf-net (wŭl'fnet), *n.* A kind of net used in fishing, by means of which great numbers of fish are taken.

wolf-note (wŭl'fōt), *n.* Same as *wolf*, 5 (*c*).

wolf-ram (wŭl'fām), *n.* [*G. wolfram*, given as *<* "wolf, wolf, + ram, rahm, froth, cream, soot."]

1. A native tungstate of iron and manganese. Its color is generally a brownish or grayish black, and it has a reddish-brown streak. The specific gravity (7.2 to 7.5) is nearly equal to that of metallic iron. It occurs crystallized, also massive with lamellar structure: it is the ore from which the metal tungsten is usually obtained, and is often found associated with tinstone. Also called *wolf-ramite*.

2. The metal tungsten or wolframium: an improper and now uncommon use.—**Wolframoher**. Same as *tungstate*.

wolframate (wŭl'fā-māt), *n.* Same as *tungstate*.

wolframic (wŭl'fām'ik), *a.* Of or pertaining to tungsten.

wolframium (wŭl'fām-i-um), *n.* Same as *tungsten*, the chemical symbol of which is W, from this word.

wolfrobe (wŭl'fōb), *n.* The skin or pelt of a wolf made into a robe for use in carriages, etc.

wolf's-bane (wŭl'f's-bān), *n.* [*<* *wolf*'s, poss. of *wolf*, + *bane*¹.] A plant of the genus *Aconitum*; aconite or monk's-hood; specifically, *A. lycocotum*, the yellow or yellow-flowered wolf's-bane, also called *badger's*-, *bear's*-, or *hare's-bane*. It is found widely in Europe, especially in moun-

tains. Its greenish-yellow flowers have the hood developed like an extinguisher; its poison is less virulent than that of other species.—**Mountain wolf's-bane**. See *Ranunculus*.

wolfsbergite (wŭl'f's-bērg-it), *n.* [Named from *Wolfsberg*, in the Harz.] Same as *chalcostibite*.

wolf-scalp (wŭl'f'skalp), *n.* The skin of a wolf's head, or a piece of it sufficient for identification, exhibited to claim the bounty paid for the killing of a wolf in some parts of the United States.

wolf's-claws (wŭl'f's'klāz), *n.* The common club-moss, *Lycopodium clavatum*: so called from the claw-like ends of the prostrate branches.

wolverene, **wolverine** (wŭl've-rēn'), *n.* [Formerly also *wolereen*, *wolceerene*, *wolceerin*, *wolvering*; appar. a French-Canadian name based on E. *wolf*.] The American glutton, or carcajou, *Gulo luscus* (specifically identical with the glutton of the Old World), a subplantigrade carnivorous mammal of the family *Mustelidae*, inhabiting British America and northerly or mountainous regions of the United States. It is 2 or 3 feet long, of thick set form, with short, stout legs, low ears, subplantigrade feet, bushy tail and shaggy pelage of

Wolverene or Carcajou (*Gulo luscus*).

blackish color, with a lighter band of color on each side meeting its fellow upon the rump. The animal is noted for its voracity, ferocity, and sagacity. In the fur countries, where the wolverene is numerous, it is one of the most serious obstacles with which the trapper has to contend, as it soon learns to spring the traps set for ermine and sable, and devour the bait without getting caught, being itself too wary to be trapped without great difficulty. In these regions, also, caches of provisions must be constructed with special precautions against their discovery and spoliation by wolverenes. The pelt is valuable, and is much used for robes and mats, in which the whitish or light-brown areas of the fur present a set of oval or horse-shoe-shaped figures when several skins are sewed together. From its comparatively large and very stout form, together with its special coloration, the wolverene is sometimes called *skunk-bear*.—**The Wolverine State**, Michigan.

woman (wŭm'an), *n.*; pl. *women* (wim'en). [*<* ME. *woman*, *wuman*, *womman*, *wumman*, *wummon*, altered (with the common change of *wi-* to *wu-*, often spelled *wo-*) from *wimman*, *wimmon*, which stand (with assimilation of *fm* to *mm*) for the earlier *wifman*, *wifnon*, *wyffman* (pl. *women*, **wumen*, *wommen*, *wummen*, *wimnen*, earlier *wifmen*, *wyffmen*), *<* AS. *wifman*, *wifnon*, later *wimman* (pl. *wifmen*, later *wimnen*), a woman, lit. 'wife-man,' i. e. female person, *<* *wif*, a woman, female, + *man*, man, person (masc., but used, like L. *homo* and Gr. *ἄνθρωπος*, in the general sense 'person, human being'). The compound *wifman* is peculiar to AS., but a similar formation appears in the G. *weibsperson*. It is notable that it was thought necessary to join *wif*, a neuter noun, representing a female person, to *man*, a masc. noun representing either a male or female person, to form a word denoting a female person exclusively. The assimilation of *fm* to *mm* occurs likewise in *leman*, formerly and more prop. spelled *lemman*, and in *Lammas*. The change of initial *wi-* to *wu-* occurs also in AS. *widu* > *wudu* > E. *wood*¹, and the spelling of *wu-* as *wo-* or *woo-* to avoid the eumulation of *u*'s or *v*'s (*wu-*, *nu-*, *vu-*) occurs in *wood*¹, *wool*, etc. The difference of pronunciation between the singular *woman* and the plural *women*, though it has come to distinguish the singular from the plural, is entirely accidental; formerly both pronunciations of the first syllable were in use in both numbers. The proper modern spelling of the plural, as now pronounced, would be *wimnen*; the spelling *women* is due to irreg. conformity to the singular *woman*, which is properly so spelled according to the analogy of *wolf*, though **wooman*, like **woolf*, would be better, as being then in keeping with *wool*, *wood*¹.] 1. An adult female of the human race; figuratively, the female sex; human females collectively. See *lady*, 5.

Leode [men] nere thar nane,

Bacon, *Physical Fables*, iv., Expl.

Bless me! Charles, you consume more tea than all my
family, though we are seven in the parlour, and as much
sugar and butter — he! it's no *wonder* you are bilious!
Thackeray, *Love of the Widower*, ii.

2. That emotion which is excited by novelty, or the presentation to the sight or mind of something new, unusual, strange, great, extraordinary, not well understood, or that arrests the attention by its novelty, grandeur, or inexplicableness. *Wonder* expresses less than *astonishment*, and much less than *amazement*. It differs from *admiration* in not being necessarily accompanied with love, esteem, or approbation. But *wonder* sometimes is nearly allied to *astonishment*, and the exact extent of the meaning of such words can hardly be graduated.

They were filled with *wonder* and amzeiment.
Acts iii. 10.

O, how her eyes dart *wonder* on my heart!
Mount bloude, soule to my lips, taste Hebe's cup;
Stande firme on deeke, when besuties close-fight's up.
Marston, Antonio and Mellida, I., l. 1.

Wonder is the effect of novelty upon ignorance.
Johnson.

The faculty of *wonder* is not defunct, but is only getting
more and more emancipated from the unnatural service
of terror, and restored to its proper function as a minister
of delight.
Lowell, Among my Books, 1st ser., p. 149.

3. A cruller. [New Eng.]

A plate of crullers or *wonders*, as a sort of sweet fried
cake was commonly called.
H. B. Stowe, *The Minister's Wooing*, iv.

Bird of wonder, the phenix.—**Nine days' wonder**, a
subject of astonishment and gossip for a short time, gener-
ally a petty scandal.

For when men han wel cryed, than wol they roune,
Ek *wonder* last but *nine nyght* (var. *days*) nevere in tounne.
Chaucer, *Troilus*, iv. 588.

So ran the tale like fire about the court,
Fire in dry stubble a *nine days' wonder* flared.
Tennyson, *Lancelot and Elaine*.

Seven wonders of the world, the seven most remarkable
structures of ancient times. These were the Egyptian
pyramids, the mausoleum erected by Artemisia at Halicarnassus,
the temple of Artemis at Ephesus, the walls and
hanging gardens of Babylon, the colossus at Rhodes, the
statue of Zeus by Phidias in the great temple at Olympia,
and the Pharos or lighthouse at Alexandria.—**Wonder-
making Parliament**. Same as *Merciless Parliament*
(which see, under *parliament*). = *Syn.* 1. Sign, marvel,
phenomenon, spectacle, rarity.—2. Surprise, bewilderment. See def. 2.

wonder (wun'dér), *v.* [< ME. *wondren*, *wondrien*, *wundren*, < AS. *wundrian* = D. *wonderen* = MLG. *wunderen* = OHG. *wuntarön*, MHG. G. *wundern* = Icel. Sw. *undra* = Dan. *undre*, wonder; from the noun.] **I. intrans.** 1. To be affected with wonder or surprise; marvel; be amazed: formerly with a reflexive dative.

Ac me *wondreth* in my witt whi that thei ne preche
As Paul the apostel prechede to the people ofte.

Who is he that hideth counsel without knowledge? therefore have I uttered that I understood not; things too wonderful for me, which I knew not. Job xlii. 3.

Keep a gamester from the dice, and a good student from his book, and it is *wonderful*.
Shak., *M. W. of W.*, iii. 1. 39.

They also shewed him some of the engines with which some of his servants had done *wonderful* things.
Bunyan, *Pilgrim's Progress*, I.

Wonderful Parliament. Same as *Merciless Parliament* (which see, under *parliament*). = *Syn.* *Wonderful*, *Strange*, *Surprising*, *Curious*, *Unique*, extraordinary, marvelous, amazing, startling, wondrous (poetic). *Wonderful* generally refers to something above the common, and so marvelous, perhaps almost incredible. *Strange* refers rather to something beside the common — that is, simply very unusual or odd, and so exciting surprise or wonder. Anything that excites awe or high admiration, or strikes one as sublime, is *wonderful*; an unpleasant object may be *strange*, but would not be called *wonderful*. That which is unexpected is *surprising*; but it is not necessarily *strange*: as, a *surprising* fact; a *surprising* discovery in science. *Curious* is *wonderful* on a small scale; by its derivation it often refers to an object extremely nice and intricate or elaborate in its details, but also it often conveys the notion of pleasing strangeness and even of rarity: as, a *curious* bit of mosaic; a *curious* piece of mechanism; a *curiously* colored stone. *Unique* expresses that which is sole of its kind or quality: as, a *unique* book; a *unique* sort of person. See *eccentric* and *surprise*.

wonderful (wun'dér-fül), *adv.* [< ME. *wonderfull*; < *wonderful*, *a.*] Wonderfully; exceedingly; very. [Obsolete or vulgar.]

Alas! she comyth *wonderfull* lyghtly;
Man seith not the hour ne hou he shall dy.
Rom. of Partenay (E. E. T. S.), l. 6159.

Chymistry, I know by a little Experience, is *wonderful* pleasing.
Howell, *Letters*, i. vi. 41.

wonderfully (wun'dér-fül-i), *adv.* [< ME. *wonderfully*; < *wonderful* + *-ly*².] 1. In a wonderful manner; in a manner to excite wonder or surprise; surprisingly; strangely; remarkably: in colloquial language often nearly or quite equivalent to 'very': as, *wonderfully* little difference.

ze schal se him rise vp and speke, and *wonderfully* be comfortid and strekthid thereby.
Book of Quinte Essence (ed. Furnival), p. 15.

I will praise thee; for I am fearfully and *wonderfully* made.
Ps. cxxxix. 14.

2. With wonder or admiration.

woo² (wō), n. A Scotch form of wood.

woo³†, n. and a. An old spelling of woc.

wood¹ (wūd), n. [*< ME. wode, wude, wod* (pl. *wodes, wudes*), *< AS. wudu*, orig. *widu*, a wood, a tree, wood, timber, = MD. MLG. *wede*, a wood, wood, = OHG. *witu*, MLG. *wite*, wood, = Icel. *vithr* = Sw. Dan. *ved*, a tree, wood; akin to (according to some, derived from) the Celtic words OIr. *ful*, Ir. *fiadh*, a wood, tree (*fiaduis*, shrubbery, underwood), = Gael. *fiadh*, a wilderness, wood, timber (*fiadhach*, shrubs), = W. *gwydd*, trees (*gwyddeli*, bushes, brakes).] 1. A large and thick collection of growing trees; a forest: often in the plural, with the same force as the singular.

From Ebron Men gon to Bethelam in half a day; for it is but 5 Myle; and it is fulle fayre Weye, be Pleynes and Wodes fulle delectable. *Maunderley*, Travels, p. 69.

Light thickens, and the crow
Makes wing to the rooky wood.
Shak., Macbeth, iii. 2. 51.

There is a pleasure in the pathless woods.
Byron, Child Harold, iv. 178.

2. The substance of trees; the hard fibrous substance which composes the body of a tree and its branches, and which lies between the pith and the bark. In dicotyledonous plants the wood is composed externally of the alburnum or sap-wood, and internally of the duramen or hard wood. In monocotyledonous plants, or endogens, the hardest part of the wood is nearest the circumference, while the interior is composed of cellular tissue.

3. Timber; the trunks or main stems of trees which attain such dimensions as to be fit for architectural and other purposes. In this sense the word implies not only standing trees suitable for buildings, etc., but also such trees cut into beams, rafters, boards, planks, etc. See *timber* 1.

4. Firewood; cordwood.

To-morrow morning bedding and a gown shall be sent in, and wood and coal.

Dekker and Webster, Northward Ho, iv. 4.

5. The cask, keg, or barrel, as distinguished from the bottle: as, wine drawn from the wood.

Ordinary clarets from the wood 4s. to 6s. per gallon; good bottled clarets from 3s. or 4s. to 10s. a bottle.

Ashton, Social Life in Reign of Queen Anne, I. 199.

6. The grain of wood.

Rightlike smol[othed] and wrought as it should, not our-
[t]whartle, and against the wood.
Ascham, The Scholemaster, p. 35.

7. In *her.*, three or four trees grouped together, usually represented as rooted in a mound, which is vert, unless otherwise blazoned. Also called *hurst*.—8. In *printing*, a wood-block, or wood-blocks collectively, as distinguished from a metallic type or plate of any kind: as, cuts printed from the wood.—9. In *music*, the wooden wind-instruments of an orchestra taken collectively. See *wind*², n., 5, *wind-instrument*, and *instrument*, 3 (b). Also called *wood wind*.—10†. Figuratively, a crowd, mass, or collection.

And though my buckler bare a wood of darts,
Yet left not I, but with audacious face
I bravely fought.

T. Hudson, tr. of Du Bartas's Judith, v.

Names of Tribulation, Persecution,
Restraint, Long-patience, and such like, affected
By the whole family or wood of you.

B. Jonson, Alchemist, iii. 2.

Wood is used to signify any miscellaneous collection, or stock of materials, hence some poets intitle their miscellaneous works *silvarum libri*; and our poet [Ben Jonson], conforming to this practice, calls his *The Forest*.

Upton, quoted in note to "The Alchemist."

Agal or agila wood. See *agalochum*.—Agatized wood. See *agatize* and *silicify*.—Aloes wood. See *agalochum*.—Amboyana wood. See *kiabocca-wood*.—Artificial wood, a composition made of paper, paper-pulp, glue, sawdust, hemp, albumen, metallic oxides, drying-oils, sulphur, caoutchouc, gutta-percha, mineral salts, etc. When warm or wet, according to the nature of the particular composition, it is plastic, but in cooling or drying it hardens and acquires properties similar to those of wood.—Brauna wood. See *brauna*.—Brazil wood, *braziletto* wood. See *brazil*, *braziletto*.—Castor wood, a name of *Magnolia glauca*.—Caviuna wood, a palisander wood obtained in Brazil from *Dalbergia nigra* and perhaps some other trees.—Champ wood, the wood of the champ and the chaupak.—Cock of the woods, the capereaille (which see, with cut).—Commissioners of Woods and Forests, a department of the British Government, called more fully the Board of Commissioners of Woods, Forests, Land-revenues, Works, and Buildings, established by 2 and 3 Wm. IV., c. 1. By 14 and 15 Vict., c. 42, it is di-

vided into a Board of Commissioners of Woods, Forests, and Land-revenues, and a Board of Commissioners of Works and Public Buildings. The former have the management of the crown woods and forests, and land-revenues; the latter have the management of the public works and buildings, to which has been added, by later acts, the care of the royal parks, etc. *Encyc. Diet.*—Coramandel wood. Same as *calamander-wood*.—Cuba wood. Same as *justic*.—Curana wood, the wood of *Icica altissima*. See *Icica*.—Feast of wood-carrying, one of the annual festivals of the ancient Jews, instituted after the Babylonish captivity. It obtained its name from the practice of the people's bringing wood to the temple on the day of its celebration for the burning of the sacrifices.—Fossil wood. (a) Wood in a fossil state—that is, wood in a state of nature that has undergone various preservative processes and has become fossil. Popularly the term is usually applied to silicified wood—that is, wood in which the substance has been replaced, atom by atom, by silica in such a manner as to retain the exact form and appearance of the original wood. Wood preserved in this manner is exceedingly abundant in various parts of the western United States, especially in the Yellowstone National Park, Wyoming, where it is not rare to find trunks 30 feet in height, and 8 or 10 feet in diameter, standing upright exactly in the positions in which they grew, and so perfectly preserved that every cell, with all its delicate markings, can be as satisfactorily examined as from a living tree. In central Arizona perfectly silicified trunks of trees, 8 feet in diameter and 140 feet long, have been observed. These latter belong to the genus *Araucarioxylon*, the representative in a fossil state of the genus *Araucaria*. Fossil wood may also be due to the molecules being displaced by lime or iron, or by various combinations of minerals. Lignite, which represents one of the stages in the formation of coal, is very frequently fossil wood which has lost more or less of its volatile constituents, but still retains its wood-like structure and appearance. The term *fossil wood* is therefore properly applied to any wood that is so situated in the earth, or has been so acted upon by various minerals, as to be permanently preserved. (b) See *fossil cork*, under *fossil*.—Hard wood, the wood of various trees, such as oak, cherry, maple, ebony, ironwood, etc., so called from these woods being relatively very hard, firm, and compact. The quality results from the cells having exceedingly thick walls and being very compactly arranged, with very few or no intercellular spaces or ducts. Trees furnishing wood of this character are usually of slow growth, with narrow annual rings and dense, solid heart-wood. Mahogany, rosewood, and most woods susceptible of a fine polish belong to this class.—Hypernic wood. See *hypernic*.—Incense wood. See *incense-tree*.—Jacaranda wood. See *palisander*.—Jarool, jarrah, kamassi wood. See *jarool*, etc.—Jasperized wood. Same as *silicified wood*.—Kanyin wood. Same as *gurjun wood*. See *gurjun*.—Karri wood, the timber of *Eucalyptus diversicolor*, of southwestern Australia. The tree is said to attain exceptionally the height of 400 feet. The timber is useful for ship-planking, masts, wheel-work, railway-ties, etc.—Khow wood. See *Olea*.—Lemon wood. (a) The wood of the lemon-tree, which is hard, elastic, and fragrant. (b) In South Africa, an evergreen shrub, or a tree 20 or 30 feet high, *Psychotria Capensis* (*Grumelia cymosa*), having a hard, tough wood, variously useful.—Lingoa wood. Same as *lingo*.—Loblolly wood. See *loblolly-tree*.—Metalization of wood. See *metalization*.—Molded wood. See *mold*.—Molompi, mora, myall wood. See *molompi*, etc.—Myrtle wood, the wood of the Tasmanian beech. See *Fagus*.—Nephritic wood. See *nephritic*.—Nicaragua wood, a dye-wood exported from Nicaragua, similar to brazil wood, and derived from the same or another species of *Caesalpinia*; peach-wood.—Padouk wood, the Andaman redwood. See *redwood*, 2.—Pernambuco wood, true brazil wood.—Perpignan wood, the wood of the European nettle-tree, *Celtis australis*. See *nettle-tree*, 1.—Petrified wood. Same as *silicified wood*.—Pierana wood, the wood of *Pierana excelsa*. See *quassia*, 2.—Quassia, quebracho, saj wood. See *quassia*, etc.—Samarita wood. Same as *curana wood*.—Sand wood, a leguminous shrub of the Isle of Réunion, doubtfully classed as *Bremontiera Ammoxylon*.—Santa Martha wood. Same as *peach-wood*.—Secondary, speckled, sterile wood. See the adjectives.—Silicified wood. See *fossil wood*, above, and *silicify*.—Soft wood, a wood, such as basswood, poplar, tulip, cedar, and white pine, which is relatively soft and easily worked. This character is due to the large and thin-walled cells, including usually numerous ducts. Soft-wooded trees are generally of rapid growth, making thick annual layers.—Tonka-bean wood. Same as *seent-wood*.—Trincomal wood. See *halmatille*.—Turantira wood, the wood of the bastard bull-tree, *Bunelia retusa*, of the West Indies.—Wood-bending machine, a machine or an apparatus for bending wood into shape. Different machines are used, according to the purpose for which the wood is to be used, as for ship-timbers, furniture, sleigh-runners, hoops, and staves.—Wood moot or mote. See *moot* 1.—Wood reed-grass. See *reed-grass*.—Wood stop, in *organ-building*, a stop the pipes of which are made of wood, as the flute, the stopped diapason, etc.—Wood tea. See *tea* 1.—Wood wind. See def. 9, above. (For a multitude of other woods, see specific epithets.) = Syn. I. Woods, Park, etc. See *forest*.

wood¹ (wūd), r. [*< wood*¹, n.] I. *trans.* To supply or replenish with wood; get supplies of wood for: as, to wood a steamboat or a locomotive. [*Colloq.*]

Many passengers would save a little by helping to "wood the boat": i. e., by carrying wood down the bank and throwing it on the boat, a special ticket being issued on that condition. *The Century*, XLI. 106.

II. *intrans.* To take in or get supplies of wood.

In this little [island] of Mevis, more than twenty yeares agoe, I have remained a good time together, to wood and water and refresh my men.

Quoted in *Capt. John Smith's Works*, II. 277.

Therefore, as soon as we came to an Anchor at the East end of the Island, we sent our Boat ashore to the Gover-

nour, to desire leave to wood, water, and cut a new Mizen-yard. *Dampier*, Voyages, II. l. 174.

wood²† (wōd), a. [*Sc. wood*, *wod*; *< ME. wood, wode*, *wod*, *wode*, *< AS. wōd*, mad, raging, furious, = Icel. *ōðhr*, raging, frantic, = Goth. *wōds*, mad; cf. Franticke companion, Innaticke and wood.
Greene, Orlando Furioso, l. 984.

For wood†, like anything mad; "like mad."

Yit lat us to the peple seme . . .
That wimmen loves us for wood.
Chaucer, House of Fame, l. 1747.

wood²† (wōd), r. i. [*< ME. wooden, wodien*; from the adj. Cf. *wced*³.] 1. To act like a madman; rave.

He stareth and wodeth in his advertence.
Chaucer, Second Nun's Tale, l. 467.

2. To be fierce or furious; rage.

Thogh they ne anye nat the body, yit vices wooden to
destroyen men by wounde of thowht.
Chaucer, Boëthius, iv. meter 3.

wood³†, n. An old spelling of wood. *Prompt. Parv.*

wood-acid (wūd'as'id), n. Same as *wood-vinegar*. See *vinegar*.

Take 20 pounds terra japonica, 5 pounds of wood-acid, . . . to about 10 barrels of water, or enough of the latter to cover the hides.
C. T. Davis, Leather, p. 607.

wood-agate (wūd'ag'āt), n. An agate which shows more or less perfectly the structure of the wood from which it has been derived by a process of silicification.

wood-alcohol (wūd'al'kō-hol), n. See *alcohol*.

wood-almond (wūd'ā'mōnd), n. A shrub, *Hippocratea comosa*. See *Hippocratea*.

wood-anemone (wūd'a-nem'ō-nē), n. The wind-flower, *Anemone nemorosa*.

wood-ant (wūd'āt), n. 1. A large ant, as *Formica rufa*, which lives in the woods.—2. A white ant, or termite, as *Termes flavipes*, which lives in the wood of old buildings. See cut under *Termes*. [U. S.]

wood-apple (wūd'ap'l), n. See *Feronia*, 1.

wood-ashes (wūd'ash'ez), n. *pl.* The remains of burned wood or plants.

wood-awl (wūd'āl), n. The green woodpecker, or awl-bird, *Cecimus viridis*: same as *woodale*. See cut under *popinjay*. [Cornwall, Eng.]

wood-baboon (wūd'ba-bōon'), n. The drill; the cinereous or yellow baboon of Guinea, *Cynocephalus leucophæus*. See *drill*⁴.

wood-barley (wūd'bār'li), n. See *Hordeum*.

wood-beetle (wūd'bē'tl), n. See *Paussidæ*.

wood-betony (wūd'bet'ō-ni), n. See *betony*. Also called *head-betony* and *lousewort*.

wood-bill (wūd'bil), n. In *her.*, a bearing representing a woodmen's bill for lopping fagots, etc.

woodbine, woodbind (wūd'bīn, -bīnd), n. [Early mod. E. *wodbynde*; *< ME. woodbynde, wodebynde, wodebind, wodebynde, wudcbinde*, *< AS. wudubind, wudebinde*, earlier *wuidubinde, wuidubindæ*, *wuidubindlac*; so called because it binds or winds round trees, *< wudu, wudu*, tree, wood, + *bindan*, bind: see *wood*¹ and *bind*.] The common European honeysuckle, *Lonicera Periclymenum*, whence the name is more or less extended to other honeysuckles. *L. grata*, a species very similar to *L. Periclymenum*, is designated *American woodbine*. The name is also given to the Virginia creeper, *Ampelopsis quinquefolia*.

Aboute a tre with many a twiste
Bytrent and writen is the soote woodbynde
Chaucer, Troilus, iii. 1231.

So doth the woodbine the sweet honeysuckle
Gently entwist.
Shak., M. N. D., iv. l. 47.

Spanish woodbine, the seven-year vine, or Spanish arbor-vine, *Ipomæa tuberosa*. See *vine*.—Wild woodbine, See *wild* 1.

wood-bird (wūd'berd), *n.* A bird that lives in the woods.

Begin these *wood-birds* but to couple now?

Shak., *M. N. D.*, iv. l. 145.

wood-block (wūd'blok), *n.* 1. In *engraving*, a die cut in relief on wood, and in condition for furnishing impressions in ink in a printing-press; a woodcut. See *wood-engraving*. The wood commonly used for wood-blocks is box, the blocks being cut directly across the grain. Inferior kinds of wood, such as American rock-maple, pear, plane, etc., are used for coarser work.

2. A print or impression from such an engraved block; a woodcut. Also used attributively in both senses: as, *wood-block* illustrations.

wood-boiler (wūd'boi'lēr), *n.* A vessel adapted for boiling wood in order to soften it and thus facilitate working.

wood-borer (wūd'bōr'ēr), *n.* That which bores wood, as an insect, a crustacean, or a mollusk. Compare *Cis*, *ship-worm*, *Saperda*, and *teredo*, and other citations under *wood-boring*.

wood-boring (wūd'bōr'ing), *a.* Capable of or characterized by boring wood; having the habits of a wood-borer: as, the *wood-boring* shrimps; *wood-boring* beetles. See *gribble*², *Limnoria*, *Cheluride*, *Lymexylon*, *ship-worm*, and *teredo*.

wood-born (wūd'bōrn), *a.* Born in the woods. *Spenser*, *F. Q.*, i. vi. 16. [Rare.]

wood-bound (wūd'bound), *a.* Encumbered with tall woody hedgerows. *Imp. Dict.*

wood-brick (wūd'brik), *n.* A block of wood, of the shape and size of a brick, inserted in the interior walls of a building to afford a hold for the joinery, etc.

Woodbridge gun. See *gun*¹.

wood-broney (wūd'brō'ni), *n.* The common ash, *Fraxinus excelsior*. [Prov. Eng.]

wood-broom (wūd'brōm), *n.* The wild teazel, *Dipsacus sylvestris*.

wood-bug (wūd'bug), *n.* A forest-bug.

woodburytype (wūd'ber-i-tip), *n.* [Named after Walter Bentley Woodbury, the inventor.]

1. A photomechanical process in which a relief is produced from a negative on a film of bichromated gelatin, hardened in alum. This is pressed into a plate of soft metal, the result being an intaglio mold. A warm solution of gelatin containing any desired pigment is poured on the mold, a sheet of paper is laid over it, and pressure applied, the superfluous pigment being squeezed out, and only that remaining in the intaglio mold and forming the image being left. When this sets it adheres to the paper, and is then fixed by hardening in a solution of alum. Compare *heliotype*.

2. A picture produced by this process.

wood-calamint (wūd'kal'a-mint), *n.* See *Calamintha*.

wood-carpet (wūd'kār'pet), *n.* 1. A floor-covering made of slats or more ornamental shapes of wood of different colors, fastened to a cloth backing. The different pieces of wood are arranged so as to produce the effects of tessellated floors, mosaic work, etc. Also called in the United States *wood-carpeting*.

2. A British geometrid moth, *Melanippe rivata*, common in the south of England.

wood-carver (wūd'kār'vēr), *n.* One who carves wood.

The peasants are turners, lapidaries, electro-platers, *wood-carvers*, and spectacle-makers.

Edinburgh Rev., CLXVI. 310.

wood-carving (wūd'kār'ving), *n.* 1. The art or process of carving wood.—2. A piece of sculpture in wood.

wood-cell (wūd'sel), *n.* A cell normally entering into the composition of the wood of plants. Wood-cells are one of the regular modifications of prosoenchyma, consisting of cell-structures greatly elongated in proportion to their breadth, with very thick walls and usually pointed extremities. When thoroughly lignified, wood-cells take little active part in the metabolism of the plant, their function being mainly to give strength and power of resistance to it. Also called *woody fiber*. See *prosoenchyma*, *tissue*, 4, and cut under *disk*, 4 (c).

wood-charcoal (wūd'chār'kōl), *n.* See *charcoal*, 1.

woodchat (wūd'chat), *n.* The red-backed shrike or butcher-bird of Africa and Europe, *Lanius rufus*. Also called *L. auriculatus* and by other names. It is occasionally seen in Great Britain in summer. The name is misleading, as the bird is not a chat in any proper sense.

woodchat-shrike (wūd'chat-shrik), *n.* The woodchat.

wood-chopper (wūd'chop'ēr), *n.* One who chops wood; specifically, one who cuts down trees, as a lumberman.

woodchuck¹ (wūd'chuk), *n.* [Also *woodshock*, applied to a different quadruped; a corruption, simulating *E. wood*¹, of *wejack*, *weejack*, repr. an Amer. Ind. name, of which the Cree form is rendered *otechock* by Sir John Richardson.] The

commonest North American species of marmot, *Arctomys monax*, a large rodent quadruped of the family *Sciuridae*. It is from 15 to 18 inches long, of very stout, heavy form, with brownish and grayish tints above, and reddish-brown below. It feeds on vegetables of many kinds, burrows in the ground, and hibernates in winter. Also called *ground-hog* and *chuck*. See cut under *Arctomys*.—**Woodchuck day**, in popular myth and rural tradition, the day on which the woodchuck first comes out of its hole after its hibernation, this action being regarded as affording a weather-prophecy. The saying goes that if the woodchuck sees its shadow on that day, it retires to its burrow for six weeks longer, which implies that warm, sunshiny weather very early in the spring, or in February, arousing the woodchuck from its torpidity, is likely to be followed by a cold or late season. Also *ground-hog day*.

woodchuck² (wūd'chuk), *n.* [Prob. < *wood*¹ + *chuck*⁵, var. of *chack*³.] The green woodpecker, *Geococcyx viridis*. See cut under *popinjay*. [Prov. Eng.]

wood-chuck (wūd'chuk), *n.* In a lathe, a chuck adapted for holding a piece of wood to be operated on.

The stoppers are fixed in a hollow *wood-chuck* by slight blows of a mallet. *O'Byrne*, *Artisan's Handbook*, p. 195.

woodcoal (wūd'kōl), *n.* Charcoal.

woodcock (wūd'kok), *n.* [< ME. *wodekoc*, *wodekok*, *woddecocke*, < AS. *wuduoc*, a woodcock; as *wood*¹ + *cock*¹.] 1. One of two distinct birds of the family *Scolopacidae*, closely related to the true snipe (*Gallinago*). (a) In Europe, *Scolopax rusticola* (wrongly spelled *rusticola*), a very common bird of the northerly parts of the Old World, one of the largest and best-known representatives of its family, highly es-

European Woodcock (*Scolopax rusticola*).

teemed as a game-bird, its flesh being delicious, while the thick cover it inhabits and the rapidity of its flight test the nerve and skill of the sportsman. It is migratory, breeding chiefly in the higher latitudes, nesting upon the ground in a dry spot under cover, and laying four eggs. This woodcock is over 12 inches in length, and weighs from 10 to 15 ounces; the plumage is intimately variegated with brown, black, russet, and tawny. It is seldom seen in America, and only as a straggler from Europe. (b) In the United States and Canada, *Philohela minor*, a bird of the same general characteristics as the former, but smaller, usually under 12 inches in length, and weighing 9 ounces or less; the under parts are whole-colored, and there is a generic difference from *Scolopax rusticola* in the

American Woodcock (*Philohela minor*).

structure of the outer primaries, three of which are attenuated and abbreviated in *Philohela*. The sexes are alike in color, but the female is considerably larger than the male, and alone reaches the maximum size and weight above given; the male is usually 10 to 11 inches long, and 16 to 17 in spread, weighing 5, 6, or 7 ounces according to condition. The bill is perfectly straight, 2½ to 3 inches long, and deeply furrowed; it is a very sensitive probe, with which the bird feels for worms in the mud by thrusting it in for its full length. The physiognomy of the woodcock is peculiar, by reason of the shape of the head, and the great size of the dark eyes, as well as their site high up and far back. The wings are short and rounded, but ample; the tail is very short, rounded, and usually held up; the legs are feathered to the heel, naked beyond; the toes are cleft quite to the base; there is a small hind toe, and the middle toe with its claw is rather longer than the tarsus. The woodcock is to some extent a nocturnal bird. It abounds in most of its range, and is one of the leading game-birds of America; it is found in bogs and swamps, wet woodlands, alder-brakes (sometimes called *woodcock-brakes* in consequence), and not seldom in quite dry fields, as corn-fields; it is migratory, but erratic and capricious in its movements, and nests throughout its

range. The eggs are laid on the ground, generally in April (earlier or later according to latitude); they are less pointed than usual among waders, 1½ by 1¼ inches in size, of a brownish-gray color, with very numerous and small chocolate-brown surface-spots and neutral-tint shell-spots; the full number is four. The woodcock has a peculiar bleating cry, and sometimes exhibits the curious habit of removing the young from danger by flying off with the chick, which is held in the parent's feet. Also called *snipe*, with or without qualifying words (see *snipe*, 1 (c)), *American woodcock*, *little woodcock*, *lesser woodcock*, *red woodcock*, *wood-hen*, *hog-sucker*, *hogbird*, *tumberdoodle*, *hookumpake*, *night-peck*, *night-partridge*, *skrups*, *cock* (short for *woodcock*), and *Labrador twister*.

2. The large black pileated woodpecker, or log-cock, *Hylotomus* (or *Ceophorus*) *pileatus*. See cut under *pileated*. [Local, U. S.]

Woodcock . . . is applied by backwoodsmen and other country folk to the pileated woodpecker, . . . wherever that big red-crested bird of the tall timber is found.

G. Trumbull, *Bird Names* (1888), p. 151.

3. In *conch.*, a woodcock-shell; more fully called *thorny woodcock*. Also called *Venus's-comb*.—4. A simpleton; in allusion to the facility with which the European woodcock allows itself to be taken in springs or in nets set for it in the glades.

Go, like a *woodcock*,

And thrust your neck in the noose.
Beau. and Fl., *Loyal Subject*, iv. 5.

Among us in England this bird is infamous for its simplicity or folly, so that a *woodcock* is proverbially used for a foolish, simple person. *Willoughby*.

Little woodcock. (a) The great or double snipe, or woodcock-snipe, *Gallinago major*. [British.] (b) The American woodcock, *Philohela minor*; a book-name. [U. S.]—**Springs to catch woodcocks**, arts to entrap simplicity. *Shak.*, *Hamlet*, i. 3. 115.—**Woodcock's cross**, penitence for folly.

Not controversies now are in disputes

At Westminster, where such a coyle they keep:

Where man doth man within the law betosse,

Till some go crosse home by *Woodcock's crosse*.

John Taylor, *Works* (1630). (*Nares*.)

Woodcock's head. (a) A tobacco-pipe; so called from the shape.

Sav. O peace, I pray you, I love not the breath of a *woodcock's head*.

Fastid. Meaning my head, lady?

Sav. Not altogether so, sir; but as it were fatal to their follies that think to grace themselves with taking tobacco, when they want better entertainment, you see your pipe bears the true form of a *woodcock's head*.

B. Jonson, *Every Man out of his Humour*, iii. 3.

(b) A woodcock-shell, as *Murex haustellum*.

Woodcock-eye (wūd'kok-i), *n.* A snap-hook. *E. II. Knight*. [Eng.]

Woodcock-fish (wūd'kok-fish), *n.* The sea-woodcock or trumpet-fish, *Centriscus* (or *Macrorhamphosus*) *scolopax*; so called from the long beak, like that of the snipe or woodcock. See cut under *snipe-fish*.

Woodcock-owl (wūd'kok-owl), *n.* The short-eared owl, *Asio accipitrinus*, *Otus brachyotus*, or *Brachyotus palustris*; so called from its association with the European woodcock. [Local, Eng. and Ireland.]

Woodcock-pilot (wūd'kok-pī'lot), *n.* The European gold-crested kinglet, *Regulus cristatus*; so called as preceding the woodcock in migration. See cut under *goldest*. [Local, Eng.]

wood-end (wùd'end), *n.* Same as *hood-end*.

wood-engraver (wùd'en-grà'vèr), *n.* 1. An artist who engraves on wood.—2. In *entom.*, any one of several bark-beetles of the genus *Xyleborus* and allied genera; specifically, *X. cœlatus*. This works in the cambium layer of pine-trees in the United States in such a way that, on removing the loosened bark, the surface of the wood is seen furrowed in a regular and artistic manner, numerous galleries passing off at right angles from a straight median tunnel.

Wood-engraver (*Xyleborus cœlatus*), eight times natural size.

wood-engraving (wùd'en-grà'ving), *n.* 1. The art or process of cutting designs in relief upon blocks of wood, usually box, so that impressions can be made from them with a pigment in a printing-press, upon paper or other material. For cuts of more than 5 or 6 inches square, two or more blocks are firmly secured together. The surface of the smoothed block, which is cut directly across the grain, is prepared for the engraver by rubbing it with pounded Bath brick mixed with a little water, in order to give a hold to the lead-pencil, and the subject is drawn in with pencil or India ink, or is transferred upon the block by photography. The engraver then, by means of gravers, tint-tools, gouges or scrapers, and flat tools or chisels of different sizes, cuts out the design, leaving it in raised lines or dots upon the surface of the block, so that these may receive the ink and yield the desired impression under the action of the press. In such parts of the design as are to be solid black, the engraver leaves the surface of the wood untouched; in such parts as are to be wholly white, he cuts the surface entirely away; the large number of tones, technically called *tints*, between these extremes are rendered by cutting out wider or narrower spaces, corresponding to white paper in the print, between the lines or dots left in relief. An engraving is seldom a mere reproduction of the copy; it is a translation, into which the personal element of the engraver enters: thus the engraving may be either superior or inferior artistically to the original. Wood-engraving is technically the opposite of steel- or copperplate-engraving: in the latter the lines cut by the engraver form the picture; in the former the parts of the surface left uncut form the picture.

2. A block of wood engraved by the above method, or an impression from such a block.
woodenhead (wùd'n-hed), *n.* A blockhead; a thick-headed, dull, or stupid person; a numskull. [Colloq.]

wood-opal (wud'ö'pal), *n.* Silicified wood; opalized wood. It is found in great abundance in many parts of the world, but especially in the auriferous gravels of the Sierra Nevada of California, where extensive forests have been exposed by hydraulic mining, in which the trunks of the trees have been converted into amorphous silica, or opal, which usually contains a small percentage of water, although this is not considered as being essential to its composition. Also called *xylopal*. See *foetid wood* (under *wood*), and *silicify*.

wood-owl (wud'owl), *n.* The European tawny or brown owl, *Syrnium aluco*, or a similar species, as the barred owl of the United States. They are earless owls, of medium to large size, the species of which are numerous and live in the woods of most parts of the world. See cut under *Strix*.

wood-paper (wud'pä'pär), *n.* A trade-name for paper made in part or in whole of pulp prepared by chemical and mechanical means from wood. The wood employed is usually poplar, though pine, fir, basswood, and beech are largely used. By the mechanical process the wood is ground to fine powder suitable for pulp, and by the chemical process the wood, cut up into small pieces, is digested with various chemicals to free it from the sap and other useless matter, to bleach it, and to reduce it to fine, loose pulp. See *pulp-digester*, *wood-grinder*, and *paper*.

wood-parenchyma (wud'pa-reng'ki-mä), *n.* A combination of wood or fiber usually classed as parenchyma, but intermediate between this and prosenchyma. Each fiber consists of three cells, one of which has flattened ends, while the other two, attached to these ends, are pointed.

wood-partridge (wud'pä'r'trij), *n.* The Canada grouse. See *grouse*, *wood-grouse*, and cut under *Canacc*. [Local, U. S.]

wood-pavement (wud'päv'ment), *n.* Pavement composed of blocks of wood: first used in London in 1839.

wood-pea (wud'pē), *n.* See *pea*¹.
wood-peat (wud'pēt), *n.* Peat formed in forests from decayed wood, leaves, etc. Also called *forest-peat*.

woodpecker¹ (wud'pek), *n.* The woodpecker.
Nor wood-pecks, nor the swallow, harbour near.
Addison, tr. of Virgil's Georgics, iv.

woodpecker (wud'pek'ér), *n.* Any bird of the large family *Picidae*, of which there are numerous genera and some 250 species, inhabiting nearly all parts of the world. They are picarian and scansorial birds, having the toes arranged in pairs, two before and two behind (except, of course, in the three-toed genera; see *Picoides*), and cut under *Tiga*; the tail-feathers rigid and acuminate, to assist in climbing; the bill hard and chisel-like, adapted for boring wood (whence the name); and a remarkable structure of the palatal and hyoidean bones and salivary glands. (See cuts under *salivary* and *sacro-mathous*.) The tongue is capable, in most species, of being thrust far out of the mouth, and is lumbriciform. (See cut under *sagittillimud*.) The plumage as a rule is variegated in intricate patterns of coloration, and usually includes bright, rich, or striking tints. Insects constitute most of their food; their eggs are white, and are laid in holes they dig in trees; their voice is harsh and abrupt. They are of great service to man by destroying insects which infest trees. See *Picidae*, and numerous cuts there cited.—**Arizona woodpecker**, *Picus (Dendrocopos) arizonae*, a bird lately discovered in Arizona, and for some time called *Picus stricklandi*, but distinct from Strickland's woodpecker in having the upper parts of a uniform light-brown color and the spots of the under parts guttiform. *Harrill*, *Ibid.*, 1866, p. 115.—**Audubon's woodpecker**, the small southern form of the hairy woodpecker (which see), named *Picus auduboni* by W. Swainson in 1831, and renamed *Picus auduboni* by Dr. James Trudeau in 1837, without reference to the prior homonym.—**Ayres's woodpecker**, *Colaptes ayresi* of Audubon (1839), *C. hybridus* of Baird (1858), *Picus hybridus aurato-mexicanus* of Sundersall (1866), names covering the remarkable flocks of western North America, especially of the upper Missouri and adjacent regions, which present every step of the intergradation between the yellow-shafted and the red-shafted flickers (*C. auratus* and *C. mexicanus*); the so-called hybrid woodpecker. The coloration is so unstable that it often varies on right and left sides of the same specimen. The case is unique, and its interpretation continues in question by ornithologists.—**Baird's woodpecker**. (a) The Cuban ivorybill, *Campophilus bairdi*, named by J. Cassin, in 1863, in compliment to Spencer Fullerton Baird (1823-1887). (b) The Californian woodpecker, *Melanerpes formicivorus bairdi*.—**Bengal woodpecker**, var. *A. brachyotus erythronotus*, of Ceylon. *Latham*, 1782.—**Bengal woodpecker**, var. *B. chrysolutes lucidus*, of the Philippines. *Latham*, 1782.—**Black-and-white-spotted woodpecker**, the numerous members of the restricted genus *Picus = Dendrocopos*; see under *great black woodpecker*, below, usually 6 to 10 inches long, with four toes, the plumage variegated intricately with black and white, with a scarlet occipital band or pair of spots in the adult male. The greater and lesser spotted woodpeckers of England, and the hairy and downy woodpeckers of the United States, are characteristic examples.—**Black-backed three-toed woodpecker**, *Picoides arcticus*, marked by the characters indicated in the name, 9 to 10 inches long, common in northern parts of North America.—**Black-breasted woodpecker**, the adult female of the thyroid woodpecker.—**Black woodpecker**, the great black woodpecker.—**Bristle-bellied woodpeckers**, the genus *Asyndesmus*, *Coccyz*.—**Brown-headed woodpecker**, the adult female of *Sphyrapicus thyroideus*; the thyroid woodpecker (see below).—**Buff-breasted woodpecker** (of Latham, 1782), the female of *Campophilus melanoleucus* (the *Picus albicostis* of Vieillot), a white-billed crested woodpecker of tropical America, 13½ inches long, congeneric with the ivorybill.—**Cactus woodpecker**, *Picus* or *Melanerpes cactorum*, of Peru, Bolivia, Uruguay, and the Argentine Republic.—**Californian woodpecker**, that race of *Melanerpes formicivorus* (a Mexican species) which abounds in the United States from the Rocky Mountains to the Pacific. It is 8½ to 9½ inches long, of a glossy blue-black color, with the rump, bases of all the quills, edge of the wing, and under parts from the breast white, the sides with sparse black streaks, the forehead white continuously with a stripe down in front of the eye and thence encircling the throat, the crown in the male crimson and white, in the female crimson, black, and white, the eyes white, often with a creamy or pinkish, sometimes bluish, tint. This is the woodpecker noted for drilling holes in dead boughs in which to insert acorns—some branches being found thus drilled and studded with hundreds of acorns.—**Canadian woodpecker**, the large northern form of the hairy woodpecker (which see), formerly *Picus canadensis* (Gmelin, 1788), and before that *Picus leucostictus* (Boddard, 1783).—**Cape woodpecker**, the South African *Mesopicus griseicapillus*, 7½ inches long, having the crown, crest, rump, upper tail-coverts, and middle of the belly crimson. This bird was originally described in 1776 by Sonnini as *picus verid de l'Estete Lusson*, whence *Picus wandellensis* of Gmelin (1788), and *Manilla green woodpecker* of Latham, next by Balfour in 1780 as *picus vete griseus du Cap de Bonne-Espérance*, whence *Picus griseocapillus* of Boddard (1783) and *Cape woodpecker*; next by Scopoli in 1786 as *Picus menstris*, this most frequent specific name indicating the bloody-red color of certain parts; next as *picus olivaceus* by Levaillant (1806); also as *Picus caniceps*, *P. obscurus*, *P. capensis*. It has been placed in 6 different genera; its proper onym was first given by Cassin in 1863.—**Carolina woodpecker**, var. *A. melanerpes* or *Centurus rubicollis*, peculiar to Jamaica. *Latham*, 1782.—**Carolina woodpecker**, var. *B.*, the red bellied woodpecker. *Latham*, 1782.—**Collared woodpecker**, *Asyndesmus torquatus*, Lewis's woodpecker.—**Crawford's woodpecker**, a bird so named by Gray in Griffith's *Charter* (1823), now called *Thryothorus crawfordi*, and supposed to be found near Ava in Burma, but known only from a drawing executed by a native artist for Mr. Crawford, Jr.—**Crimson-breasted woodpecker**, the monotypic *Geothlypis olivacea* (also *Picus arator*), of South Africa, 9 to 10 inches long, much variegated with olivaceous and reddish tints. *Latham*, 1783.—**Crimson-rumped woodpecker**, *Mesopicus geocetes*, the *geocetes* or *picus verid de l'Estete* of early French writers, a West African species, 8 inches long, of a golden-olive color above, with scarlet rump and upper tail-coverts, and otherwise much variegated.—**Cuban woodpecker**, *Neococcyx serripinnatus*, usually called *Colaptes ferandinus* and *Cuban flicker*, 11½ to 12 inches long, above olive-black barred with yellow, and confined to Cuba.—**Downy woodpecker**, *Picus*

(*Dendrocopos pubescens*, a small black and white species, 6 or 7 inches long, one of the commonest woodpeckers of eastern parts of North America, and among those popularly called *sapsucker* (which see). It is exactly like the hairy woodpecker, except in size, and in having the lateral tail-feathers barred with black and white, instead of being entirely white. There is no such difference between the two as the terms *downy* and *hairy* would seem to imply. This species corresponds in the United States to the lesser-spotted woodpecker of England.—**Gairdner's woodpecker**, *Picus pubescens gairdneri*, the western subspecies of the downy woodpecker, having few if any white spots on the black wing-coverts, and in some localities the belly smoky-gray; dedicated by Audubon in 1839 to Dr. Meredith Gairdner, a Scotch naturalist.—**Gila woodpecker**, the saguaro or pitahaya woodpecker. See cut under *pitahaya*.—**Gilded woodpecker**. (a) An American flicker of the genus *Colaptes*, as the golden-winged woodpecker, *C. auratus*. See cut under *flicker*. (b) Specifically one of these, *C. chrysoides*, of Arizona, Lower California, and southward, which resembles the common flicker in the body, tail, and wings, but has the head as in the Mexican flicker.—**Golden-shafted, golden-winged, gold-winged woodpecker**, the common flicker, *Colaptes auratus*.—**Gray-headed woodpecker**, *Coccyzus canus*, a popinjay of nearly all Europe and much of Asia. *Pennant*, 1755, and more fully *gray-headed green woodpecker* (Edwards, 1747).—**Grayson's woodpecker**, the ladder-backed woodpecker of the Tres Marias Islands off the Pacific coast of Mexico, named after Col. A. J. Grayson by Lawrence, in 1874, *Picus scabris*, var. *graysoni*.—**Great black woodpecker**, *Picus* or *Dryocopus martius*, the largest European woodpecker, ranging in northerly latitudes through the Palearctic region to Kamchatka and Japan. It is 17 inches long, black, with pointed scarlet crest in the male (the scarlet restricted in the female), and peculiar in having the tarsi extensively feathered. It corresponds to the pileated woodpecker of North America. Many authors assume this isolated woodpecker to be monotypic of the restricted genus *Picus*, in which case the numerous smaller black and white species like the greater and lesser spotted of Europe, and the hairy and downy of North America, are generically called *Dendrocopos*; but when these are left in *Picus*, the great black woodpecker is generically called *Dryocopus*, and upon it have also been based two other genera, *Carboaricus* of Kaup (1829) and *Dryopites* [sic] of Malherbe (1848-9). See cut under *Dryocopus*.—**Greater spotted woodpecker**, *Picus (Dendrocopos) major*, ranging through nearly all of Europe and much of Asia. This is one of the woodpeckers common in Great Britain, there corresponding to the hairy woodpecker of the United States. It is 10 inches long, of black and white color in intricate pattern, the male with a red hindhead. See cut under *Picus*.—**Green woodpecker**, *Coccyzus viridis*, the commonest woodpecker in Great Britain, with a host of provincial English names, dialectal variants of these, and various poetical epithets, but only about twenty New Latin names. (See cut under *popinjay*.) The genus *Coccyzus* ranges through almost all the Palearctic and Indian regions, here it is represented by 17 species. That mentioned inhabits the greater part of Europe, north to 60° N. lat., also Asia Minor and eastward to Persia. It is about 12½ inches long, of a greenish color, variegated with crimson, yellow, and black, etc.—**Green woodpecker of Mexico**, a bird described in 1734 by Seba as *Ardea mexicana*, and later in 1760 by Brisson as *picus verid de Mexico*, but a popinjay artificially fitted with the legs of some other bird and classified as to habitat.—**Hairy woodpecker**, *Picus (Dendrocopos) villosus*, a common woodpecker of eastern North America, chiefly black and white, the male with a scarlet occipital band, the size usually 9 to 10 inches, but varying from 8 to 11. This very exceptional gradation in size has caused the recognition of three varieties, *major*, *medius*, and *minor*, graded mainly according to latitude, the northernmost birds being the largest. These varieties have several synonyms, and in western North America the hairy woodpecker runs into yet other geographical or climatic races.—**Half-billed woodpecker** (Latham, 1782), a nominal species, based on *Picus semirufus* of Linnaeus (1766), which was a popinjay with a broken bill.—**Harris's woodpecker**, *Picus villosus harrisi*, the hairy woodpecker of the region from the Rocky Mountains to the Pacific, in which the white spots on the wing-coverts are few, if any, and the belly is smoky-gray in some localities. This subspecies is thus parallel with that of the downy woodpecker called *Gairdner's*, and was dedicated by Audubon in 1839 to Edward Harris.—**Hybrid woodpecker**, Ayres's woodpecker.—**Imperial woodpecker**, *Campophilus imperialis*, an ivory-billed and the largest known woodpecker, nearly 2 feet long, with black nasal plumules, no white stripe on the head or neck, a long occipital crest of scarlet, the secondaries tipped with white, the plumage otherwise black, and the bill white. This magnificent bird inhabits Mexico, and will probably be found in the United States near the Mexican border.—**Ivory-billed woodpecker**, the ivorybill, any member of the genus *Campophilus* having a white bill. See cut under *Campophilus*.—**Javan three-toed woodpecker**, the bird figured under *Tiga* (which see).—**Ladder-backed three-toed woodpecker**, *Picoides americanus*, marked by the characters indicated in the name, 8 to 9 inches long, common in northerly parts of North America.—**Ladder-backed woodpeckers**, those small black-and-white-spotted woodpeckers whose upper parts are regularly barred crosswise with black and white, as the Texan woodpecker and related forms. *Coccyz*.—**Larger red-crested woodpecker**, the pileated woodpecker. *Catesby*, 1731.—**Largest white-billed woodpecker**, the ivorybill. *Catesby*, 1731.—**Lesser black woodpecker** (Latham, 1782), the homonym of two different species of South American woodpeckers, *Melanerpes rubrifrons* and *M. cruentatus*.—**Lesser spotted woodpecker**, *Picus (Dendrocopos) minor*, ranging through nearly all Europe, much of Asia, and parts of Africa. It is one of the woodpeckers common in Great Britain, where it corresponds to the downy woodpecker of the United States. It is 6 inches long, of black and white color in intricate pattern, the male with a red hindhead.—**Lewis's woodpecker**, *Asyndesmus torquatus*, of Coles, originally *Picus torquatus* of Wilson (1811), named by the latter after its discoverer, Captain Meriwether Lewis, of United States army. It inhabits western North America, chiefly in mountainous parts of the United States, and is generically distinct from

all other woodpeckers in having the plumage of the under parts hair-like by reason of disconnection of the barbs of the feathers. It is 10 to 12 inches long, greenish-black with bronze luster, a patch of velvety crimson feathers on the face, the under parts and a collar round the neck hoary-gray, heightened to rose- or lake-red on the belly. Also called *collared* and *bristle-bellied woodpecker*.—**Lined woodpecker**, *Ceophloeus* or *Dryocopus* (formerly *Picus) lineatus*, of Central and South America, of rather large size (14 inches long), crested with crimson, and otherwise resembling the pileated woodpecker, to which it is nearly related.—**Little brown woodpecker**, *Impatiens gymnothalamus*, of Ceylon and the point of the Indian peninsula, 4½ inches long. *Latham*, 1787.—**Magellanic woodpecker**, *Impatorant magellanicus*, a monotypic species of Chili and Patagonia, 15 inches long, mostly black with scarlet crested head.—**Malaccan woodpecker**, *Chrysophlegma malaccensis*, of the Malay countries, Sumatra, and Borneo. It is one of a group of about 8 Oriental species of this genus. *Latham*, 1787.—**Manilla green woodpecker**, the Cape woodpecker (by a geographical blunder). *Latham*, 1782.—**Maria's woodpecker**, a young hairy woodpecker, named *Picus martinus* by Audubon in 1839 after a Miss Maria Martin.—**Masked woodpeckers**, the genus *Neopicus*, *Coccyz*, 1884.—**Narrow-fronted woodpecker**, *Melanerpes formicivorus angustifrons*, a variety found in Lower California, having not the forehead but the white frontal stripe narrower than usual.—**Nubian woodpecker**, the leading species of a group of about 12 species composing the Ethiopian genus *Campophora*, *C. rubica*, of Abyssinia and south to equatorial Africa. *Latham*, 1782.—**Nuchal woodpecker**, a western variety of the sapsucker, *Sphyrapicus varius nuchalis*, showing more red on the head, and thus an approach to *S. ruber*.—**Nuttall's woodpecker**, *Picus (Dendrocopos) nuttalli*, the ladder-backed woodpecker of the Pacific slope of the United States, very near the Texan; named in 1843 by Dr. W. Gambel in compliment to the botanist Thomas Nuttall.—**Orange woodpecker**, *Brachyotus aurantius*, of northern India, in part of the color named, and 11 inches long, the male of which was originally described in 1760 by Brisson as *picus du Cap de Bonne-Espérance*, and the female the same year by the same as *picus verid de Bengal*, whence the Linnaean (1766) *Picus aurantius* and *Picus bengalensis*. The same bird served also as the type of Malherbe's genus *Dryopites*, dedicated to the leading personage of the Hindoo Trimurti.—**Phillips's woodpecker**, a young hairy woodpecker; so named as a distinct species in 1839 by Audubon, after Benjamin Phillips, F. R. S.—**Pileated woodpecker**, the black log-cock of North America, *Hylotermus or Dryotermus or Phloeotermus or Ceophloeus pileatus*, originally *Picus pileatus*. See cut under *pileated*.—**Pole-backed three-toed woodpecker**, *Picoides americanus dorsalis*, having a long white stripe lengthwise down the middle of the black back of the Rocky Mountain region of the United States.—**Raffles's woodpecker**, *Gauripicoides rafflesii*, a monotypic inhabiting Tenassarim, the Malay peninsula, Sumatra, and Borneo, originally named *Picus rafflesii* by Vigors, in 1831, after Sir Stamford Raffles. The upper parts are mostly uniform golden-olive.—**Rayed woodpecker**, one of the zebra-woodpeckers, *Picus* or *Centurus* *Zebra*, *Sphyrapicus striatus*, of Hayti and San Domingo. *Latham*, 1782.—**Red-bellied woodpecker**, *Centurus carolinus*, one of the zebra-woodpeckers, common in the United States. See cut under *Centurus*.—**Red-breasted woodpecker**, *Sphyrapicus ruber*, the sapsucker of the Pacific coast of the United States, like *S. varius*, but having the whole head, neck, and breast carmine-red in both sexes.—**Red-cheeked woodpecker** (of Edwards, 1764), *Celex undatus*, a crested amazonian species of a genus of 14 species peculiar to the Neotropical region.—**Red-cockaded woodpecker**. See *red-cockaded*.—**Red-headed woodpecker**, *Melanerpes erythrocephalus*; so named by Catesby in 1731. See cut under *Melanerpes*.—**Red-shafted woodpecker**, the Mexican flicker, *Colaptes mexicanus*.—**Red-throated woodpecker**, the adult male of the thyroid woodpecker, formerly described as *Melanerpes rubrigularis* (Schater).—**St. Lucas woodpecker**, the ladder-backed woodpecker of Lower California; a local race called *Picus salsarius lucasianus*.—**Sap-sucking woodpeckers**, the true sapsuckers of the genus *Sphyrapicus* (which see, with cut).—**Smallest spotted woodpecker**, the downy woodpecker. *Catesby*, 1731.—**Strickland's woodpecker**, *Picus (Dendrocopos) stricklandi*, of southeastern Mexico, dedicated in 1845 by Malherbe to Hugh E. Strickland, principal author of the Stricklandian code of nomenclature in ornithology. It is 7½ inches long, has the back and rump barred with blackish-brown and whitish, the under parts white, fully streaked with black.—**Superciliary woodpecker**. See *superciliary*.—**Texan woodpecker**, the ladder-backed woodpecker of Texas to Arizona and southward to Yucatan, *Picus (Dendrocopos) salsarius*, 5½ to 6½ inches long, having the upper parts regularly barred crosswise with white and black. Also called *Texan sapsucker*.—**Three-toed woodpecker**, any species of several different genera of *Picinus*, in which the first digit (inner hind toe) is lacking. This peculiarity recurs in genera otherwise very close to those in which the feet are normally yoke-toed, so that the species which exhibit it do not form a group by themselves. The three-toed genera are *Picoides*, *Gauripicoides*, *Coccyz*, and *Tiga* (see cut under *Tiga*). The same peculiarity marks the genus *Sasia* among the *Picumnini*.—**Thyroid woodpecker**, *Sphyrapicus thyroideus*, a remarkable sapsucker of western North America, the opposite sexes of which differ so much that they have been placed in separate genera, and repeatedly described as different species, called *brown-headed*, *red-throated*, *Williamson's*, etc., woodpecker, *Picus thyroideus* (Cassin, 1851), *Colaptes thyroideus*, *Picus naticus* (Malherbe, 1854), *Centurus natalis*, *Picus williamsoni* (Newberry, 1857), *Melanerpes thyroideus*, *M. rubrigularis*, etc. The length is 9 to 9½ inches, the extent 16 to 17; the adult male is glossy blue-black, with scarlet throat, an oblique wing-bar, two stripes on each side of the head, and some other markings white; the female is only continuously black in a shield-shaped area on the breast, otherwise barred closely and regularly with black and white or white-brown, the head uniform hair-brown, the quills marked with white spots in rows of pairs. The sexual differences begin with nestlings as soon as they are fledged, contrary to one of the broadest rules in ornithology—namely, that, when the adults of opposite sexes differ decidedly in

color, the young males resemble the female, and acquire their distinctive markings at maturity only.—**Tricolored woodpeckers**, the members of the restricted genus *Melanerpes*, as the red-headed. See cut under *Melanerpes*. **Cotes**.—**White-backed woodpecker**, *Picus (Dendrocopos) leucotus* (originally misprinted *leucotis*—Bechstein, 1802), 10 inches long, having the lower back white, extending from northwestern Europe to Manchuria, Corea, and Mongolia.—**White-headed woodpecker**, *Xenopicus albolarvatus*. See *Xenopicus* (with cut).—**White-rumped woodpecker**, the red-headed woodpecker. See cut under *Melanerpes*. **Latham**, 1782.—**Williamson's woodpecker**, the adult male of the thyrooid woodpecker, formerly described by Dr. J. S. Newberry in 1857 as *Picus williamsoni*, after Lieutenant R. S. Williamson, United States army.—**Woodpecker hornbill**, an Asiatic species of *Bucerotidae*, *Buceros pica* (of Scopoli, 1786, now *Anthracoseros coronatus*), of a black and white color, inhabiting India and Ceylon.—**Yellow-bellied woodpecker**, the common sapsucker; so named originally by Catesby, 1731. See *sapsucker* (with cut), and *Sphyrapicus*.—**Yellow blue-footed Perstian woodpecker** (*Picus luteus cyanopus persicus* of Aldrovandi), the popinjay. **Latham**, 1782.—**Yellow-fronted woodpecker**, *Centurus aurifrons*, one of the zebra-woodpeckers, of Texas and southward, having the forehead and nasal plumbeous golden-yellow, the head and under parts clear ashy-gray, becoming yellowish on the belly, and the upper tail-coverts continuously white.—**Yellow-necked woodpecker**, *Gecinus chlorolophus*, a popinjay of Nepal, parts of the Himalayas, Bengal, Manipur, Assam, Burma, and the Malay peninsula. **Latham**, 1822.—**Yellow-winged woodpecker**. Same as *licker* 2.—**Zebra woodpeckers**. See *zebra-woodpecker*, and cut under *Centurus*.

wood-pewee (wùd'pē'wē), *n.* A tyrannuline, or little olivaceous flycatcher, of the genus *Contopus*, the species of which are numerous in the warmer parts of both Americas. The common wood-pewee, *C. virens*, is the most abundant of its tribe in the woodlands of many parts of North America. It resembles the water-pewee, or pewee flycatcher (compare cuts under *Contopus* and *pewee*), but is smaller (only 6 or 6½ inches long, and 10 or 11 in extent), with extremely small feet, and broad flat beak; the feet and upper mandible are black; the lower mandible is usually yellow; the eyes are brown; the plumage is olive-brown above, below dingy-whitish tinged with yellow and shaded with the color of the back, especially across the breast and along the sides. The nest is flatly saddled on a horizontal bough, stuccoed with lichens; the eggs are four or five in number, creamy-white, marked with reddish-brown and lilac spots usually wreathed about the larger end. The note is a long-drawn querulous whistle of two or three syllables, imitated in the word *pewee*. The western wood-pewee is *C. v. richardsoni*.

wood-pie (wùd'pī), *n.* The woodpecker; so called with reference to the spotted plumage; locally applied to the greater and lesser spotted woodpeckers, *Picus major* and *P. minor*, and the green woodpecker, *Gecinus viridis*. See cuts under *Picus* and *popinjay*. [Local, British.]

wood-pigeon (wùd'pī'jōn), *n.* 1. The wood-culver, wood-quest, cushat, or ring-dove, *Columba palumbus*; also, sometimes, the stock-dove, *C. œnas*. [Eng.]—2. In the western United States, the band-tailed pigeon, *Columba fasciata*. This is one of the few American pigeons congeneric with an Old World type (that figured under *white-crowned* being another). It is a large stout species (16 inches long and about 27 in extent), the adult male having the head, neck, and under parts vinaceous, fading to white on the crissum, the sides of the neck iridescent, a sharp white half-collar on the back of the neck (whence also called *white-collared pigeon*), the tail marked with a light terminal and dark subterminal bar (whence *band-tailed pigeon*), the bill yellow tipped with black, the feet yellow with black claws, and a red ring round the eye. It is of common but irregular distribution, chiefly in woodland, from the Rocky Mountains to the Pacific, feeds mainly on mast, nests in trees and bushes, and lays (as usual in this family) two white eggs.

woodpile (wùd'pīl), *n.* A stack or pile of wood, especially of wood for fuel.

And, take it in the autumn, what can be pleasanter than to spend a whole day on the sunny side of a barn or a wood-pile, chatting with somebody as old as one's self?

Haethorne, Seven Gables, iv.

wood-pimpernel (wùd'pim'pēr-nel), *n.* A European species of loosestrife, *Lysimachia nemorum*, somewhat resembling the common pimpernel.

wood-puceron (wùd'pū'se-ron), *n.* [*< wood* + *F. puceron*, *< puce*, OF. *pulec* = It. *pulec*, *< L. pulex*, flea.] A kind of aphid or plant-louse.

wood-pulp (wùd'pulp), *n.* Wood-fiber reduced to a pulp, either mechanically or chemically, for use in the manufacture of paper. Almost any wood may be used; the amount of cellulose varies from 39.41 per cent. in oak to 56.99 per cent. in fir. The easily worked woods are preferred, cottonwood and other poplars being largely used in North America. The amount thus consumed in America and continental Europe is very large. Compare *wood-paper*.

wood-quail (wùd'kwāl), *n.* Any bird of the genus *Kollulus*; a rounroul. See cut under *Kollulus*.

wood-quest (wùd'kwest), *n.* The ring-dove, *Columba palumbus*; same as *quest*.

Me thought I saw a stock-dove, or wood-quest, I know not how to term it, that brought short straws to build his nest on a tall cedar.

Lyly, Sapho and Phaon, lv. 3. (*Nares*.)

wood-rabbit (wùd'rāb'it), *n.* The common gray rabbit of the United States, *Lepus sylvaticus*. See cut under *cottontail*.

wood-rat (wùd'rāt), *n.* Any species of *Neotoma*, including large woodland rats of the United States, etc., of the family *Muridae*, subfamily *Murinae*, and section *Sigmodontes*, such as the Florida wood-rat, *N. floridana*; the Rocky Mountain wood-rat, *N. cinerea*; the California wood-rat, *N. fuscipes*; the Texas wood-rat, *N. micropus*; the ferruginous wood-rat of Mexico and Central America, *N. ferruginea*. See *pack-rat* (under *rat*), and cut under *Neotoma*.

wood-reed (wùd'rēd), *n.* See *reed* 1.

woodreeve (wùd'rēv), *n.* In England, the steward or overseer of a wood or forest.

wood-robin (wùd'rōb'in), *n.* The American wood-thrush, *Turdus mustelinus*. [Local, U.S.]

wood-rock (wùd'rōk), *n.* Ligniform asbestos.

woodruff, **woodroof** (wùd'ruf, -rōf), *n.* [Early mod. E. *woodrofe*; *< ME. woutrufe, wuderove, woderore*, *< AS. wudurofe, wuderofe*, *< wudu*, wood, + **rofe*, of uncertain meaning.] A rubiacaceous herb, *Asperula odorata*, of Europe and Asiatic Russia, more fully named *sweet woodruff*. It has a creeping rootstock sending up erect stems, the leaves whorled, chiefly in eights, the flowers small, white, in loose cymes. The plant, from the presence of coumarin, is scented like the sweet vernal-grass and sweet-clover, and in parts of Europe it is used to flavor the spring beverage called *May-drink* (which see). Woodruff is sometimes found growing near German settlements in the United States. The name is extended to the other species of *Asperula*.—**Dyers' woodruff**, *Asperula tinctoria*, of Europe, whose roots sometimes serve in place of madder.—**Quinsy-woodruff**. Same as *quinsywort*.—**Sweet woodruff**. See *def*.

wood-rush (wùd'rush), *n.* [*< wood* + *rush* 1, *n.*] A plant of the genus *Luzula*; also called *glow-worm-grass*. The field wood-rush, *Luzula campestris*, is an extremely common low plant of Europe and North America, having clusters of brown chaffy flowers appearing early in spring; in Great Britain it is locally called *black-head*- or *cuckoo-grass* and *chimney-sweeps*. A larger species, *L. sylvatica*, has the names *wood-blades* and *wood-grass*.

wood-sage (wùd'sāj), *n.* See *sage* 2.

wood-sandpiper (wùd'saud'pī-pēr), *n.* A common tattler of Europe and much of the Old World, *Totanus glareola*, of the family *Scelopax-*

Wood-sandpiper (*Totanus glareola*).

cilae, nearly related to the redshank and green-shank, and also to the American solitary sandpiper.

wood-sanicle (wùd'san'i-kl), *n.* See *sanicle*.

wood-sarer, *n.* A kind of froth seen on herbs; cuckoo-spit.

The froth which they call *woodscare*, being like a kind of spittle, is found but upon certain herbs, . . . as lavender, . . . sage, etc. *Bacon*, Nat. Hist., § 497.

wood-saw (wùd'sā), *n.* Same as *buck-saw*. See cuts under *saw*.

wood-sawyer (wùd'sā'yēr), *n.* In *entom.*, same as *sawyer*, 4.

wood-screw (wùd'skrō), *n.* A screw specially made for use in fastening together parts of wooden structures or structures of wood and metal. The modern wood-screw has generally a conical point, like that of a gimlet. See cuts under *countersink*, *screw*, and *screw-thread*.

wood-seret (wùd'sēr), *n.* and *a.* [Also *wood-seer*; *< wood* + *seret*, *scar* 1.] **I. n.** The time when there is no sap in a tree. *Tusser*, *May's Husbandry*, st. 6.

II. n. Dry; barren.

The soil . . . is a poor *wood-sere* land, very natural for the production of oaks especially.

Aubrey, Misc., p. 211. (*Davies*.)

Wood's fusible alloy. See *alloy*.

woodshed (wùd'shed), *n.* A shed for keeping wood for fuel.

She looked so much like one of Elbe's own little dolls which she had thrown into the woodshed, out of the way, that she felt ashamed. *St. Nicholas*, XVIII, 288.

woodshock (wùd'shok), *n.* [See *woodchuck* 1, applied to a different quadruped.] The pekan, fisher, or Pennant's marten, *Mustela pennanti* or *M. canadensis*, also called *black-cat* and *black-fox*. It is the largest and darkest-colored species of the genus, inhabiting North America approximately between 35° and 65° N. lat., in wooded regions of the country; it is from 2 to 3 feet long, the tail over a foot in length; the general color is black or blackish. See *pekan*, and cut under *fisher*.

wood-shrike (wùd'shrik), *n.* 1. The wood-chat.—2. An African shrike of the genus *Pri-niops*.

wood-shrimp (wùd'shrimp), *n.* A bering or terebrant amphipod, of the family *Cheluridae*. See cut under *Chelura*.

Woodsia (wùd'zi-ä), *n.* [NL. (R. Brown, 1815), named after Joseph Woods, a British botanist.] A genus of delicate polypodiaceous ferns, natives of high temperate or boreal latitudes. They are tufted ferns with the stipes often jointed and separating at the joint, and round sori borne on the back of simply forked free veins. The indusium is inferior, thin, either small and open or early bursting into irregular lobes at the top. There are 15 species, of which number 7 are found in North America. See cut under *indusium*.

wood-skin (wùd'skin), *n.* A large canoe, used by the Indians of Guiana, made from the bark of the purple heart-tree and the simari or locust-tree. Some of these canoes are large enough to carry from twenty to twenty-five persons. *Simmonds*.

wood-slave (wùd'slāv), *n.* A Jamaican lizard, *Mabouya agilis*.

woodsmán (wùd'smān), *n.*; pl. *woodsmen* (-men). One who dwells in or frequents the woods, as a wood-cutter, sportsman, hunter, or the like.

The sturdy woodsmán.

J. F. Cooper, Last of Mohicans, xxv.

Things that are common to all woodsmen.

Lovell, Study Windows, p. 202.

An Owl and a Duck will resort to the same nest-box, set up by a scheming woodsmán for his own advantage.

Encyc. Brit., III, 772.

The log was white birch. . . . Woodsmen are at a loss to account for its intense and yet chaste flame, since the bark has no oily appearance.

C. D. Warner, Backlog Studies, p. 23.

Wood's metal. See *metal*.

wood-snail (wùd'snāl), *n.* A common snail of Great Britain, *Helix nemoralis*.

wood-snake (wùd'snāk), *n.* Any serpent of the family *Dryophidae*.

wood-snipe (wùd'snip), *n.* 1. The European woodcock, *Scelopax rusticola*; so called as distinguished from the common snipe of England (*Gallinago media*). See first cut under *wood-cock*. [Local, Eng.]

The wood-snipe was considered a stupid bird.

St. James Gazette, March 14, 1887. (*Encyc. Dict.*)

2. The American woodcock, *Philoheta minor*. See second cut under *woodcock*. [Virginia.]

wood-soot (wùd'sūt), *n.* Soot from burnt wood. It has been found useful as a manure.

Wood's operation for inguinal hernia. See *operation*.

wood-sorrel (wùd'sōr'el), *n.* A plant of the genus *Oxalis*. The common wood-sorrel is *O. acetosella*. This is a low stemless species, found in damp deep shade through the north temperate zone. Its peduncles bear single delicate flowers, the petals white with light-redish veins. It has the old or local names *alleluia*, *cuckoo-bread*, *stubbwort*, etc., and it is regarded by some as the original Irish shamrock. The violet wood-sorrel, *O. violacea*, is a similar somewhat smaller American plant with violet petals, growing in less shaded ground. (See cut under *oxalis*.) *O. corniculata*, the yellow wood-sorrel, having slender leafy branching stems which are erect or procumbent, with small yellow flowers, grows nearly everywhere. The leaves in this genus contain oxalic acid, and have a sourish taste. Several Mexican and South American species yield edible tuberous roots. (See *oca* and *arracacha*.) Several exotic species are cultivated in greenhouses, as *O. purpurata*, var. *Bowiei*, with abundant flowers of a deep rose-color, *O. flava* with yellow flowers, and *O. versicolor* with flowers exhibiting a pink exterior when closed, white within, opening only in sunshine; these are all from the Cape of Good Hope.

wood-sour (wùd'sour), *n.* [Also *wood-sore*, *wood-sower*.] The wood-sorrel, *Oxalis acetosella*; sometimes, the common barberry, *Berberis vulgaris*. [Prov. Eng.]

wood-späck (wùd'spak), *n.* Same as *wood-spite*. [Prov. Eng.]

wood-spirit (wùd'spīr'it), *n.* Same as *pyroxylic spirit*. See *pyroxylic*.

wood-spite (wùd'spīt), *n.* [*< wood* + *spite*, var. of *spight*.] The green woodpecker, *Gecinus viridis*. Also *wood-späck*. *Willughby*; *Ray*. See cut under *popinjay*. [Prov. Eng.]

wood-spurge (wùd'spūrj), *n.* See *spurge* 2.

wood-stamp (wùd'stāmp), *n.* A stamp, engraved or carved in wood, for impressing figures or colors on fabrics.

wood-star (wud'stär), *n.* 1. A humming-bird of the genus *Calothorax*, as *C. calliope*.—2. The Bahama sheartail, a humming-bird, *Dorieha eclymæ*, common in New Providence and Andros islands. See *sheartail*.

wood-still (wud'stil), *n.* A turpentine-still.

wood-stone (wud'stön), *n.* Petrified wood; especially, silicified wood, such as that from Antigua, the desert of Cairo, etc.

wood-stork (wud'störk), *n.* A stork of the subfamily *Tantalinae*, more commonly and less correctly called *wood-ibis*. See cut under *Tantalus*.

wood-stove (wud'stöv), *n.* A stove specially adapted for burning wood, as distinguished from a coal-stove, gas-stove, etc.

wood-strawberry (wud'strä'ber-i), *n.* See *strawberry*.

woodsucker (wud'suk'er), *n.* The green woodpecker, *Geococcyx viridis*. Compare *sapsucker*. See cut under *popinjay*. [New Forest, Eng.]

wood-swallow (wud'swol'sö), *n.* The Anglo-Australian name of any bird of the family *Artamidae*; a swallow-shrike (which see, with cut).

wood-swift (wud'swift), *n.* The moth *Epiplias sylvinus*. See *swift*, 7.

woody (wud'zi), *a.* [*< woods, pl. of wood*¹, + *-y*¹.] Belonging to or associated with woods; peculiar to or characteristic of woods: as, a *woody stream*; a *woody flavor*. [U. S.]

Harry, Tina, Esther, and I ran up and down and in and about the piles of wood that evening with a joyous satisfaction. How fresh and spicy and *woody* it smelt! I can smell now the fragrance of the hickory, whose clear, oily bark in burning cast forth perfume quite equal to cinnamon. *H. B. Stowe, Oldtown, p. 485.*

*Woody and wild and lonesome,
The swift stream wound away.
Whittier, Cobbler Keezer's Vision.*

woodtapper (wud'tap'er), *n.* A woodpecker. Also *woodtopper*. [Prov. Eng.]

wood-tar (wud'tär), *n.* Tar obtained from wood. See *tar*¹.

wood-thrush (wud'thrush), *n.* 1. The mistle-thrush. [Local, Scotland.]—2. In the United States, *Turdus (Hylocichla) mustelinus*, a beautiful thrush of a russet hue above, passing into olivaceous on the rump and tail, the under parts pure white or faintly tinged with buff on the breast, with a profusion of arrow-headed blackish spots. It is 7½ to 8 inches long, and about 13 in extent. It abounds in copses and woods of eastern parts of the United States, is an exquisite songster, and nests in bushes or low trees, laying four or five robin-blue eggs without spots, 1½ inches long by ¾ inch broad. It is migratory, breeds throughout its range, and is rather southerly, not going north of New England. It is the most strongly marked species of its subgenus. The name is sometimes extended to the several species of the same subgenus (*Hylocichla*), as the hermit-thrush, the olive-back, the veery, and others. Also locally called *wood-robin*.

To her grave sylvan nooks
Thy steps allure us, which the *wood-thrush* hears
As maids their lovers', and no treason fears.
Lovell, To Whittier.

wood-tick (wud'tik), *n.* 1. Any tick of the family *Ixodidae*. See *Ixodidae, tick*², and cut under *Acarida*.—2. A small insect which ticks in the woodwork of houses; the death-watch. See cut under *death-watch*.

wood-tin (wud'tin), *n.* A nodular variety of cassiterite, or tin-stone, of a brownish color and fibrous structure, and somewhat resembling dry wood in appearance.

woodtopper (wud'top'er), *n.* Same as *wood-tapper*.

wood-tortoise (wud'tör'tis), *n.* See *tortoise*.

wood-vetch (wud'vech), *n.* See *vetch*.

wood-vine (wud'vin), *n.* The bryony.

wood-vinegar (wud'vin'gär), *n.* See *vinegar*.

wood-violet (wud'vi'ö-let), *n.* 1. Same as *hedge-violet*.—2. The bird's-foot violet.

wood-wagtail (wud'wag'täl), *n.* See *wagtail*.

woodwale (wud'wäl), *n.* [Also *woodcall*, and formerly *woodcote, woodweele*; also *witcall*, *q. v.*; *< ME. wudewale, wodewale (= MD. wudewael, weedeuwal = MLG. wedeuwal = MHG. witeuwal, G. wittewal)*; *< wood*¹ + *-wale* (uncertain).] The woodhack; a woodpecker, as the yaffle.

Wodeuale, bryd, idem quod reynfowle (or wodehake) supra et lucar. Prompt. Parv., p. 531.

In many places were nyghtingales,
Alpes, fynches, and *wodeuales*.
Rom. of the Rose, l. 658.

The *wodeuale* beryde als a belle,
That all the wode abowte me ronge.
Thomas of Erceuldoune (Child's Ballads, l. 98).

The *woodweele* sang, and wold not cease,
Sitting upon the spraye.
Robin Hood and Guy of Gisborne (Child's Ballads, V. 160).

wood-walker (wud'wä'kär), *n.* A book-name of any of the gibbons, as members of the genus *Hylobates*.

wood-wal (wud'wäl), *n.* Same as *woodwale*.

wood-warbler (wud'wär'blär), *n.* A bird which warbles in the woods. Specifically—(a) In Great Britain, the yellow willow-warbler, or wood-wren, *Sylvia or Phylloscopus sibilatrix* (the *Sylvia sibilatrix* of some authors), a small migratory species of the subfamily *Sylviinae*, or true warblers, common to much of Europe and northern Africa. See cut under *wood-wren*. (b) In the United States, a bird of the beautiful and extensive family *Mniotiltidae* or *Dendroicae*, the American warblers, as distinguished from the Old World *Sylviidae*; especially, a bird of the genus *Dendroica*, of which more than 20 species inhabit the United States. The beauty and variety of this genus are displayed to best advantage in the woodland of the eastern United States, where the numerous species are conspicuous ornaments of the forest scene. In most parts of the United States the wood-warblers are migratory birds, coming with great regularity in the spring, each in its own time, abounding for a season, and then passing on to reappear in even greater profusion during the autumn. See *warbler*, where all the species that have English names are defined.

woodward (wud'wärd), *n.* [*< ME. wodeward; < wood*¹ + *ward*¹, *n.* Hence the surname *Woodward*.] A forester; a landreeve.

She [a forest] hath also her peculiar Officers, as Foresters, Verderers, Regarderers, Aglaters, &c. Whereas a Chase or Park hath only Keepers and *Woodwards*.
Howell, Letters, iv. 16.

The *wood-ward*, who watched the forest, could claim every tree that the wind blew down.
J. R. Green, Conq. of Eng., p. 317.

Woodwardia (wud-wär'ti-ä), *n.* [NL. (Smith, 1790), named after Thomas J. Woodward, an English botanist.] A small genus of polypodiaceous ferns, the chain-ferns, mostly natives of north temperate regions. They are large ferns with pinnatifid or pinnate fronds, and linear or oblong sori which are sunk in cavities of the frond, arranged in a chain-like row parallel to the midrib of the pinna. The indusium is fixed by its outer margin to the fruiting veinlet, and covers the cavity like a lid. Of the 6 species 3 are found in North America. See also cut under *sorus*.

woodwardite (wud-wärd-it), *n.* [Named after Dr. S. P. Woodward (1821-65).] A hydrous sulphate of copper, occurring in concretionary forms of a blue color, found in Cornwall, England.

woodwardship (wud-wärd-ship), *n.* [*< woodward* + *-ship*.] The office of woodward.

Also Mr. Hungerford has engrossed the above spoils and 60 more trees at 4/- by conveyance of Mr. Inkpen, who sold him the *woodwardship* of that manor for 33/4.
Darrell Papers (H. Hall's Society in Elizabethan Age, [App., ii.])

wood-wasp (wud'wesp), *n.* 1. A European social wasp, or paper-wasp, *Vespa sylvestris*, which hangs its nest in a tree.—2. A wasp which burrows in wood, as certain species of *Crabronidae*. The female, by means of her strong broad mandibles, excavates cells in the sand or in rotten timber, in which she deposits her eggs, with larvae or insects as food for her progeny when hatched. These insects are extremely active in their habits, and fond of the nectar of flowers. The larger species are marked with yellow rings, while those of the smaller are generally black. See cut under *Crabro*.

3. A horn-tail; any member of the *Uroceridae* (or *Siricidae*), the larvae of all of which are wood-borers; a tailed wasp, as *Urocerus* or *Sirex gigas*.

wood-wax (wud'waks), *n.* [Also *wood-waxen*, and *woodwaxen* (simulating *wood*); *< ME. wode-waxe, < AS. wuduweaxe, < wudu, wood, + weax, wax (?)*.] Same as *woodwaxen*.

wood-waxen (wud'wak'sn), *n.* Same as *wood-wax*.

woodweelet, woodwelet, n. Obsolete forms of *woodcalle*.

wood-widgeon (wud'wij'on), *n.* See *widgeon*, 2 (e).

wood-wool (wud'wül), *n.* Fine shavings made from pine wood, specially prepared and used as a surgical dressing.

woodwork (wud'wörk), *n.* Objects, or parts of objects, made of wood; that which is produced by the carpenters' or joiners' art; generally applied to details rather than to complete

structures: as, the *woodwork* of a house (that is, the inner fittings, etc.).

A young man has some reason to be displeas'd when he finds the girl of his heart hand in hand with another young gentleman in an occult and shady recess of the *wood-work* of Brighton Pier.
Thackeray, Philip, xiv.

The rich painting of the *wood-work* was beginning to fade.
B. Taylor, Lands of the Saracen, p. 128.

woodworker (wud'wör'kär), *n.* 1. A worker in wood, as a carpenter, joiner, or cabinet-maker.—2. A power-machine for jointing, molding, squaring, and facing wood. It is made adjustable, and has various attachments for work of different kinds.—**Universal woodworker**, a combination machine for working in wood, so made that the two sides can work independently or in concert, as may be desired. Such machines are adapted for a great variety of work, as chamfering, graining, tenoning, crosscutting, and mitering. *E. H. Knight.*

wood-worm (wud'wörm), *n.* A worm, grub, or larva that is bred in wood.

woodwose, *n.* [Also, corruptly, *woodhouse*; *< ME. woodwose, wodewose, wodewese, woodwyse, wowyse*; *< AS. wudewasa*, a man of the woods, a faun or satyr, *< wudu, wood, + *wasa*, prob. 'a being,' *< wesan*, dial. *wosan*, be: see *was*.] A wild man of the woods; a satyr or faun. Representations of woodwoses often appear in heraldry as supporters.

Woodwos, that woned in the knarrez [rocks].
Sir Gawayne and the Green Knight (E. E. T. S.), l. 721.

In he schokkes his schelde, schountes he no lengare;
Bot alles unwyse *wodewyse* he wente at the gayneste.
Morte Arthure (E. E. T. S.), l. 3818.

Some like brute beasts grazed upon the ground, some went naked, some roamed like *woodwoses*.
Sir T. Wilson (Arber's Eng. Garner, l. 464).

wood-wren (wud'ren), *n.* 1. Either one of two small woodland birds of Europe, belonging to the subfamily *Sylviinae*. (a) The willow-warbler or willow-wren, *Phylloscopus trochilus*. (b) The true wood-warbler, or yellow willow-wren, *Phylloscopus sibilatrix*:

Chain-fern (*Woodwardia virginica*), a, pinnae, showing the fruit-dots (sori).

Yellow Wood-wren (*Phylloscopus sibilatrix*).

the preferable use of the name. The two species, though quite distinct, are much alike and often confounded. Neither is a wren in a proper sense.

2†. A supposed species of true wren, described by Audubon in 1834 as *Troglodytes americanus*, but not different from the common house-wren of the United States.

wood-wroth (wud'röth), *a.* Angry to the extent of madness. [Scotch.]

When he saw dear heart's blood,
A *wood-wroth* waxed he.
Lord Thomas and Fair Annet (Allingham's Ballad-Book).

woodwyset, n. See *woodwose*.

woody (wud'i), *a.* [Early med. E. also *woodie, woddy*; *< ME. wody, wod, woody; < wood*¹ + *-y*¹.] 1. Abounding with wood; wooded: as, *woody land*; a *woody region*.

It is all *woody*, but by the Sea side Southward there are sands like downes.
Quoted in *Capt. John Smith's Works, II. 277.*

oft in glimmering bowers and glades
He met her, and in secret shades
Of *woody* Ida's inmost grove.
Milton, II Penseroso, l. 29.

A slanting ray lingered on the *woody* crests of the precipices that overhung some parts of the river, giving greater depth to the dark-gray and purple of their rocky sides.
Irving, Sketch-Book, p. 438.

2. Pertaining to or belonging to the woods; dwelling or situated in the woods; peculiar to a wood or forest; sylvan; woodland; woody.

All the Satyres scorn their *woody* kind.
Spenser, F. Q., I. vi. 18.

The Brachmans, which he in his Indian travels had found in a *woodie* solitariness.
Purchas, Pilgrimage, p. 367.

3. Consisting of or containing wood; ligneous: as, the *woody* parts of plants.

Herbs are those plants whose stalks are soft, and have nothing *woody* in them, as grass, sowthistle, and hemlock.
Locke, Elem. of Nat. Philos., ix.

4. Peculiar to or characteristic of wood: as, a *woody* scent or flavor.—**Glandular woody fiber.**

See *glandular*.—**Woody fiber**, the fiber of wood. See *vegetable fibers* (under *fiber*), *wood-cell*, and *woody tissue*, below.—**Woody layers**. See *layer*.—**Woody mullen**, the Jerusalem sage, *Phlomis frutescens*.

Verbesco, wooll-blade, torche-herbe, lung-woort, hares-beard, french-sage, higtaper, or wooddi-mullen. *Florio*.
Woody nightshade. See *nightshade*, 1 (a).—**Woody stem**, in bot., a stem of a hard or woody nature, which lasts for many years, as the trunks of trees.—**Woody tissue**, in bot., vegetable tissue composed chiefly of wood-cells. See *wood-cell* and *tissue*, 4.

wooper (wó'ér), *n.* [Early mod. E. also *wower*; < ME. *wowere*, *wowar*, *woware*, *wowere*, < AS. *wōgere*, a wooper, < *wōgian*, woo: see *wool*.] One who woos. (a) One who courts or solicits in love; a suitor.

"By my feith, trere," quod I, "ge faren lyke thise *woweres* That wedde none wydwes but forto weldre here godis."
Piers Plowman (B), xl. 71.

I'll mark no words that smooth-faced *wowers* say.

Shak., L. L. L., v. 2. 838.

(b) One who promotes the marriage of another; a match-maker.

Wovar, or he that wowythe for another. *Pronuba*, *paranymphus*.
Prompt. Parv., p. 533.

woof (wóf), *n.* [Altered, by initial conformity with *weave*, *welt*, *web*, from *oof*, < ME. *oof*, < AS. *ōweft*, *ōweb*, *āweb*, contr. to *āwaf*, *woof*, < *āwefan* in pp. *āwefan*, *weave*, < *ā* + *wēfan*, *weave*: see *a-* and *weave*.] 1. The thread that is carried by the shuttle and is woven into the warp by being passed back and forth through successive sheds, or partings made in the warp or lengthwise threads by the action of heddles; the threads that run from side to side of a web; the weft.

The placing of the tangible parts in length or transverse, as in the warp and the *woof* of textile, is more inward or more outward.
Bacon, *Nat. Hist.*

2. Texture; cloth: as, a pall of softest *woof*.

There was an awful rainbow once in heaven:
We know her *woof*, her texture; she is given
In the dull catalogue of common things.

Keats, *Lamia*, ii.

His movements were watched by hundreds of natives, . . . an exceedingly tall race, almost naked, . . . the women circled with a *woof* of painted feathers, or a deerskin apron.
Bancroft, *Hist. U. S.*, 1. 34.

woofy (wó'fi), *a.* [*woof* + *-y*.] Having a close texture; dense: as, a *woofy* cloud. *J. Baillie*.

woohoo (wó-hó'), *n.* The sail-fish: same as *boohoo* (where see *cut*).

wooingly (wó'ing-li), *adv.* In a wooing manner; enticingly; with persuasiveness.

Heaven's breath

Smells *wooingly* here. *Shak.*, *Macbeth*, i. 6. 6.

wool, *n.* A Middle English form of *weel*.¹

wool (wól), *n.* [Formerly also *wooll*; *Se. wool*; < ME. *woll*, *wolle*, *wulle*, < AS. *wull*, *wul* = OFries. *wolle*, *ulle* = D. *wol* = LG. *wulle* = OHG. *wolla*, MHG. *G. wolle* = Icel. *ull* = Sw. *ull* = Dan. *uld* = Goth. *wulla*, *wool* (Teut. **wolla*, assimilated from **wolna*), = OBulg. *vŭna* = Lith. *vilna* = Russ. *vólna* = L. *villos*, shaggy hair, *vellus*, a fleece, *wool*, = Skt. *árnā*, *wool*; lit. a 'covering,' formed, with suffix *-na*, from a root seen in Skt. *√ var*, *cover*. Connection with Gr. *ἐπιον*, *wool*, *εἶπος*, *wool*, *ὄλιος*, *woolly*, *shaggy*, *thick*, etc., is doubtful.] 1. The fine, soft, curly hair which forms the fleece or fleecy coat of the sheep and some other animals, as the goat and alpaca, in fineness approaching fur. The wool or fleece of the sheep furnishes the most important material for clothing in all cold and temperate climates. The felting property from which wool derives its chief value, and which is its special distinction from hair, depends in part upon the kinks in the shaft or fiber, but mainly upon the scales with which the surface is imbricated. These scales are minute, from about 2,000 to nearly 4,000 to the inch, and whorled about the stem in verticils; the stem itself is extremely slender, being less than one thousandth of an inch in diameter. Wool is kept soft and pliable by the wool-oil, commonly called *yolk*. In different animals wool shades by imperceptible degrees into hair; and that of the sheep simply represents an extreme case of the most desirable qualities, namely, fineness, kinkiness, and scalliness of the fiber, together with its length, strength, and luster, and the copiousness of the fleece, which consists entirely of wool, without hair; in all of which particulars the wool of the different breeds of sheep varies to a degree. (Compare *def. 2*.) Wool when shorn is divided into two classes, *short wool*, or *carding-wool*, seldom exceeding a length of 3 or 4 inches, and *long wool*, or *combing-wool*, varying in length from 4 to 8 inches, each class being subdivided into a variety of sorts, according to the fineness and soundness of the staple. The finest wools are of short staple, and the coarser wools usually of long staple. Wools which unite a high degree of fineness and softness with considerable length of staple bear a high price. English-bred sheep produce a good, strong *combing-wool*, that of the Scotch breeds being somewhat harsher and coarser. The finest *carding-wools* were formerly exclusively obtained from Spain, the native country of the merino sheep, and at a later period extensively from Germany, where that breed had been successfully introduced and cultivated. Immense flocks of merinos are now reared in Australia, North and South America, and South Africa.

Chaucer, *Good Women*, l. 1721.

Wool is a modified form of hair, distinguished by its slender, soft, and wavy or curly structure, and by the highly imbricated or serrated surface of its filaments.
Encyc. Brit., XXIV. 653.

2. The fine, short, thick underfur or down of any animal, as distinguished from the longer and stiffer hairs which come to the surface of the pelage. Most hairy animals have at least two coats, one of long and comparatively straight, stout, stiff hairs, the other of wool. See *underfur*.

Mandeville, *Travels*, p. 208.

Eye of newt and toe of frog,

Wool of bat and tongue of dog.

Shak., *Macbeth*, iv. 1. 15.

3. The short, crisp, curly or kinky hair of the head of some persons, as negroes; humorously, the hair of any person's head. [Colloq.]

From a strange freak of nature, not unusual in these Virginian mountains, his knotty *wool* was of a pale taw-color.
Harper's Mag., LXXVI. 203.

4. Any light, downy, fleecy, or floeculent substance resembling wool. (a) The dense furry or woolly coat of many insects, as the pubescence covering the moths known as *millers*, that on various caterpillars, that spun by various larvae for a case or cocoon, etc. Secretions of various insects are very nicely graded from a solid waxy consistency through various frothy states to a light dry fleecy condition resembling wool: see *wax-insect*, *spittle-insect*, and *woolly aphid* (under *woolly*). In another large class of cases the spun-out secretion is goat's hair, cobweb, or true silk. See these words, and *silkworm*. (b) In bot.: (1) A sort of down or pubescence, or a clothing of dense curly hairs, on the surface of certain plants. woot¹, A Middle English form of wol. See wit¹, v. wootz (wōts), n. [Supposed to be an orig. error or misprint, perhaps for *wook, repr. Cananese ukku (pron. wukkn), steel.] The name given to steel made in India by fusing iron with carbonaceous matter. This is done in small crucibles holding a pound or two of the iron, and the wood selected to furnish the carbon to the metal is always that of Cassia auriculata, which is cut into small pieces, the same being done with the iron, and the whole covered by one or more green leaves, usually of a species of Convolvulus, the crucible being then covered with a lid of clay. A number of these crucibles are placed together in a hole dug in the ground, and heated in a charcoal fire urged by a pair of bellows made of ox-hide, the blast being kept up for three or four hours. The steel thus obtained is hard in temper, and requires much care in working. This is the oldest method of making steel of which anything definite is known, having been in use, without change, for an indefinite length of time, and being, as generally believed, original with the Hindus.

wop (wop), v. t.; pret. and pp. wopped, ppr. wopping. Same as whop.

Gr. eipeiv, speak, epeiv, question, pŕiptw, speaker, etc. (see rhetor). Doublet of verb.] 1. A sound, or combination of sounds, used in any language as the sign of a conception, or of a conception together with its grammatical relations; the smallest bit of human language forming a grammatical part of speech; a vocable; a term. A word may be any part of speech, as verb, noun, particle, etc.; it may be radical, as love, or derivative, as lover, lovely, loveliness, or an inflected form, as loves, loved; it may be simple, or compound, as love-sick. Anything is a word that can be used as an individual member of a sentence, and that is not separable into parts usable independently and coordinately in making a sentence. A word is a spoken sign that has arrived at its value as used in any language by a series of historical changes, and that holds its value by virtue of usage, being exposed to such further changes, of form and of meaning, as usage may prescribe. The conception involved in a word may be of any grade, from the simplest, as one, to the most derived and complicated, as political, and the grammatical relations involved may also be of any degree, from true to untruthfulness, or from (Latin) ana to amabitur.

Practise all things chiefly at two several times, the one when the mind is best disposed, the other when it is worst disposed; that by the one you may gain a great step, by the other you may work out the knots and stounds of the mind. *Bacon, Advancement of Learning, ii. 296.*

So the pure limpid stream, when foul with stains Of rushing torrents and descending rains, Works itself clear, and as it runs refines. *Addison, Cato, I. 6.*

9. To manage or turn to some particular course or way of thinking or acting by insidious means; influence in some respect by plying with arguments, urgings, threats, bribes, etc.; prevail on or gain over; induce; persuade; lead: as, to work the committee; to work the jury.

There is noe hope that they will ever be wrought to serve faithfully agaynst theyr old frendes and kinsemen. *Spenser, State of Ireland.*

I will try his temper; And, if I find him apt for my employments, I'll work him to my ends. *Fletcher, Spanish Curate, v. 1.*

The Clergy being thus brought on, on the nine and twentieth of April, the Cardinal came into the House of Commons, to work them also. *Baker, Chronicles, p. 270.*

Many of the Jews were wrought into the belief that Herod was the Messias. *Sir T. Browne, Vulg. Err., I. 3.*

10. To excite by degrees; bring into a state of perturbation or passion; provoke; agitate.

Some passion That works him strongly. *Shak., Tempest, iv. 1. 144.*

Sir Lucius has wrought me to it. He has left me full of rage—and I'll fight this evening, that so much good passion mayn't be wasted. *Sheridan, The Rivals, iv. 1.*

11. To succeed in effecting, attaining, or making; win by labor; achieve: as, to work a passage through something.

Through winds and waves and storms he works his way. *Addison, Cato, I. 3.*

Some months afterwards Amory made his appearance at Calcutta, having worked his way out before the mast from the Cape. *Thackeray, Pendennis, xxv.*

We passed heavily laden junks slowly working their way upstream amidst what to any but the Chinese would have appeared insurmountable difficulties. *The Century, XLI. 729.*

12. To endeavor; attempt; try.

By reason she was fast in the latch of our cable . . . she could not cleare her selfe as she wrought to doe. *Quoted in Capt. John Smith's Works, II. 43.*

13. To operate on, as a purgative or other drug; purge.

Every time it operates, it carries off a Distemper; but if your Blood's Wholesome, and your Body Sound, it will work you no more than the same quantity of Ginger bread. *Quoted in Ashton's Social Life in Reign of Queen Anne, [II. 106.]*

14. To ply one's trade, calling, vocation, or business in; carry on operations in or on: as, to work a district in canvassing for a publication. [Colloq.]

I've worked both town and country on gold fish. I've served both Brighton and Hastings. *Mayhew, London Labour and London Poor, II. 91.*

As a general rule, the "casual ward" of a workhouse, so far from being the temporary refuge of deserving poor, is a place of rendezvous for thieves and prostitutes and other vagabonds of the lowcat class, gangs of whom work allotted districts, and make their circuits with as much regularity as the Judges.

A. Doyle, quoted in Ribton-Turner's Vagrants and [Vagrancy, p. 293.]

The first day I started alone to explore the forest with gun and dog, leaving my friends to work the river. *Fortnightly Rev., N. S., XLIII. 632.*

15. To exact labor or service from; keep busy or employed: as, he works his horses too hard.

Until the year 1830, the people (in Great Britain) had been forbidden to combine, their only power against employers who worked them as many hours a day as they dared, and paid them wages as small as they could, who took their children and locked them up in unwholesome factories, was in combination, and they were forbidden to combine. *W. Besant, Fifty Years Ago, p. 80.*

16. To solve: as, to work a sum in arithmetic or a problem in algebra. [Colloq.]—**17.** To cause to ferment: said of anything which is put into a liquid for that purpose.—**To work an observation.** See *observation*.—**To work a traverse.** See *traverse sailing*, under *sailing*.—**To work in.** (a) To intermix, as one material with another, in the process of manufacture or the like; weave or stir in: as, he worked the good yarn in with the bad. (b) To cause to enter or penetrate by repeated efforts: as, the wire was slowly worked in.—**To work into.** (a) To introduce artfully; insinuate: as, he easily works himself into confidence by

his plausibility. (b) To change or alter by gradual process or influence.

This imperious man will work us all From princes into pages. *Shak., Hen. VIII., ii. 2. 47.*

To work off, to get rid of; free or be freed from, or from the effects of; discharge; c. acute; as, to work off the effects of a debauch.—**To work one's passage,** to give one's work or services as an equivalent for passage-money.—**To work one's will.** See *will*.—**To work out.** (a) To effect or procure by continued labor or exertion; accomplish.

Work out your own salvation with fear and trembling. *Phil. ii. 12.*

Who can hide, When the malicious Fates are bent On working out an ill intent? *Wordsworth, The Waggoner, iv.*

O lift your natures up: Embrace our aims: work out your freedom. *Tennyson, Princess, ii.*

(b) To elaborate; develop; reduce to order; study out.

She [Italy] did not work out the basilican type for herself; she left it to others to do that for her, and consequently never perfectly understood what she undertook or why it was done. *J. Ferguson, Hist. Arch., I. 428.*

The minerals, which are now in the British Museum, were worked out by Mr. Davies of that establishment. *Amer. Jour. Sci., 3d ser., XLI. 406.*

(c) To solve, as a problem. *Mal. M.,—Malvolto; M.,—why, that begins my name—Fab. Did not I say he would work it out? Shak., T. N., ii. 5. 139.*

(d) To erase; efface; remove. *Tears of joy, for your returning guilt, Work out and expiate our former guilt. Dryden, Astraea Redux, I. 275.*

(e) To exhaust: as, to work out a mine or quarry.—**To work out a day's work (naut.),** to compute a ship's position from the course and distance sailed.—**To work the twig.** See *twig 1*.—**To work up.** (a) To excite; stir up; raise; rouse.

It is no very hard Matter to work up a heated and devout Imagination to the Fancy of Raptures and Ecstasies and Mystical Unions. *Stillingfleet, Sermons, III. iii.*

We cannot but tremble to consider what we are capable of being wrought up to, against all the ties of nature, love, honour, reason, and religion. *Steele, Tatler, No. 172.*

They [the Moslems] work themselves up to such agonies of rage and lamentation that some, it is said, have given up the ghost from the mere effect of mental excitement. *Macaulay, Lord Clive.*

(b) To use up in the process of manufacture or the like; expend in any work: as, we have worked up all our materials.

The industry of the people works up all their native commodities to the last degree of manufacture. *Swift.*

(c) To expand; enlarge; elaborate: as, to work up a story or an article from a few hints.

We have read of "Handkerchief Moody," who for some years persisted in always appearing among men with his face covered with a handkerchief.—an incident which Hawthorne has worked up in his weird manner into the story of "The Minister with the Black Veil."

H. B. Stowe, Oldtown, p. 454.

(d) To master by careful study or research: as, to work up a theme. (e) To achieve or attain by special effort: as, to work up a reputation for one's self. (f) *Naut.*, to discipline or punish by setting at an unnecessary or hateful job, like scarping the anchor-chain. Such a piece of work is called a working-up job.—**To work water.** See the quotation.

Water is also frequently carried over from the boiler with the steam. When this occurs the boiler is said to prime, or to work water. *Forney, Locomotive, p. 170.*

work (wĕrk), *n.* [*ME. work, wĕrk, wure, wore, were, weore, c. AS. weore, wore, were = OS. OFries. D. werk = LG. work = OHG. werch, werah, MHG. were, G. werk = Icel. Sw. verk = Dan. værk = Goth. ga-wurki; cf. Gr. ipyov, work; see work, v.*] 1. Effort or exertion directed to the accomplishment of some purpose or end; expenditure of strength, energy, etc.; toil; labor; striving.

Fie upon this quiet life! I want work. *Shak., I Hen. IV., ii. 4. 118.*

Man hath his daily work of body or mind Appointed. *Milton, P. L., iv. 618.*

Here, work enough to watch The Master work, and catch Hints of the proper craft. *Browning, Rabbi Ben Ezra.*

2. Opportunity of expending labor (physical or mental) in some useful or remunerative way, especially as a means of earning a livelihood; employment: something to do: as, to be out of work; to look for work.—**3.** That upon which one is employed or engaged, and in the accomplishment of which labor is expended or some operation performed: a task, undertaking, enterprise, or project.

If it would please Him whose work it is to direct me to speake such a word over the sea as the good old woman of Abel did over the wall in the like exigent. *N. Ward, Simple Colder, p. 33.*

The great work of erecting a way of worshipping of Christ in church fellowship. *N. Morton, New England's Memorial, p. 160.*

To her dear *Work* she falls; and, as she wrought,
A sweet Creation followed her hands.

J. Beaumont, Psyche, iii. 61.

4. Something accomplished or done; doing; deed; achievement; feat; performance.

Thei knowlechen wel that the *Workes* of Jesu Crist ben gode, and his *Workes* and his *Deedes* and his *Doctryne* by his *Gospelles* weren trewe, and his *Meracles* also trewe.

Mandeville, Travels, p. 134.

It is a damned and a bloody *work*;
The graceless action of a heavy hand,
If that it be the *work* of any hand.

Shak., K. John, iv. 3. 58.

A people of that beastly disposition that they performed the most secret *work* of Nature in publique view.

Purchas, Pilgrimage, p. 323.

Once more,
Act a brave *work*, call it thy last adventury.

B. Jonson, Epigrams, cxxxiii.

It would be easy to multiply illustrations of the difference between . . . the philosophy of words and the philosophy of *works*.

Macaulay, Lord Bacon.

5. *pl.* In *theol.*, acts performed in obedience to the law of God. According to Protestant theology, such *works* would be meritorious only as they constituted a perfect and complete observance of the law; according to Roman Catholic theology, such *works*, if proceeding from grace and love, are so far acceptable to God as to be truly deserving of an eternal reward. See *supererogation*.

And gif I shal werke be here *werkis* to wyne me henene,
And for here *werkis* and for here wyt wende to pync,
Thanne wrougte I vnwisly with alle the wyt that I here!

Piers Plowman (A), xl. 268.

For by grace are ye saved through faith: and that not of yourselves; it is the gift of God: not of *works*, lest any man should boast

Eph. ii. 9.

6†. Active operation; action.

Where pride, fulness of bread, and abundance of idleness set them on *work* against God.

Purchas, Pilgrimage, p. 41.

7. Ferment; trouble. [*Rare.*]

Tokay and Coffee cause this *Work*
Between the German and the Turk.

Prior, Alma, iii.

8. That which is made or manufactured; an article, fabric, or structure produced by expenditure of effort or labor of some kind, whether physical or mental; a product of nature or art.

The *work* some praise,
And some the architect.

Milton, P. L., i. 731.

Hence, specifically—(a) That which is produced by mental labor; a literary or artistic performance; a composition: as, the *works* of Addison; the *works* of Mozart. See *opus*.

You are rapt, sir, in some *work*, some dedication
To the great lord.

Shak., T. of A., i. 1. 19.

No other Poet that I know of [save Ben Jonson], in those days, gave his Plays the pompous Title of *Works*; of which Sir John Suckling has taken notice in his Sessions of the Poets. . . . This puts me in mind of a Distick directed by some Poet of that Age to Ben Jonson:

Pray, tell me, Ben, where does the myst'ry lurk?
What others call a Play, you call a *Work*;
which was thus answer'd by a Friend of his:

The Author's Friend thus for the Author says,
Ben's Plays are *Works*, when others *Works* are Plays.

Langbaine, Eng. Dramatick Poets (1691), p. 264.

When I contemplate a modern library, filled with new *works* in all the bravery of rich gilding and binding.

Ireing, Sketch-Book, p. 165.

(b) An engineering structure, as a building, dock, embankment, bridge, or fortification.

And now ye Sarrazins have taken vp the stones of the same tumber and put them to the *workes* of their Muskey.

Sir R. Guylforde, Pylgrymage, p. 52.

I will be walking on the *works*.

Shak., Othello, iii. 2. 3.

Don Guzman, . . . who commanded the sortie, ought to have taken the *work* out of hand, and annihilated all therein.

Kingsley, Westward Ho, ix.

Frail were the *works* that defended the hold that we held with our lives.

Tennyson, Defence of Lucknow.

(c) Design; pattern; workmanship.

Ther ys a gret Chalys of fine gold of Curus *werke*.

Torkington, Diarie of Eng. Travell, p. 11.

Let there be three or five fine cupolas in the length of it, placed at equal distance, and fine coloured windows of several *works*.

Bacon, Building (ed. 1857).

All his followers likewise were, in their faces, in part or in whole, painted, . . . some with crosses and other antick *works*.

Mour's Journal, in Appendix to New England's Memorial, p. 355.

(d) Embroidery; ornamental work done with the needle; needlework.

I am glad I have found this napkin.
. . . I'll have the *work* ta'en out,
And give t' Lago.

Shak., Othello, iii. 3. 296.

I never saw any thing prettier than this *Work* on your Point D'espaigne.

Etherege, Man of Mode, iii. 2.

9. An establishment for manufacturing, or for performing industrial labor of any sort: generally in the plural, including all the buildings, machines, etc., used in the required operations: as, iron-*works*; hence the plural is used as a collective singular, taking then a singular article: as, there is a large glass-*works* in the town.

They have a Salt *Work*, and with that salt preserve the fish they take.

Capl. John Smith, Gen. Hist. Virginia

[Arber's Eng. Garner, II. 285.]

Whereupon he gott a patent of the king (Cha. I.) for an allum *work* (which was the first that ever was in England), which was worth to him two thousand pounds per annum, or better.

Aubrey, Lives (Thomas Chaloner).

10. In *mech.*: (a) The product of a force by the component displacement of its point of application in the direction of the force; or, if this is variable, the integral of all successive infinitesimal such products for any motion of the point of application. The work is thus the same whatever be the velocity of the motion or the mass moved, so long as the force and the displacement are the same. Thus, if an electrified body is moved by an electrical force along a horizontal surface, the work is the same whatever be the mass of the body moved. But the same electrical force moves the body for the same distance but upward against gravity, less work on the whole is done, since the force of gravity does a part of the work which the electrical force performs. Negative work, or work *undone*, is also called *resistant work*, in contradistinction to *motor work*. The total work performed upon a particle is equivalent to the kinetic energy it gains; the total work *undone*, to the kinetic energy it loses. If a force is resisted by friction, the same amount of work is done as if it were not resisted; for, though the resultant force upon the mass moved is less by the amount of the friction, so that less work is done upon the mass as a whole, yet heat is produced, and the particles receive displacements in the direction of the action of friction, the work of which makes up the balance. *Mechanical work* is work done in the displacement of sensible masses, as opposed to work done in the displacement of molecules. If a gun is shot off in a horizontal direction, a force is brought to bear upon the bullet, and in carrying this a certain distance work proportional to the acceleration is performed: at the same time, the heat of the confined gases is reduced by a proportional amount, and heat is said to be transformed into mechanical work.

We have thus arrived at the immensely important conclusion that no heat-engine can convert into *work* a greater fraction of the heat which it receives than is expressed by the excess of the temperature of reception above that of rejection divided by the absolute temperature of reception.

Encyc. Brit., XXXI. 432.

(b) The negative of the work as defined above. In this sense a ball shot upward is said to do work by removing itself from the attracting earth. [Both these uses of the word *work* were introduced by Clausius, first in German.]

11. In *physics* and *chem.*, the production of any physical or chemical change. For example, if a body is heated, the effects are said to be the internal work of increasing the kinetic molecular energy—that is, increase of temperature—of change of volume, cohesive elasticity and the external work involved in its expansion, and hence overcoming the surrounding atmospheric pressure. An example of work in the chemical sense is that done when a chemical compound is decomposed, as by an electrical current in electrolysis. See further under *energy*.

12. In *mining*, ores before they are cleaned and dressed.—13. *pl.* The mechanism or effective part of some mechanical contrivance, such as a watch.—14. Manner of working; management; treatment.

It is pleasant to see what *work* our adversaria make with this innocent canon: sometimes 'tis a mere forgery of hereticks, and sometimes the bishops . . . were not so wise as they should have been.

Stillington.

Accommodation works. See *accommodation*.—**Advanced works,** works placed beyond the covered ways and glacis of a permanent fortification, but in defensive relations with it. When placed beyond the range of small arms such works are termed *detached works*.—**Agra work,** an inlay of hard stones, such as agates and carnelians, and other costly materials in white marble, made at Agra in British India.—**Bareilly work,** woodwork decorated in black and gold lacquer, made in the Northwestern Provinces of India.—**Beaten work.** See *beaten*.—**Berlin work,** fancy work on canvas in Berlin wools or worsted.—**Best work.** See *best*.—**Bone-work.** Same as *bone-lace*.—**Carnul work,** decoration by means of lacquer painted with flowers in slight relief on a green ground, gold being freely used: from Carnul, or Kurnul, a town of India.—**Cashmere work,** a kind of metal-work in which copper or brass is deeply engraved, and the engraved lines are filled wholly or in part with a black composition like niello; small raised flowers of white metal are then applied to the surface in connection with the design engraved upon the body of the piece.—**Combed-out work.** See *combed-out*.—**Covenant of works.** See *covenant*.—**Damasene work.** See *damasene*.—**Day's work.** See *day's*.—**Delhi work,** a variety of Indian embroidery distinguished by a free use of chain-stitch, usually in gold and silver mixed with colored silk on colored grounds.—**Dinged work.** See *dinged*.—**Drawn and cut work,** decorative work done upon fine linen or the like by cutting away parts and pulling out the threads in places: a kind of work often associated with embroidery. In the more elaborate sorts, a network of threads is fastened down upon a piece of linen lawn, the pattern is stitched (usually in buttonhole-stitch) upon the lawn, and after its completion the threads of the network and some of those of the lawn are pulled out and parts of the lawn cut away.—**Embossed-velvet work.** See *velvet*.—**External work.** See *internal work*, below.—**False work.** See *false*.

There are voices and a sound of tools, and we come to a wooden staging, or *false work*, and climb a short ladder, and stand close to the roof among a group of workmen.

The Century, XXXIX. 221.

Fancy, fat, frosted work. See the adjectives.—**Gnarled work.** Same as *gnarling*.—**Granulated work.** See *granulated*.—**Hammered work.** See *hammer*.—

Hiroshima work, fine decorative metal-work made in Japan, in which various ornamental appliances are combined. The name is derived from the town of Hiroshima, where much of the finest has been made.—**Holbein work,** a kind of embroidery done in modern times in imitation of decorative borders and the like shown in paintings of Holbein and other artists of his time. The design is in outline without filling in, and consists of borders and other patterns of slight scrolls, zigzags, etc. It is worked especially with thread on washable material, and has the advantage of showing alike on both sides.—**Honeycomb work.** See *honeycomb*.—**Incrusted work.** See *incrusted*.—**Internal work,** in *physics*, work done in or among the molecules of a body upon change of temperature, as in increasing their velocity, changing their relative position, etc.: contrasted with *external work*, that done against external forces as the body changes in volume.—**Irish work.** See *Irish*.—**Lacertine work.** See *lacertine*.—**Laid work.** See *laid*.—**Lap-jointed work.** Same as *clinker-work*.—**Lean lump, madras, mechanical, meshed work.** See the qualifying words.—**Madeira work,** embroidery in white thread upon lawn or embric, made in the island of Madeira, and of remarkable fineness of execution.—**Monghyr work,** Indian decorative carving in black ebony, inlay with ivory.—**Mcradabad work,** decorative work in metal in which two plates of different metals are soldered together and then engraved on one side in deep incisions, so as to show the one metal through the incisions in the other. In another variety the incisions are filled in with a black composition similar to niello.—**Mother-of-pearl work.** See *mother-of-pearl*.—**Mounted work.** See *mounted*.—**Mynpuri work,** an inlay of wood with brass and other metals similar in its character to buhl, practised in India in recent times.—**Mysore work,** decoration by painting in vivid opaque colors on a brilliant ground composed of translucent green lacquer laid upon tin-foil.—**Niello-work.** See *niello*.—**Nullled work.** See *null*.—**Out of work.** (a) Out of working order.

There rises a fearful vision of the human race evolving machinery which will by-and-by throw itself fatally out of work.

George Eliot, Theophrastus Such, xvii.

(b) Without employment: as, he was out of work and ill.—**Phrygian work.** See *Phrygian*.—**Pierced work.** See *pierced*.—**Pitched work.** See *pitched*.—**Plaited string work, pounced work, process work, public works.** See *plaited*, *pounced*, etc.—**Punctured work.** See *punctured*.—**Raised work.** See *raised*.—**Random work.** See *random*.—**Reisner work** [from its inventor, Reisner, a German of the time of Louis XIV.] a kind of inlay cabinet-work in which woods of contrasted colors are employed, designs being formed in woods lighter or darker than the ground; marquetry.—**Reticated work.** See *reticated*.—**Rubbed work.** See *rub*.—**Russian-tapestry work, rustic work, Saracenic work.** See *Russian*, etc.—**Side of work,** decorative work done by the Sikhs of northern India, especially embossed work in thin copper done with the hammer and punch.—**Sindh work,** decoration produced by laying upon wood several strata of lacquer in different colors, and afterward cutting through the lacquer to various depths, as in engraving on onyx.—**Spanish work,** embroidery of simple character, such as that done upon pillow-cases and table-cloths: a term of the seventeenth century.—**Spiritual and corporal works of mercy.** See *mercy*.—**Stamped work.** See *stamp*.—**Swedish work.** See *Swedish*.—**Tabular work.** Same as *table-work*.—**Tamil work,** ornamental metal-work, containing much filigree, made in Ceylon, especially in the northern part of the island.—**Tessellated work.** See *tessellated*.—**Tied work,** a kind of fancy work by which fringes are made of worsted, silk, or other fiber or cord. The cords are fastened and grouped together by a process like netting, producing a sort of knotted fringe.—**To have one's work cut out.** (a) To have one's work prepared or prescribed. (b) To have all that one can do. [Slang.]—**To lie to one's work.** See *lie*.—**To make short work of or with.** (a) To bring to a speedy conclusion; accomplish at once. (b) To deal with or dispose of summarily.

Mr. Canning made very short work of poor Mr. Erskine.

H. Adams, Gallatin, p. 394.

To run the works. See *run*.—**Turkey work,** rugs or carpeting brought from the East: the phrase was in use as late as the seventeenth century.—**Upper works (naul).** Same as *dead-works*.—**Vienna work,** decorative work in leather, including ornamental utensils of that material, with patterns in slight relief and impressed.—**Vizagapatam work,** an inlay of ivory, horn, and other materials in wood. The work is on a small scale, and is applied to the decoration of movable furniture, tea-caddies, chess-boards, etc.—**Work and turn,** in *printing*, a form of type arranged to print two copies by turning the sheet.—**Work of art.** See *art*.—**Works of supererogation.** See *supererogation*. (See also *gingerbread-work*, *piguet-work*, *spider-work*.)—**Syn. 1. Work, Labor, Toil, Drudgery,** occupation, exertion, business. *Work* is the generic term for exertion of body or mind: It stands also for the product of such exertion, while the others do not. *Labor* is heavier; the word may be qualified by strong adjectives: as, confinement at hard *labor*. We may speak of light *work*, but not of light *labor*. *Toil* is still heavier, necessarily involving weariness, as *labor* does not. *Drudgery* is heavy, monotonous *labor* of a servile sort.

All *work*, even cotton-spinning, is noble.

Carlyle, Past and Present, iii. 4.

He had been so far that he almost despair'd of getting back again; for a Man cannot pass thro' those red Mangroves but with very much *labour*.

Dampier, Voyages, I. 156.

With burden of our armour here we await.

This *toil* of ours should be a work of thine.

Shak., K. John, ii. 1. 93.

The every-day cares and duties which men call *drudgery* are the weights and counterpoises of the clock of time.

Longfellow, Kavanagh, xiii.

workability (wɜr-ka-bil'i-ti), *n.* [*< workable + -ity* (see *-ibility*).] Practicability; feasibility.

The *workability* of compulsory notification would depend on the general practitioner. *Lancet*, 1890, II. 21.

workable (wɜr'kə-bl), *a.* [*< work + -able.*] 1. That can be worked, or that is worth working; as, a *workable* mine; *workable* coal. The term *workable*, as applied to coal, has two meanings: one refers to the maximum limit of depth, the other to the minimum limit of thickness of the bed or beds. In the Report of the English Royal Commission appointed in 1866, the limit of workable depth was taken as 4,000 feet, that of thickness at 1 foot. But no coal has yet been worked to so great a depth as that, and it has only very rarely happened that a seam of less than 2 feet in thickness has been actually mined.

Clay . . . soft and *workable*. *Ascham*, *Toxophilus*, ii.

I apprehend that the Commissioners [the English of 1866] placed the limit of thickness as low as 12 inches because their inquiries were not in that connection directed to the question what amount of coal would ultimately be found commercially *workable*; it was the simple physical limits which they were chiefly regarding.

Marshall, *Coal: its Hist. and Uses*, p. 307.

2. Practicable; as, a *workable* scheme for lighting the streets.—3. Capable of being stirred or influenced.

These have nimble feet, forward affections, hearts *workable* to charity. *Rev. T. Adams*, *Works*, II. 410.

4. Capable of being set at work.

At the time of taking the last census there were very nearly seven millions of wives and children of a *workable* age still unoccupied.

Mayhew, *London Labour and London Poor*, II. 358.

workableness (wɜr'kə-bl-nes), *n.* Practicableness; feasibility.

That fair trial which alone can test the *workableness* of any new scheme of social life. *J. S. Mill*, *Socialism*.

workaday (wɜr'kə-dā), *n.* and *a.* [Formerly also *workyday*. Cf. *workday*.] 1. A working-day.

Trade, I cashier thee till to-morrow; friend Onion, for thy sake I finish this *workyday*.

B. Jonson, *Case is Altered*, lv. 3.

We find a great Difference paid to Saturday Afternoon, above the other *worky-Days* of the Week.

Bourne's Pop. Antiq. (1777), p. 145.

II. *a.* Working-day; relating to workdays; plodding; toiling.

Dickens, *Uncommercial Traveller*, iv.

This is a *workaday*, practical world, and . . . we must face things as they are. *The Century*, XXXIX. 630.

work-bag (wɜr'kə-bāg), *n.* A small bag of some textile material, formerly carried by women, and used to contain their needlework. The term was often used for the reticule.

The lawful fine of the pledged *work-bay* of the king's wife.

O'Curry, *Anc. Irish*, II. xxiv.

work-basket (wɜr'kə-bāsket), *n.* A basket used by women either to hold the implements for sewing, as needles, thread, scissors, or thimble, in which case the basket is small, or to hold partly made garments, articles needing repair, etc., for which use the basket is large and has a wide opening.

On the table is . . . Elizabeth's *workbasket*.

Rhoda Broughton, *Alas*, xxxiv.

work-box (wɜr'kə-bɔks), *n.* A box used by women to hold their materials for sewing and the needlework itself when not too bulky.

Here, lately shut, that *work-box* lay;

False apostles, deceitful *workers*.

2 Cor. xi. 13.

Men, my brothers, men the *workers*, ever reaping something new;

That which they have done but earnest of the things that they shall do.

Tennyson, *Locksley Hall*.

With co-partnership between employer and employed, the *worker* would feel he was more nearly the equal of the capitalist.

N. A. Rev., CXLII. 615.

2. In *entom.*, the neuter or undeveloped female of various social hymenopterous and a few other insects, as bees, ants, and termites, which collects pollen, makes honey, builds or fabricates cells or a nest, stores up food, cares for the young, herds and milks the aphids kept as cows, and performs other services for the community of which it is a member. Among bees the worker is distinguished from the queen and the drone, or the perfect female and male. Among ants certain of the workers are specialized and specified as soldiers; these make war and capture slaves. See cuts under *Apis*, *Atta*, *Monomorium*, *Termites*, and *umbrella-ant*.

3†. Maker; creator.

And therfor in the *worker* was the vye,

And in the covetour that was so nyce.

Chaucer, *Complaint of Mars*, l. 261.

Shak., Much Ado, ii. 1. 331.

Ifence the expression woman of the world (that is, a married woman), used by Audrey in "As you Like it."

I hope it is no dishonest desire to desire to be a woman of the world. *Shak., As you Like it, v. 3. 5.*

To make a noise in the world. See noise. — Woman of the world. See woman. See also to go to the world, above. — World without end, to all eternity; eternally; unceasingly: also used attributively, meaning 'never-ending,' as in the quotation from Shakspeare.

Nor dare I chide the world-without-end hour,

Whilst I, my sovereign, watch the clock for you.

Shak., Sonnets, lvii.

This man . . . thinks by talking world without end to make good his integrity. *Milton.*

=Syn. 5. Globe, etc. See earth. — world (wêrd'), v. t. [*< world, n.*] To introduce into the world; give birth to.

Like Lightning, it can strike the Child in the womb, and kill it ere 'tis worlded, when the Mother shall remain unborn. *Feltham, Resolves, i. 59.*

worlded (wêrd'ed), a. Containing worlds. [Rare.]

The fires that arch this dusky dot —

Yon myriad-worlded way. *Tennyson, Epilogue.*

world-hardened (wêrd'hâr'dnd), a. Hardened by the love of worldly things.

worldhood (wêrd'hûd), n. [*< world + -hood.*] A worldly possession. [Rare.]

Content yourselves with what you have already, or else seek honest means whereby to increase your worldhoods.

Henry VIII. of Eng., quoted in I. D'Israeli's Amen. of (Lit., l. 363.)

world-language (wêrd'lang'gwäj), n. A language used by or known to the civilized world.

Jericzek was already well versed in the two classical and four great modern world-languages.

To live secure,

Worldly or dissolute. *Milton, P. L., xi. 803.*

Interest, pride, and worldly honour. *Dryden. (Johnson.)*

=Syn. 1. Mundane, terrestrial, sublunary. — 1 and 3. Worldly, Secular, Temporal, Earthly, Carnal, Unspiritual, Carnal. Worldly means of the world, in fact or in spirit, in distinction from that which is above the world; as, applying to mind, it indicates a pleasure in the things that belong to the external life and a disregard of spiritual or even intellectual pleasures: it is opposed to spiritual, expressing positively what unspiritual expresses negatively.

Secular is opposed to sacred or to ecclesiastical: as, there are six secular days in the week; the secular arm. Secular and temporal are rarely used in a bad sense. Temporal is opposed to spiritual or eternal: as, lords temporal; merely temporal concerns. Earthly has, like worldly, the sense of mundane, but in the sense of unspirituality it suggests more of grossness or groveling, a thought which is carried still further by earthy, although earthy is not often used in that sense. Carnal suggests that which belongs to the gratification of the animal nature; it ranges from the merely unspiritual to the sensual. See sensual and temporal. worldly (wêrd'li), adv. [*< ME. *worldliche, worldliche, weruldliche, weoruldliche; < worldly, a.*] In a worldly manner; with relation to this life.

Subverting worldly strong and worldly wise
By simply meek. *Milton, P. L., xii. 568.*

world-old (wêrd'ôld), a. As old as the world; very old; reaching back through the ages.

world-richest, n. [*ME., < world + riche.*] The kingdom of this world; the earth.

For, as of trouthe, is ther noon her liche

Of al the women in this world-riche.

Chaucer, Anelida and Arcite, l. 77.

world-wearied (wêrd'wêr'id), a. Tired of the world.

world-wide (wêrd'wid), a. As wide as the world; extending over or pervading all the world; widely spread: as, world-wide fame; specifically, in zoögeog., cosmopolitan: noting such habitat, or the fact of such distribution, but not the species or individuals themselves which inhabit all parts of the world.

worm (wêrm), n. [*< ME. wurm, wirm, werm, < AS. wyrn, a worm, snake, dragon, = OS. wurm = D. Lg. worm = OHG. MHG. G. wurm, worm, insect, snake, dragon, = Icel. ormr (for *worm) = Sw. See *Vermes*, and the various words noted in 1 (a), (b), above.

3. A person or human being likened to a worm as an object of scorn, disgust, contempt, pity, and the like: as, man is but a *worm* of the dust.

Vile worm, thou wast o'erlooked even in thy birth.
Shak., M. W. of W., v. 5. 87.

Hence—4. Figuratively, of inanimate objects, something that slowly, silently, or stealthily eats, makes, or works its way, to the pain, injury, or destruction of the object affected: used emblematically or symbolically. (a) Corruption, decay, or dissolution; death itself.

Thus chides she Death—
"Grim-grinning ghost, earth's worm, what dost thou mean,
To stifle beauty and to steal his breath?"
Shak., *Venus* and *Adonis*, l. 933.

My days are in the yellow leaf;
The flowers and fruits of love are gone;
The worm, the canker, and the grief
Are mine alone!

Byron, On his Thirty-sixth Birthday.

(b) An uneasy conscience; the gnawing or torment of conscience; remorse.

The worm of conscience still beguaw thy soul!
Shak., *Rich. III.*, i. 3. 222.

Beatrice. The true value,
Tak't of my truth, is near three hundred ducats.
De Flores. 'Twill hardly buy a capase for one's conscience though,
To keep it from the worm.

Middleton and Rowley, *Changeling*, iii. 4.

5. In *anat.*, some vermiform part or process of an animal's body. (a) The vermiform of the cerebellum. See *vermis*. (b) The vermiform cartilage of a dog's tongue. See *lytta*.

There is one easy artifice
That seldom has been known to miss;
To snarl at all things, right or wrong,
Like a mad dog that has a worm in 's tongue.
S. Butler.

wormul (wɜr'mul), *n.* Same as *warble*³.

worm-wheel (wɜrm'hwɛl), *n.* A wheel which gears with an endless or tangent screw or worm, receiving or imparting motion. By this means a powerful effect with a diminished rate of motion is communicated from one revolving shaft to another. See *tangent screw* (under *tangent*), *endless screw* (under *endless*, with *cut*); also *cuts* under *Hindley's screw* (at *screw*) and under *steam-engine*.

wormwood (wɜrm'wud), *n.* [*< ME. wormwod, an altered form, simulating worm + wood¹, of the earlier wermode, wermot, wormod, < AS. wermode = MD. wermode, wermot, wermot, wermode, wermode, wermot, wermode, etc., = OHG. wermuota, wermote, wermuota, wormuota, MHG. wermuot, wermuete, G. wermuth (> F. wormout), wormwood; formation uncertain; appar. lit. 'keep-mind,' preserver of the mind, from a supposed belief in its medicinal virtues (so hellebore was called in AS. wēdeberge, preservative against madness), < AS. werman (= D. weeren, weeren = MHG. weren, G. wehren, etc.), defend, protect, keep, + mōd, mood, mind: see wear² and mood¹.] A somewhat woody perennial herb, *Artemisia Absinthium*, native in Europe and Asiatic Russia, found in old gardens*

and by roadsides in North America. This plant is proverbial for its bitterness, and was in medicinal use among the ancients. It is of a highly tonic property, and is still used in Europe for weak digestion; it was formerly employed for intermittents and some other troubles, and was once regarded as a vermifuge. It is very largely consumed, with a few other species, in preparing the absinthe beverage of the French. (See *absinthe* and *absinthum* (with *cut*)). The name is extended to the genus, or particularly to species closely related to this; various species have their own names, as *southernwood*, *mugwort*, *targaron*, *santonica*, and *sage-brush*.

The source Almaunde, & wermode, & feyn greeke,

And captive-like be manac'd and bound.
Marlowe, tr. of Ovid's Elegies, ii.

2. In *medical jurisprudence*, any lesion of the body resulting from external violence, whether accompanied or not by rupture of the skin or mucous membrane—thus differing from the meaning of the word when used in surgery. Great difference of opinion, however, appears in the way in which the word is interpreted when occurring in criminal statutes. Some authorities have held that it necessarily implies the use of a hard or solid instrument other than the hand or fist; others, that it necessarily implies the breaking of the skin beyond the cuticle or outer membrane.

3. A breach or hurt of the bark and wood of a tree, or of the bark and substance of other plants.—4. Figuratively, injury; hurt; harm: as, a **wound** given to credit or reputation. Feelings, etc.: often specifically applied in literature to the pangs of love.

wrecchet, wrecchedt. Middle English forms of *wreth, wrethted*.

wrechet, *n.* See *wreck*.

wreck¹ (rek), *n.* [*ME. wrak, wreck, wrec*, < *AS. wræk*, expulsion, banishment, exile, misery (= *D. wrak, wreck*, = *leel. rek* (for *wrek*), also *reki*, anything drifted or driven ashore, = *Sw. vrak*, refuse, trash, wreck, = *Dan. vræg, wreck*), < *urwakan* = *leel. rekka*, etc., drive: see *wreak*¹, and cf. *wraek*¹, a doublet of *wreck*¹.] 1. The destruction, disorganization, disruption, or ruin of anything by force and violence; dilapidation: as, the wreck of a bridge; the wreck of one's fortunes.

Hence grew the general wreck and massacre.
Shak., I Hen. VI., i. 1. 135.

The wreck of matter and the crush of worlds.
Addison, Cato, v. 1.

2. That which is in a state of wreck or ruin, or remains from the operation of any destroying agency: as, the building is a mere wreck; he is but the wreck of his former self.

But still the brave old soul held on, making the most of the wreck of life, now drifting alone to the Islands of the Blessed.
Theodore Parker, Historic Americans, vi.

Naught remains the saddening tale to tell,
 Save home's last wrecks—the cellar and the well!
O. W. Holmes, Island Ruin.

3. The partial or total destruction of a vessel at sea or in any navigable water, by any accident of navigation or by the force of the elements; shipwreck.

Go, go, begone, to save your ship from wreck,
 Which cannot perish, having thee on board.
Shak., T. G. of V., i. 1. 156.

4. A vessel ruined by wreck; the hulk and spars, more or less dismembered and shattered, of a vessel cast away or completely disabled by breaching, staving, or otherwise breaking.

In the statute of Westminster the first (3 Edw. I., c. 4), the time of limitation of claims given by the charter of Henry II. is extended to a year and a day. . . . and it enacts that, if a man, a dog, or a cat escape alive, the vessel shall not be adjudged a wreck. *Blackstone, Com., I. viii.*

5. That which is cast ashore by the sea; shipwrecked property, whether a part of the ship or of the cargo; wreckage; in *old Eng. common law*, derelict of the sea cast upon land within the body of a country, and not in the possession of the owner or his agents. *Wreck*, or more fully *wreck of the sea*, was at common law applied only to wrecked property cast by the sea upon the land; and this included things grounded—that is, not floating at the time of seizure, although in a position where the tide would float them again. All such property was originally the perquisite of the crown, or of its tenant the lord of the manor; but in course of time an exception was made of wrecks from which any living thing escaped to land, in which case a presumption that an owner would appear arose and the property was preserved for a year and a day, after which if no claim was established the right of the crown was recognized. Wrecked matter floating was within the jurisdiction not of the common-law courts, but of admiralty, and known as *derelict, or derelict of the sea*. This too was a perquisite of the crown, claimed under the name of a *droit of admiralty*. Such matter was classed as *flotsam, jetsam, and lagan or ligam* (which see). In the United States the right to derelict for which the owner does not appear is in the Federal government; the right to wreck for which he does not appear is in the State to whose coast it comes, subject usually in either case to the right of the rescuer of it to a compensation known as *salvage*.

6. Seaweeds cast ashore by storms; wrack.—Commissioners of wrecks (in Maine, Massachusetts, and Rhode Island), receivers of wrecks (in Great Britain), wreck-masters (in New York and Texas), officers whose duty it is to take charge of wrecked property on the part of the coast for which they are appointed, and preserve it for the owner, or, if unclaimed, for the state.—Wreck commissioner, in Great Britain, one of a tribunal consisting of not more than three, appointed by the lord chancellor, under the Merchant Shipping Act, 1876 (39 and 40 Vict., c. 80), for the purpose of investigating shipping casualties.

wreck¹ (rek), *v.*; pret. and pp. *wrecked*, ppr. *wrecking*. [*wreck*¹, *n.*] **I. trans.** 1. To cause the wreck of, as, a vessel; snuff to be ruined or destroyed in the course of navigation or management: said specifically of the person under whose charge a vessel is at the time of its wreck, and usually implying blame, even in case of misfortune.

Friends, this frail bark of ours, when sorely tried,
 May wreck itself without the pilot's guilt,
 Without the captain's knowledge.
Tennyson, Aylmer's Field.

2. To cause the downfall or overthrow of; ruin; shatter; destroy; bring into a disabled or ruinous condition by any means: as, to wreck a railroad-train or a bank; to wreck the fortunes of a family.

Weak and envy'd, if they should conspire
 They wreck themselves, and he hath his desire.
Daniel, Civil Wars, iii. 17.

The meeting-houses of the Dissenters were everywhere wrecked.
Lecky, Eng. in 18th Cent., I.

3. To involve in a wreck; imperil or damage by wreck: as, a wrecked sailor; wrecked cargo.

Here I have a pilot's thumb,
 Wreck'd as homeward he did come.
Shak., Macbeth, I. 3. 29.

The spurious tea-men are also the buyers of wrecked tea—that is, of tea which has been part of the salvage of a wrecked vessel.

Mayhew, London Labour and London Poor, II. 151.
 Like golden ripples hasting to the land
 To wreck their freight of sunshine on the strand.
Lancelotti, Legend of Brittany, i. 33.

II. intrans. To suffer wreck or ruin. [Rare.]
 Rocks, whereon greater men have oftst wreck'd.
Milton, P. R., ii. 223.

wreck² (rek), *v.* and *n.* An obsolete form of *wreck*¹.

wreckage (rek'āj), *n.* [*wreck*¹ + *-age*.] 1. The act of wrecking, or the state of being wrecked.

Wreckage and dissolution are the appointed issue.
Carlyle, French Rev., II. v. 2.

2. That which remains of or from a wreck of any kind; wrecked material in general.

Only a few years ago, the procession of the fat ox re-mained. . . . a real piece of wreckage from vanished civilizations.
Pop. Sci. Mo., XXII. 247.

Littered above the pavement with the wreckage and refuse of the market. *W. Besant, Fifty Years Ago, p. 61.*

wreck-chart (rek'ehärt), *n.* A chart showing the location and date of wrecks on any coast, as an aid in avoiding them or as a guide in searching for them.

wrecker (rek'ēr), *n.* [*wreck*¹ + *-er*.] 1. A person who purposely causes a wreck or wreck-

age of any kind, or a person who commits depredation upon such wreckage. Specifically—(a) One who lures a ship to destruction on a dangerous coast by false lights or signals, or otherwise, for the purpose of plunder, or one who makes a business of watching for and plundering wrecked vessels. Such wreckers formerly abounded in many parts of the world, sometimes including whole communities in favorable localities.

Those mad days of the Buccaneers and their nominally more respectable descendants, the *Wreckers*, are gone.

Amer. Jour. Psychol., II, 522.

(b) One who causes the wreck or ruin of anything; one who lays snares or uses artful or dishonest means to cause physical, financial, or moral wreckage: as, a train-wrecker (on a railroad); a bank-wrecker; the wrecker of another's character.

2. A person employed in reovering wrecked or disabled vessels, or cargo and other property from such vessels, on account of the owners, underwriters, or other persons legitimately concerned; also, a vessel employed in this service.

wreck-fish (rek'fish), *n.* The stone-bass, ermer, cherna, or eherna, *Polyprion cernium*. See *Polyprion*, and cut under *stone-bass*.

wreck-free (rek'frē), *a.* Exempted from the forfeiture of shipwrecked goods and vessels. This privilege was granted to the Cinque Ports by a charter of Edward I.

wreckful (rek'ful), *a.* [*wreck*¹ + *-ful*. Cf. *wreckful*.] Causing wreck; producing or involving destruction or ruin. [Archaic and poetical.]

The southern wind with brackish breath

Dispersed them [the ships] all amongst the *wreckful* rocks.

Marlowe and Nashe, Tragedy of Dido, i. 2.

O, how shall summer's honey breath hold out
Against the *wreckful* siege of battering days?

Shak., Sonnets, lxx.

A summer mere with sudden *wreckful* gusts
From a side-gorge. *Tennyson*, *Harold*, iii. 1.

wrecking-car (rek'ing-kär), *n.* A car provided with means and appliances for clearing wreckage or other obstructions from a railroad-track. Sometimes it is a long platform-car fitted with a small derrick and a horse at one end. [U. S.]

wrecking-instrument (rek'ing-in'strō-ment), *n.* Same as *pocket-relay*.

wrecking-pump (rek'ing-pump), *n.* A special steam-pump of great capacity, used in freeing sunken or damaged vessels from water.

wreck-master (rek'mās'tēr), *n.* 1. A person appointed by law to take charge of goods, etc., east ashore from a wreck. See under *wreck*, *n.*—2. A person appointed by owners or salvors to take charge of a wrecked ship or cargo.

wreck-wood (rek'wūd), *n.* Wood or timber from wrecked vessels.

There stood upon it, in these days, a single rude house
Of uncemented stones, approached by a pier of *wreckwood*.

R. L. Stevenson, *Memoirs of an Islet*.

Wredin's test. Absence of a certain gelatinous matter from the middle ear of the fetus, taken as evidence that a child has breathed and therefore had been born alive.

wren (ren), *n.* [Also dial. *wrean*; < ME. *wrenne*, *wrenne*, a wren, < AS. *wrenna*, *wrenna*, a wren.] A very small migratory and insectivorous singing-bird of Great Britain and other European countries, with a slender bill and extremely short tail, and of dark reddish-brown coloration varied with black, inhabiting shrubbery, and belonging to the family *Troglodytidae*; hence, any member of this family, and, with a qualifying term, one of various other small birds of different families, as certain warblers, kinglets, etc. See the phrases below. *Wren* originally specified the bird technically known as *Sylvia troglodytes*, *Troglodytes parvulus*, *T. vulgaris*, *T. europæus*, *Anorthura troglodytes*, *A. communis*, etc., the only member of its genus and family found in Europe. It is only about four inches long, very active and sprightly, with a pleasing song at times, and a characteristic habit of carrying the short tail cocked up. This little bird figures extensively in English folklore, and has a host of local, provincial, or familiar names with *wren* expressed or implied, as *bobby*, *cutti*, *kitty*, *jenny*, *sally*, *scutti*, *tiddy*, *tiddy*, *titty*, also our *Lady of Heaven's hen*, etc. This wren is a northerly type, and one of several species of the restricted genus *Troglodytes* (or *Anorthura*), as *T. fumigatus* of Japan, *T. alascensis* of Alaska, and the well-known winter wren of North America, *T. hiemalis*, which is so near the English wren as to be by some naturalists regarded as only a variety. (See cut under *Troglodytes*.) In the United States the commonest wren, and the one which plays the part taken by the English wren in Europe, is the house-wren, *T. nelsoni* or *T. domesticus*, which abounds in most parts of North America, from the Atlantic to the Pacific, runs into several geographical races, and is represented in Mexico and warmer parts of America by several other varieties or congeneric species. The common house-wren in settled districts attaches itself closely to man, and nests by preference in nooks and crannies of outhouses, though it is more retired and wood-loving in other regions. It trills a hearty and voluble song, and lays numerous (from 6 to 10) pinkish-

white eggs very heavily spotted with brown, in the large mass of rubbish which it carries into its hole for a nest. This wren is migratory, and in many parts of the United States its presence is complementary to that of the winter wren. (Certain wrens of North America, of the genus *Cistothorus*, (and its section *Telmotodytes*), inhabit marshes and low wet shrubbery, and are known as *marsh-wrens*. (See the generic names, *marsh-wren*, and *tule-wren*.) Various others, chiefly of southern regions of the United States, and thence southward, as the great Carolina and Bewick's, are of the genus *Thryothorus* (which see, with cut). Others are the rock-wren, canyon-wren, and cactus-wrens, of the genera *Sainplices*, *Catherpes*, and *Campylorhynchus*. (See the compound and technical names, with cuts.) All these belong to essentially Neotropical types, which have but few outlying forms in the United States, though richly represented by very numerous species of various genera in the warmer parts of America (as those above named, *Thryophilus*, *Urosalpinx*, *Hemicothina*, *Cyporhinus*, and *Microcerculus*). The wrens above noted are all properly so called (*Troglodytidae*); with the exceptions named, they are all American. The qualified application of *wren* to various small birds of both hemispheres, including some of other families than *Troglodytidae*, is given in the phrases following.

The poor wren,

The most diminutive of birds, will fight,

Her young ones in her nest, against the owl.

Shak., *Macbeth*, iv. 2. 9.

wren-babbler (ren'bab'ler), *n.* A babbler of small size or otherwise resembling a wren; indiscriminately applied to various such timeliine birds. See *Alceippe*, 2, *babbler*, 2, *hill tit* (under *tit*), *hill-wren* (under *wren*), *tit-babbler*, and *Timelia*, with various cuts.

wrench (rench), *n.* [Also dial. *wrinch*; < ME. *wrench*, *wrenche*, also unassimilated *wrenk*, *wronke*, *wrink*; < AS. *wrenc*, *wrence*, *guile*, *fraud*, *deceit* (the orig. physical sense being preserved in mod. E., but not recorded in ME. and AS.), = MHG. *wanc*, quick movement, motion, G. *wank*, trick, artifice, intrigue, G. dial. also *crookedness*; from the root of *wring*; cf. mod. E. *wring*, *a.* and *n.*, in the metaphorical senses, nrt. from the root of *wring*.] 1. A crooked or tortuous action; a fraudulent device; a trick; a deceit; a stratagem.

His wyly wrenches thou ne mayst nst flee.

Chaucer, *Canon's Yeoman's Tale*, l. 70.

For it lodes a man with *wrenches* and wyles,
And at the last it hym begyles.

Hampole, *Prieke of Conscience*, l. 1360, quoted in *Religious Pieces* (E. E. T. S.), p. 105.

2. A violent twist or turn given to something; a pulling away; a sudden twisting out of shape, place, or relation; used of both material and immaterial things: as, to sprain one's foot by a *wrench*; the change was a great *wrench* to his feelings.

If one straine make them not confess, let them be stretched but one *wrench* higher, and they cannot be silent.

Sp. Hall, *The Ark and Dagon*.

There are certain animals to whom tenacity of position is a law of life—they can never flourish again after a single *wrench*.

George Eliot, *Mill on the Floss*, iii. 1.

I might chance give his meaning a *wrench*,

He talking his patois and I English-French.

Lovell, *Black Preacher*.

3. A sharp turn; specifically, in *coursing*, the turning of a hare at less than a right angle. *Encyc. Brit.*, VI, 515.—4. adapted to catch upon the head of a bolt or a nut, or to hold a metal pipe or rod, so as to turn it. Some wrenches have a variety of jaws to suit different sizes and shapes of nuts and bolts, and others, as the monkey-wrench, have an adjustable inner jaw.

6†. Means of compulsion. [Rare.]

He . . . resolved to make his profit of this business . . . of Naples as a *wrench* and means for vice.

Bacon, *Hist. Hen. VII.*, p. 90.

wrench (rench), *v.* [< ME. *wrenchen*, *wrench*, twist, turn, < AS. *wrencan*, deceive, = MHG. *G. renken*, G. (*er*)*renken*, dislocate, twist, sprain; from the noun.] I. *trans.* 1. To twist or turn about with effort or violence; give a sudden twist to; hence, to distort; to pervert; turn awry.

Now there can not be in a maker a fowler fault then . . . to *wrench* his words to help his rime.

Puttenham, *Arte of Eng. Poesie*, p. 67.

I am well acquainted with your manner of *wrenching* the true cause the false way. *Shak.*, 2 *Hen. IV.*, ii. 1. 120.

2. To injure or pain by a twisting action; produce a distorting effect in or upon; distort; sprain; as, to *wrench* one's ankle.

Through the space
Of twelve ensuing days his frame was *wrenched*,
Till nature rested from her work in death.

Wordsworth.

3. To pull or draw with torsion; extract by twisting or tortuous action; hence, to wrest forcibly or violently.

Wrench his sword from him. *Shak.*, *Othello*, v. 2. 288.

To *wrench* it [a fixed opinion] out of their minds is hardly less difficult than pulling up an oak.

Hawthorne, *Seven Gables*, xvi.

II. *intrans.* To have or undergo a wrenching motion; turn twistingly. [Rare.]

Let not thy venturous Steps approach too nigh
Where, gaping wide, low steepy Cellars lie;
Should thy Shoe *wrench* aside, down, down you fall,
And overturn the scolding Huckerster's Stall.

Gay, *Trivia*, iii. 123.

wrench-hammer (rench'häm'ér), *n.* A hammer fitted with a movable jaw so that it can also serve as a spanner.

wrench-handle (rench'händ'l), *n.* A double-armed wrench for use with dies in cutting threads and similar work. *E. H. Knight*.

Stephen's day, in the north of England, in commemoration of the martyrdom of the saint.

wrenning-day (ren'ing-dā), *n.* St. Stephen's day, on which wrenning is practised in the north of England.

wren-tit (ren'tit), *n.* A bird, *Chamaea fasciata*, peculiar to California, of uncertain relations, usually made the type and sole member of a family *Chamaeidae*: so called from its uniting, to some extent, the habits of a wren and of a titmouse. It is about 6 inches long, with very short rounded wings, a long tail, the beak somewhat like that of a titmouse, the plumage remarkably soft and loose, of a dark-brown color, paler below, and the eye white. See *Chamaea* (with ent). Also called *ground-tit*.

wrest (rest), *v.* [*ME. wressten, wresen, wressten*, < AS. *wrēstan*, twist forcibly (cf. AS. *wrēst*, firm, strong, = Icel. *reista*, wrest; cf. Dan. *vriste*, wrest); prob. with formative *-t* (*-tlt*) > *-st*], < *wriþhan* (pret. *wriþh*), writhe, twist; see *wriþe*, and cf. *wreath*¹. Cf. also *wrist*, *wrestle*.] **I. trans.** 1. To twist or turn; especially, to deflect, as from the existing or normal state, character, course, or significance: now used chiefly of immaterial things.

And finally he gan his herte *wreste*
To trusten hire, and tok it to the beate.
Chaucer, Troilus, iv. 1427.

Wrest once the law to your authority:
To do a great right do a little wrong.

And Jacob was left alone; and there *wrestled* a man with him until the breaking of the day.

Gen. xxxii. 24.

You have *wrestled* well, and overthrowen
More than your enemies.

Shak., As you Like it, i. 2. 266.

Each one may here a chooser be,
For room ye need not *wrestle*.

Drayton, Nymphidia.

Hence—3. To contend in any way, as in a struggle for mastery; maintain opposition or resistance, especially against a moral foe or force; strive.

I persuaded them, if they loved Benedick,
To wish him *wrestle* with affection,

And never fo let Beatrice know it.

Shak., Much Ado, iii. 1. 42.

Put on the whole armour of God that ye may be able to stand against the wiles of the devil, for we *wrestle* not against flesh and blood but against spiritual wickedness.

Eph. vi. 12.

'Twill be some pleasure then to take his Breath,
When he shall strive, and *wrestle* with his Death.

Cowley, Davideis, i.

4. To deal, as with a troublesome duty; apply one's self vigorously; grapple: as, to *wrestle* with a knotty problem; to *wrestle* with a distasteful task. [*Colloq.*]—5. Hence, to devote one's self earnestly to prayer; pray. [*Cant.*]

My reverend Clergy, look ye say
The best of thanksgiving ye ha'e,
And *wastle* for a sunny day.

Scott, Carle, now the King's Come, ii.

II. trans. 1. To contend with in wrestling; as, I will *wrestle* you for so much. [*Colloq.*]

—2. On a cattle-range, to throw for the purpose of branding, as an animal. [*Slang, western U. S.*]

T. Roosevelt, The Century, XXXV. 861.

wrestle (res'l), *n.* [*Also dial. wrastle*; < *wrestle*, *v.*] A bout at wrestling; a wrestling-match.

Corinens, . . . whom in a *wrestle* the giant catching aloft, with a terrible hugg broke three of his ribs.

Milton, Hist. Eng., i.

If he had gone out for a few days with his nine cousins in the country, and tried a *wrestle* with one of them, he would have quickly found that his body was a pretty slim affair.

Tribune Book of Sports, p. 5.

wrestler (res'lēr), *n.* [*ME. wrastlare, wrestler*; < *wrestle + -er*¹.] 1. One who wrestles; specifically, one who makes a practice of wrestling, as a professed athlete.

Was not Charles, the duke's *wrestler*, here to speak with me?

Shak., As you Like it, i. 1. 94.

2. One who wrestles cattle on a range. [*Slang, western U. S.*]

The calf-*wrestlers*, grimy with blood, dust, and sweat, work like beavers.

T. Roosevelt, The Century, XXXV. 861.

wrestling (res'ling), *n.* [*Verbal n. of wrestle, v.*] The act of trying to throw another person to the ground; the act of two persons contending which shall throw the other to the ground and overpower him. Wrestling, as a game subject to special rules, is of great antiquity. It was held in high esteem by the Greeks, and their youth were taught it by aespial masters as part of the public education. In its highest and simplest form it was the fifth of the five tests of the pentathlon. In this contest the wrestlers wrestled standing and naked, any hold being allowed, and three falls constituting victory. Wrestling, in combination with boxing, formed the arduous and dangerous contest known as the *pancratium*—a contest much more resembling a fight to a finish than an athletic contest. A third form of wrestling, which does not seem to have come down to modern times, consisted in interlocking the fingers, pushing the palms of the hands together, and twisting the joints and wrists, without the assistance of any other member or of any hold of the body. The highest and purest form of Greek wrestling does not appear to have been transplanted to Rome, although the more contentious and cruel *pancratium*—a sport more nearly allied to the Roman gladiatorial spirit—was introduced there by Caligula, and became very popular.

Go not to the *wrestelinge*, ne to scholynge at cok.

Babees Book (E. E. T. S.), p. 40.

wrest-pin (rest'pin), *n.* In the pianoforte and harp, a steel pin driven into the wrest-block or frame, around which one end of a string is wound, and by turning which the string may

be tuned; a tuning-pin. The upper part of the pin is square in section, so as to be turned by a tuning-hammer or key. See cut under *harp*.—**Wrest-pin piece**, in the pianoforte, a metal plate through which the wrest-pins are screwed into the wrest-block.

wrest-plank (rest'plangk), *n.* Same as *wrest-block*.

Bruce, Source of the Nile, II. 500.

2. A sorry or contemptible creature; a despicable person; a term of opprobrium applied to one who has incurred condemnation by misconduct, and often used on slight occasion and with little intended force.

Fie on thee, *wretch*! 'tis pity that thou livest
To walk where any honest man resort.

Shak., C. of E., v. 1. 27.

Does not every dowager in London point to George Fitz-Boodle as to a disolute *wretch* whom young and old should avoid?

Thackeray, Fitz-Boodle's Confessions.

3. Body; creature; thing: used (in some manner that indicates the intention) of a person regarded with some degree of kindly or ironical commiseration, or, when genuine words of endearment seem inadequate, with tender sympathy or passion, or even with admiration.

Excellent *wretch*! Perdition catch my soul,
But I do love thee!

Shak., Othello, iii. 3. 90.

Poor *wretch* was never frightened so.

Drayton, Nymphidia, st. 27.

Come forth,

Fond *wretch*, and know thyself and him aright.

wrist (rist), *n.* [Early mod. E. also *wreast, wrest*; < ME. *wrist, wriste*, also *wirte, wyrste*, < AS. *wrist* (usually in comp. *hand-wrist*) = (Fries. *wriust, riust, wrist, werst* (*hond-wriust*, 'hand-wrist,' *foet-wriust*, 'foot-wrist,' *instep*) = LG. *wrist* = MHG. *rist, riste, G. rist* (G. dial. *frist*), hand- or foot-joint; cf. G. *wider-rist*, withers of a horse (see *withers*), = Icel. *rist* = Sw. Dan. *wrist*, *instep*; with formative *-t* (*-tht*) > *-st*), < *wrihtan*, twist, writhe: see *writhe*, and cf. *wrest*.] 1. That part of the fore limb or arm which comes between the forearm and the hand, and by which the latter is joined or jointed to the former; the wrist-joint; technically, the carpus, or the carpal articulation. The wrist is the first segment of the manus, and its skeleton consists in man of seven carpal bones, together with a sesamoid bone (the pisiform) on the ulnar side, these eight bones being disposed in two rows of four each, proximal and distal. The whole set of bones, their articulations with one another and with the radius, ulna, and the several metacarpals, together with the ligaments and other associated soft parts, are included in the term *wrist*. The motions of the wrist as a whole upon the forearm include all the movements of flexion, extension, abduction, adduction, and circumduction, together with the movements of pronation and supination impressed upon the wrist by the rocking of the radius about the ulna; but the motion of the individual carpal bones upon one another is slight, and that between the distal carpals and the metacarpals is still less. In most other animals than man, the movements of the wrist are more restricted. The term is extended to the corresponding joint of the fore limb of other mammals, birds, and reptiles. Thus the so-called knee of the horse's fore leg is anatomically the carpus or wrist. See *carpus*, and cuts under *hand, pisiform*, and *scapholunar*. Little Preston was found there with both his hands cut off by the *wreasts*. *W. Patten, Ex. into Scotland* (Arber's Eng. Garner, III. 128).

2†. The ankle or the instep. Then he put on the old man's hose, Were patch'd from knee to *wrist*. *Robin Hood Rescuing the Widow's Three Sons* (Child's Bal. (Iads, V. 264).

3. In *mach.*, a stud or pin projecting from the side of a crank, wheel, or other moving part, and forming a means of attachment to a connecting-rod leading to some other part of the mechanism. Also called *wrist-pin*.—**Bridle wrist**, in the *manège*, the wrist of the horseman's left hand. Compare *bridle-hand*.—**Twist of the wrist**. See *twist*.—**Wrist touch**, in *pianoforte-playing*, a stroke or touch which proceeds from the wrist rather than from the fingers alone or from the whole forearm.

wristband (rist'band, colloq. rist'band), *n.* That band or part of a sleeve, especially of a shirt-sleeve, which covers the wrist. The wristbands sewed on to shirt-sleeves were formerly continued with a flare over the upper part of the hand, serving the purpose of the separate stiff cuffs buttoned to the narrow wristbands now in use. In the times of more elaborate dressing such wristbands were often very long, and adorned with rich lace or fine embroidery. With that the hands to pocket went, Full *wristband* deep. *Vanbrugh, Æsop, ii. 1.* He . . . wore very stiff collars, and prodigiously long *wristbands*. *Diekens, A Rogue's Life, I. (Household Words).*

wrist-bone (rist'bōn), *n.* Any bone of the wrist or carpus; a carpal bone. See *carpus, wrist*, and cuts under *hand, pisiform*, and *scapholunar*.

wrist-clonus (rist'klō'nus), *n.* A series of jerky movements of the hand produced in certain nervous diseases by a sudden forcible bending back of the wrist.

wrist-drop (rist'drɒp), *n.* Inability to extend the hand, owing to paralysis of the extensor muscles in the forearm. It is commonly associated with lead-poisoning. Also called *drop-wrist*. The case of chronic lead poisoning, with its accompanying *wrist-drop*, caused by the paralysis of the extensors. *Amer. Anthropologist, I. 68.*

wrister (ris'tēr), *n.* A covering for the wrist; a wristlet. [Local, U. S.] A neighbor, come to tea, was crocheting *wristers* for her guardian. *The Century, XXVI. 624.*

wristfall (rist'fâl), *n.* A deep ruffle of various materials, usually lace, falling from a wrist-

band or the lower part of a sleeve. See *fall¹, n., 8.* Men and women alike were in Puritan dress. Some, however, had discarded the lace *wristfalls* and neckbands. *A. E. Barr, Friend Olivia, iii.*

wrist-guide (rist'gīd), *n.* Same as *chiroplast*.

wrist-joint (rist'jɔint), *n.* The carpal joint proper; the radiocarpal articulation, by which the hand as a whole moves upon the forearm: chiefly used as applied to man. See *carpus, wrist*, and *radiocarpal articulation* (under *radiocarpal*).

wristlet (rist'let), *n.* [*< wrist + -let.*] 1. A band worn around the wrist: applied to various useful or ornamental objects of the sort. (a) A covering of thick material for the wrist to protect it under exposure to cold. (b) A bracelet. A siren lithic and debonaire, With *wristlets* woven of scarlet beads. *T. B. Aldrich, Pampina.*

2. A handcuff. [Humorous or slang.] Two or three of the party wearing black dresses instead of grey, with leg irons as well as *wristlets*, to show that they were bad-conduct men. *Daily Telegraph, Dec. 31, 1881. (Encyc. Dict.)*

wrist-pin (rist'pin), *n.* 1. In *mach.*, any pin forming a means of connecting a pitman to a cross-head or crank; more particularly, the pin of the crank to which a pitman is connected. The pin in the cross-head is in the United States more generally called *cross-head pin*. 2. A pin in a wrist-plate of a steam-engine, whether connected with an eccentric-rod or with a valve-rod.

wrist-plate (rist'plāt), *n.* 1. A plate which oscillates on a central pivot, and from the face of which project one or more crank-pins or -wrists for the connection of rods or pitmans.— 2. Specifically, a plate used in some kinds of automatic cut-off engines. It has a reciprocating rotary motion on a central pivot, and is actuated through a limited arc by the rod of an eccentric on the crank-shaft of the engine. From its face project four crank-wrists, which give it its name. Two of these wrists are respectively connected with rods that actuate the rocker-arms of two separate oscillating plug-valves, for introducing steam into the cylinder on opposite sides of the piston alternately. The other two wrists are similarly connected to independently operating exhaust-valves.

writ¹ (rit), *n.* [*< ME. writ, wryt, wrytt, wicrit*, < AS. *ge-writ, writ*, a writ, writing, or scripture (= OHG. *riz*, a letter, MHG. *riz*, G. *riss*, a rent, a tear, *ritze*, a wound, a scratch, = Icel. *rit*, a writ, writing, penmanship, = Goth. *writ*, a stroke, a point), < *wrihtan*, etc., write: see *write*.] 1. 2. In *law*, a precept under seal, in the name of the people, or the sovereign, or other competent legal authority, commanding the officer or other person to whom it is addressed or issued to do or refrain from doing some specified act. In early times, when the pleadings and proceedings generally in actions were oral, writs were, as the name implies, the written parts of an action (besides judgments in courts of record), it being for obvious reasons required that the warrant by which a person or his property might be seized, or his conduct controlled under penalty of contempt, should be expressed in writing and attested by the name and seal of the government. 3. A formal instrument or writing of any kind. I . . . Folded the *writ* up in form of the other. *Shak., Hamlet, v. 2. 51.*

Barons by writ. See *baron, 1.*—**Close writs.** See *close²*.—**Indorsed writ.** See *indorse*.—**Judicial writ**, a writ issued by the court, as distinguished from an *original writ*.—**Optional writ.** See *optional*.—**Original writ.** (a) The writ formerly required to be issued from Chancery, under the seal of the sovereign, before the commencement of an action in a court of common law: so called to distinguish it from judicial writs, or writs issued by the court in which the action was thus brought, in the course of prosecuting the action. (b) In the United States, a mandatory precept issuing out of the clerk's office in any of the courts of law, by the authority and in the name of the State or commonwealth, under the seal of the court from which it issues, bearing teste of the chief justice of the court, if he is not a party, and signed by the clerk of the court. (*Heard*.) Its object is to compel the appearance of the defendant, or at least to give him due notice that he is sued. In most of the States it has been superseded by a summons, issued by the plaintiff's attorney, giving such notice and requiring the defendant to plead. See also *original writ*, under *original*.—**Peremptory, Præmunientes, pre-**

rogative writ. See the qualifying words.—**Service of a writ.** See *service*.—**Ship writ**, in *Eng. hist.*, a writ issued in the name of the crown imposing the tax known as *ship-money* (which see); notably one of such writs issued under Charles I. which led to Hampden's opposition. They were declared illegal by 16 Car. I. c. 14 (1640).—**The writ runs.** (a) The writ is expressed in terms of or including; as, *the writ runs* in the name of the people. (b) The writ is legally capable of enforcement: as, *the writ of subpoena runs* throughout the state. (c) The writ is practically capable of enforcement: as, "When lawlessness has yielded to order; when the Queen's writ runs; when the edicts of the civil courts are obeyed; . . . and when sedition is trampled under foot—then, and then only, is there some chance for the development of remedial measures." (*Edinburgh Rev.*, CLXV. 587).—**To serve a writ.** See *to serve a process*, under *serve*.—**To serve a writ of attachment.** See *to serve an attachment*, under *serve*.—**Twelve-day writ**, in *Eng. law*, a writ allowed by 18 and 19 Vict., c. 67, in actions on bills and notes if brought within six months after maturity, warning defendant to appear within twelve days, otherwise judgment would go against him.—**Vicountial writs.** See *vicountial*.—**Writ of account.** See *action of account*, under *account*.—**Writ of assistance, besayle, capias, certiorari, consultation, dower, error, estrepement.** See *assistance*, etc.—**Writ of execution.** See *execution*, 3 (b).—**Writ of habeas corpus, inquiry, mandamus, possession, privilege, prohibition, protection, reCAPTION, restitution, right, spoliation, subpoena, etc.** See *habeas corpus, inquiry*, etc.—**Writs of extent.** See *extent*, 3 (b).

It affects at first usually only those muscles which are directly concerned in the production of writing movements, but, if the act is persisted in, the neighboring muscles may also share in the disturbance. The affection may manifest itself under one of four forms or a combination of them—namely, *paralytic*, in which weakness in the fingers or even absolute inability to hold the pen is experienced; *spastic*, in which the attempt to write excites clonic or tonic contractions of the fingers; *tremulous*, in which the hand shakes so while writing that the letters formed are indistinguishable; and *sensory*, in which the effort to write causes severe pain, tingling, or other abnormal sensations in the hand and at times in the forearm also. The symptoms vary greatly in different individuals, usually, however, increasing in severity as long as the attempt to use a pen is persisted in. The use of steel pens and metal penholders is supposed to increase the liability to the affection. Also called *scribblers' cramp* or *palsy*, *writers' palsy* or *paralysis*, and *graphosptism*.—**Writers to the signet.** See *signet*, 1.

long, slender, and extensible, and most other characters of the true *Picidae* or woodpeckers; but the tail-feathers are soft, broad, and rounded at the ends, and not used in climbing. The wryneck is migratory and insectivorous, and its general habits are similar to those of woodpeckers. It has a variety of names pointing to its arrival in the British Islands at the same time as the cuckoo, as *cuckoo's-foot*, *footman*, *knave*, *leuder*, *maid*, *mate*, *messenger*, *marrow*, *whit*, etc. It is also called *writheneck* and *snake-bird*, from the twisting of its neck; *long-tongue* and *tongue-bird*, from its long tongue; *emmet-hunter*, from feeding on ants; *pea-bird*, *weat-bird*, from its cry; *turkey-bird*, *mile-bird*, and *slab*, for some unexplained reasons.

Even while I write I hear the quaint squeak, queak, queak of the wryneck.

Mortimer Collins, Thoughts in my Garden, l. 62.

The wryneck will tap the tree, to stimulate the insect to run out to be eaten entire.

P. Robinson, Under the Sun, p. 36.

wry-necked (rī'nekt), *a.* Having a wry or distorted neck.

When you hear the drum,
And the vile squealing of the wry-neck'd fife.

Shak., M. of V., ii, 5, 30.

[By some this is understood as an allusion to the bend of the fifer's neck while playing upon his instrument; by others (less probably) to an old form of the flute, called the *flute-à-bee*, having a curved mouthpiece like the beak of a bird at one side.]

A fife is a wry-neck musician, for he always looks away from his instrument.

Barnaby Rich, Irish Hubbub (1616). (Furness.)

wryness (rī'nes), *n.* The state of being wry or distorted.

wryt, **wrytet**, **wrythet**. Obsolete spellings of *writ*¹, *write*, *writhet*.

W. S. An abbreviation of *writer* to the *signet*. See *signet*.

W. S. W. An abbreviation of *west-southwest*.

wt. A contraction of *weight*.

wucht. An obsolete form of *which*¹.

wud (wud), *a.* A Scotch form of *wood*².

wudder (wud'ér), *v. i.* See *wuther*.

wudet, *n.* A Middle English form of *wood*¹.

wulfenite (wul'fen-it), *n.* [Named after Baron von Wülffen or Wülfen (1728-1805), an Austrian scientist.] Native lead molybdate, a mineral of a bright-yellow to orange, red, green, or brown color and resinous to adamantine luster. It occurs in tetragonal crystals, often in very thin tabular form, also granular massive. Also called *yellow lead ore*.

wull. An obsolete or dialectal form of *will*¹, *will*².

wummel, wumml. *n.* Scotch forms of *wimble*¹, *wunt*, *v. i.* See *won*¹.

wungee (wun'jē), *n.* [E. Ind.] A variety in India of the muskmelon, *Cucumis Melo*, sometimes regarded as a species, *C. cicatrisatus*. It is of an ovate form, about 6 inches long.

wurali, wurari. *n.* Same as *curari*.

wurd, *n.* An old spelling of *word*¹.

wurmal (wér'mal), *n.* Same as *wormal*.

wurrus (wur'us), *n.* [< Ar. *wars*, a dyestuff similar to kamilla.] A brick-red dye-powder, somewhat like dragon's-blood, collected from the seeds of *Rottlera tinctoria*.

wurset, wurst. Old spellings of *worse*, *worst*.

Württemberg (wér'tem-bérg-ér; G. pron. vür'tem-ber-gér), *n.* [< *Württemberg* (G. *Württemberg*) (see def.) + *-er*.] An inhabitant of Württemberg, a kingdom of southern Germany.

Württemberg siphon. See *siphon*.

wurth. An old spelling of *worth*¹, *worth*².

wurtzilite (wér'tsil-it), *n.* [Named after Dr. Henry Wurtz, of New York (b. 1828).] A kind of solid bitumen found in the Uintah Mountains, Utah. It has a deep-black color and brilliant luster, and breaks with a conchoidal fracture. It is elastic when slightly warmed, and in boiling water becomes soft and plastic.

wurtzite (wér't'sit), *n.* [After C. A. Wurtz (1817-1884), a French chemist.] Sulphid of zinc occurring in hexagonal crystals, isomorphous with greenockite. Sulphid of zinc is accordingly dimorphous, the common form, sphalerite or zinc-blende, being isometric. Also called *späulerite*.

Würzburger (wér'ts'bérg-ér; G. pron. vür'ts'bür-gér), *n.* Wine made in the neighborhood of the city of Würzburg, in Bavaria. This name is often given to the wines more properly called *Leisten-wein* and *Stein-wein*, and to the famous "wine of the Holy Ghost."

wus¹, *v. i.* See *wis*³.

wus², *n.* A Middle English form of *woose*, *oose*.

Hee wringes onto the wet wus and went on his gate.

Alisaunder of Maccdoine (E. E. T. S.), l. 712.

wuther (wuth'ér), *v. i.* [Also *wudder*; perhaps ult. < AS. *wōth*, a noise, cry, sound.] To make a sullen roar, as the wind. [North. Eng.]

The air was now dark with snow; an Iceland blast was driving it wildly. This pair neither heard the long wuthering rush, nor saw the white burden it drifted.

Charlotte Brontë, Shirley, xxxiii.

From time to time the wind wuthered in the chimney at his back.

R. L. Stevenson and L. Osbourne, The Wrong Box, vi.

There was also a wuthering wind sobbing through the narrow wet streets.

A. E. Barr, Friend Olivia, lv.

wuther (wuTH'ér), *n.* [Also *wudder*; < *wuther*, *v.*] A low roaring or rustling, as of the wind. [North. Eng.]

I felt sure . . . by the wuther of wind amongst trees, denoting a garden outside. *Charlotte Brontë, Villette, xvi.*

wuzzent (wuz'ent), *a.* A dialectal (Scotch) form of *wizened*.

An I had ye among the Frigate-Whins, wadna I set my ten talents in your wuzzent face for that very word!

Scott, Heart of Mid-Lothian, xviii.

wuzzle (wuz'l), *v. t.*; pret. and pp. *wuzzled*, pp. *wuzzling*. [Origin obscure.] To mingle; mix; jumble; muddle. [New Eng.]

He wuzzled things up in the most singular way.

H. B. Stowe, Oldtown, p. 63.

wyandotte (wī'an-dot), *n.* [From the American Indian tribal name *Wyandotte*.] An American variety of the domestic hen, of medium size and compact form, hardy, and valuable for eggs and for the table. The silver wyandotte, the

typical variety, has every feather white in the middle and heavily margined with black, except the black tail-feathers and primaries, the hackle (and in males the saddle), which is white striped with black, and the white wing-bows of the males. The golden wyandotte replaces the white of the silver variety by orange or deep-buff; and the white wyandotte is pure-white. The combs are rose, legs yellow, and ear-lobes red.

wych (wieh), *n.* See *wick*⁴.

wych-elm, wych-hazel, *n.* See *witch-elm, witch-hazel*.

Wyclifite, Wycliffite (wik'lif-it), *a.* and *n.* [Also *Wicliffite, Wickliffite*; < *Wyclif*, etc. (see def.), + *-ite*.] 1. *a.* Of or pertaining to John Wyclif or de Wyclif (a name also written *Wielif, Wickliffe, Wyckliffe*, and in various other ways reflecting the varying orthography of his time, properly in modern spelling *Wickliff*), an English theologian, reformer, and translator of the Bible from the Vulgate (died 1384).

2. *n.* One of the followers of Wyclif, commonly called *Lollards*. Wyclif's doctrines, propagated in his lifetime and later by open-air preachers called "poor priests," largely coincided with the later teachings of Luther.

wyde, *a.* An old spelling of *wide*.

wydeberht, adv. See *widewhere*.

wye¹, *n.* See *wie*.

wye² (wi), *n.* The letter Y, or something resembling it.

wyer, *n.* In *her.*, same as *viure*.

wyft, *n.* An old spelling of *wife*.

Wykehamist (wik'am-ist), *n.* [< *Wykeham* (see def.) + *-ist*.] A student, or one who has been a student, of Winchester College in England, founded by William of Wykeham (1324-1404), Bishop of Winchester and Chancellor of England, as a preparatory school for New College at Oxford, also founded by him. Also used attributively.

It may reasonably be hoped that this is not *Wykehamist* Greek.

Athenæum, No. 3303, p. 212.

We notice a complaint that *Wykehamists* obtained an undue proportion of the university prizes.

The Academy, No. 873, p. 56.

wylet, *n.* An old spelling of *wile*¹.

wylie-coat (wī'li-kót), *n.* [Se.; also spelled *wyle-coat, wile-coat*; first element uncertain.] A flannel garment worn under the outer clothes; an under-vest or under-petticoat.

wylot, *n.* An old spelling of *willow*¹.

wynt, *n.* An old spelling of *wine*.

wynd¹ (wind), *n.* [Another spelling and use of *wind*¹, *n.*] An alley; a lane; especially, a narrow alley used as a street in a town. [Scotch.]

The wynds of Glasgow, where there was little more than a chink of daylight to show the hatred in women's faces.

George Eliot, Felix Holt, xxvii.

wynd², *n.* A Middle English spelling of *wind*².

wyndast, *n.* An obsolete spelling of *windas*.

wyndewet, wyndowet, wyndwet, wynewet, *v.* Middle English forms of *window*.

wyndret, *v.* An unexplained verb, probably meaning 'to attire' or 'to adorn,' found in the following passage:

It nedede nought
To wyndre hir or to peynte hir ought.

Rom. of the Rose, l. 1020.

wynkt, *n.* A Middle English spelling of *wink*¹.

wynn (win), *n.* [Origin obscure.] A kind of timber truck or carriage. *Simmonds*.

wyntt. A contraction of *windeth*, third person singular indicative present of *wind*¹.

wypet, *n.* [< ME. *wipe*, *wype*, a bird. < Sw. *Norw. rípa* = Dan. *ríbe*, lapwing; perhaps so called from its habit of fluttering its wings (cf. *Faellus*), from the verb represented by Sw. *ríppa*, rock, see-saw, tilt; see *whip*¹.] Otherwise imitative; cf. *wcep*².] A lapwing.

Wype, hyrde or lapwyng. *Upupa. Prompt. Parv., p. 530.*

wyper, *n.* Same as *wiper*.

wyppyl-tret, *n.* A Middle English form of *whippel-tree*.

wyst, wyset, *a.* Old spellings of *wise*¹. *Chaucer*.

wytet, *v.* and *n.* Another spelling of *wite*².

wythe, *n.* See *withe*.

wyvet, *v.* An old spelling of *wive*.

wyveri, *n.* See *wiver*.

wyvernt, *n.* See *wivern*.

1. The twenty-fourth letter and nineteenth consonant-sign in the English alphabet. In the Latin alphabet, from which it comes to ours, it followed next after U or V (which were then only one letter; see U), and was till a late date the last letter in that alphabet, till F and Z (see those letters) were finally added from the Greek to represent peculiar Greek sounds. The sign X was a Greek addition to the Phœnician alphabet; it had in early Greek use a divided value; in the eastern alphabets, that of *ks* (besides the signs for *ph* and *th*); in the western, that of *ks* (besides the signs for *ps* and *ts* or *ds*). The former of the two came afterward to be the universally accepted value in Greece itself; while the latter was carried over into Italy, and so became Roman, and was passed on to us. Hence our X has in general the Latin value *ks*; but as initial (almost only in words from the Greek, and there representing a different Greek character, the *ks*) we have reduced it to the *z*-sound, as in *Xerxes*, *xanthous*. In many words also, especially among those beginning with *ex*, it is made sonant, or pronounced as *gz*. The accepted rule for this is that the *gz*-sound is given after an unaccented before an accented vowel, as in *exert*, *exile* (*egert*, *eyzile*), over against *exercise*, *exile* (*ekseroize*, *eksile*). But usage does not follow the rule with exactness, and many cultivated speakers disregard the distinction altogether, pronouncing everywhere alike *ks* (or *kz*). In any case, the sign X is superfluous in English, as it was in Latin and in Greek; it denotes no sound which is not fully provided for otherwise. In Old English it was sometimes used for *sh*, as in *zal = shall*.

2. As a numeral, X stands for ten. When laid horizontally (X), it stands for a thousand, and with a dash over it (X̄), it stands for ten thousand.

3. As an abbreviation, X, stands for *Christ*, as in Xn. (Christian), Xmas. (Christmas).—4. As a symbol: (a) In *ornith.*, in myological formulas, the symbol of the semitendinous muscle. *J. H. Garrod*. (b) In *math.*: (1) [*l. c.*] In algebra, the first of the unknown quantities or variables. (2) [*l. c.*] In analytical geometry, an abscissa or other retilinear point-coördinate. (3) In mechanics, the component of a force in the direction of the axis of *x*.—5. Originally, a mark on brewers' easks; hence, a name given to all of a certain quality. Compare XX, XXX.—Xn function. See *function*.

xanorpha (zā-nōr'fī-kā), *n.* A musical instrument, resembling the harmonichord and the tetrahordon, invented by Röhlig in 1801, the strings of which were sounded by means of little bows.

Xantharpyia (zan-thür-pi'i-ä), *n.* [NL. (J. E. Gray), < Gr. *ξανθός*, yellow, + NL. *Harpyia*, q. v.] A genus of *Pteropodidae*. *X. amplixaudata* is a fruit-bat of the Australasian sub-region.

xantharsenite (zan-thär'se-nit), *n.* [*l. c.*] A hydrated arsenate of manganese, occurring in sulphur-yellow massive forms. It is found in Sweden, and is related to chondarsenite.

xanthate (zan'thät), *n.* [*l. c.*] A salt of xanthic acid.

xanthein (zan'thē-in), *n.* [*l. c.*] That part of the yellow coloring matter in flowers which is soluble in water, as distinguished from *xanthin*, which is the insoluble part.

xanthelasma (zan-thē-las'mä), *n.* [NL., < Gr. *ξανθός*, yellow, + *πλακα*, a plate.] Same as *xanthoma*.

Xanthia (zan'thi-ä), *n.* [NL. (Ochsenbeimer, 1816), < Gr. *ξανθός*, yellow.] A genus of moths, of the family *Orthosiidae*, having slender porrect palpi, and mostly yellow or orange fore wings undulating along their exterior border. It comprises about 30 species, and is represented in Europe, Asia, North and South America, and the West Indies. *X. fulvago* is the sawfly-moth of Europe. Its larva feeds when young on catkins of willow, later on bramble and plantain.

Xanthian (zan'thi-an), *a.* [*l. c.*] Xanthus (see def.). Of or belonging to Xanthus, an ancient town of Lycia in Asia Minor.—**Xanthian sculptures**, a large collection of sculptures, chiefly sepulchral, from Xanthus and the neighboring region, preserved in the British Museum. The collection includes

the reliefs from the so-called Harpy tomb. See *Harpy monument*, under *harpy*.

xanthic (zan'thik), *a.* [*l. c.*] Tending toward a yellow color; of or relating to xanthin; yellow, referring to the color of the urine.—**Xanthic acid**, the general name of the esters or ether-acids of thiosulphocarbonic acid, as ethyl xanthic acid, C₂H₅CS₂SH, a heavy, oily liquid with a penetrating smell and a sharp, astringent taste, many of whose salts have a yellow color.—**Xanthic calculus**, a urinary calculus composed in great part of xanthin.—**Xanthic flowers**, flowers which have yellow for their type, and are capable of passing into red or white, but never into blue. Those flowers of which blue is the type, and which are capable of passing into red or white, but never into yellow, have been termed *cyanic flowers*.—**Xanthic oxid**, xanthin.—**Xanthic-oxid calculus**. Same as *xanthic calculus*.

xanthid (zan'thid), *n.* [*l. c.*] A compound of xanthogen.

xanthin, **xanthine** (zan'thin), *n.* [Also *xanthin*; < Gr. *ξανθός*, yellow, + *-in*, *-in*.] One of several substances, so named with reference to their color. Especially—(a) That part of the yellow coloring matter of flowers which is insoluble in water. (b) The yellow coloring matter contained in madder. (c) A gaseous product of the decomposition of xanthates. (d) A complex body, C₅H₄N₄O₂, related to uric acid, occurring normally in small quantity in the blood, urine, and liver, and occasionally in urinary calculi. It is a white dimorphous body, and combines with both acids and bases.—**Xanthin calculus**. Same as *xanthic calculus*. See *xanthic*.

xanthinuria (zan-thi-nū'ri-ä), *n.* [*l. c.*] The excretion of xanthin in abnormal quantity in the urine. Also *xanthuria*.

Xanthispa (zan-this'pä), *n.* [NL. (Baly, 1858), < Gr. *ξανθός*, yellow, + NL. *Ilispa*, q. v.] A genus of leaf-beetles, of the family *Chrysomelidae*, erected for the single species *X. cincinnatiensis*, from Cayenne.

xanthitane (zan'thi-tän), *n.* [*l. c.*] An alteration-product of the sphene (titanite) from Henderson county, North Carolina. In composition it is analogous to the clays, but contains chiefly titanite acid instead of silica.

xanthite (zan'thit), *n.* [*l. c.*] A variety of vesuvianite found in limestone near Amity, New York.

Xanthium (zan'thi-um), *n.* [NL. (Tournefort, 1700; earlier by Lobel, 1576), < Gr. *ξανθιον*, a plant, said to be *X. strumarium*, and to have been so named because its infusion turned the hair yellow; < *ξανθός*, yellow.] A genus of composite plants, of the tribe *Helianthoideae* and subtribe *Ambrosieae*. It is characterized by unisexual flower-heads, the male with a single row of separate bracts,

leaves which are lobed and closely tomentose, or are coarsely toothed and greenish. The small numerous flower-heads are solitary or clustered in the axils; in the fertile heads the fruit forms a large spiny bur containing the achenes. The species are known as *cockle-bur*, or *clot-bur*; 3 occur in the United States, only 1 of which is a native, *X. canadense*, which varies near the coast and the Great Lakes to a dwarf variety, *echinatum*, known as *saw-burdock*; of the others, *X. spinosum*, the spiny clot-bur, thought to be a native of Chili, is armed with slender yellowish trifid spines in the axils; and *X. strumarium* is the common species of Europe. In England it is known as *ditch-bur*, *burweed*, *louse-bur*, and *small burdock*.

xanthiuria (zan-thi-ū'ri-ä), *n.* Same as *xanthinuria*.

Xantho (zan'thō), *n.* [NL. (Leach, 1815), < Gr. *ξανθός*, yellow.] A genus of brachyurous crustaceans, of the family *Cameridae*, with numerous species. Also *Xanthus*.

xanthocarpous (zan-thō-kär'pus), *a.* [*l. c.*] *ξανθός*, yellow, + *καρπός*, fruit.] In *bot.*, having yellow fruit.

Xanthocephalus (zan-thē-sef'ē-lus), *n.* [NL. (Bonaparte, 1850), < Gr. *ξανθός*, yellow, + *κεφαλή*, head.] A genus of *Icteridae*, or American blackbirds, having as type the common yellow-headed blackbird of the United States, first described by Bonaparte in 1825 as *Icterus icterocephalus*, and now known as *X. icterocephalus*. This large blackbird, of striking aspect, abounds in North America

Yellow-headed Blackbird (*Xanthocephalus icterocephalus*), male.

from Illinois, Iowa, and Wisconsin westward, extending north into the British possessions, and south into Mexico. The male is jet-black, with the whole head and neck bright-yellow, except the black lores and a black space about the base of the bill; there is a large white space on the patch, and usually there are a few yellow feathers on the thighs and vent. The length is from 10 to 11 inches, the extent 16 to 17. The female is smaller and chiefly brownish. This blackbird nests in marshy places, and lays from three to six eggs of a grayish-green color spotted with reddish brown. Also called *Xanthosomus*.

Xanthochelus (zan-thō-kē'lus), *n.* [NL. (Chevrolat, 1873), < Gr. *ξανθός*, yellow, + *χελών*, a claw.] A genus of snout-beetles, of the family *Curculionidae* and subfamily *Cleoninae*, having wings and somewhat pruinose elytra. It contains less than a dozen species, distributed from Egypt to Siberia.

Xanthochlorus (zan-thō-klō'rus), *n.* [NL. (Loew, 1857), < Gr. *ξανθός*, yellow, + *χλωρός*, greenish-yellow.] A genus of dipterous insects, of the family *Dolichopodidae*, comprising 4 small rust-colored species with yellow wings, of which 3 are European and 1 is North American. *Leptopus* is a synonym.

Xanthochroa (zan-thōk'rō-ä), *n.* [NL. (Schmidt, 1846), < Gr. *ξανθόχροος*, with yellow skin, < *ξανθός*, yellow, + *χρόα*, *χρόα*, the skin.] A genus of beetles, of the family *Edemeridae*, comprising 7 species, of which 3 are European, 1 is South American, and 3 are North American. They are small slender beetles with contiguous middle coxae, unspurred front tibia, and deeply emarginate eyes.

Xanthochroi (zan-thōk'rō-i), *n. pl.* [NL., *pl.* of *xanthochrous*; see *xanthochrous*.] In *ethnol.*, one of the five groups into which some

the female armed with numerous hooked prickles. Twenty-one species have been described, perhaps to be reduced to four; they are mostly of uncertain, perhaps of American, origin, but are now widely naturalized throughout warm regions. They are coarse weedy annuals with alternate

anthropologists classify man, comprising the blond type, or fair whites.

The *Xanthochroi* or fair whites—tall, with almost colourless skin, blue or grey eyes, hair from straw colour to chestnut, and skulls varying as to proportionate width—are the prevalent inhabitants of Northern Europe, and the type may be traced into North Africa and eastward as far as Hindostan. On the south and west it mixes with that of the Melanchroï, or dark whites, and on the north and east with that of the Mongoloids.

E. B. Tylor, Encyc. Brit., II. 113.

xanthochroia (zan-thō-kroi'ä), n. [NL., < Gr. *ξανθός*, yellow, + *χρῶμα*, the skin.] A yellow discoloration of the skin resulting from pigmentary changes. Also *xanthopathia*, *xanthopathy*.

xanthochroic (zan-thō-kro'ik), a. [*xanthochroous* + *-ic*.] Same as *xanthochroous*.

That distinction of light- and dark-haired populations and individuals which anthropologists have designated *xanthochroic* and *melanchroic*.

A. Winchell, N. A. Rev., CXXXIX. 254.

xanthochroous (zan-thok'rō-us), a. [*xanthochroous*, < Gr. *ξανθός*, yellow, + *χρῶμα*, skin, color.] Yellow-skinned; of or pertaining to the *Xanthochroi*.

xanthocoon, **xanthocone** (zan'thō-kōn, -kōn), n. [*xanthocoon*, < Gr. *ξανθός*, yellow, + *κόκκος*, dust.] An arsenio-sulphid of silver, of a dull-red or clove-brown color, occurring in hexagonal tabular crystals, but commonly in crystalline reniform masses. When reduced to powder it becomes yellow (whence the name). Also *xanthocoonite*.

xanthocreatine (zan-thō-krē'a-tin), n. [*xanthocreatine*, < Gr. *ξανθός*, yellow, + *κρέας* (*kreas*-), flesh, + *-ine*.] A basic nitrogenous substance found in muscular tissue and occasionally in urine, occurring in the form of yellow crystalline plates.

xanthocreatinine (zan'thō-krē-at'i-nin), n. Same as *xanthocreatine*.

xanthocyanopsy (zan'thō-si-an'op-si), n. [*xanthocyanopsy*, < Gr. *ξανθός*, yellow, + *κυανός*, dark-blue, + *ὄψις*, appearance.] Color-blindness in which the ability to distinguish yellow and blue only is present, vision for red being wanting.

Xanthocyela (zan-thō-sik'lä), n. [NL. (Baly, 1875), < Gr. *ξανθός*, yellow, + *κύκλος*, a ring, circle.] A genus of beetles, of the family *Chrysomelidae*, agreeing somewhat with *Euphitraea* in sternal structure, but with punctate-striate elytra, and different hind thighs. The type is *X. chapuisi* from India. The genus is supposed to be synonymous with *Amphimetu* (Chapuis, 1875).

xanthoderma (zan-thō-der'mä), n. [NL., < Gr. *ξανθός*, yellow, + *δέρμα*, the skin.] Yellowness of the skin from any cause; *xanthochroia*.

Xanthodes (zan-thō'déz), n. [NL. (Guenée, 1852), < Gr. *ξανθός*, yellow, + *εἶδος*, form.] A genus of noctuid moths, of Guenée's family *Acontidae*, comprising a few species inhabiting southern Europe, Asia, and Africa, whose metamorphoses are unknown. The fore wings are entire, usually rounded, and pale-yellow in color, with red or violet-brown markings.

xanthodont (zan'thō-dont), a. [*xanthodont*, < Gr. *ξανθός*, yellow, + *ὀδούς* (*odont*-) = E. tooth.] Having yellow teeth, as a rodent. The enamel of the front surface of the incisors in rodents is, as a rule, of some bright color into which yellow enters, mostly orange or of a still more reddened tint, furnishing a notable exception to the white teeth of most mammals, the piceous or reddish-black teeth of most shrews being another exception to the rule.

xanthodontous (zan-thō-don'tus), a. [*xanthodont* + *-ous*.] Same as *xanthodont*.

xanthogen (zan'thō-jen), n. [*xanthogen*, < Gr. *ξανθός*, yellow, + *γενής*, producing; see *-gen*.] A hypothetical radical formerly supposed to exist in xanthic acid and its compounds.

Xanthogramma (zan-thō-gram'ä), n. [NL. (Schiner, 1860), < Gr. *ξανθός*, yellow, + *γράμμα*, mark, letter.] A genus of dipterous insects, of the family *Syrphidae*, closely allied to the genus *Syrphus*, and comprising 3 European and 5 North American species. They are large, almost naked flies, of a metallic black color broken with yellow spots and bands. The larvæ probably feed on plants.

Xantholestes (zan-thō-les'téz), n. [NL. (R. B. Sharpe, 1877), < Gr. *ξανθός*, yellow, + *λεσστής*, a robber; see *Lestes*.] In *ornith.*, a genus of Philippine flycatchers, inhabiting the island of Panay. *X. panayensis* is the only species, 4½ inches long, olive-yellow above and bright-yellow below.

Xantholinus (zan-thō-lin'us), n. [NL. (Serville, 1825), < Gr. *ξανθός*, yellow, + NL. (*Staphylinus*).] A genus of rove-beetles or *Staphylinidae*, of universal distribution, and comprising about 100 species, distinguished chiefly by the long terminal joint of the maxillary palpi.

They are found under dead leaves, stones, and moss; but a few European species are myrmecophilous, living in the nests of *Formica rufa* and *F. fuliginosa*.

Xantholites (zan-thō-lit'ez), n. [NL. (Ethoridge), < Gr. *ξανθός*, yellow, + *λίθος*, stone.] A genus of fossil crustaceans from the London clay.

xanthoma (zan-thō'mä), n. [NL., < Gr. *ξανθός*, yellow, + *-oma*.] A connective-tissue new growth in the skin, forming soft yellow patches, either flat (*xanthoma planum*) or tuberculated (*xanthoma tuberosum*). The former is especially apt to occur on the eyelids, being then called *xanthoma palpebrarum*. Also called *vittigoides* and *xanthelasma*.

xanthomatous (zan-thom'a-tus), a. [*xanthoma* (t-) + *-ous*.] In *pathol.*, of or pertaining to xanthoma; as, the *xanthomatous* diathesis.

xanthomelanous (zan-thō-mel'a-nus), a. [*xanthomelanous*, < Gr. *ξανθός*, yellow, + *μέλας* (*melas*-), black.] Noting a type or race of men. See the quotation.

The *Xanthomelanous*, with black hair and yellow, brown, or olive skins. *Huxley*, Critiques and Addresses, p. 153.

Xanthonia (zan-thō-ni-ä), n. [NL. (Baly, 1863), < Gr. *ξανθός*, yellow.] A genus of chrysomelid beetles, comprising 4 species, all North American. *X. stevensi* and *X. villosula* feed on the leaves of the black walnut.

xanthopathy (zan-thop'a-thi), n. [*xanthopathy*, < Gr. *ξανθός*, yellow, + *πάθος*, disease.] Same as *xanthochroia*.

Xanthophæa (zan-thō-fē'ä), n. [NL. (Chaudoir, 1848), < Gr. *ξανθός*, yellow, + *φαῖς*, dusky.] A genus of beetles, of the family *Carabidae*, comprising 2 species, one from Australia and the other from Oceania.

xanthophane (zan'thō-fän), n. [*xanthophane*, < Gr. *ξανθός*, yellow, + *-φανής*, < *φαίνεσθαι*, appear.] A yellow coloring matter derived from the retina.

xanthophyl, **xanthophyll** (zan'thō-fil), n. [*xanthophyl*, < Gr. *ξανθός*, yellow, + *φύλλον*, leaf.] In *bot.*, the peculiar yellow coloring matter of autumn leaves, due to the decomposition of chlorophyll. Its chemical composition and the processes of its formation are not well known. See *chlorophyll*, *chrysochlorophyll*.

xanthophyllite (zan-thō-fil'it), n. [*xanthophyllite*, < Gr. *ξανθός*, yellow, + *φυλλον*, leaf.] In *bot.*, the peculiar yellow coloring matter of autumn leaves, due to the decomposition of chlorophyll. Its chemical composition and the processes of its formation are not well known. See *chlorophyll*, *chrysochlorophyll*.

xanthophylline (zan-thō-fil'in), n. [*xanthophylline*, < Gr. *ξανθός*, yellow, + *φυλλον*, leaf.] Same as *xanthophyll*.

xanthophyllite (zan-thō-fil'it), n. [*xanthophyllite*, < Gr. *ξανθός*, yellow, + *φυλλον*, leaf.] A mineral allied to the micas, occurring in crusts or implanted globules in talcose schist; found in Zlatoust in the Ural. Walenite is a variety in distinct tabular crystals. Xanthophyllite is closely allied to sebertite (clintonite), and these species, with chloritoid, otvélite, etc., constitute the clintonite group, or the brittle micas.

xanthopierin (zan-thō-pik'rin), n. [*xanthopierin*, < Gr. *ξανθός*, yellow, + *πικρός*, bitter, + *-ine*.] In *chem.*, a name given by Chevallier and Pelletan to a yellow coloring matter from the bark of *Xanthoxylum Caribæum*, afterward shown to be identical with berberine.

xanthopierite (zan-thō-pik'rit), n. [*xanthopierite*, < Gr. *ξανθός*, yellow, + *πικρός*, bitter, + *-ite*.] Same as *xanthopierin*.

xanthopous (zan'thō-pus), a. [*xanthopous*, < Gr. *ξανθός*, yellow, + *πούς* (*pod*-) = E. foot.] In *bot.*, having a yellow stem.

xanthoproteic (zan-thō-prō'tē-ik), a. [*xanthoproteic*, < Gr. *ξανθός*, yellow, + *πρωτεΐν*, protein, + *-ic*.] Related to or derived from xanthoprotein.—**Xanthoproteic acid**, a non-crystallizable acid substance resulting from the decomposition of albuminoids by nitric acid.

xanthoprotein (zan-thō-prō'tē-in), n. [*xanthoprotein*, < Gr. *ξανθός*, yellow, + E. protein.] The characteristic yellow substance formed by the action of hot nitric acid on proteid matters.

xanthoproteinic (zan-thō-prō'tē-in'ik), a. [*xanthoproteinic*, < Gr. *ξανθός*, yellow, + *πρωτεΐν*, protein, + *-ic*.] Related to xanthoprotein.

xanthopsin (zan-thop'sin), n. [*xanthopsin*, < Gr. *ξανθός*, yellow, + *ψήραξ*, a blister.] The presence of pustules on the skin.

xanthopsy (zan'thop-si), n. [*xanthopsy*, < Gr. *ξανθός*, yellow, + *ὄψις*, appearance.] Color-blindness in which all objects seem to have a yellow tinge; yellow vision.

xanthopsydria (zan-thop-si-drä'si-ä), n. [NL., < Gr. *ξανθός*, yellow, + *ψήραξ*, a blister.] The presence of pustules on the skin.

Xanthoptera (zan-thop'te-rä), n. [NL. (Sodoffsky, 1837), < Gr. *ξανθός*, yellow, + *πτερόν*, wing.] A genus of noctuid moths, of Guenée's family *Anthophilidae*, comprising a few American species, distinguished by the presence of a subcellular areole on the fore wings. *X. semicrocea* feeds in the larval state on the leaves of

the pitcher-plant (*Sarracenia*). The larva is a semi-looper, and is beautifully banded with white and purple or lake-red.

xanthopuc-cine (zan-thō-puk'sin), n. [*xanthopuc-cine*, < Gr. *ξανθός*, yellow, + *πυκνός* (*puccoon*)-, + *-ine*.] An alkaloid found in *Hydrastis Canadensis*.

Xanthopygia (zan-thō-pi'gi-ä), n. [NL. (Blyth, 1849), and *Zanthopygia*, Blyth, 1847, < Gr. *ξανθός*, yellow, + *πυγή*, rump.] A genus of Old World flycatchers or *Muscicapidae*, ranging from Japan and China to the Malay peninsula and the Philippines. There are 4 species, 2 of which the males have the rump yellow (whence the name), the throat and breast yellow, and the tail black. These are *X. tricolor* and *X. narcissina*. *X. cyanomelena* is chiefly blue and black in the male. *X. fuliginosa* (see *water-*

Xanthopygus (zan-thō-pi'gus), n. [NL. (Kraatz, 1857), < Gr. *ξανθός*, yellow, + *πυγή*, rump.] A genus of American rove-beetles, comprising 1 North American species, *X. acti*, and about 15 species from South America, characterized by having the marginal lines of the thorax distinct in front, the inner well defined.

xanthorhamnine (zan-thō-ram'nin), n. [*xanthorhamnine*, < Gr. *ξανθός*, yellow, + *ράμος*, buckthorn (see *Rhamnaceae*), + *-ine*.] A yellow coloring matter contained in the ripe Persian or Turkish berries and in Avignon grains. See *Persian berries*, under *Persian*.

Xanthornus (zan-thōr'nus), n. [NL. (P. S. Pallas, 1769; Scopoli, 1777; generally misread to Cuvier), prop. **Xanthornis*, < Gr. *ξανθός*, yellow, + *ὄρνις*, bird.] A large genus of *Icteridae*; strictly synonymous with *Icterus* of Brisson (1760). Most of the American caronges, orloles, hang-nests, or troopials have at some time been placed in this genus. Also called *Pendulinus*. See cut under *tropical*.

Xanthorrhiza (zan-thō-ri-zä), n. [NL. (Marshall, 1789), < Gr. *ξανθός*, yellow, + *ρίζα*, root.] A genus of polypetalous plants, of the order *Ranunculaceae*, tribe *Helleboreae*, and subtribe *Cimicifugeae*. It is characterized by regular racemose flowers with five or ten stamens, and five or ten carpels which become follicles in fruit. The only species, *X. apifolia*, is a native of the United States, growing on shaded mountain-banks from Pennsylvania and western New York to Kentucky and southward. It is a dwarf shrub with its stem yellowish within, bearing pinnately decomposed leaves and pendulous compound racemes of brownish-purple flowers with petaloid sepals and small gland-like petals. Its yellow rootstock secures it the name of *shrub-yellowroot* (whence see); this and the bark are intensely bitter, and afford a simple tonic of minor importance.

Xanthorrhœa (zan-thō-rê'ä), n. [NL. (Smith, 1798), so called from the red resin of some species; < Gr. *ξανθός*, yellow, + *ροία*, a flow, < *ρεῖν*, flow.] A genus of liliaceous plants of the tribe *Lomandreeae*. It is characterized by bisexual flowers with distinct and partly glumaceous perianth-segments, and a three-celled ovary with few or several ovules in each cell. The 11 species are all Australian; they produce a thick rhizome commonly growing up into an arborescent woody trunk, covered or terminated by long linear rigid crowded brittle leaves. The numerous small flowers are densely compacted in a long cylindrical terminal spike.

xanthosis (zan-thô'sis), *n.* [NL., < Gr. *ξανθός*, yellow, + *-osis*.] In *pathol.*, a yellowish discoloration, especially that sometimes seen in cancerous tumors.

Xanthosoma (zan-thô-sô'mä), *n.* [NL. (Schott, 1832), < Gr. *ξανθός*, yellow, + *σώμα*, body.] A genus of monocotyledonous plants, of the order *Araceæ*, tribe *Colocasioideæ*, and subtribe *Colocasiœæ*. It is characterized by coriaceous sagittate or pedate leaves, by two- or three-celled ovaries separate below but dilated and united above, forming berries in fruit which are included within the spathe-tube, and by anatroous ovules with an inferior micropyle, mostly attached to the partitions. There are about 20 species, natives of tropical America. They are herbs with a milky juice, producing a tuberous rootstock or thick elongated caudex. They bear long thick petiolate leaves; the flower-stalks are usually short, often numerous, and produce a spathe with an oblong or ovoid convoluted tube which bears a boat-shaped lamina and enlarges in fruit. The spadix is shorter and included; the fertile and densely flowered lower part is separated by a constriction from the elongated male section. *X. atrovirens* is known in the West Indies as *kale*, and *X. peregrinum* (perhaps the same as the last) as *taya*; for *X. sagittifolium*, see *tannier*.

xanthospermous (zan-thô-spér'mus), *a.* [< Gr. *ξανθός*, yellow, + *σπέρμα*, seed.] In *bot.*, having yellow seeds; yellow-seeded.

Xanthotania (zan-thô-té'ni-ä), *n.* [NL. (Westwood, 1857), < Gr. *ξανθός*, yellow, + *τανία*, a band; see *tania*.] A genus of beautiful butterflies, containing only the species *X. busiris*, from Malacca, where it was discovered by A. R. Wallace.

Xanthoura, *n.* See *Xanthura*.

xanthous (zan'thus), *a.* [< Gr. *ξανθός*, yellow, + *-ous*.] Yellow; in anthropology and ethnography specifying the yellow or Mongoloid type of mankind.

The second great type, the Mongolian or *Xanthous* or "yellow." *W. H. Flower*, Pop. Sci. Mo., XXVIII. 316.

xanthoxyl (zan-thok'sil), *n.* A plant of the former order *Xanthoxylaceæ* (now the tribe *Xanthoxyleæ*). *Lindley*.

Xanthoxyleæ (zan-thok-sil'ë-ë), *n. pl.* [NL. (Lindley, 1835), < *Xanthoxylum* + *-acæ*.] A former order of plants, equivalent to the present tribe *Xanthoxyleæ*.

Xanthoxyleæ (zan-thok-sil'ë-ë), *n. pl.* [NL. (Nees and Martius, 1823), < *Xanthoxylum* + *-eæ*.] A tribe of polypetalous plants, of the order *Rutaceæ*. It is characterized by regular flowers with free spreading petals and stamens, usually an annular or pulvinate disk, from two to five carpels each with two ovules, and a straight or arcuate embryo commonly with flat cotyledons. It includes 25 genera, mainly tropical, 14 of which are widely separated monotypic local genera. See *Xanthoxylum* (the type) and *Pentaceæ*.

xanthoxylol (zan-thok-sil'ô-in), *n.* [< *Xanthoxylum* + *-in*.] A neutral principle extracted from the bark of the prickly-ash, *Xanthoxylum Americanum*.

Xanthoxylum (zan-thok'si-lum), *n.* [NL. (Philip Miller, 1759), altered from the *Zanthoxylum* of Linnæus, 1753, and of Plukenet, 1696, the name of some West Indian tree; applied to this from the yellow heartwood; < Gr. *ξανθός*, yellow, + *ξύλον*, wood.] A genus of plants, of the order *Rutaceæ*, type of the tribe *Xanthoxyleæ*. It is characterized by alternate pinnate leaves, by polygamous flowers with from three to five imbricate or induplicate petals and three to five stamens, and by a fruit of one to five somewhat globose and commonly two-valved carpels. There are about 110 species, widely distributed through tropical and warm regions; nearly 50 occur in Brazil, many others in the West Indies, Mexico, and Central America, and 5 in the United States. They are trees or shrubs, sometimes armed with straight or recurved prickles. The leaves are commonly odd-pinnate, rarely reduced to one to three leaflets; the leaflets are entire or crenate, oblique, and pellucid-dotted. The flowers are small, usually white or greenish, commonly in crowded axillary and terminal panicles. The fruit is usually aromatic and pungent, with a glandular-dotted pericarp. The bark, especially that of the roots, is powerfully stimulant and tonic, and often used for rheumatism, to excite salivation, and as a cure for toothache; it contains a bitter principle (berberine) and a yellow coloring matter; in the West Indies it is esteemed an antisyphilitic. Three species in the United States are small trees, of which *X. cribrosum* (*X. Caribæum*) is the satinwood of Florida, the West Indies, and the Bermudas, its wood, used in the manufacture of small articles, having at first the odor of true satinwood. *X. Fagara* (*X. Pterota*) is the wild lime of Florida and western Texas, extending also through Mexico to Brazil and Peru, and has been also known as *Fagara Pterota* and *P. lentiscifolia*; in southern Florida it is one of the most common of small trees, often a tall slender shrub; it produces a hard heavy reddish-brown wood, known as *savin* or *ironwood* in the West Indies. (See *wild lime*, under *lime*.) *X. emarginatum* (*X. sapindoides*), known as *liciate* or *liquun-rorum* in the West Indies, and exported thence under the name of *rosewood*, also extends to Florida, where it is a shrub with coriaceous shining leaves. The 2 other species of the United States are known as *tooth-ache-tree* and as *prickly-ash* (which see); of these *X.*

Americanum is a shrub found from Massachusetts and Virginia to Minnesota and Kansas, and *X. Clava-Herculis* is a small tree ranging from Virginia southward, also known

Xanthoxylum Americanum. 1, branch with male flowers; 2, branch with fruits and leaves; a, male flower; b, female flower; c, fruits.

as *pepper-wood*. For *X. Caribæum*, see *prickly yellow-wood*, under *yellow-wood*. The other species of the West Indies are there known in general as *yellow-wood* and as *justic*, several producing a valuable wood; in Jamaica *X. corticea* is also known as *yellow mastwood*, and *X. spinifex* as *rain-wood* (which see); in Australia *X. brachycanthum* is used for cabinet-work; in Cape Colony *X. Capense* is known as *knobwood* (which see); 6 other woody species occur in the Hawaiian Islands, all there known as *heae*. The fruit of many tropical species is used as a condiment and also medicinally, as *X. piperitum*, the Japanese pepper, and *X. schinifolium* (*X. Mantschuricum*), the anise-pepper of China. The Chinese bitter pepper, or star-pepper, *X. Daniellii*, is now referred to the genus *Evoidia*. *X. nitidum* is in China a valued febrifuge, and *X. atatum* a sudorific and antelmintic; the leaves of the latter are used as food for silkworms, its fruit in India as a condiment, and its seeds as a fish-poison.

Xanthura (zan-thú'rä), *n.* [NL. (Sciator, 1862, after *Xanthoura*, Bonaparte, 1850), < Gr. *ξανθός*, yellow, + *οὐρά*, tail.] A genus of beautiful American jays, having the tail more or less yellow; the green jays, as *X. lucrosa*, of the Rio Grande region and southward. These resplendent birds vie with any of the blue jays in color, and are of very unusual hues for this group. The species named is yellowish-green, bright-yellow, greenish-blue, azure-blue, jet-black, and hoary-white in various parts; it is not crested.

Rio Grande Jay (*Xanthura luxiosa*). The length is 11 or 12 inches, the extent 14½ to 15½. It nests in bushes, and lays usually three or four eggs of a greenish-drab color marked with shades of brown. Another and still more richly colored species is the Peruvian jay, *X. yncos*.

xanthuria (zan-thú'ri-ä), *n.* Same as *xanthurin*.

Xanthyrus (zan'thi-ris), *n.* [NL. (Felder, 1862), prop. **Xanthothyrus*, < Gr. *ξανθός*, yellow, + *θύρις*, window.] A genus of bombycid moths, of the family *Arctiidae*, comprising one or more species from South America.

Xantus gecko. See *gecko*.

Xantusia (zan-tú'si-ä), *n.* [NL. (S. F. Baird, 1852), named after L. J. Xantus de Vesey, who collected extensively in California and Mexico.] The typical genus of *Xantusiidae*.

Xantusiidae (zan-tú-si'i-dë), *n. pl.* [NL., < *Xantusia* + *-idae*.] An American family of eriglossate lacertilians, typified by the genus *Xantusia*, having the parietal bones distinct and the supratemporal fossæ roofed over.

xd. A contraction of *ex dir.* (which see).

zebec (zë'bek), *n.* [Also sometimes *zebec*, *zebeck*, *shebec*, *shebeck*; = F. *chebec* = Sp. *jabeque* = Pg. *chaveco*, *zaveco* = It. *sciabeco*, also *zambecco*; said to be < Turk. *sumbeki*; cf. Pers. Ar. *sumbuk*, a small vessel.] A small three-masted vessel, formerly much used by the Algerine corsairs, and now in use to some extent in Mediterranean commerce. It differs from the felucca chiefly in having several square sails as well as lateen sails, while the latter has only lateen sails.

Our fugitive, and eighteen other white slaves, were put on board a *zebec*, carrying eight six-pounders and sixty men. *Sumner, Orations*, I. 252.

Xema (zë'mä), *n.* [NL. (Leach, 1819): a made word.] A genus of *Laridae*; the fork-tailed gulls. *X. sabinei* is the only species. This gull is 13 or 14 inches long. The adult is snowy-white, with extensive slaty-blue mantle, the outer five primaries black tipped with white, the head hooded in slate-color with a jet-black ring, the feet black, and the bill black tipped with yellow. The forking of the tail is about one inch. This remarkable and beautiful gull inhabits arctic America both coastwise and interiorly, and strays irregularly southward in

winter, though it is not often seen in the United States. It has been taken in the Bermudas, in Peru, and in Europe. The nest is made on the ground; the eggs are three in number, measuring 1½ by 1¼ inches, and of a brownish-olive color sparsely splashed with brown. The swallow-tailed gull (see *swallow-tailed*) has sometimes been wrongly referred to this genus.

xenacanthine (zen-a-kan'thin), *a.* and *n.* I. *a.* Of or relating to the *Xenacanthini*.

II. *n.* One of the *Xenacanthini*.

Xenacanthini (zen-a-kan-thi'ni), *n. pl.* [NL., < Gr. *ξένος*, strange, + *ἀκανθα*, spine, + *-ini*.] An order of fossil selachians. They had the notochord rarely if ever constricted, neural and hemal arches and spines long and slender, and pectoral fins with long segmented axis. The order includes many extinct fishes which flourished in the seas of the Carboniferous and Permian periods, and which have been referred to the families *Pleuacanthidae* and *Cladodontidae*.

Xenaltica (zë-nal'ti-kä), *n.* [NL. (Baly, 1875), < Gr. *ξένος*, strange, + NL. *Haltica*, q. v.] A genus of beetles, of the family *Chrysomelidae*, having the four anterior tibiae with a small spine and the hind tibiae with a double spine. The two known species are from Old Calabar and Madagascar. The genus is supposed to be synonymous with *Myrcina* (Chapuis, 1875).

xenarthral (zë-när'thräl), *a.* [< Gr. *ξένος*, strange, + *ἄρθρον*, a joint.] Peculiarly or strangely jointed, as a mammal's vertebrae; having certain accessory articulations of the dorsolumbar vertebrae, as the American edentates: the opposite of *nomarthral*. *Gill*, 1884.

xenelasia (zen-ë-lä'si-ä), *n.* [NL., < Gr. *ξένος*, strange, + *λασία*, the expulsion of strangers, an alien act, < *ξένος*, a stranger, + *λάσις*, < *ἵσθαι* (*ἵστασθαι*), drive.] A Spartan law or alien act which prohibited strangers from residing in Sparta without permission.

xenia, *n.* Plural of *xenium*.
xenial (zē'ni-əl), *a.* [**<** Gr. *ξενία*, hospitality, **<** *ξένος*, Ionic *ξένος*, a guest, also a host, in Homer a friendly stranger.] Pertaining to hospitality, or to the rights, privileges, standing, or treatment of a guest, or to the relations between a guest and his host; specifically, noting such relations, etc., in Greek antiquity.

Again, it is curious to observe that the *xenial* relation was not less vivacious than that of blood. The tie of blood subsists in the second generation from the common ancestor; and Diomed and Glaucus similarly own one another as *ξένος* because two generations before *Glaucus* had entertained *Bellerophon*.

Gladstone, *Studies on Homer*, II. 460.

Xenichthyinae (zē-nik-thi-i'nē), *n. pl.* [NL., **<** *Xenichthys* + *-inae*.] A subfamily of *Sparidae*, typified by the genus *Xenichthys*, having the dorsal fin deeply emarginate, the vomer toothed, and all the teeth villiform in narrow bands.

Xenichthys (zē-nik'this), *n.* [NL. (Gill, 1863), **<** Gr. *ξένος*, strange, + *ἰχθύς*, a fish.] A genus of sparoid fishes, typical of the *Xenichthyinae*, as *X. californiensis*. This queer fish is of a silvery color with continuous dusky stripes along the several rows of scales on the upper part of the body, and is found from San Diego southward.

Xenicidae (zē-nis'i-dē), *n. pl.* [NL., **<** *Xenicus* + *-idae*.] A family of non-oscine (clamatorial or mesomyodian) passerine birds, typified by the genus *Xenicus*, and confined to New Zealand. Also called *Acanthisittidae*. They were formerly supposed to be creepers, warblers, nuthatches, or wrens, and classed accordingly, but are now placed in the vicinity of the Old World ant-thrushes and related forms (*Pittidae*, etc.). There is only one intrinsic sringomyon; the sternum is single-notched on each side behind; the nasal bones are holohinal, the maxillopalatines are slender, and the vomer is broad, with anterior emargination; the tarsi are not lamnuplantar; the primaries are ten, with the first about as long as the second, and the rectrices are ten. *Acanthisitta chloris* (the citrine warbler of Latham, 1783) is a short-tailed creeper, quite like a nuthatch in appearance and habits; the species of *Xenicus* resemble wrens. See *Xenicus*.

Xenicus (zē'ni-kus), *n.* [NL. (G. R. Gray, 1855), **<** Gr. *ξενικός*, of a stranger, **<** *ξένος*, a stranger.] The name-giving genus of *Xenicidae*. It contains two species. *X. longipes* is the long-legged warbler of Latham (1783), remarkably like a wren in appearance and habits; the other species is *X. gilviventris* of Julius Haast.

Xenisma (zē-nis'mä), *n.* [NL. (Jordan, 1876), **<** Gr. *ξένισμα*, amazement, **<** *ξενίζεω*, surprise, make strange, **<** *ξένος*, strange.] A genus of cyprinodonts, or a subgenus of *Fundulus*, whose dorsal fin is high and begins opposite or slightly behind the anal. Two species inhabit tributaries of the Lower Mississippi. See cut under *studfish*.

xenium (zē'ni-um), *n.*; pl. *xenia* (-ä). [NL., **<** Gr. *ξένιον*, usually in pl. *ξένηα*, a gift to a guest from his host, neut. of *ξένιος*, of a guest, **<** *ξένος*, a guest, stranger.] In *classical antiq.*, a present given to a guest or stranger, or to a foreign ambassador.

Xenocichla (zen-ō-sik'lä), *n.* [NL. (Hartlaub, 1857), **<** Gr. *ξένος*, strange, + *κίχλη*, a thrush.] An extensive genus of Ethiopian birds, conventionally referred to the *Timeliidae*, and also called *Bleda*, *Pyrrhurus*, *Bæpogon*, and *Trichites*. Fifteen species are described; they differ much from one another. Some have often been put in such genera as *Pneonotus*, *Crimiger*, or *Trichophorus*, and all are called by the name *bulbul*, in common with other birds more or less nearly related. *X. icteria* is the yellow-browed bulbul; *X. flavicollis*, the yellow-throated; *X. tephrolema*, the ashy-throated; *X. simplex*, Marche's; *X. flavistriata*, Barratt's; *X. serina*, the red-billed; *X. syndactyla* (the type of the genus, from Senegambia to Gaboon), the chestnut-tailed; *X. scandens*, the pale; *X. abigularis*, Usher's; *X. indicator*, the honey-guide; *X. leucopleura*, the white-bellied; *X. notata*, the yellow-marked; *X. canicapilla*, the gray-headed.

Xenocratean (zē-nok-rā-tō'an), *a.* [**<** *Xenocrates* (see def.).] Pertaining to the doctrine of Xenocrates, a Greek philosopher, who was the head of the Academy, the second after Plato. He is known to have been a voluminous and methodical writer, adhering pretty closely to his master's teachings, but inclined to the doctrines of the Pythagoreans. He held that the ideas were numbers, and that all numbers were produced from 1 and 2.

Xenocratic (zen-ō-krat'ik), *a.* Same as *Xenocratean*.

Xenocrepis (zen-ō-kre'pis), *n.* [NL. (Förster, 1856), **<** Gr. *ξένος*, strange, + *κρηπίς*, a half-boot.] A genus of hymenopterous parasites, of the chalcid subfamily *Pteromalinae*, having thirteen-jointed antennae with two ring-joints, the stigmal club small, and the marginal vein thickened. The species are European.

Xenodacnis (zen-ō-dak'nis), *n.* [NL. (Cabanis, 1873), **<** Gr. *ξένος*, strange, + NL. *Dacnis*, *q. v.*] A genus of guittinets or *Certhiidae*. The type is *X. parina* of Peru, 4½ inches long, the male of a nearly uni-

form dull purplish-blue, the wings and tail blackish edged with blue. The form is peculiar among the guittinets, the bill having a parine shape, though no nasal bristles.

xenoderm (zen-ō-dēr'm), *n.* [**<** NL. *Xenoderma*.] A wart-snake of the subfamily *Xenodermatinae*.

Xenoderma (zen-ō-dēr'mä), *n.* [NL. (Reinhardt), **<** Gr. *ξένος*, strange, + *δέρμα*, skin.] The typical genus of *Xenodermatinae*, with granular scales, simple urostegeas, and no frontal nor parietal plates. The genus has also been placed in *Nothopsidae*. Also *Xenodermus*.

Xenodermatinae (zen-ō-dēr-mä-ti'nē), *n. pl.* [NL., **<** *Xenoderma* (-t-) + *-inae*.] A subfamily of *Acrochordidae* or wart-snakes, represented by the genus *Xenoderma*. Also *Xenodermata*.

xenodermine (zen-ō-dēr'min), *a.* [**<** *Xenoderma* + *-ine*.] Of or pertaining to the *Xenodermatinae*.

Xenodermus (zen-ō-dēr'mus), *n.* [NL.] Same as *Xenoderma*.

xenodocheum, xenodochium (zen'ō-dō-kē'um, -kī'um), *n.*; pl. *xenodochea, xenodochia* (-ä). [LL. *xenodocheum*, **<** Gr. *ξενοδοχείον*, a place for strangers to lodge in, a hotel, **<** *ξένος*, a stranger, + *δοχείον*, a receptacle, **<** *δέχομαι*, receive.] 1. In *classical antiq.*, a building for the reception of strangers.—2. In modern Greek lands, a hotel; an inn; also, a guest-house in a monastery.

xenodochy (zē-nod'ō-ki), *n.* [**<** Gr. *ξενοδοχίον*, the entertainment of a stranger, **<** *ξένος*, a stranger, + *δοχή*, a receiving, **<** *δέχομαι*, receive.] 1. Reception of strangers; hospitality.—2. Same as *xenodocheum*.

xenogamy (zē-nog'ä-mi), *n.* [**<** Gr. *ξένος*, strange, + *γάμος*, marriage.] In *bot.*, cross-fertilization—that is, the impregnation or fecundation of the ovules of a flower with pollen from another flower of the same species, either on the same or (usually) on a different plant.

xenogenesis (zen-ō-jen'ō-sis), *n.* [NL., **<** Gr. *ξένος*, stranger, + *γένεσις*, birth.] The generation of offspring which pass through an entirely different life-cycle from that of the parents, and never exhibit the characters of the latter: a mode of biogenesis supposed by Milne-Edwards to occur, but not proved to have any existence in fact.

The term Heterogenesis . . . has unfortunately been used in a different sense [than that of the offspring being altogether and permanently unlike the parent], and M. Milne-Edwards has therefore substituted for it *Xenogenesis*, which means the generation of something foreign.

Huxley, *Lay Sermons*, p. 353.

xenogenetic (zen'ō-jē-net'ik), *a.* [**<** *xenogenesis* (-ēt-) + *-ic*.] Of the nature of or pertaining to xenogenesis.

I have dwelt upon the analogy of pathological modification, which is in favour of the *xenogenetic* origin of microzymes.

Huxley, *Lay Sermons* (ed. 1871), p. 370.

xenogenic (zen-ō-jen'ik), *a.* [**<** *xenogen-y* + *-ic*.] Same as *xenogenetic*.

xenogeny (zē-noj'e-ni), *n.* [**<** Gr. *ξένος*, strange, + *γενεα*, **<** *γενεῖν*, -born.] Same as *xenogenesis*.

xenolite (zen'ō-lit), *n.* A silicate of aluminium, related to fibrolite, found at Petershoff, Finland.

xenomenia (zen-ō-mē'ni-ä), *n.* [NL., **<** Gr. *ξένος*, strange, + *μηνιαία*, menses.] A loss of blood occurring at the time of the menstrual flow elsewhere than from the uterus, and taking the place of the regular flow; vicarious menstruation. Compare *stigma*, 4.

Xenomi (zē-nō'mi), *n. pl.* [NL., **<** Gr. *ξένος*, strange, + *ὄμιος*, shoulder.] A suborder of fishes, resembling the *Haplomi*, but distinguished by peculiarities of the pectoral arch (whence the name). It consists of the family *Dallidae* alone. See cut under *Dallia*.

xenomorph (zen-ō-mōr'fik), *a.* [**<** Gr. *ξένος*, strange, + *μορφή*, form.] In *lithol.*, noting the mineral constituents of a rock when they are bounded by planes not formed as the result of their own molecular structure, but the result of their contact with other minerals also forming constituents of the same rock, which having crystallized first have impressed their form on those adjacent to them: the counterpart of *idiomorphic*. Also called *allotriomorphic*.

xenomous (zē-nō'mus), *a.* [**<** NL. *Xenomi*.] Peculiar in the structure of the pectorals, as the Alaskan blackfish; of or pertaining to the *Xenomi*.

Xenopeltidae (zen-ō-pel'ti-dē), *n. pl.* [NL., **<** *Xenopeltis* + *-idae*.] A family of colubriiform *Ophidia*, represented by the genus *Xenopeltis*. They have no supraorbital or postorbital bone, have a coronoid bone, premaxillary teeth, and gastrostegeas, and have no rudiments of hind limbs.

Xenopeltis (zen-ō-pel'tis), *n.* [NL. (Reinhardt, 1827), **<** Gr. *ξένος*, strange, + *πέλις*, a shield.] The typical genus of *Xenopeltidae*, having the lower jaw produced, the teeth very fine, and no anal spurs. *X. unicolor*, formerly *Tortrix xenopeltis*, is a singular snake of nocturnal and carnivorous habits, found in Malaysia and some other regions.

Xenophanean (zē-nof-ä-nē'an), *a.* [**<** *Xenophanes* (see def.).] Pertaining to the doctrines of Xenophanes of Colophon, the founder of the Eleatic school of philosophy. He seems to have been the first of the Greeks to propound a monotheistic doctrine, probably of a pantheistic character; but he did not go to the length of denying the reality of the manifold, as Parmenides and his followers did.

Xenophora (zē-nof'ō-rä), *n.* [NL. (Fischer von Waldheim, 1807), also *Xenophorus* (Philippi, 1847), **<** Gr. *ξένος*, strange, + *-φορος*, **<** *φέρω* = *E. bear*.] The typical genus of *Xenophoridae*, so

Xenophora pallidula, side view, reduced.

Xenophora pallidula, lower view, reduced.

called from their carrying foreign objects attached to the shell. Formerly also called *Phorus* (a name too near the prior *Phora* in entomology). See also cut under *carrier-shell*.

Xenophoridae (zen-ō-for'i-dē), *n. pl.* [NL., **<** *Xenophora* + *-idae*.] A family of tænioglossate gastropods, typified by the genus *Xenophora*: formerly called *Phoridae* (a name preoccupied in entomology). They are known as *carrier-shells*, *conchologists*, and *mineralogists*. See cuts under *carrier-shell* and *Xenophora*.

xenophoroid (zē-nof'ō-roid), *a.* and *n.* I. *a.* Of or relating to the *Xenophoridae*.

II. *n.* Any member of this family.

xenophthalmia (zen-of-thal'mi-ä), *n.* [NL., **<** Gr. *ξένος*, strange, + *ὀφθαλμία*, ophthalmia.] Conjunctivitis excited by the presence of a foreign body.

Xenopicus (zen-ō-pi'kus), *n.* [NL. (S. F. Baird, 1858), **<** Gr. *ξένος*, strange, + L. *picus*, a woodpecker.] An isolated genus of North American woodpeckers, based on the *Picus albolarvatus* of Cassin, and characterized by the structure

White-headed Woodpecker (*Xenopicus albolarvatus*).

of the tongue and hyoid bone, in which is seen an approach to that of *Sphyrapicus*. The body is black, without spots or stripes; the head is white, with a scarlet nuchal crescent in the male; the wings are blotched with white; the length is about 9 inches, the extent 16. This remarkable woodpecker inhabits the mountains of Cal-

formia, Oregon, and Washington, where it is common in pine woods.

Xenopodidae (zen-ō-pod'i-dē), *n. pl.* [NL., < *Xenopus* (-pod-) + -idae.] A family of African aglossal or tongueless toads, typified by the genus *Xenopus*: same as *Dactylethridae*. They are related to the American *Pipidae*, but have upper teeth and some long tentacular processes on the head.

Xenops (zē-nops), *n.* [NL. (Illiger, 1811), < Gr. ξένος, strange, + ὤψ, face, appearance.] A genus of *Dendrocolaptidae*, or South American tree-creepers, characterized by the short, com-

pressing, and upturned bill, and ranging from Mexico to southern Brazil. There are 2 distinct species. *X. genibarbis* has the back olivaceous and the belly streaked; in *X. rufilans* the back is rufous and the belly is not streaked. They are very small birds, 4 or 5 inches long, both with a white cheek-stripe.

pressed, and upturned bill, and ranging from Mexico to southern Brazil. There are 2 distinct species. *X. genibarbis* has the back olivaceous and the belly streaked; in *X. rufilans* the back is rufous and the belly is not streaked. They are very small birds, 4 or 5 inches long, both with a white cheek-stripe.

Xenopus (zen-ō-pus), *n.* [NL. (Wagner, 1863), < Gr. ξένος, strange, + πούς (πούς) = E. foot.] The typical genus of *Xenopodidae*. There are several species, all of tropical Africa, as *X. laevis*. They are called *clawed toads*.

Xenorhina (zen-ō-rī'nā), *n.* [NL. (Peters, 1863), < Gr. ξένος, strange, + ῥίς (ῥίς), nose, snout.] A genus of batrachians, peculiar to New Guinea, typical of the family *Xenorhinidae*. The species is *X. oxycephala*.

Xenorhinidae (zen-ō-rī'nī-dē), *n. pl.* [NL., < *Xenorhina* + -idae.] A family of Papuan batrachians, represented by the genus *Xenorhina*.

Xenorhipis (zen-ō-rī'pīs), *n.* [NL. (Le Conte, 1866), < Gr. ξένος, strange, + ῥίς, also ῥίψ, wickerwork.] A genus of buprestid beetles,

containing the single species *X. brendeli*, from Illinois, remarkable in that the male antennae are flabellate, a unique structure in the family *Buprestidae*.

Xenorhynchus (zen-ō-ring'kus), *n.* [NL. (Bonaparte, 1855), < Gr. ξένος, strange, + ῥίγχορ, beak.] A genus of storks or *Ciconiidae*, representing the Indian and Australian type of jabirus. *X. australis* is the black-necked stork (which see, under *stork*).

Xenos (zē-nos), *n.* [NL. (Rossi, 1792), < Gr. ξένος, strange.] A genus of parasitic coleopters, of the family *Stylopidae*, having four-jointed antennae and four-jointed tarsi. The species are found in middle and southern Europe and in North and South America. They are among the most remarkable of insects, and the genus is historically notable as containing the earliest known strepsipters. Also, and preferably, *Xenus*.

Xenosauridae (zen-ō-sā'ri-dē), *n. pl.* [NL., < *Xenosaurus* + -idae.] A family of American eriglossate lacertilians, related to the *Iguanidae*, based on the genus *Xenosaurus*.

Xenosaurus (zen-ō-sā'rus), *n.* [NL. (Peters, 1861), < Gr. ξένος, strange, + σαῦρος, a lizard.] The typical genus of *Xenosauridae*, based on *X. grandis*, a Mexican lizard about 10 inches long.

Xenotime (zen-ō-tim), *n.* [< Gr. ξενότιμος, favoring strangers, ξένος, strange, + τιμή, honor.] A native phosphate of yttrium, having a yellowish-brown color, and crystallizing in squares, octahedrons, and prisms. It resembles zircon in form, but is inferior in hardness.

Xenotis (zē-nō'tis), *n.* [NL. (Jordan, 1877), also *Xenotes*, < Gr. ξένος, strange, + ὄψ (ὄψ-), ear.] A genus of centrarchoid fishes, very near *Lepomis*, in which it is sometimes merged, but having very short, weak, and flexible gill-rakers, and no palatine teeth. Species are *X. megalotis*, *X. marginatus*, and *X. bombifrons*, of the United States, the first named known as the *long-eared sunfish*. This is 6 inches long, highly colored, and abounds in many parts of the United States.

Xenurine (zē-nū'rin), *n. and a.* [< *Xenurus* + -ine.] **I.** *n.* An armadillo of the genus *Xenurus*, a kabasson. In these forms of *Dasyopodidae* the buckler is more zoniiferous than in the true dasypodines, and the tail is nearly naked; the feet are also somewhat peculiar in the proportions of the metacarpals and phalanges.

II. a. Of or pertaining to the genus *Xenurus*.

Xenurus (zē-nū'rus), *n.* [NL., < Gr. ξένος, strange, + οὐρά, tail.] **1.** In *ornith.*, same as *Actecturus*. **Boie**, 1826.—**2.** In *mammal.*, a genus of armadillos, named by Wagler in 1830; the xenurines or kabassons. There are 2 species,

characterized by the infundibuliform nostrils and the peculiarity of the dermal ossifications. They inhabit the Indian archipelago. *X. narritus* is a typical example.

Xenopterygian (zē-nop-ṭe-rij'i-an), *a. and n. I. a.* Having the characters of or pertaining to the *Xenopterygii*.

II. n. A fish of this suborder.

Xenopterygii (zē-nop-ṭe-rij'i-i), *n. pl.* [< Gr. ξένος, strange, + πτερίς, wing (fin).] A suborder of teleostcephalous fishes, represented by the family *Gobiiesocidae*, and characterized by the development of a complicated suctorial organ in the pectoral region. The xenopterygians had usually been placed with the lump-fishes and snail-fishes, in consequence of their common possession of a sucking-disk, which, however, is formed differently in the present suborder, being chiefly developed from the skin of the breast, in connection with the ventral fins. They are mostly fishes of oblong or lengthened coniform shape, with scallid skin and spineless fins, one posterior dorsal fin, more or less nearly opposite the anal, and the sucker either entire or divided. They are small fishes, most common in tropical and warm temperate seas between tide-marks, adherent to rocks. There are 10 genera and 25 or 30 species, as *Gobioesoc reticulatus*, abundant in tide-pools on the Pacific coast of the United States.

Xenopus (zen-ō-pus), *n.* [NL. (Wagner, 1863), < Gr. ξένος, strange, + πούς (πούς) = E. foot.] The typical genus of *Xenopodidae*. There are several species, all of tropical Africa, as *X. laevis*. They are called *clawed toads*.

Xenorhina (zen-ō-rī'nā), *n.* [NL. (Peters, 1863), < Gr. ξένος, strange, + ῥίς (ῥίς), nose, snout.] A genus of batrachians, peculiar to New Guinea, typical of the family *Xenorhinidae*. The species is *X. oxycephala*.

Xenorhinidae (zen-ō-rī'nī-dē), *n. pl.* [NL., < *Xenorhina* + -idae.] A family of Papuan batrachians, represented by the genus *Xenorhina*.

Xenorhipis (zen-ō-rī'pīs), *n.* [NL. (Le Conte, 1866), < Gr. ξένος, strange, + ῥίς, also ῥίψ, wickerwork.] A genus of buprestid beetles,

containing the single species *X. brendeli*, from Illinois, remarkable in that the male antennae are flabellate, a unique structure in the family *Buprestidae*.

Xenorhynchus (zen-ō-ring'kus), *n.* [NL. (Bonaparte, 1855), < Gr. ξένος, strange, + ῥίγχορ, beak.] A genus of storks or *Ciconiidae*, representing the Indian and Australian type of jabirus. *X. australis* is the black-necked stork (which see, under *stork*).

Xenos (zē-nos), *n.* [NL. (Rossi, 1792), < Gr. ξένος, strange.] A genus of parasitic coleopters, of the family *Stylopidae*, having four-jointed antennae and four-jointed tarsi. The species are found in middle and southern Europe and in North and South America. They are among the most remarkable of insects, and the genus is historically notable as containing the earliest known strepsipters. Also, and preferably, *Xenus*.

Xenosauridae (zen-ō-sā'ri-dē), *n. pl.* [NL., < *Xenosaurus* + -idae.] A family of American eriglossate lacertilians, related to the *Iguanidae*, based on the genus *Xenosaurus*.

Xeroderma (zē-rō-dēr'mā), *n.* [NL., < Gr. ξηρός, dry, + δέρμα, skin.] A mild form of ichthyosis, in which the skin is dry and harsh in consequence of diminished activity of the sudorific and sebaceous glands. Also called *dermatoxerasia* and *dryskin*.—**Xeroderma pigmentosum**, a disease of the skin, beginning usually in childhood, characterized by areas of capillary dilatation and pigment deposit, followed by localized atrophy of the skin alternating with small patches of hypertrophied epithelium.

Xeroderma (zē-rō-dēr'mī-ā), *n.* [NL.] Same as *xeroderma*.

Xerodes (zē-rō'dēz), *n.* [NL., < Gr. ξηρόδης, dryish, dry-looking, < ξηρός, dry, + εἶδος, form.] Any tumor attended with dryness.

Xeroma (zē-rō'mā), *n.* [< Gr. ξηρός, dry, + -oma.] Same as *xerophthalmia*.

Xeromyrum (zē-rōm'irum), *n.* [NL., < Gr. ξηρόμυρον, a dry perfume, < ξηρός, dry, + μύρον, perfume, ointment.] A dry ointment.

Xerophagy (zē-rof'ā-jī), *n.* [< LL. *xerophagia*, < Gr. ξηροφαγία, the eating of dry food, abstinence, < ξηρός, dry, + φαγῖν, eat.] The habit of living on dry food, especially a form of abstinence, as in the early church, in which only bread, herbs, salt, and water were consumed.

Xerophil (zē-rō-fīl), *n.* [< Gr. ξηρός, dry, + φίλιν, love.] In *bot.*, a plant of Alphonse de Candolle's second "physiological group" in his natural system of geographical distribution. The plants of this group, like those of the first group, the megatherms, require a hot climate, but, unlike the latter, are adapted to one of great dryness only. They are chiefly found between latitudes 20° and 35° south and north of the equator, and embrace among the most characteristic families the *Zugophyllaceae*, *Cactaceae*, *Artocarpaceae*, *Proteaceae*, and *Cycadaceae*. Compare *megatherm*, *mesotherm*, *microtherm*, and *hektistotherm*.

Xerophilus (zē-rof'ī-lus), *n.* [NL., < Gr. ξηρός, dry, + φίλιν, love.] Loving dryness; in botany noting plants which are in various ways peculiarly adapted to dry, especially to hot and dry climates, as by possessing coriaceous leaves, succulent stems, etc.; specifically, belonging to the group of xerophils. See *xerophil*.

Xerophthalmia (zē-rof-thal'mī-ā), *n.* [NL., < LL. *xerophthalmia*, < Gr. ξηροφθαλμία, dryness of the eyes, < ξηρός, dry, + ὄφθαλμός, eye.] A dry form of conjunctivitis, resulting in a thickening and skin-like condition of the conjunctiva. Also *xeroma*, and *xerosis of the conjunctiva*.

Xerophyllum (zē-rō-fīl'um), *n.* [NL. (Richard, 1803), so called from the harsh dry leaves; < Gr. ξηρός, dry, + φύλλον, leaf.] **1.** A genus of liliaceous plants, of the tribe *Marthaceae*. It is characterized by crowded linear radical leaves, flowers with three styles, and a loculecidal capsule. The 3 species are natives of the United States, and are known as *turkeybeard*. They are perennials, with a short thick woody rhizome, tall erect unbranched stem, and a great number of harsh rigid elongated leaves, usually forming a conspicuous basal tuft, and also numerous along the stem, but much smaller and thinner, finally diminished into bristles. The flowers are white and very showy, forming a long terminal raceme which is at first densely pyramidal, oblong and becomes afterward greatly elongated. *X. setifolium*, the eastern species, is a native of pine-barrens from New Jersey to Georgia; the western, *X. Douglasii*, with a smaller raceme, occurs from the Columbia river to Montana; the raceme of *X. tenax*, of California, is fragrant and dense, becoming over a foot in length.

2. [*l. c.*] A plant of this genus.

Xerosis (zē-rō'sis), *n.* [NL., < Gr. ξηρόσις, a drying up, < ξηρός, dry: see *xerasia*.] Same as *xeransis*.—**Xerosis of the conjunctiva**. Same as *xerophthalmia*.

Xenopus genibarbis.

Xenopterus narritus.

Zoned Xenurine (*Xenurus unicolor*).

xerostomia (zê-rô-stô-mi-ä), *n.* [NL., < Gr. ξηρός, dry, + στόμα, mouth.] Abnormal dryness of the mouth.

xerotes (zê-rô-têz), *n.* [NL., < Gr. ξηρότης, dryness, < ξηρός, dry.] In *med.*, a dry habit or disposition of the body.

xerotic (zê-rot'ik), *a.* [*xerotes* + *-ic*.] Characterized by dryness; of the nature of or pertaining to *xerotes* or *xerosis*.

xerotribea (zê-rô-trib'i-ä), *n.* [NL., < Gr. ξηροτριβία, dry rubbing, < ξηρός, dry, + τρίβειν, rub.] Dry friction.

xerotripsis (zê-rô-trip'sis), *n.* [NL., < Gr. ξηρότριψις, rubbing, < τρίβειν, rub.] Same as *xerotribea*.

Xerus (zê-rus), *n.* [NL. (Hemprich and Ehrenberg), so called from the character of the fur: < Gr. ξηρός, dry.] A genus of African ground-squirrels, having dry, harsh fur, which in some cases is bristly and even spiny. They are of more or less terrestrial and fossorial habits, like spermophiles. The species are few. The best-known is *X. rutilans*, 11 inches long, the tail 9 more, and of a reddish-yellow color above, paler or whitish below. The red-footed is *X. erythropus*.

African Ground-squirrel (*Xerus rutilans*).

Xestia (zês'ti-ä), *n.* [NL. (Hübner, 1816), < Gr. ξέστις, smooth, smoothed by scraping, < ξέειν, scrape.] 1. A genus of noctuid moths, of the family *Orthosiidae*. Three species are known, two from Europe and one from North America. — 2. A genus of coleopterous insects, of the family *Cerambycidae*, named by Serville in 1834. About a dozen species are known, all South American.

Xestobium (zês-tô'bi-um), *n.* [NL. (Motschulsky, 1845), < Gr. ξέστος, smooth, dry, + βίον, live.] A genus of bark-boring beetles, of the family *Ptinidae*, having the prosternum very short and the tarsi broad. Three species are described from Europe, and three from North America. *X. affine* breeds in dead maple-stumps in the United States.

Xi (xi), *n.* The Greek letter ξ, ζ, corresponding to the English *x* and *z*.

Ximenia (zi-mê-ni-ä), *n.* [NL. (Plumier, 1703), named after Francisco Ximenes, a Spanish naturalist, who wrote in 1615 on medicinal plants.] A genus of polyetalous plants, of the order *Oleaceae* and tribe *Oleeae*. It is characterized by flowers with the calyx persistent unchanged, the petals inwardly bearded, the stamens in number more than double the petals and each bearing an oblong or linear anther. There are 5 species, natives chiefly of the tropics, one widely dispersed through both the Old and New Worlds, one Polynesian, and one South African. They are shrubs or trees, smooth or tomentose, often armed with spinescent branches. They bear alternate entire leaves, often in clusters. The flowers are whitish, larger than in most of the order, and arranged in short axillary cymes. *X. Americana*, a native of the West Indies, Florida, and Mexico, is known as *tallow-nut* (which see) in Florida as *hog-plum* and *wild lime*, and in the West Indies as *mountain-plum*, *seaside plum*, and *false sandalwood*.

Xiphiadidae (zif-i-ad'i-dê), *n. pl.* See *Xiphiidae*.

Xiphianae (zif-i-ä'nê), *n. pl.* See *Xiphiidae*.

Xiphias (zif'i-as), *n.* [NL. (Linnæus, 1748), < L. *xiphias*, < Gr. ξιφίας, a swordfish, a sort of comet, < ξίφος, sword.] 1. The typical genus of *Xiphiidae*, now restricted to swordfishes without teeth or ventral fins, and thus exclusive of the sailfishes and spear-fishes (*Histiophorus* and *Tetrapturus*). The dorsal fins are two, the first high and falcate, and the second very small and situated on the tail, opposite the small second anal. In younger individuals, however, teeth are present, and the two dorsals are connected, so that the banner is more like that of a sailfish. The first anal resembles the first dorsal, but is smaller and less falcate; the pectorals are moderate and falcate. The caudal keel is single; the skin is rough and naked, or in the young has rudimentary scales. *X. gladius* is the common swordfish, widely dispersed in both Atlantic and Pacific oceans, attaining a weight of 300 or 400 pounds, with the sword a yard long. It is dark-bluish above, dusky below, with the sword blackish on top.

2. In *astron.*: (a) A constellation made by Ptolemy Theodori in the fifteenth century, in the south pole of the ecliptic, and now named *Draco*. (b) [l. c.] In older authors, a sword-shaped comet.

Xiphicera (zi-fis'ê-rä), *n.* [NL. (Latreille, 1825), < Gr. ξίφος, sword, + κέρα, horn.] A genus of orthopterous insects, of the family *Aeriliidae*, or forming a family *Xiphiceridae*. They are very large strong grasshoppers with erected pronotum and ensiform antennae. About 25 species have been described, mainly from South America. Others are found in Mexico, the West Indies, Australia, Java, China, and Corea. Also *Xiphocera* (Burmeister, 1838).

Xiphiceridae (zif-i-ser'i-dê), *n. pl.* [NL. (S. H. Scudder, as *Xiphoceridae*), < *Xiphicera* + *-idae*.] A family of short-horned grasshoppers, founded on the genus *Xiphicera*, and containing some half-dozen genera of large tropical and sub-tropical forms.

Xiphidion (zi-fid'i-on), *n.* [NL. (Serville, 1831), also *Xiphidium* (Agassiz, 1846), erroneously *Xyphidium* (Fieber, 1854); < Gr. ξιφίδιον, dim. of ξίφος, sword.] 1. In *entom.*, a genus of orthopterous insects, of the family *Locustidae*, synonymous in part with *Orchelimum*. They are slender long-horned grasshoppers which lay their eggs in the pith of plants, thus sometimes damaging cereals, especially maize.

2. In *ichth.*, a genus of blennioid fishes: so called by Girard in 1859. Being preoccupied in entomology, the name has been changed to *Xiphister* (which see).

Xiphidiontidae (zi-fid-i-on'ti-dê), *n. pl.* [NL., irreg. < *Xiphidion* + *-idae*.] A family of fishes, the gunnels or gunnel-fishes: same as *Muraenoididae*. See *rock-eel*.

Xiphidiopterus (zi-fid-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of spur-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

White-crowned Lapwing (*Xiphidiopterus albiceps*).

It is known as the *black-shouldered* and *white-crowned lapwing*, and these color-marks are quite distinctive. It is a very rare bird, originally described by Gould from the Niger.

Xiphidiorhynchus (zi-fid'i-ô-ring'kus), *n.* [NL. (Reichenbach, 1845), < Gr. ξιφίδιον, dim. of ξίφος, sword, + ῥύγχος, snout.] An Australian genus of wading birds, resembling both stilts and avocets. The species is *X. pectoralis*. See *stilt*, *n.*, 6. Also called *Leptorhynchus* and *Cladorhynchus*.

Xiphidium (zi-fid'i-um), *n.* [NL., < Gr. ξιφίδιον, dim. of ξίφος, sword.] Same as *Xiphidion*, 1.

xiphihumeralis (zif-i-hü-mê-rä'lis), *n.*; *pl.* *xiphihumerales* (-lez). [NL. (se. *musculus*), < *xiph(oid)* + *humerus*.] A muscle which in some animals passes from the xiphoid cartilage to the proximal end of the humerus.

Xiphiidae¹ (zi-fi'i-dê), *n. pl.* In *mammal*. See *Ziphiidae*.

Xiphiidae² (zi-fi'i-dê), *n. pl.* [NL., < *Xiphias* + *-idae*.] A family of fishes, typified by the genus *Xiphias*; the swordfishes. It has included forms now placed in *Histiophoridae*. Exclusive of these, it is the same as *Xiphiidae*. Also *Xiphioidae*, *Xiphioides*, *Xiphidiformes*, *Xiphiadidae*, and *Xiphianae*. See *ent* under *swordfish*.

xiphiform (zif'i-i-fôrm), *a.* Same as *xiphoid*².

Xiphiformes (zif'i-i-fôrm'ez), *n. pl.* [NL., < *Xiphias* + L. *forma*, form.] Same as *Xiphiidae*².

Xiphiinae (zif-i-i'nê), *n. pl.* [NL., < *Xiphias* + *-inae*.] A subfamily of *Xiphiidae*, represented by the true swordfishes alone, without teeth or ventral fins. See *ent* under *swordfish*.

xiphoid¹ (zif'i-oid), *a.* and *n.* In *mammal*. See *ziphioid*.

xiphoid² (zif'i-oid), *a.* and *n.* [*Xiphias* + *-oid*.] 1. Resembling the swordfish; related to the swordfish; belonging to the *Xiphiidae*, or having their characters. Also *xiphiform*.

II. *n.* A member of the family *Xiphiidae*.

xiphiplastral (zif-i-plas'tral), *a.* [*xiphiplastron* + *-al*.] Of the nature of, or pertaining to, the chelonian xiphiplastron. Also used substantively.

The imperfect left *xiphiplastral*.

Quart. Jour. Geol. Soc., XLV, 511.

xiphiplastron (zif-i-plas'tron), *n.*; *pl.* *xiphiplastru* (-trî). [NL., < Gr. ξίφος, a sword, + E. *plastron*.] The fourth lateral piece of the plastron of a turtle; one of the pair of terminal pieces of the plastron in *Chelonia*, called *xiphisternum* by some. See *cuts* under *plastron* and *Chelonia*.

Xiphister (zi-fis'têr), *n.* [NL. (Jordan, 1879), < Gr. ξιφίστηρ, a sword-belt, < ξίφος, sword.] A genus of blennioid fishes, the type of which is the species called *Xiphidion mucosum* by Girard. This is found along the coast from Monterey to Alaska, reaching the length of 18 inches, and is abundant about tide-rocks, where it feeds on seaweeds. *X. rupestris* is a smaller but similar fish, found with the preceding; and a third member of the genus, of the same habitat and still smaller, is *X. chirus*.

Xiphisterinae (zi-fis-te-rî'nê), *n. pl.* [NL., < *Xiphister* + *-inae*.] In Jordan and Gilbert's classification, a subfamily of *Blenniidae*, typified by the genus *Xiphister*.

xiphisternal (zif-i-stêr'nal), *a.* [*xiphisternum* + *-al*.] 1. In *anat.*, of the nature of the xiphisternum, or last sterneber of the sternum; pertaining to the xiphisternum; ensiform or xiphoid, as a cartilage or bone of the breast-bone.

Dissect out the *xiphisternal* cartilage of a recently-killed frog, and remove its membranous investment (perichondrium). *Huxley and Martin*, Elementary Biology, p. 128.

2. In *Chelonia*, xiphiplastral. See *cuts* under *Chelonia* and *plastron*.

xiphisternum (zif-i-stêr'num), *n.*; *pl.* *xiphisterna* (-nâ). [NL., prop. *xiphosternum*, < Gr. ξίφος, sword, + στέρον, breast-bone.] 1. The hindmost segment or division of the sternum, corresponding to the xiphoid appendage or ensiform cartilage of man. It is of various shapes in different animals, sometimes forked or double, there being a right and a left xiphisternum, as in some lizards. It succeeds the segment or segments called the *mesosternum*. See *cuts* under *mesosternum* and *sternum*.

2. The xiphiplastron of a turtle. See *second cut* under *Chelonia*.

Xiphisura (zif-i-sû'râ), *n. pl.* [NL. (orig. erroneously *Xyphosura* (Latreille), later *Xyphisura*, *Xiphura*, *Xiphosura* (which see), and prop. *Xiphura*), noting the dagger-like telson of the king-crab; < Gr. ξίφος, sword, + οὐρα, tail.] In Latreille's classification, the first family of his *Pacilopoda*, contrasted with his *Siphonostoma*, and containing only the genus *Limulus*. Compare *Synxiphosura*. See *cuts* under *horseshoe-crab* and *Limulus*.

Xiphura (zif-i-sû'râ), *n. pl.* See *Xiphisura*.

Xiphus (zif'i-us), *n.* In *mammal*. See *Ziphus*.

Xiphocera, **Xiphoceridae**. See *Xiphicera*, *Xiphiceridae*.

Xiphocolaptes (zif'ô-kô-lap'têz), *n.* [NL. (Lesson, 1840), < Gr. ξίφος, sword, + *κολαπτης, taken for *κολαπτήρ*, a chisel; see *Dendrocolaptes*.] A genus of *Dendrocolaptidae*, including some of the largest piculules, having the bill much compressed and moderately long (not half as long again as the tarsus). It includes about a dozen species of tropical America, averaging a foot long, which is large for this family, as *X. albicollis*, etc.

xiphodidymus (zif-ô-did'i-mus), *n.* [*X. ξίφος*, sword, + *δίδυμος*, twin.] Same as *xiphopagus*.

Xiphodon (zif'ô-don), *n.* [NL. (Cuvier, 1822), < Gr. ξίφος, sword, + ὄδους (ὄδουτ-) = E. *tooth*.] A genus of fossil artiodactyl mammals, of Eocene age and small size, now referred to the *Dichobunidae*.

Xiphodontidae (zif-ô-don'ti-dê), *n. pl.* [NL., < *Xiphodontus* + *-idae*.] A family of anoplotherioid mammals, at one time recognized as composed of the 3 genera *Xiphodon*, *Cænotherium*, and *Microtherium*.

Xiphodontus (zif-ô-don'tus), *n.* [NL. (Westwood, 1838), < Gr. ξίφος, sword, + ὄδους (ὄδουτ-) = E. *tooth*.] A genus of coleopterous insects, of the family *Lucanidae*, having but one species, *X. antilope*, from South Africa, remarkable for its long sword-like mandibles.

xiphoid (zif'oid), *a.* and *n.* [*X. ξιφοειδής*, sword-shaped, < ξίφος, sword, + εἶδος, form.] I. *a.* Shaped like or resembling a sword; ensiform.—**Xiphoid appendage, appendix, or cartilage**, the xiphisternum. See *cartilage*, and *cuts* under *mesosternum* and *sternum*. Also called *xiphoid process*.—**Xiphoid bone**, in *ornith.*, the occipital style of the coracorn and some related birds; a long sharp dagger-like or ensiform ossification in the nuchal ligament, attached to the occiput by its base, and pointing backward.

Yarrell designated the "occipital style" of Shufeldt as the *xiphoid bone*. *Science*, 111, 404.

Xiphoid ligament, a small ligament connecting the ensiform cartilage or xiphisternum with the cartilage of the seventh rib on either side.—**Xiphoid process**. (a) In *anat.*, the ensiform appendage of the sternum; the xiphisternum. See cuts under *mesosternum* and *sternum*. (b) The telson of a crustacean, as the king-crab. See cut under *horseshoe-crab*.

II. n. The ensiform or xiphoid cartilage in man, or its representative in other animals. See *xiphisternum*, 1.

xiphoides (zī-fōi'déz), *n.* [NL.] In *anat.*, same as *xiphoid*.

xiphoidian (zī-fōi'di-an), *a.* [*xiphoid* + *-ian*.] In *anat.*, same as *xiphoid*.

xiphopagus (zī-fop'á-gus), *n.*; pl. *xiphopagi* (-jī). [NL., < Gr. *ξίφος*, sword, + *πάγος*, that which is fixed or firmly set.] In *teratol.*, a double monster connected by a band extending from the ensiform cartilage to the umbilicus. The Siamese twins constituted a xiphopagus. Also *xiphodidymus*.

Xiphophorus (zī-fōf'ō-rus), *n.* [NL. (Haeckel, 1848), < Gr. *ξίφοφόρος*, also *ξίφοφόρος*, bearing a sword, < *ξίφος*, sword, + *φέρειν* = E. *bear*.] In *ichth.*, a genus of cyprinoids, having in the male the lower rays of the caudal fin prolonged into a sword-shaped appendage, sometimes as long as all the rest of the fish. The anal fin of the male is also modified into an intromittent organ, having one or two enlarged rays with hook-like processes. A curious fish of this genus is *X. helleri* of Mexico.

xiphophyllous (zī-fō-fil'us), *a.* [*xiphos*, sword, + *φύλλον*, leaf.] In *bot.*, having ensiform leaves.

Xiphorhamphus (zī-fō-ram'fus), *n.* [NL. (Blyth, 1843), < Gr. *ξίφος*, sword, + *ράμφος*, beak.] 1. A genus of timeline birds of the eastern Himalayas. *X. superciliosus*, the only species, is 7½ inches long. The general color above is olivaceous-brown; over the eye is a white streak, but most of the plumage is of sober shades of ashy and rufous. See *Xiphorhynchus*, 2.

2. A genus of fishes. Müller and Troschel, 1844.

Xiphorhynchus (zī-fō-ring'kus), *n.* [NL. (Swainson, 1827, also *Xiphorhynchus*, 1837), < Gr. *ξίφος*, sword, + *ῥύνχος*, snout.] 1. A genus of South American dendrocolapine birds, named from the long, thin, and much-curved bill; the saberbills, as *X. procurvus*. This tree-creeper is 10 inches long, and malady of a fulvous color, the head blackish with pale shaft-spots. The genus ranges from Costa Rica to southern Brazil and Bolivia, and contains 4 other species—*X. trochilirostris*, *X. lafresnayanus*, *X. pusillus*, and *X. pucherani*. In the last-named the bill is shorter and less curved, and there is no such white spot under the eye as all the rest have. See cut under *saberbill*.

2. A different genus of birds, named by Blyth in 1842 in the form *Xiphirhynchus*, and changed by him in 1843 to *Xiphorhamphus*.—3. A genus of *Dryophidae*, or wood-snakes: so called from the acute appendage of the snout. *X. langaha* is the langaha of Madagascar. (See cut under *langaha*.) This genus was named by Wagler in 1830, but the name is preoccupied in ornithology.

4. A genus of fishes. Agassiz, 1829.

Xiphosoma (zī-fō-sō'mū), *n.* [NL. (Spix), < Gr. *ξίφος*, a sword, + *σώμα*, body.] A genus of large serpents, of the family *Boidae*, or boas. *X. caninum* is the dog-headed boa of South America.

xiphosternum (zī-fō-stēr'nūm), *n.* Same as *xiphisternum*. [Rare.]

Xiphosura (zī-fō-sū'rā), *n. pl.* [NL., irreg. < Gr. *ξίφος*, sword, + *οὐρά*, tail.] Same as *Xiphisura*: in this form, in Lankester's classification, brought under *Arachnida* as one of three orders (the other two being *Eurypterina* and *Tribolite*) brigaded under the name *Delobranchia*.

xiphosuran (zī-fō-sū'ran), *a. and n.* [*xiphosura* + *-an*.] 1. *a.* Of or pertaining to the *Xiphosura*, as a horseshoe-crab.

II. n. A member of the group *Xiphosura*; a xiphosure.

xiphosure (zī-fō-sūr), *n.* One of the *Xiphosura*, as a horseshoe-crab.

xiphosurous (zī-fō-sū'rns), *a.* [*xiphosura* + *-ous*.] Same as *xiphosuran*.

Xiphoteuthis (zī-fō-tū'this), *n.* [NL. < Gr. *ξίφος*, sword, + *τεῦθις*, squid.] A genus of belemnites, characterized by a very long, narrow, deeply chambered phragmacone. Only a single species is known, from the Lias. See *Belemnitidae*.

Xiphotrygon (zī-fō-trī'gon), *n.* [NL. (Cope, 1879), < Gr. *ξίφος*, sword, + *τρυγών*, a sting-ray.] In *ichth.*, a genus of elasmobranchiate fishes, of the family *Trygonidae*.

Xiphura (zī-fū'rā), *n. pl.* The more proper form of *Xiphisura*.

xiphurous (zī-fū'rus), *a.* [*xiphos*, sword, + *οὐρά*, tail.] Having a long sharp telson like a dagger, as the king-crab; of or pertaining to the *Xiphosura* or *Xiphura*; xiphosuran. See cut under *horseshoe-crab*.

Xiphydria (zī-fīd'ri-ī), *n.* [NL. (Latreille, 1802), < Gr. *ξίφιδριον*, a kind of shell-fish, < *ξίφος*, sword.] In *entom.*, a notable genus of hymenopterous insects, of the family *Proceridae*, or typical of a family *Xiphydriidae*, having the ovipositor con-

White-horned Camel-wasp (*Xiphydria albicornis*), female, twice natural size.

siderably exerted, the neck elongate, and certain peculiar venational characters. Ten North American and three European species are known. *X. camelus* and *X. thomomys* are British species, known as *camel-wasps* from their long neck. The white-horned camel-wasp is *X. albicornis*. They are found commonly in willows and hedges. Also *Xiphydria*, *Xiphidria*.

Xiphydriidae (zī-fī-dri'i-dē), *n. pl.* [NL., also *Xiphydriidae* (Leach, 1819), *Xiphidridae*, *Xiphidriidae*, etc.; < *Xiphidria* + *-idae*.] A family of hymenopterous insects, named from the genus *Xiphidria*, now merged in *Proceridae*.

Xirichthys (zī-rik'this), *n.* Same as *Xyrichthys*. *De Kay*, 1842.

X-leg (eks'leg), *n.* Knock-knee. [Rare.]

Xmas. See *X*, 3.

xoanon (zō'á-nōn), *n.*; pl. *xoana* (-nā). [*xoanon*, a carved image, < *ξέον*, serape, earve, especially in wood.] In *anc. Gr. art.* a work of sculpture of the most ancient and primitive class, rudely formed in wood, the eyes being generally represented closed, and the limbs, when indicated at all, extended stiffly. The examples of these statues, representing deities, which were preserved in Greek historic times, were looked upon with much veneration as divine gifts fallen from heaven; they were usually cloaked with precious stuffs and rich embroideries. No specimen survives, but representations of these old works are found on painted vases. The term is sometimes applied attributively to primitive statues in stone advanced but little beyond the wooden prototypes, as the *xoanon* statue discovered by the French in Delos. See cut under *palladium*.

Xolmis (zōl'mis), *n.* [NL. (Boie, 1828); also *Xolmus* (Swainson).] A genus of South American tyrant-flycatchers: a synonym both of *Tenoptera* and of *Fluvicola*.

xonaltite (zō-nal'tit), *n.* [*Xonalta* (see *def.*) + *-ite*.] In *mineral.*, a hydrous silicate of calcium, occurring in massive form of a white or bluish-gray color.

Xorides (zor'i-déz), *n.* [NL. (Latreille, 1809).] A genus of hymenopterous parasites, of the ichneumonid subfamily *Pimplinae*, or giving name to an unused family *Xorididae*, having the face narrowed, the cheeks tuberculate behind the eyes, and the tibiae and tarsi long and slender. The species are peculiar to northern regions, 14 having been described from northern Europe, including 1 from Lapland, and 4 from British America.

Xorididae (zō-rid'i-dē), *n. pl.* [NL., < *Xorides* + *-idae*.] A family of hymenopterous insects, named by Shuckard in 1840 from the genus *Xorides*, but now included in *Ichneumonidae*. It has not even subfamily rank, its characters being shared by a number of genera of *Pimplinae*.

X-ray. See *ray*.

XX, XXX. Symbols noting ale of certain quantities or degrees of strength, derived originally from marks on the brewers' casks.

Xya (zī'ī), *n.* [NL. (Latreille, 1809), < Gr. *ξέα*, serape, smooth, polish.] A genus of molecrickets, of the orthopterous family *Gryllidae*, having filiform ten-jointed antennae and fossorial front legs. The species are mainly tropical; but one is European and one (*X. apicalis*) is North American. Also called *Triadactylus* and *Rhipipteryx*.

Xyela (zī-ē'lā), *n.* [NL. (Dalman, 1819), < Gr. *ξύη*, a plane or rasp, < *ξέα*, serape.] A genus of saw-flies, of the hymenopterous family *Tenthredinidae*, giving name to the subfamily *Xyelinae*, and having the fourth and following joints of the antennae long, slender, and filiform. The species are small and have a remarkably long ovipositor. One North American and three European species are

known. The generic name has recently been ascertained to be a synonym of *Pineola* (Bréhisson, 1818).

Xyelinae (zī-ē-lī'nē), *n. pl.* [NL., < *Xyela* + *-inae*.] A subfamily of the hymenopterous family *Tenthredinidae*, founded on the genus *Xyela*, and having the antennae nine- to thirteen-jointed, irregular, third joint very long, anterior wings with three marginal and four submarginal cells, and ovipositor long. Also *Xyelula*, *Xyelides*, *Xyelites*.

xylanthrax (zī-lan'thraks), *n.* [NL., < Gr. *ξύλον*, wood, + *άνθραξ*, coal.] Woodcoal: in distinction from *lithanthrax*.

Xyleborus (zī-leb'ō-rns), *n.* [NL. (Eichhoff, 1864), < Gr. *ξύληβόρος*, eating wood, < *ξύλον*, wood, + *βόρος*, devouring.] A notable genus of bark-boring beetles, of the family *Scolytidae*, having the antennal funicle five-jointed, the club subglobose and subannulate, the tarsi with the first three joints subequal and simple, and the tibiae with the outer edge curved and finely serrate. About 75 species are known, of which 14 inhabit North America. *X. dispar* is common to Europe and North America. It is known in the United States and Canada as the *pin-borer*, *shot-borer*, and *pear-blight beetle*. See these words, and cuts under *pin-borer* and *wood-graver*.

xylem (zī'lem), *n.* [Irreg. < Gr. *ξύλον*, wood.] In *bot.*, that part of a fibrovascular bundle which contains ducts or tracheids—that is, the woody part, as distinguished from the phloem, or bast part. Compare *phloem*. See *protoxylem*, *leptoxylem*.

xylene (zī'tēn), *n.* [*xyl*, wood, + *-ene*.] Any one of the three metameric dimethyl benzenes C₆H₄(CH₃)₂. They are volatile, inflammable liquids obtained from wood-spirit and from coal-tar. Also *xytol*, *xylole*.

Xylesthia (zī-les'thi-ā), *n.* [NL. (Clemens, 1859), < Gr. *ξύλον*, wood, + *εσθίεν*, eat.] A peculiar genus of North American tineid moths, allied to *Ochsenheimeria* and *Hapsifera* of the European fauna. *X. pruniviraniella*, the type, feeds as a larva upon the black-knot of the plum (*Sphaeria morbosae*), and the larva of *X. clemensella* feeds upon dead locust-timber.

Xyletinus (zī-lē-tī'nus), *n.* [NL. (Latreille, 1829), irreg. < Gr. *ξύλον*, wood, + NL. *Pinus*, q. v.] A genus of coleopterous insects, of the family *Pinidae*, comprising about 30 species, and very widely distributed. The elytra are striate and the antennae serrate with joints nine to eleven, not elongate. Seven species occur in North America, as *X. pubescens*.

Xyleutes (zī-lū'tēz), *n.* [NL. (Hübner, 1816), < Gr. *ξύλες*, a wood-cutter, < *ξύλον*, wood.] A

Common Locust-borer (*Xyleutes robiniae*), female, natural size.

genus of moths, of the family *Cossidae*. *X. robiniae* is the common locust-borer of the United States. See also cut under *carpenter-moth*.

xylharmonica (zī-lār-mon'i-kā), *n.* [*xyl*, wood, + E. *harmonica*.] An enlarged and improved form of the xylostron (which see).

Xylia (zī'lī-ī), *n.* [NL. (Bentham, 1852), so called from the woody pod; < Gr. *ξύλον*, wood.]

A genus of leguminous trees, of the tribe *Luminoideae*. It is characterized by a broadly falcate compressed woody two-valved pod with transverse obovate seeds. The only species, *X. dolabriformis* (formerly *Inga xylocarpa*), is a tall tree of tropical Asia, producing a hard wood and bearing bipinnate leaves of only two pinnae, these with four or five pairs of large leaflets and an odd one. The small pale-green flowers are condensed into globose heads which form terminal racemes or axillary clusters. It is known as the *ironwood* of Pegu, or by its Burmese name, *pyengadu* (which see).

xylidine (zī'lī-dīn), *n.* Same as *xyloidine*.

Xylina (zī'lī-nī), *n.* [NL. (Treitschke, 1826), < Gr. *ξύλινος*, of wood, < *ξύλον*, wood.] A genus of noctuid moths, giving name to the *Xylinae*, and having the male antennae simple, the proboscis short, the body robust, and the fore wings rounded at the apex. The larvae usually live on trees, and the pupae are subterranean. The genus is represented in all parts of the world, and the species number about 50.

of which 8 are European and about 20 North American. *X. cinerea*, of the United States, is called the *ash-gray pinion*, and its larva bores into green apples and peaches, and

a, larva, boring into a peach; b, moth.

feeds upon the foliage of various trees. Three of the British species are fancifully named respectively the conformist, *X. furcifera* (*X. conformis*), the nonconformist, *X. lambdæ*, and the gray shoullder-knot, *X. ornithopus*.

Xylinidæ (zī-līn'i-dē), *n. pl.* [NL. (Guenée, 1852), < *Xylina* + *-idæ*.] A family of noctuids, named from the genus *Xylina*, many of which are known as *shark-moths*. They have the antennæ almost always simple, well-developed palpi, thorax robust, wings oblong, with longitudinal markings, and somewhat plicated when at rest, giving the insect an elongated appearance. The family includes about 20 genera.

xylobalsamum (zī-lō-bal'sa-mum), *n.* [*X. L. xylobalsamum*, < Gr. ξύλον, wood, + βάλσαμον, balsam.] 1. The wood, or particularly the dried twigs, of the balm-of-Gilead tree, *Commiphora Opobalsamum*. The wood is heavy, pinkish, and fragrant. A decoction of it, as also of the fruit (*carpobalsamum*), is given in the East as a carminative, etc. 2. The balsam obtained by decoction from this wood.

Xylobius (zī-lō'bi-us), *n.* [NL., < Gr. ξύλον, wood, + βίος, life.] 1. A genus of beetles, of the family *Eucnemidæ*, named by Latreille in 1834, and containing two European species. Also called *Xylophilus*.—2. A genus of fossil ephlognath myriapods. *Darwin*, 1859.

xylocarp (zī-lō-kārp), *n.* [*X. L. ξύλον*, wood, + καρπός, fruit.] In *bot.*, a hard and woody fruit.

xylocarpous (zī-lō-kār'pūs), *a.* [As *xylocarp* + *-ous*.] Having fruit which becomes hard or woody.

xylochlore (zī-lō-klōr), *n.* [*X. L. ξύλον*, wood, + χλωρός, greenish-yellow.] An olive-green crystalline mineral, closely resembling apophyllite, if not a variety of it.

Xylocopa (zī-lōk'ō-pā), *n.* [NL. (Latreille, 1802), < Gr. ξύλον, wood, + κοπος, < κόπτειν, cut.] An extensive genus of solitary bees, containing many of those large species known as *carpenter-bees*. They resemble bumblebees, from which they differ in having the abdomen usually naked, and in important venational characters. Their burrows

are formed in solid wood, and their cells are separated by partitions usually made of agglutinated sawdust, and provisioned with pollen. Six species occur in Europe and nine in North America. *X. violacea* is the common European species, and *X. virginica* the common one in the United States. See also *carpenter-bee* (with cut).

Xylocopus (zī-lōk'ō-pūs), *n.* [NL. (Cabanis, 1863), < Gr. ξύλον, wood, + κοπος, < κόπτειν, cut.] A genus of woodpeckers, such as *Picus minor* and *P. major*, respectively the lesser and greater spotted woodpeckers of Europe; generally considered a synonym of *Picus* proper. See *Dendrocopus*, 2, and cut under *Picus*.

xylogen (zī-lō-jen), *n.* [*X. L. ξύλον*, wood, + γένεσις, producing.] 1. Same as *lignin*.—2. Wood or xylem in a formative state.

xylograph (zī-lō-grāf), *n.* [*X. L. ξύλον*, wood, + γράφω, engrave, write.] 1. (a) An engraving on wood. (b) An impression or print from a wood-block. In both senses the term is most commonly applied to old work, especially to that of the very earliest period.—2. A mechanical copy of the grain of wood, executed by a method of nature-printing, and used as a

surface decoration. The wood to be copied is treated chemically so that the grain remains in relief and serves to give an impression in a suitable pigment.

xylographer (zī-lōg'ra-fēr), *n.* [*X. L. xylography* + *-er*.] An engraver on wood, especially one of the earliest wood-engravers, as of the fifteenth century.

xylographic (zī-lō-grāf'ik), *a.* [*X. L. xylography* + *-ic*.] Of or pertaining to xylography; cut in or on wood.

Some of these changes of form, otherwise inexplicable, since they are from simpler and easier forms to others more complicated and seemingly more difficult, can be readily accounted for by the fact that the runes were essentially a *xylographic* script.

Isaac Taylor, *The Alphabet*, II, 221.

xylographical (zī-lō-grāf'ik-al), *a.* [*X. L. xylographic* + *-al*.] Same as *xylographic*.

Xylographus (zī-lōg'ra-fūs), *n.* [NL. (Dejean, 1834); see *xylograph*.] A genus of coleopterous insects of the family *Cioidæ*, distinguished mainly by the structure of the legs. About a dozen species are known, most of which are South American. Two, however, are from southern Europe, one is from Algeria, and one from Madagascar.

xylography (zī-lōg'ra-fī), *n.* [= *F. xylographic*; < Gr. ξύλον, wood, + γράφω, < γράφω, engrave, write. Cf. *ξύλογραφείν*, write on wood.] 1. Engraving on wood: a word used only by bibliographers, and chiefly for the woodcut work of the fifteenth century.—2. A process of decorative painting on wood. A selected pattern or design is drawn on wood and is then engraved, or the design is reproduced on zinc by the ordinary method. An electrolyte cast is taken from the woodcut or zinc plate, and smooth surfaces of wood are printed from the electrolyte, under a regulated pressure, with pigments prepared for the purpose. The color penetrates the wood, leaving no outside film, and after being French polished, or covered with a fluid enamel, the wood may be washed, scrubbed, or even sandpapered without destroying the pattern. *Ure*.

xyloid (zī'lōid), *a.* [*X. L. ξυλοειδής*, like wood, < ξύλον, wood, + εἶδος, form.] Woody; of the nature of, resembling, or pertaining to xylem or wood; ligneous.

xyloidine (zī-lōi'dīn), *n.* [As *xyloid* + *-ine*.] An explosive compound (C₆H₉NO₇) produced by the action of strong nitric acid upon starch or woody fiber. It somewhat resembles gun-cotton in its nature. Also called *xylinine*.

xylol, **xylole** (zī'lōl, zī'lōl), *n.* [*X. L. ξύλον*, wood, + *L. oleum*, oil.] Same as *xylene*.

xyloma (zī-lō'mā), *n.*; *pl. xylomata* (-mā-tā). [NL., < Gr. ξύλον, wood, + *-oma*.] In *bot.*, a sclerotized body in certain fungi which produces sporeogenous structures in its interior.

Xylomelum (zī-lō-mē'lum), *n.* [NL. (Smith, 1798), so called from the woody apple-like fruit; < Gr. ξύλον, wood, + μέλον, apple.] A genus of apetalous plants, of the order *Proteaceæ* and tribe *Grevilleæ*. It is characterized by opposite leaves, densely spicate flowers, an ovary with two ovules laterally affixed, and a hard, nearly indehiscent, somewhat ovoid fruit. The 5 species are all Australian. They are trees or tall shrubs, with opposite entire or spiny-toothed leaves. The flowers are of medium size, sessile in pairs under the bracts of a dense spike, which is commonly perfect below, but in the upper part sterile. The spikes are opposite or axillary, or crowded into a terminal cluster which finally becomes lateral. *X. pyriforme*, the wooden-pear tree of New South Wales, is remarkable for its fruit, which is exactly like a common pear in size and shape, but attached by the broad end and composed of a hard woody substance difficult to cut; when ripe it splits lengthwise, discharging a flat winged seed. The tree grows from 20 to 40 feet high, 6 to 8 inches in diameter, producing a dark-reddish wood, used in cabinet-work.

Xylomiges (zī-lōm'ī-jēz), *n.* [NL. (Guenée, 1852, as *Xylomyges*), < Gr. ξύλον, wood, mixed with wood, < ξύλον, wood, + μίγναι, mix.] A genus of noctuid moths, of the family *Apanidæ*, comprising species of moderate size, robust body, short proboscis, and palpi hardly reaching above the head. The genus is wide-spread, but contains only about a dozen species, of which 9 inhabit the United States. See *silver-cloud*.

xylomit (zī'lō-mīt), *n.* [Irreg. < Gr. ξύλον, wood, + *-ite*.] Same as *celluloid*.

Xylonomus (zī-lōn'ō-mus), *n.* [NL. (Gravenhorst, 1829), < Gr. ξύλον, wood, + νέμω, graze, feed.] An important genus of hymenopterous parasites, of the iehneumonid subfamily *Pimplinae*, having very long legs and antennæ, and the marginal cell of the fore wing extending nearly to the apex of the wing. The species are rather large, are wide-spread, and are parasitic upon the larvae of the larger wood-boring beetles, such as the *Cerambycidæ*; 15 are known in Europe, and 9 have been described from the United States.

xylopal (zī-lō-pal), *n.* [*X. L. ξύλον*, wood, + πάλλω, opal.] Same as *wood-opal*.

Xylophaga² (zī-lōf'ā-gā), *n.* [NL. (Turton, 1822), < Gr. ξυλοφάγος, wood-eating, < ξύλον, wood, + φαγεῖν, eat.] 1. A genus of boring bivalves,

of the family *Pholadidæ*, as *X. dorsalis*.—2. [*l. c.*] A member of this genus.

Xylophaga looks like a very short ship-worm, making burrows in floating wood, against the grain, about an inch long. *F. P. Carpenter*, *Lectures on Mollusca* (1861), p. 99.

Xylophaga¹ (zī-lōf'ā-gā), *n. pl.* [NL.: see *Xylophaga*.] 1. A series of *Hymenoptera ditrocha*, in Hartig's classification (1837), containing only the family *Urocercidæ*: distinguished from the *Phyllophaga* on the one hand and the *Parasitica* on the other. Compare these two words.—2. A group of rhynchophorous insects. *Motschulsky*, 1845.

xylophagan (zī-lōf'ā-gan), *a. and n.* [*X. L. xylophaga* + *-an*.] 1. *a.* In *entom.*, of or pertaining to the *Xylophaga*, in either sense.

II. *n.* A member of the *Xylophaga*, in either sense.

xylophage (zī-lō-fāj), *n.* [*X. L. xylophagus*.] A xylophagous insect. [Rare.]

Wood yellowish, . . . of a somewhat unequal coarse fiber, soon attacked by *xylophages*.
Kurz, *Flora Brit. Burmah*.

Xylophagi (zī-lōf'ā-jī), *n. pl.* [NL., *pl. of Xylophagus*, *q. v.*] 1. In Latreille's system of classification, the second family of his tetramerous *Coleoptera*, containing many forms now distributed among the *Bostrichidæ*, *Mycetophagidæ*, *Cioidæ*, *Lathrididæ*, *Cucujidæ*, *Colytidæ*, and *Trogositidæ*.—2. In Meigen's classification, same as *Xylophagidæ*.

Xylophagidæ (zī-lō-faj'ī-dē), *n. pl.* [NL. (Stephens, 1829), < *Xylophagus* + *-idæ*.] A family of bracheyterous dipterous insects, typified by the genus *Xylophagus*. They have the costal vein encompassing the entire wing, and the tibiae spurred. Their larvae live in dead and decaying wood, and the adults are found most commonly on tree-trunks in high places in the woods. About 60 species are known. Compare *Beridæ*.

xylophagus (zī-lōf'ā-gūs), *a.* [*X. L. ξυλοφάγος*, wood-eating, < ξύλον, wood, + φαγεῖν, eat.] 1. Wood-eating; habitually feeding upon wood; lignivorous, as an insect. See *Cis* (with cut).—2. Perforating and destroying as if eating timber, as a mollusk or an erustacean.

Xylophagus (zī-lōf'ā-gūs), *n.* [NL. (Meigen, 1803); see *xylophagus*.] The typical genus of *Xylophagidæ*. The larvae live in garden-mold or under the bark of decaying trees, and the adult flies are remarkable for their resemblance to certain hymenopterous insects. They are rather large, almost naked, blue or black in color, often with a broad brownish band on the abdomen. A dozen or more species are known, of which eight are North American. Also incorrectly *Xylophagus* (Latreille, 1829).

Xylophasia (zī-lō-fā'sī-ā), *n.* [NL. (Stephens, 1829), < Gr. ξύλον, wood, + φάσις, an appearance.] A genus of noctuid moths, of the family *Apanidæ*, allied to *Xylomiges*, but having the palpi reaching above the head. *X. hezatica* is the clouded brindle-moth. *X. polyodon* is the dark arches, expanding about 2 inches. Many of the species formerly included in this genus are now placed in *Hadena* and *Mamestra*.

xylophilan (zī-lōf'ī-lan), *n.* [*X. L. xylophilus* + *-an*.] Any member of the *Xylophili*.

Xylophili (zī-lōf'ī-lī), *n. pl.* [NL. (Latreille, 1825), *pl. of Xylophilus*: see *xylophilous*.] A group of scarabæoid beetles, including several genera of the modern family *Scarabæidæ*: corresponding to the families *Dynastidæ* and *Rutelidæ* of Macleay.

xylophilous (zī-lōf'ī-lūs), *a.* [*X. L. xylophilus*, < Gr. ξύλον, wood, + φίλος, love.] Fond of wood, as an insect; living or feeding upon wood.

Xylophilus (zī-lōf'ī-lūs), *n.* [NL. (Latreille, 1825); see *xylophilous*.] 1. A genus of small beetles, of the family *Anthicidæ*. It is represented in many parts of the world, and comprises more than 40 species, of which 16 are found in the United States, as *X. melisomeri*, remarkable in that the males have fabelate antennæ.

2. Same as *Xylobius*, 1. *Mannerheim*.

xylophone (zī-lō-fōn), *n.* [*X. L. ξύλον*, wood, + φωνή, voice.] A musical instrument consisting of a graduated series of wooden bars, often supported on bands of straw, and sounded by means

Xylophone.

of small wooden hammers or by rubbing with rosin gloves. The tone is often agreeable and effective. Also *gigclira*, *sticeda*, and *straw-fiddle*.

Xylophia (zī-lō'pī-ā), *n.* [NL. (Linnæus, 1763), for **Xylopieros*, so called from the bitter wood; < Gr. ξύλον, wood, + πικρός, bitter.] A genus of plants, of the order *Anonaceæ*, type of the tribe *Xylopiæ*. It is characterized by flowers with a conical receptacle bearing externally numerous stamens with truncate anthers, in the center excavated and containing from one to five carpels, each with two to six ovules. There are from 30 to 40 species, natives of the tropics, chiefly in America, but with several in India and Africa. They are trees or shrubs with coriaceous and commonly two-ranked leaves. The flowers are solitary or clustered in the axilla, and are nearly or quite sessile, each with six petals, the outer elongated, thick, boat-shaped, curving, erect, and almost meeting at the summit, surpassing the three inner petals. The fruit consists of oblong or elongated berries produced on a convex receptacle. *X. Ethiopica*, of western tropical Africa, is the source of African, negro, or Guinea pepper; it is a tree with pointed ovate leaves, and a fruit consisting of several dry black quill-like aromatic carpels about 2 inches long. These are sold in native markets as a stimulant and condiment, and were formerly imported into Europe, forming the *piper Ethiopicum* of old writers. For *X. polycarpa*, of tropical Africa, see *yellow dye-tree* (under *yellow*). From the pervasive flavor of their wood various American species are called *bitter-wood*, especially *X. glabra* in the West Indies and *X. frutescens* in Guiana. The fruit of *X. sericea* in Brazil serves as a spice, and its bark torn from the tree in ribbon-like strips is twisted into coarse cordage, and would be available for matting. *X. frutescens*, known in Brazil as *embira*, has similar uses. Several species have formerly been classed under the genera *Unona*, *Uvaria*, and *Habzelia*.

Xylopiæ (zī-lō-pī'ē-ē), *n. pl.* [NL. (Endlicher, 1836), < *Xylophia* + *-ææ*.] A tribe of polypetalous plants, of the order *Anonaceæ*. It is characterized by densely crowded stamens, and thick exterior petals which are connivent or scarcely open; the inner ones are included and smaller, and are sometimes minute or absent. It includes 8 genera, chiefly of tropical trees, of which the chief are *Anona*, *Habzelia*, and *Xylophia* (the type).

Xylopinus (zī-lō-pī'nns), *n.* [NL. (Le Conte, 1862), < Gr. ξύλον, wood, + πεινᾶν, be hungry.] A genus of tenebrionid beetles, peculiar to North America, having the antennæ slender with the distal joints triangular, the anterior tarsi of the male little dilated, and the anterior margin of the front not reflexed. Three species are known. They live under the bark of dead trees.

xylopyrography (zī'lō-pī-rog'ra-fī), *n.* [NL., < Gr. ξύλον, wood, + πῦρ, fire, + -γραφία, < γράφειν, write.] Same as *poker-painting*.

xyloretine (zī-lō-rē'tin), *n.* [For **xylorrhétine*; < Gr. ξύλον, wood, + ῥήτιν, resin; see *resin*.] A subfossil resinous substance, found in connection with the pine-trunks of the peat-marshes of Holtegaard in Denmark.

Xylyctes (zī-lō-rik'téz), *n.* [NL. (Hope, 1837), < Gr. ξύλον, wood, + ὀρύκτης, a digger.] A peculiar genus of scarabæid beetles, having the head of the male armed with a long horn, and the female head tuberculate. The genus corresponds in the western hemisphere to the eastern *Oryctes*. *X. satyrus* is rather common in the eastern United States. Its larva is said to injure the roots of ash-trees.

xylosistrum (zī-lō-sis'tron), *n.* [< Gr. ξύλον, wood, + σείστρον, sistrum; see *sistrum*.] A musical instrument, invented by Uthe in 1807, resembling Chladni's euphonium, but having wooden instead of glass rods. Compare *xylharmonica*.

xylostein (zī-los'tē-in), *n.* [< NL. *Xylosticum* (see def.) (< Gr. ξύλον, wood, + στέον, bone) + -in².] An active poisonous principle which has been

isolated from the seeds of *Lonicera Xylosticum*, a species of honeysuckle.

Xylostroma (zī-lō-strō'mā), *n.* [NL., < Gr. ξύλον, wood, + στρώμα, anything spread or laid out.] A genus or form-genus of polyporeid fungi, which continues indefinitely, without fruiting, as a thick dense leathery sheet covering the wood upon which it lives.

xylostromatoid (zī-lō-strō'mā-toid), *a.* [< NL. *Xylostroma*(-t) + *-oid*.] In *bot.*, resembling the genus or form-genus *Xylostroma* — that is, having a tough woody or leathery appearance — as the matted mycelium of certain polyporeid fungi.

Distinguished by its distinct *xylostromatoid* sub-stratum. M. C. Cooke, Handbook of British Fungi, I. 282.

Xylota (zī-lō'tā), *n.* [NL. (Meigen, 1822), < Gr. ξύλον, wood.] A large genus of syrphid flies, comprising medium-sized or large species, slender, with the abdomen more or less red, yellow, or metallic. More than 40 species are found in North America, and about 15 in Europe. The larvae are found in decaying wood, and the adults frequent the foliage of bushes in blossom.

Xyloletes (zī-lō't'c-lēz), *n.* [NL. (Newman, 1840), < Gr. ξύλον, wood, + τέλος, end.] A genus of Polynesian cerambycid beetles, comprising about a dozen species from New Zealand and the Philippines. They are rather large pubescent beetles, with the intercoxal prominence of the abdomen in the form of an acute triangle.

Xyloterus (zī-lō't'c-rus), *n.* [NL. (Erichson, 1836), < Gr. ξύλον, wood, + τερεῖν, bore.] 1. A genus of bark-boring beetles, containing several very destructive species, as *X. bivittatus*, which seriously injures the spruce in North America. They have the antennal club large, oval, solid, pubescent on both sides, the eyes completely divided, and the tibiae serrate. Five species occur in the United States. By European authors the genus is considered a synonym of *Trypædendron* (Stephens, 1850).

2. A genus of hornblatts, comprising two European species. Hartig, 1837.

xylotile (zī'lō'til), *n.* [< Gr. ξύλον, wood, + τίλος, down.] A mineral of fibrous structure and wood-brown color, probably an altered form of asbestos.

xylotomous (zī-lō'tō-mus), *a.* [< Gr. ξύλον, wood, + -τομος, < τέμνειν, ταμείν, cut.] Wood-cutting, as an insect.

Xylotrogi (zī-lō-trō'jī), *n. pl.* [NL., < Gr. ξύλον, wood, + τρογείν, gnaw.] In Latreille's classification, a group of serriicorn beetles, distinguished among serriicorn from *Malacodermi* and from *Sternozii*.

Xylotrypes (zī-lō-trī'pēz), *n.* [NL. (Dejean, 1834, as *Xylotrypes*), < Gr. ξύλον, wood, + τρυπέων, bore.] A genus of very large lamellicorn beetles, related to *Dynastes*, as *X. gideon* of Malacca, which attacks the cocoonut. The cephalic horn of the males is always forked, and the thoracic horn sometimes bifid. About a dozen species are known, belonging mainly to the Australasian fauna.

Xyrichthys (zī-rik'this), *n.* [NL. (Cuvier and Valenciennes, 1839), also *Xyrichthys*, *Zyrichthys*; < Gr. ξύρον, a razor, + ἰχθύς, a fish.] In *ichth.*, a genus of brilliantly colored labroid fishes, of tropical seas, known as *razor-fishes*. *X. vermiculatus* is West Indian, and differs little from the European type of the genus. *X. lineatus* of the West Indies, is rose-red with a large blotch on each side below the pectorals.

Xyridacæ (zī-ri-dā'sē-ē), *n. pl.* [NL., < *Xyris* (-id-) + *-acææ*.] Same as *Xyridææ*.

xyridaceous (zī-ri-dā'shius), *a.* Characterized like *Xyris*; belonging to the *Xyridææ* (*Xyridacææ*).

Xyridææ (zī-ri-dē-ē), *n. pl.* [NL. (Kunth, 1815), < *Xyris* (*Xyrid-*) + *-æææ*.] An order of monocotyledonous plants, of the series *Coronariææ*. It is characterized by slightly irregular bisexual flowers, ses-

sile and solitary under imbricated bracts in a terminal head. The perianth consists of three equal broad-spreading delicate corolla-lobes, and a single large petaloid caducous sepal which wraps around the corolla, or is in the tropical American genus *Abolboda* absent. There are perhaps 48 species, belonging mostly to the genus *Xyris* (the type), the others to *Abolboda*. They are usually perennials, growing in tufts in wet places, chiefly in warm countries. They resemble the sedges and rushes in habit, the *Restiæææ* in the structure of their seeds, and the spiderworts in that of their ovules.

Xyris (zī'ris), *n.* [NL. (Linnæus, 1737; earlier in Lobel, 1581), so called from the sharp-edged leaves; < Gr. ξυρίς, a species of *Iris*, perhaps *I. furtivissima*, < ξυρόν, a razor, < ξίειν, scrape.] A genus of plants, type of the order *Xyridæææ*. It is characterized by flowers with a broad petaloid sepal which is very caducous, and a style without any appendage. About 40 species have been described, but not all are now thought distinct. They are tufted herbs, the stems usually flattish and two-edged, with linear rigid or grass-like leaves, and small globose or ovoid flower-heads with very closely imbricated rigid bracts. They are known as *yellow-eyed grass*, from the yellow petals; 17 species occur in the southern United States, mostly in sands and pine-barrens; 4 extend northward, of which *X. flexuosa*, with a twisted, and *X. Caroliniana*, with a flattish scape, occur from Massachusetts to Florida; *X. fibriata* and *X. torta* occur in pine-barrens from New Jersey southward. The leaves and roots of *X. Indica* are used as a remedy against leprosy and the itch in India, as are also those of *X. Americana* in Guiana and of *X. vaginata* in Brazil.

xyst (zist), *n.* [< L. *xystus*, also *xystum*, < Gr. ξυστός, a covered portico (so called from its polished floor), < ξυστός, scraped, smoothed, polished, < ξίειν, scrape, plane, smooth, polish.] In *anc. arch.*, a covered portico or open court, of great length in proportion to its width, in which athletes performed their exercises; or, in Roman villas, sometimes, a garden walk planted with trees. Also *xystos*, *xystus*.

Xysta (zis'tā), *n.* [NL. (Meigen, 1824), < Gr. ξυστός; see *xyst*.] 1. A genus of dipterous insects, belonging to the *Muscidæææ calyptrataææ* and subfamily *Phasiinæææ*. They are medium-sized or small somewhat hairy flies of black or gray color, whose metamorphoses are not known. Few species have been described, of which but one is North American.

2. A genus of tenebrionid beetles, synonymous with *Elæodes* (Eschscholtz, 1829).

xystarch (zīs'tärk), *n.* [< LL. *xystarches*, < Gr. ξυστόρχης, the director of a xyst, < ξυστός, a covered portico, xyst, + ἀρχων, rule.] An Athenian officer who presided over the gymnastic exercises of the xyst.

xyster (zīs'tér), *n.* [< Gr. ξυστήρ, a scraping-tool, < ξίειν, scrape; see *xyst*.] 1. A surgeons' instrument for scraping bones.—2. [cap.] [NL.] A genus of fishes. *Lacépède*.

Xysticus (zīs'ti-kus), *n.* [NL. (Koch, 1835), < Gr. ξυστικός, of or for scraping, < ξιστός, scraped; see *xyst*.] A large genus of laterigrade spiders, of the family *Thomisidæææ*. About 30 species are described from North America.

xystos (zīs'tos), *n.* [NL. or L.: see *xyst*.] Same as *xyst*.

Xyrocera (zīs-tros'c-rā), *n.* [NL. (Serville, 1834), < Gr. ξύστρον, a scraper, < κίρα, horn.] In *entom.*, a genus of tropical longicorn beetles of large size, and usually of a reddish-yellow color variegated with metallic green. About 30 species are known, nearly all from African and Australasian faunas.

Xyrostroplites (zīs-trop-lī'téz), *n.* [NL. (Jordan MSS., Cope, 1877), < Gr. ξύστρον, a scraper (< ξίειν, scrape), + ὄπιθός, armed.] A genus of centrarchoid fishes, distinguished from *Lepomis* by the blunt pharyngeal teeth. A species is found in Texas, usually called *Lepomis heros*.

xystus (zīs'tus), *n.* 1. Same as *xyst*.—2. [cap.] [NL.] A generic name variously applied to certain hymenopterous, coleopterous, and lepidopterous insects.

Xylyctes satyrus, female, natural size.

1. The twenty-fifth letter in the English alphabet. It has both a vowel and a consonant value. The character (as was pointed out under *U*) is the finally established Greek form of the sign added by the Greeks next after *T* (which had been the last Phœnician letter) to express the *oo*(*o*)-sound; *U* and *V* are other forms of it, which have kept more nearly their original place and value. As a Greek vowel, *Y* underwent a phonetic change which made of it the equivalent of the present French *y*, German *ü*, a rounded *i*, or a blending of the *i* and *u*-sounds; and in the first century B. C. it was added by the Romans to their alphabet (which had till then borrowed into their language. With the same value it passed also into Anglo-Saxon use; but its sound gradually changed to that of a pure or unrounded *i*; and then its further development into a sign for both vowel and consonant is analogous with the partial differentiation of *U* or *V* and *W* (see *W*). It differs from *v*, the other character having the double value of vowel and consonant, in being not only exchanged with *i* in diphthongs and vowel-digraphs—as at *ay*, *ei*, *ey*, *oi*, *oy*—but also commonly used by itself as the vowel of a syllable, as in *by*, *deny*, *syph*, *lying*, taking the place of *i* both at the end of a word (since no proper English word except the pronoun *I* is allowed to end with *i*) and elsewhere, and constantly exchanging with *i* and *ie* in the different inflectional forms of the same words: as, *pony*, *ponies*; *pretty*, *prettier*; *deny*, *denies*, *denied*, *denier*; and soon. In Anglo-Saxon *y* properly expressed the mixed sound *ü*; but it early began to interchange with *i*, and in Middle English the two became convertible, *y* being often substituted for *i* as being more legible, and as affording, especially at the end of a word, an opportunity for a calligraphic flourish. Hence its present prevalence at the end of words, while in the inflected forms the older *i* is retained, *families*, the plural of *familiæ*, remaining beside *family*, the flourished spelling, without the original final *e*, of *familiæ*. As a vowel-sign, *y* is a superfluity in our alphabet, signifying nothing which would not be just as well signified by *i*. The consonant *y* is really a different letter, representing the Middle English *ȝ*, the Anglo-Saxon *ȝ*. The value is that of a semivowel, related to the *i*-sounds (*i* and *ē*) precisely as *v* is related to the *u*-sounds (*ū* and *oo* or *ō*); if at all dwelt on or prolonged, it becomes an *i* or *ē*. With this value it stands always before another vowel, as in *yam*, *ye*, *yield*, *you*, *Yule*. In very many words it is a matter of comparative indifference, and subject to constant variation in practice, whether an *i* before a vowel shall be pronounced as a vowel, making a separate syllable, or as *y*, combining into one syllable with its successor. In the respellings for pronunciation of this dictionary, such cases are often written with an *i* in the same syllable with the following vowel: examples are *car*, *diab*, *fo*, *lio*, *fa*, *shient*, *e*, *ras*, *lian*. The semivowel *y*-sound is not only thus written with *y* and with *i* (sometimes also with *e*, as in the ending *-ceous*), but it is omitted without being written in a large class of words as the first element of what is called "long *u*" (that is, *yoo*: see *U*), as in *use*, *union*. and then, even when the *oo* (*ō*) part of the combination is reduced by slighting even to the neutral-vowel sound (*ū* or *u* or *o*), the *y* remains: hence, *fy*, *yēr*, not *fyēr*, for *fyēr* (*fyēr*), (*fyēr*). In all these varieties of designation, the semivowel *y*-sound is a much rarer element than the *v*-sound in English utterance, making but 3 of one per cent. of the latter, while the *v* is 2½ per cent. The character *y* in the archaic forms or abbreviations *ye*, *yat*, *ye*, *yf*, etc., is neither the Greek *γ* nor the Anglo-Saxon *ȝ* (*ȝ*), but a form of the Anglo-Saxon and Middle English *h*, now written *th*, and is to be pronounced, of course, as *th*.

2. As a symbol: (a) In *chem.*, the symbol of *yttrium*. (b) In *arithm.*, in myological formulas, the symbol of the accessory semitendinosus. *A. H. Garrod*. (c) In *math.*: (1) [*l. c.*] In algebra, the second of the variables or unknown quantities. (2) [*l. c.*] In analytical geometry, the symbol of the ordinate or other rectilinear point-coördinate. (3) In mechanics, the component of a force in the direction of the axis of *y*. (d) As a medieval Roman numeral, the symbol for 150, and with a line drawn above it (*Y*), 150,000.—**3.** [*l. c.*] An abbreviation of *year*.—**Yn function.** See *function*.

Y² (*wi*), *n.* [From the letter *Y*.] Something resembling the letter *Y* in shape. Specifically—(a) A forked clamp for holding drills or other tools. (b) One of the forked supports in the angle of which is placed either a telescope or one of the extremities of the axis about which a telescope or other instrument or apparatus turns. (c) Same as *Y-track*. (d) A two-way pipe or coupling used to unite a hot- and cold-water pipe in one discharge, as in a bath-tub; a *Y* pipe or *Y-cross*. (e) In *entom.*, a *Y*-moth.

Y^{3t}. An old mode of writing the pronoun *I*.
For the hory nicht and day,
Y may say, hay wayleway!
Y luf the boar than mi lif. *Rel. Antiq.*, I, 145.

y- See *i-1*. For Middle English words with this prefix, see *i-*, or the form without the prefix.

-y¹. [Early mod. E. also *-ie*, *-ye*; < ME. *-y*, *-ie*, *-ye*, *-i*, *-ig*; < AS. *-ig* = D. *-ig* = OHG. *-ig*, *-ic*, MHG. *-ic*, *-ec*, G. *-ig* = Icel. *-igr*, *-igr* = Sw. Dan. *-ig* = Goth. *-ags* (cf. L. *-icus* = Gr. *-uk-ōc*), an adj. suffix, as in AS. *stēnig*, stony, *isig*, icy, *dedwig*, dewy, etc. This suffix is often spelled *-ey*, especially when attached to a word ending in *-y*, as in *clayey*, *skycy*.] A very common suffix used to form adjectives from nouns, and sometimes from verbs, such adjectives denoting 'having,' 'covered with,' 'full of,' etc., the thing expressed by the noun, as in *stony*, *rocky*, *icy*, *watery*, *rainy*, *dewy*, *meaty*, *juicy*, *mealy*, *salty*, *peppery*, *powdery*, *flowery*, *spotty*, *speckly*, etc. It may be used with almost any noun, but is found chiefly with monosyllables, while examples of its use with trisyllables are rare.

-y². [Also *-ie* (rarely *-ee*); < ME. *-ye*, *-ie* (rare); a dim. suffix, prob. due to a merging of the familiar adj. suffix *-yl*, *-iel*, with the orig. fem. suffix *-ic³*, *-y³*, and perhaps in some cases with the D. dim. suffix *-je*, which is short for *-jen*, a later var. of *-ken* (see *-kin*).] A diminutive suffix, appearing chiefly in childish names of animals, etc., as *Kitty*, *doggie*, *piggie*, *birdy*, *froggy*, *mousy*, and similar names, or familiar forms of personal names, as *Katy* or *Kitty* (diminutive of *Kate*), *Jenny*, *Hetty*, *Fanny*, *Willy*, *Johanny*, *Tommy*, etc., such names being often spelled with *-ie*, as *Willie*, *Davie*, etc., a spelling common in Scotch use, and also in general use in names of girls, as *Katie*, *Jennie*, *Hettie*, *Carrie*, *Lizzie*, *Nellie*, *Annie*, etc. Such names coincide in terminal form with some feminine names not actually diminutive, as *Mary*, *Lucy*, *Lily*, formerly and sometimes still written *Marie*, *Lucie*, *Lillie*, etc. The diminutive termination is not used, except as above, in English literary speech, but it is common in Scotch, as in *beastie*, *mannie*, *lassie*, sometimes with a second diminutive suffix, as in *lassiekie*, etc.

-y³. [Early mod. E. also *-ye*, *-ie*; < ME. *-ie*, *-ye*, < OF. *-ie*, F. *-ie* = Sp. *-ia*, in some words of Gr. origin *-ia* = Pg. It. *-ia*, < L. *-ia* = Gr. *-ia*, a common term of fem. abstract (and concrete) nouns, as in L. *familia*, family, *mania* (< Gr. *mania*), madness, etc. See def. Cf. *-ey*, *-ency*, *-ec*, *-ence*, etc.] A termination of nouns from the Latin or Greek, or of modern formation on the Latin or Greek model. Such nouns are or were originally abstract, but many are now concrete. Examples are *family*, *innocency*, *humility*, *theory*, *geography*, *philosophy*, *philology*, etc.; the list is innumerable. Besides words from the Latin and Greek, many other words have the termination *-y*, either after the analogy of the Latin and Greek termination, or from some other source. As the termination in such cases usually has no significance, and is therefore not used as formative within the meaning assigned to that word, such words, which are very numerous and intractable to classification, are here ignored.

ya¹. An old spelling of *yea*.

ya² (*yā*), *pron.* A dialectal form of *you*.

yacare (*yak'a-re*), *n.* [Brazil.] Same as *jacare*.

yacca (*yak'ā*), *n.* [W. Ind.] Either of two West Indian evergreens, *Podocarpus Purdieana* and *P. coriacea*, trees becoming respectively 100 feet and 50 feet high, and affording timber suitable for cabinet and plain purposes.

yacca-tree (*yak'ā-trē*), *n.* Same as *yacca*.

yacca-wood (*yak'ā-wūd*), *n.* The wood of the *yacca-tree*.

yacht (*yot*), *n.* [Formerly also *yacht*, *yatch* (cf. F. *yacht*, < E.); = G. *jacht*, < MD. *jacht*, D. *jagt*, a yacht, lit. a chase, hunting] (= OHG. **jagōt*, MHG. *jagāt*, G. *jagd*, chase, hunting), < *jagen* = OHG. *jagōn*, MHG. G. *jagen*, hunt.] A vessel propelled either by sails or by steam, most often light or comparatively small, but sometimes of large size, used for pleasure-trips or for racing, or as a vessel of state to convey persons of distinction by water. There are two distinct types of sailing yacht: the racer with large spars and sails and fine lines, but sacrificing comfort to speed; and the commodious well-proportioned cruising-yacht. Sailing yachts are seldom or never of a more elaborate rig than that of the schooner; but steam-vessels of every class from launches up are common as yachts.

I sailed this morning with his Majesty in one of his yachts (or pleasure-boats), vessels not known among us till the Dutch East India Company presented that curious piece to the king. *Evetyng*, Diary, Oct. 1, 1661.

Yacht, a Dutch Vessel or Pleasure boat about the bigness of our Barge. *Blount*, Glossographia (1670).

Yacht, a small sort of a ship, built rather for Swiftness and Pleasure than for Merchandize or Warlike Service. *E. Phillips*, 1706.

yacht (*yot*), *v. i.* [*Yacht*, *n.*] To sail or cruise in a yacht.

The young English . . . seek for travels as dangerous as war, diving into Maelstroms, . . . *yachting* among the icebergs of Lancaster Sound. *Emerson*, *Power*.

yacht-built (*yot'bilt*), *a.* Constructed on the model of a yacht.

On the coast of Florida, there are the skimming-dish, the pumpkin-seed, and the flat-iron medals, all half-round *yacht-built* boats, broad and beamy, cat-rigged or sloop-rigged; they all pound and spank in a sea-way, and are very wet. *J. A. Henshall*, *Forest and Stream*, XIII, 683.

yacht-club (*yot'klub*), *n.* A club or union of yacht-owners for racing purposes, the promotion of yachting, etc., usually presided over by a commodore.

yachter (*yot'ēr*), *n.* [*Yacht* + *-er*.] One who commands a yacht; also, one who sails in a yacht; a yachtsman.

yachting (*yot'ing*), *n.* [Verbal *n.* of *yacht*, *v.*] The art of navigating a yacht; the sport of sailing or traveling in a yacht. Also used attributively: as, a *yachting* voyage; a *yachting* suit.

yachtsman (*yots'man*), *n.*; pl. *yachtsmen* (-men). One who keeps or sails a yacht.

The men . . . were hauling up the mainsail, and and Freddy lending superfluous aid, and making themselves very hot over it, as the manner of *yachtsmen* is. *W. E. Norris*, *Matrimony*, v.

yachtsmanship (*yots'man-ship*), *n.* [*Yachtsman* + *-ship*.] The art or science of sailing or managing a yacht. Also *yachtsmanship*.

The partisans of English *yachtsmanship* need not be disconcerted. *St. James's Gazette*, Sept. 8, 1886. (*Encyc. Dict.*)

yaft. A Middle English form of *gave*, preterit of *give*.

yaff (*yaf*), *v. i.* [Imitative; cf. *yap*¹ and *waff*².] To bark like an angry dog; yelp; hence, to talk pertly. [Prov. Eng. and Scotch.]

This said, up came a *yaffing* cur. *A. Scott*, *The Hare's Complaint*. (*Jamieson*.)

yafil (*yaf'il*), *n.* Same as *yaffle*.

yaffingale (*yaf'ing-gāl*), *n.* [Appar. altered from *yaffle*¹, with term. conformed to that of *nightingale*.] Same as *yaffle*¹. Also *yappingale*. [Prov. Eng.]

I am woodman of the woods,
And hear the garnet-headed *yaffingale*
Mock them. *Tennyson*, *Last Tournament*.

yaffle¹ (*yaf'l*), *n.* [Imitative; cf. *yaff*.] The green woodpecker, *Geococcyx viridis*: from its loud laughing notes. Also *yafil*, *yaffler*, *yaffingale*. See cut under *popinjay*. [Prov. Eng.]

The Green Woodpecker, *Geococcyx viridis*, though almost unknown in Scotland or Ireland, is the commonest; frequenting wooded districts, and more often heard than seen, its laughing cry (whence the name "Yafil" or "Yaffle," by which it is in many parts known) and undulating flight afford equally good means of recognition. *Encyc. Brit.*, XXIV, 651.

yaffle² (*yaf'l*), *n.* [Also *yafful*; origin obscure.] 1. An armful. [Prov. Eng.]—2. A pile of codfish to be carried from the flakes to the storehouse. [Local, Massachusetts.]

yaffle² (*yaf'l*), *v. i.*; pret. and pp. *yaffled*, ppr. *yaffling*. [*Yaffle*², *n.*] To transport yaffles of fish: as, "now, boys, go to *yaffling*." [Provincetown, Massachusetts.]

yaffler (*yaf'lēr*), *n.* Same as *yaffle*¹. [Prov. Eng.]

yager (*yā'gēr*), *n.* [*G. jäger* (= D. *jäger*), a huntsman, < *jagen*, hunt: see *yacht*. Cf. *jäger*.] 1. Formerly, a member of various bodies of light infantry in the armies of different German

states, recruited largely from foresters, etc.; now, a member of certain special battalions or corps of infantry or cavalry, generally organized as riflemen.—2. Same as *jäger*.

yagger (yag'ér), *n.* [*< D. jager, a huntsman, < jagen, hunt: see yacht.*] A ranger about the country; a traveling peddler. [Shetland Islands.]

I would take the lad for a *yagger*, but he has rather ower good havings, and he has no pack. *Scott, Pirate, v.*

yaguarundi (yag-wa-run'di), *n.* [Also *jaguarundi, yaguarondi*; *S. Amer.:* see *jaguar.*] A wild cat of Mexico and Central and South America, *Felis jaguarundi*. This cat is nearly as large as the ocelot, but entirely without spots, in which respect, as well as in its slender form, it resembles the eyra, and has thus a musteline rather than a feline aspect. The tail is as long as the body exclusive of the head and neck. The general color is a uniform grizzled brownish-gray, the individual hairs being annulated and tipped with blackish; kittens are more rufous brown. The *yaguarundi* ranges northward nearly or quite through Mexico, and of late years has generally been included among the mammals of the United States.

yah (yá), *interj.* An interjection of disgust.

Yahoo (yá-hö'), *n.* [A made name, prob. meant to suggest disgust; cf. *yah*, an interj. of disgust.] 1. A name given by Swift, in "Gulliver's Travels," to a feigned race of brutes having the form of man and all his degrading passions. They are placed in contrast with the Houyhnhnms, or horses endowed with reason, the whole being designed as a satire on the human race.

He [the Houyhnhnm] was extremely curious to know "from what part of the country I came, and how I was taught to imitate a rational creature; because the Yahoos (whom he saw I exactly resembled in my head, hands, and face, that were only visible), with some appearance of cunning, and the strongest disposition to mischief, were observed to be the most unteachable of all brutes."

Swift, Gulliver's Travels, iv. 3.

Hence—2. [*l. e.*] A rough, brutal, uncouth character.

A yahoo of a stable-boy.

Graves, Spiritual Quixote, iv. 10. (Davies.)

"What sort of fellow is he? . . . A Yahoo, I suppose." "Not at all. He is a capital fellow,—a perfect gentleman."

H. Kingsley, Ravenshoe, iv.

3. [*l. c.*] A greenhorn; a back-country lout. *Bartlett.* [Southwestern U. S.]

Yahveh (yá-vá'), *n.* Same as *Jehovah*.

Yahvist (yá'vist), *n.* Same as *Jehovist*.

Yahvistic (yá-vis'tik), *a.* Same as *Jehovistic*.

yaip, *v. i.* Same as *yaup*².

yak (yak), *n.* [*< Tibetan gyak.*] The wild ox of Tibet, *Poëphagus grunniens*, or any of its domesticated varieties; the grunting ox. The yak is a remarkable instance of the development of the pelage under climatic influence. The modification is like that seen in the musk-ox of arctic regions, *Oribos moschatus*, though altitude has done for the yak what has resulted from latitude in the case of the musk-ox. The body is covered with very long hair hanging from the shoulders, sides, and hips nearly to the ground, and the tail bears a heavy brush of long hairs. The wild animal, which inhabits the mountains of Tibet about the snow-line and descends into the valleys in winter, is of a blackish color; the back is humped; and the general form is not unlike that of the bison, though the long hair gives the animal a different appearance. The actual relationships of the yak are with the humped Asiatic cattle of which the zebu is the best-known domesticated stock. The yak is of great economic importance to the Tibetans, and has been domesticated. In this state it sports in many color-varieties, like other cattle. It is used as a beast of burden, makes excellent beef, and yields rich milk and butter; the long silky hair is spun and woven for many fabrics. The tails when mounted furnish the fly-snappers or chowries much used in India, and they are also dyed in various

ranges. The relationships of the yak are with the rupicaprine and nemorhine antelopes, as the European chamois, the Asiatic gorals, and the American Rocky Mountain goat.

yakopu (yak'ō-pō), *n.* A weapon like the kutar, used by the people of Java and Sumatra.

yaksha (yak'shā), *n.* [Skt.] In *Hindu myth.*, one of a class of demigods who attend Kuvera, the god of riches, and guard his treasures.

Yakut (ya-köt'), *n.* A member of a people of Turkish or mixed Turkish origin, dwelling in Siberia in the neighborhood of the Lena.

yald¹ (yald), *a.* Same as *yeld*¹.

yald², **yauld** (yald), *a.* [Prob. var. of **yeld*, < Icel. *yildr* = Sw. Dan. *yild*, stout, brawny, of full size.] Supple; active; athletic. [Scotch.]

Bein' yald and stout, he wheelit about, And kluve his heid in twaine.

Hogg, Mountain Bard, p. 43. (Jamieson.)

Yale lock. See *lock*¹.

yellow (yal'ō), *a.* A dialectal variant of *yellow*. *George Eliot, Silas Marner, xi.*

yam (yam), *n.* [= F. *igname*, < Sp. *ignama*, *igname*, *iñame*, *ñame* = Pg. *inhame* (NL. *inhame*), < African (in Pg. rendering) *inhame*, *yam*. The Malay name is *ubi*, Javanese *wci*, E. Ind. *ocbis* (Müller), whence G. *öbis-wurzel*, *yam*.] 1. A tuberous root of a plant of the genus *Dioscorea*, particularly if belonging to one of numerous species cultivated for their esculent roots; also, such a plant itself. The plant is commonly a slender twining high-climbing vine, in some species prickly, the root is fleshy, often very large, sometimes a shapeless mass, sometimes long and cylindrical, varying in color from white through purple to nearly black. The yam is propagated by cuttings from the root, or also in some species by axillary bulbils. The root contains a large amount of starch, sometimes 25 per cent, is hence highly nutritious, and in tropical lands largely takes the place of the potato of temperate climates. It lacks, however, the dry meanness of the potato, and is on the whole rather coarse, and not as a rule highly esteemed by people of European races. It is cooked by baking or boiling, and is in the West Indies sometimes converted into a meal used for making cakes and puddings. *D. sativa* is an ordinary species (the *hoi* of the Hawaiians) with unarmed stem and an acrid root which requires soaking before boiling; it is a profitable source of starch. *D. alata*, the red or white yam, the *uri* of the Fiji Islands, has a winged, not prickly stem, supported in culture by reeds; its tubers stain sometimes a length of 8 feet and a weight of 100 pounds. *D. aculeata*, the *kawai* of the Fijis, has prickly stems not requiring support. *D. Batatas*, the Chinese or Japanese yam, is hardy in temperate climates, and excited considerable interest in Europe and America, at the time of the potato-rot, as a possible substitute for that crop. The tuber is pure white within, of a flaky consistency, and of a taste agreeable to many. It grows 3 feet deep, however, enlarging somewhat toward the bottom, hence is very difficult to gather. *D. sativa* also is hardy in the southern United States, but the true yam is there little cultivated. (See def. 2.) These species present many varieties, and various other species are more or less cultivated.

The negro yams are a yearly crop, but the white yams will last in the ground for several years. *T. Roughley, Jamaica Planter's Guide (1823), p. 317.*

2. By transference, a variety of the sweet-potato. [Southern U. S.]

Branch of Female Plant of Yam (*Dioscorea alata*).

De yam will grow, de cotton blow, We'll hab de rice an' corn. *Whittier, Song of the Negro Boatmen.*

3. Any plant of the order *Dioscoreaceæ*. *Lindley.*—Chinese yam. See def. 1.—Common or cultivated yam, *Dioscorea sativa*.—Japanese yam. See def. 1, and cut under *Dioscorea*.—Kawai yam. See def. 1.—Ooyala yam, *Dioscorea tonkinensis*, of the East Indies.—Port Moniz yam. See *Tamts*.—Red yam. See def. 1.—Tivoli yam, *Dioscorea nummularia*, of India and the Malayan and Pacific Islands.—Uri yam. See def. 1.—White yam. See def. 1.—Wild yam, any native species of yam. Specifically—(a) The wild yam-root, *Dioscorea villosa*, of North America, a delicate and pretty twining vine, extending north to Canada. The root is esteemed by eclectics a cure for bilious colic, and is used by the southern negroes against rheumatism; hence called *colic-root* and *rheumatism-root*. (b) See *Rajania*.—Winged yam, *Dioscorea alata*.—Yam family, the plant-order *Dioscoreaceæ*.

Yama (yam'i), *n.* [Skt. *Yama*, prob. lit. 'the twin.')] In *early Hindu myth.*, the first mortal, son of the sun (*Vivasvat*) and progenitor of the human race, who went first to the other world,

and ruled as king of those who followed him thither; later, the god of departed spirits and the appointed judge and punisher of the dead. He is in modern Hindu art generally represented as crowned and seated on a buffalo, which he guides by the horns. He is four-armed, and of austere countenance. In one hand he holds a mace, in another a noose which is used to draw out of the bodies of men the souls which are doomed to appear before his judgment-seat. His garments are of the color of fire; his skin is of a bluish green.

yamadou (yam'a-dō), *n.* An oil obtained from the tallow-nutmeg, *Myristica sebifera*. See *nutmeg*, 2.

yama-mai (yam'ä-mi'), *n.* [NL. (Guérin-Ménéville, 1861), < Jap. *yama-mai*, lit. 'worm of the mountains.')] A large bombycid moth, whose larva feeds on the oak *Quercus serrata* in Japan, and furnishes silk of excellent quality which has long been utilized in the manufacture of the heavier native silk fabrics. The worm has been reared in Europe and in the United States, but has not been commercially successful in those countries. See *silkworm*, 1.

yam-bean (yam'bēn), *n.* A leguminous plant, *Pachyrhizus tuberosus* and *P. angulatus*, widely cultivated in the tropics for its pods, which are used as a vegetable, and for its tubers, which are edible cooked when young, and furnish in large quantity a starch said to be fully equal to arrowroot. The tubers are borne at intervals along the cord-like roots. *P. tuberosus* has often been included in *P. angulatus*, but is for cultural purposes at least distinct, having a much larger pod free from irritating hairs. In the Fiji Islands *P. angulatus* is called *yaka* or *ua yaka*; in English it has been distinguished from *P. tuberosus* as the *short-podded yam-bean*.

yammer (yam'er), *v. i.* [Also *yammer*, *yamer*; < ME. *zamuren*, *zomeren*, *zcomeren*, < AS. *gómērian* (= OHG. *jāmarōn*, MHG. *jāmeren*, G. *jāmeren*), lament, groan, < Gómor, sad, mournful (= OS. *jāmar* = OHG. *jāmar*, sad, > OHG. *jāmar*, MHG. *jāmor*, G. *yammer*, lamentation, misery).] 1. To lament; wail; shriek; yell; cry aloud; whimper loudly; whine. [Prov. Eng. and Scotch.]

As for the White Maiden of Avenel, she is seen to *yammer* and wail before any o'em dies. *Scott, Monastery, iv.*

"The child is doing as well as possible," said Miss Grizzy; "To be sure it does *yammer* constantly—that can't be denied."

Miss Ferrier, Marriage, xviii.

2. To yearn; desire. [Prov. Eng.]

I yammer to hear how things turned cawt. *Tim Bobbin, in Mackay's Lost Beauties of the Eng. Lang.*

yammering (yam'er-ing), *n.* [Also *yammering*; verbal *n.* of *yammer*, *v.*] A crying, whining, or grumbling. [Prov. Eng. and Scotch.]

They ill-thrawn folk . . . would tear the congregation to pieces wif their bickerings and *yammerings*. *W. Black, in Far Locharber, ix.*

yammerly (yam'er-li), *adv.* [*< ME. zamerly, zomerly, < AS. *gómortlic, < gómortlic*, lamentable, < Gómor, sad; see *yammer*, *v.*] Piteously. *Gawayne.*

yamp (yamp), *n.* [Am. Ind.] An umbelliferous plant, *Carum Gairdneri*, found from California to Wyoming and Washington; doubtless, also, *C. Kelloggii*, of central California. These plants have fasciated tuberous roots, which are an important food of the Indians.

yampf (yampf), *v. i.* [Cf. *yaff*, *yap*¹.] To bark continuously. *Halliwel.* [Prov. Eng.]

yamun (yá'nun), *n.* [Chinese, < *ya*, the marquise of a general, + *mun*, a two-leaved door, a gate.] The official and private residence of a Chinese mandarin who holds a seal; the place where a mandarin transacts the business of the region or department under his care, and where he lives; a mandarin's office, court, residence, etc.

The three *yamuns* at our feet, with their quaint towers, grand old trees, flags, and the broad Pearl River on the other side of the city, are the only elements of positive beauty in the landscape. *Lady Brassey, Voyage of Sunbeam, II. xxii.*

Tsung li yamun, the bureau or department of the Chinese government which attends to foreign affairs; the Chinese "Foreign Office." It was established in 1860, is composed of eleven members, and forms the channel of communication between the foreign ministers and the throne. *Giles.*

yang (yang), *v. i.* [Imitative.] To cry as the wild goose; honk.

yang (yang), *n.* [*< yang*, *v.*] The cry of the wild goose; a honk.

yang-kin (yang'kēn'), *n.* [Chinese.] A Chinese dullemer.

yank¹ (yangk), *v.* [Perhaps a nasalized form of *yack*, found in scuse of 'talk fast', prob. orig. move quickly, < Sw. dial. *jakka*, rove about, a secondary form of Icel. *jaga*, move about, = Sw. *jaga* = Dan. *jage*, hunt, chase, hurry, = D.

colors as decorations and ceremonial insignia. The elephant-headed god Ganesa is usually represented as flourishing the chowry with his trunk over the heads of various personages of the Hindu pantheon. Yaks have often been taken to Europe, where they are kept in menageries, and have repeatedly been bred in confinement. The yak crosses easily with some other cattle, producing various mixed breeds. See also under *Artiodactyla*.

Yak lace, a heavy and rather coarse lace made from the silky hair of the yak; at one time much used for trimming outer garments.

yakin (yá'kin), *n.* A large Himalayan antelope, *Budorcas taxicolor*, inhabiting high mountain-

jagen = G. *jagen*, hunt; see *yaecht*. The Sw. Dan. sense 'hunt' appears to be due to G., and the word does not seem to be old in Scand., or to exist in AS., etc. *Yank* has prob. been confused in part, as to meaning, with *yark*, *yerk*; and the whole series to which it belongs is dialectal, and without early record.] **I. intrans.** 1. To be in active motion; move or work quickly; bustle. *Imp. Dict.*—2. To talk fast or constantly; scold; nag. *Imp. Dict.*

II. trans. To move, carry, bring, take, etc., with a sudden jerk or jerking motion: usually with *along*, *over*, or *out*: as, to *yank* a fish out of the water. [Colloq.]

I don't see the fun of being *yanked* all over the United States in the middle of August.

C. D. Warner, *Their Pilgrimage*, p. 201.

When the butt of a room goes on the drink, or takes to moping by himself, measures are necessary to *yank* him out of himself.

R. Kipling, *Only a Subaltern*.

I guess t' best thing we can do is t' *yank* our traps out of that cave an' get started again.

T. A. Janvier, *Aztec Treasure-house*, x.

yank¹ (yangk), *n.* [*Yank¹*, *v.*] 1. A quick, sharp stroke; a buffet. [Scotch.]

I took up my neive an' ga'e him a *yank* on the hafat tell I gart his bit brass cap rattle against the wa'.

Hogg, *Brownie of Bodsbeck*, xiv.

2. A jerk or twitch. [Colloq., U. S.]—3. *pl.* Leggings or long gaiters worn in England by agricultural laborers. *Halliwel.*

Yank² (yangk), *n.* [An abbr. of *Yankee*.] A Yankee. [Colloq. or vulgar.]

"The *Yank*" or the equally grovelling "nigger," one or the other, which we do not know, has corrupted "Pollard of Richmond."

The Nation, IV. 286.

[The word acquired during the war of the rebellion wide currency as a nickname or contemptuous epithet among the Confederates for a Union soldier, the Confederates themselves being in like spirit dubbed *Johnnies* or *Rebs* by the Union soldiers.]

yankee¹ (yang'kē), *a.* [A dubious word, in spelling prob. conformed to *Yankee²*, being, if a genuine word, prob. for **yankie* or **yanky*, smart, active (as a noun, Sc. *yankie*, a sharp, clever, forward woman), < *yank¹* + *-ie¹* or *-y¹*, equiv. to *yanking*, active; see *yanking*. Cf. *Yankee²*.] Spanking; excellent. Also used adverbially.

You may wish to know the origin of the term *Yankee*. Take the best account of it which your friend can procure. It was a cant, favorite word with farmer Jonathan Hastings, of Cambridge, about 1713. Two aged ministers, who were at the college in that town, have told me they remembered it to have been then in use among the students, but had no recollection of it before that period. The inventor used it to express excellency. A *Yankee* good horse, or *Yankee* cider and the like, were an excellent good horse and excellent cider.

Dr. W. Gordon, *Hist. Amer. War* (ed. 1789), I. 324.

Yankee² (yang'kē), *n.* and *a.* [Formerly also *Yankey* and **Yanky* (in *pl.* *Yankies*); origin uncertain. (*a.*) According to a common statement, *Yankee*, as used in the plural *Yankies*, is a var. of *Yenkees* or *Yengees* or *Yaunghees*, a name said to have been given by the Massachusetts Indians to the English colonists, being, it is supposed, an Indian corruption of the E. word *Engilish*, or, as some think, of the F. *Anglais*, English (in the latter case the statement must refer to the Indians of Canada, the only ones in contact with the French). The word is said to have been adopted by the Dutch on the Hudson, who applied it to the people of New England (it is said, "in contempt," but prob. not more in contempt than any other designation of them). (*b.*) In another view, the name *Yankee* was derived from the adj. *yankee* as given under *yankee¹*. Some connect *yankee¹* with the preceding theory by assuming it to be a corruption of the Indian *Yengees* or *Yenkees* or *Yankees* as applied to the English, as if 'English' articles meant necessarily 'excellent' articles. Others identify *Yankee²* with *yankee¹*, 'excellent, smart'; but this sense does not seem to have been common, if existent, in New England use; and the theory is otherwise untenable.] **I. n.** 1. A citizen of New England.

Yankies—a term formerly of derision, but now merely of distinction, given to the people of the four eastern States. *Trumbull's McFingal* (6th Ed. Eng. ed.), Editor's note.

For ourselves, now, we do not entertain a doubt that the sobriquet of *Yankees*, which is in every man's mouth, and of which the derivation appears to puzzle all our philologists, is nothing but a slight corruption of the word "Yengeese," the term applied to the "English" by the tribes to whom they first became known. We have no other authority for this derivation than conjecture, and conjectures

that are purely our own; but it is so very plausible as almost to carry conviction of itself.

J. F. Cooper, *Oak Openings*, p. 28.

Yankee, in the American use, does not mean a citizen of the United States as opposed to a foreigner, but a citizen of the Northern New England States (Massachusetts, Connecticut, &c.), opposed to a Virginian, a Kentuckian, &c.

De Quincy, *Style*, Note 1.

3. A measuring-rod or -stick of the exact length of 3 feet or 36 imperial inches; a yardstick.

You would not, sir: had I the *yard* in hand, I deeme your pate for this delusion.

Heywood, *Fair Maid of the Exchange* (Works, ed. 1874, II. 40).

4. The fundamental unit of English long measure. The prototype of the British imperial yard (to which the United States Office of Weights and Measures conforms, though without express authority) was legalized in 1855. It is a bar made of a kind of bronze or gunmetal known as *Baily's metal*. It has a square section of 1 inch on the sides, and is 33 inches long. But at 1 inch from each end a well is drilled into one of its surfaces so that the bottom is in the central plane of the bar, and into the bottom of the well is sunk a gold plug, upon whose flat surface is engraved one of the two defining lines. The yard is defined as the distance between these lines at 62° F., with the understanding that the bar is to be supported in a particular manner, and that the thermometers are to be constructed according to certain rules. The lines are designed to be looked at with the microscopes of a comparator; but they are not so free from blur that their middles can be determined more nearly than to a millionth part of the distance between them. This standard was made after the practical destruction of the previous legal prototype, that of 1760, in the burning of the Houses of Parliament, October 16th, 1834, and was legalized as a new prototype because its length agreed with what had been recognized in 1819 by the Standards Commission as the scientific standard yard — namely, with a certain scale, or rather with Captain Kater's measures of that scale, known as *Shuckburgh's scale*, having been made in 1794 by Troughton for Sir George Shuckburgh, who in his comparisons of it first introduced the comparator with micrometer microscopes. This scale was a copy of another which had been made for the Royal Society in 1742, from which the standard of 1760 was copied. This was a bar having upon one side two gold studs, each with a dot pricked upon it; and it was used by bringing the points of a beam-compass into these dots, which had thus soon become badly worn. Older standards still extant are those of Queen Elizabeth and of Henry VII. The latter is shorter than the present yard by one thousandth part of its length, or about $\frac{1}{8}$ of an inch. It is said that the yard was made to be of the length of Henry I.'s arm — doubtless a fable, even if believed by that monarch himself. Customary units are not changed so easily. Yet it is true that there appear to be no traces in the measures of buildings earlier than the twelfth century of the use of a yard equal to ours, nor of its subdivisions; while in the later Norman and Gothic structures a foot equal to the third of our yard has often clearly been used. But the

Gothic architects of England more usually employed a foot of 13; modern inches, a unit probably derived from France; and the oldest works show a foot of 12; modern inches, no doubt the old Saxon foot, agreeing very nearly with the Rhineland foot of modern Germany. Some British remains, as Stonehenge, were evidently constructed with Roman measures. The Standards Commission of 1819 reported that 37 inches of cloth were frequently given for each yard, which is almost precisely Rhinish measure. They also found local yards of 38 and 40 inches. As a cloth measure, the yard is divided into 4 quarters = 16 nails. (See *cloth-measure*, under *measure*.) A square yard contains 9 square feet, and a cubic yard 27 cubic feet. Contracted *yd.*

5. *Naut.*, a long cylindrical spar having a rounded taper toward each end, slung crosswise to a mast and used for suspending certain of the sails called either *square* or *lateen sails* according as the yard is suspended at right angles or obliquely. Yards have sheave-holes near their extremities for the sheets reefing through. Either end of a yard, or rather that part of it which is outside the sheave-hole, is called the *yard-arm*; the *quarter* of a yard is about half-way between the sheave-hole and the slings. Going upward from the deck, the yards are known as the *lower yards*, *topsail*, *topgallant*, and *royal-yards*, except where double topsails are used, when the topsail-yard is replaced by the lower and upper topsail-yards. Lower yards and topsail-yards are sometimes made of iron, and hollow. See cuts at *above*, *a-cockbill*, *cockscomb*, and *ship*.

Hood, *Sailor's Apology for Bow-legs*.

yaw¹ (yā), *n.* [< *yaw*¹, *v.*] *Naut.*, a temporary deviation of a ship or vessel from the direct line of her course.

O, the *yaws* that she will make!

Fletcher and Massinger, *A Very Woman*, iii. 5.

He did not see a light just before us, which had been hid by the studding-sails from the man at the helm, but by an accidental *yaw* of the ship was discovered.

B. Franklin, *Autobiography*, p. 264.

A very red-faced, thick-tipped countryman, . . . as soon as the Prince hailed him, jovially, if somewhat thickly, answered. At the same time he gave a beery *yaw* in the saddle.

K. L. Stevenson, *Prince Otto*, l. 4.

yaw² (yā), *n.* [Said to be from African *yaw*, a raspberry.] 1. One of the tubercles characteristic of the disease known as *yaws*.

In some cases a few *yaws* will show themselves long after the primary attack is over; these are called "membr *yaws*" (from "remember"). *Encyc. Brit.*, XXIV, 732.

yawner (yā'nér), *n.* One who yawns.

yawning (yā'ning), *n.* [Verbal *n.* of *yawn*, *v.*]

Gaping; oscitation; the taking of a deep inspiration, followed by a slight pause, and then a prolonged expiration, the mouth being more or less widely open. The act is reflex and involuntary in character, though it can often be partially repressed by a strong effort of the will. It is the physiological expression of fatigue and of a desire to sleep, but is also excited by insufficient oxygenation of the blood, and occurs therefore in conditions of lowered vitality, in the prodromal stage of many diseases, and after profuse losses of blood. The sight of another person yawning is also provocative of the act.

yawningly (yā'ning-li), *adv.* In a yawning manner; with *yawns* or *gapes*.

Ye . . . that leaning upon your idle elbow *yawningly*

patter out those prayers.

Bp. Hall, *The Hypocrite*, Sermon on 2 Tim. iii. 5.

Many were merely attracted by a new face, and, having stared me full in the title-page, walked off without saying a word; while others lingered *yawningly* through the preface, and, having gratified their short-lived curiosity, soon dropped off one by one.

Irvine, *Knickerbocker*, p. 358.

Yclad in costly garments fit for tragicke Stage.
Spenser, F. Q., III. xii. 3.
Her words *yclad* with wisdom's majesty.
Shak., 2 Hen. VI., i. 1. 33.

yclept, ycleped. Forms of the preterit and past participle of *clepe*.

Y-cross (wī'krōs), *n.* 1. A Y-shaped cross, suggesting the position of Christ as crucified with the arms raised: often an ornament on chasubles.—2. A Y-branch or Y; a three-way joint or connection.

yd. A contraction of *yard*†.

ydlet, a. An obsolete spelling of *idle*.

ydrad†. A form of *drad*, obsolete past participle of *dread*.

Yet nothing did he dread, but ever was *ydrad*.
Spenser, F. Q., I. i. 2.

ye¹, you (yē, yō), *pron. pl.* (used also instead of *sing.*); poss. *your* or *yours*, obj. *you*, sometimes *ye*. [Two forms of the same word, representing historically the nom. and obj. respectively of the personal pronoun used as the plural of *thou* (see *thou*): (a) Nom. (and voc.) *ye*, early mod. E. also *yeē*, < ME. *ye, ye*, < AS. *gē, ge* = OS. *gi, gi* = OFries. *gi, i* = MD. *ghy, D. gij* = LG. *ji* = OHG. MHG. *ir, G. ihr* = Icel. *er, er* = Sw. *Dan. i* = Goth. *ius, ye*, = (with additional suffix) Gr. *ἑῆς, ἑμεῖς* = Skt. *yūyam, ye*; a pron. used as the pl. of *thou*, with which it is not etymologically related.

(b) Nom. *you*, orig. obj. (dat. and acc.), taking the place of the nom. *ye*, because of the much greater frequency of the dat. and acc., and the tendency to make the three cases *ye, your, you*, conform to one base, a tendency assisted also by the fact that *ye* and *you* are usually unaccented, and therefore have the vowel more or less obscurely pronounced; < ME. *you, gou, you*, < AS. *ēow, dat., cōw* (poet. *cōwie*), acc., = OS. *iu* = OFries. *iūwe, iwe* = D. *u* = OHG. *iu* = Sw. *Dan. i* (prop. nom.) = Goth. *iwis, wi*; cf. Gr. *ἑῆς, dat., ἑμεῖς, acc.* The confusion of the two forms, and the use of *you* as nom., began in early mod. E., and is conspicuous in the Elizabethan dramas. In the authorized version of the Bible (1611), in which many usages already regarded as archaisms were purposely retained, the distinction between *ye, nom.*, and *you, obj.*, is carefully preserved. *Ye* still survives in religious and poetical use, while in ordinary colloquial and literary use *you* has superseded it. In provincial use, as in Irish, *ye* occurs for *you* both in nom. and obj., but in the obj. it is to be regarded rather as a shortening of the enclitic *you*: thus, *I tell you, I tell ye*. The *ye* may be further reduced, as in *thank you* > *thank ye* > *thankee* or *thanky*; *how do you do* > *how do ye do* > *how d'ye do* > *howdy do* > *howdy*, etc.] The personal pronoun of the second person, in the plural number: now commonly applied also (originally with some notion of distinction or compliment, as in the case of the royal *we*) to a single individual, in place of the singular forms *thee* and *thou*—a use resulting in the partial degradation of *thou* to a term of familiarity or of contempt. *Ye* is archaic, and little used except in exalted address and poetry. (a) As carefully discriminated, especially in the older English, the nominative and vocative being *ye* and the dative and accusative *you*.

He swor foremost [first]
That *ye* schuld haue no harm, but hendly for god
He praiſe *you* com speke with him.
William of Palerne (E. E. T. S.), l. 269.
He gaue *you* fyne wittes
For to worshopen hym ther-with while *ye* lyeu here.
Piers Plowman (C), ii. 15.
And he said unto the elders, Tarry *ye* here for us, until
we come again unto *you*.

John Hay, Mystery of Gilgal.

ye^{2†}, adv. A Middle English form of *yea*.

ye^{3†}, n. An obsolete variant of *eye*†.

yea (yā), *adv.* [ME. *ye, ge, ya, yo*, < AS. *gēd* = OS. *ja* = OFries. *iē, gē* = D. *ja* = LG. *ja* = OHG. MHG. *jā, G. ja* = Icel. *jā* = Dan. Sw. *ja* = Goth. *ja, yes, ja*, truly, verily; perhaps = Lith. *ja* in *ja sakyti*, say yes, and Gr. *ἦ, truly*. Connection with AS. *ge* = Goth. *jah*, also, and, and with L. *jam*, now, Skt. *ya*, who, is uncertain. Hence ult. *yes*.] 1. Yes; ay: a word that expresses affirmation or assent: the opposite of *nay*: as, Will you go? *Yea*.
Swear not at all; . . . but let your communication be
Yea, yea; *Nay, nay*.
Mat. v. 37.
You promise to bear Faith and Loyalty to him: Say
Yea. And King Edward said *Yea*, and kissed the King of
France on the Mouth, as Lord of the Fee.
Baker, Chronicles, p. 117.
2. Indeed; verily; truly; it is so, or is it so? used to introduce a subject.
Yea, hath God said, Ye shall not eat of every tree of the
garden?
Gen. iii. 1.
Yea, mistress, are you so peremptory?
Shak., Pericles, ii. 5. 73.
Him I loved not. Why?
I deem'd him fool? *yea*, so?
Tennyson, Pelleas and Ettarre.

3. Used to intimate that something is to be added by way of intensiveness or amplification: Not this alone; not only so but also; what is more. Compare the similar use of *nay*.
Confess Christ and his truth, not only in heart, but also
in tongue, *yea*, in very deed, which few spellers do.
J. Bradford, Letters (Parker Soc., 1853), II. 202.
I therein do rejoice; *yea*, and will rejoice. Phil. i. 18.
One that composed your beauties, *yea*, and one
To whom you are but as a form in wax.
Shak., M. N. D., i. 1. 48.
Many of you, *yea* most,
Return no more. Tennyson, Holy Grail.

4. In the authorized version of the Bible, so; thus; true; real; consistent.
All the promises of God in him are *yea*, and in him
Amen.
2 Cor. i. 20.
Yea is now used only in the sacred, solemn, or formal
style. *Yea*, being mainly a word of assent, was formerly
used chiefly in answer to questions framed affirmatively;
yes, a stronger term, was chiefly used in answer to ques-
tions containing a negative or otherwise implying a doubt.
But the distinction does not appear to have been rigidly
maintained; and the assertions of the following quotations
about *yea* and *yes*, like those about *nay* and *no* (see *no*†),
must be taken with some allowance.
I would not here note by the way that Tyndall here
translateth *no* for *nay*, for it is but a trifle and mistaking
of the englishe worde, sauing that ye shoulde see that
he, whych in two so plain englishe wordes, and so common
as is *naye* and *no*, cannot tell when he shoulde take the
tone, and when the tother, is not, for translating into
english, a man very mete. For the use of those two
wordes in answering to a question is this. No [read *nay*]
answereth the question framed by the affirmative. As,
for example, if a manne should aske Tindall hymselfe:
"ys an heretike mete to translate holy scripture into
english?" Lo, to this question, if he will answer trew
english, he must answer *nay*, and not *no*. But and
if the question be asked hym thus, lo: "is not an heret-
yque mete to translate holy scripture into english?"
To this question, lo, if he will answer true english, he
must answer *no*, & not *nay*. And a lyke difference is
there betwene these two aduerbs, *yea* and *yes*. For if
the question be framed vnto Tindall by thaffirmatiue in
this fashion: "If an heretike falsely translate the newe
testament into english, to make hys false heresyes seme
the worde of Godde, be hys booke worthy to be burned?"
To this question asked in this wyse, wy he wyl answer
true english, he must answer *ye*, and not *yes*. But now
if the question be asked hym thus, lo, by the negatiue:
"If an heretike falsely translate the newe testament
into english, to make hys false heresyes seme the word
of God, be not hys boke worthy to be burned?" To
this question in this fashion framed, if he will answer
trew english, he maye not answer *ye*, but he must
answer *yes*, and say "*yes*, mary, be *ye*, bothe the
translatioun and the translatour, and al that wyl holde
wyth them." And this thing, lo, though it be no great
matter, yet I haue thought it good to giue Tindall warn-
ing of, because I would haue him write true one way or
other, that though I can not make him by no meane to
write true inatter, I would haue him yet at the best wise
write true englishe.

[Anno 1532, book iii., Workes, p. 448.

There is an example of the rejection of a needless sub-
tlety in the case of our affirmative particles, *yea* and *yes*,
nay and *no*, which were formerly distinguished in use, as
the two affirmatives still are in our sister-tongues, the
Danish and Swedish. The distinction was that *yea* and
nay were answers to questions framed in the affirmative;
as, Will he go? *Yea* or *Nay*. But if the question was
framed in the negative, Will he not go? the answer was
Yea or *No*. G. P. Marsh, Lects. on Eng. Lang., xxvi.

opening of the year, = OBulg. *jarŭ, spring*, = Gr.
ἔτος, a season, year, *ἔρα*, season, spring, year,
hour, = Zend *yāre*, a year. From the Gr. *ἔρα*
comes ult. E. *hour*, which is thus a doublet of
year: see *hour*. Hence ult. *yore*.] 1. A full
round of the seasons; the period of the earth's
revolution round the sun; more accurately,
the interval between one vernal equinox and
the next, or one complete mean apparent cir-
cuit of the ecliptic by the sun, or mean mo-
tion through 360° of longitude. This is specifically
the tropical year, which determines the sequence of the
seasons (sometimes also called the *astronomical* or *solar*
year). Its length is about 365 days, 5 hours, 48 minutes,
46 seconds. Owing to the precession of the equinoxes,
this is less than the length of the sidereal year, the true
period of the sun's revolution, or his return to the same
place in relation to the fixed stars, which is 365 days, 6
hours, 9 minutes, 9.3 seconds. See also *style*†, *n.*, 9. Ab-
breviated *y, yr*.

Hence—2. The time in which any planet com-
pletes a revolution round the sun: as, the *year*
of Jupiter or of Saturn.—3. A space of about
365 days, used in the civil or religious reckoning
of time; especially, the usual period of 365 or
366 days, divided into twelve calendar months,
now reckoned as beginning with the 1st of Janu-
ary and ending with the 31st of December: as,
the *year* 1891 (see *legal year*, below); also, a peri-
od of approximately the same length in other
calendars. Compare *calendar*†.—4. A space of
twelve calendar months without regard to the
point from which they are reckoned: as, he
sailed on June 1st, and was absent just one *year*.

At the zeres end thei comen azen, and founden the same Lettres and Figures, the which thei hadde written the zeer before, withouten ooy defaute.

yeast (yést), *n.* [Formerly also *yest*; also dial. *east*: < ME. *gest*, < AS. *gist*, *gyst* = D. *gest*, *gist* = MHG. *gest*, *jest*, G. *gäseht*, *gäseht* = Icel. *jast*, *jastr* = Sw. *jäst* (cf. Dan. *gjær*), yeast; from a verb seen in OHG. *jesan*, MHG. *jesen*, *gesen*, *geru*, G. *gähren*, ferment, = Sw. *jäsa*, ferment, froth; akin to Gr. ζέω, boil, seethe, (> ζεστός, boiled, boiling); Skt. √ yas, boil, froth.] 1. A yellowish substance, having an acid reaction, produced during the alcoholic fermentation of saccharine fluids, rising partly to the surface in the form of a frothy, flocculent, viscid matter (*top or surface yeast*), and partly falling to the bottom (*bottom or sediment yeast*). Yeast consists of aggregations of minute cells, each cell constituting a distinct plant, *Saccharomyces cerevisiae*. The yeast-plant is a saprophytic fungus of uncertain systematic position, being regarded by some as a degenerate ascomycete, by others as representing a distinct class. It exists under two conditions. In the first it is in the form of transparent round or oval cells, averaging .08 mm. (.003 inch) in diameter, which increase in countless numbers by budding—that is, by the formation of a small daughter-cell by the side of the mother-cell, from which it sooner or later separates. The other form consists of larger cells, which, by a division of their protoplasm, form four new cells within the parent-cell. These endogenously formed cells have been likened to the ascospores of the *Ascomycetes*, with which, as stated above, they are frequently classed. The former notion that the yeast-plant was only the immature condition of a mold has been effectually exploded by Brefeld's elaborate researches. Fermentation takes place sooner and goes on more rapidly when yeast is added than when the fluid is merely exposed to the atmosphere, beer-yeast possessing the property of setting up fermentation in the highest degree. Surface yeast is formed at from 65° to 77° F., and its action is rapid and irregular, whereas sediment yeast is formed at from 32° to 45°, and its action is slow and quiet. Sediment yeast is reproduced by spores, and not by buds. In their chemical relations the two do not appear to differ. Yeast varies in quality according to the nature of the liquid in which it is generated, and yeast-merchants distinguish several varieties, which are employed for different purposes according to their energy and activity. Yeast is employed to induce fermentation in the manufacture of beer and ale, and of distilled spirits, and is also the agent in producing the panary fermentation, whereby bread is rendered light, porous, and spongy. Beer-yeast is employed medicinally as a stimulant in low fevers, and is of great service in cases where, from inflammatory symptoms, wine is inadmissible. See *barm*², *Saccharomyces*, *fermentation*.

a, yeast-plant (*Saccharomyces cerevisiae*), showing increase by budding; b, a cell, showing the formation of the spores; c, a cell, containing four mature spores; d, the spores; e, germinating spores.

II. n. 1. The color of gold, butter, the neutral chromates of lead, potassa, etc., and of light of wave-length about 0,581 micron. It has some remarkable properties, which are due to the fact that by far the greater part of the visible spectrum consists of two regions, in either of which any three colors being taken a suitable mixture of the extreme ones will match the middle one, and that the yellow is about the middle of one of these regions which contains four fifths of all the visible light of the solar spectrum. This region is bounded by the scarlet and the emerald-green; the other by the emerald-green and the violet-blue. These three colors are thus the only ones which cannot be matched by mixtures of others. They are also more chromatic or high-colored than these which fall between them in the spectrum; for which reasons physicists regard these three colors as the elementary ones. (See *color*.) A remarkable property of yellow is that an increase of light merely intensifies the sensation with a slight heightening of the color, without changing the hue; while blue, on the other hand, is rendered pale by increased illumination, and all other colors are rendered yellowish. The name *yellow* is restricted to highly chromatic and luminous colors. When reduced in chroma, it becomes buff; when reduced in luminosity, a cool brown. Mixed with red, yellow goes over into orange; mixed with green, into yellow-green. Lemon-yellow and canary-yellow may be taken as pure yellows, the latter being a little greener. Sulphur-yellow is a little greenish; primrose is a little greenish and pale; gamboge is a very slightly orange yellow. By chromic-yellow is usually meant a little more orange and most intensely chromatic color. Indian, cadmium, and saffron yellows are orange-yellows; Naples yellow and maize-yellow are pale orange-yellows. Ocher-yellow, clay-yellow, and wax-yellow are of somewhat diminished chroma, the first a little orange, and the last a little green. It is impossible to describe the yellows more precisely, as the slightest causes—for example, a little thicker layer of paint, or illumination from another part of the sky—change their hues decidedly.

6. One of certain geometrid moths: an English collectors' name; as, the *speckled yellow*.—7. Any one of the group of small yellow butterflies; a sulphur. See *sulphur*, n., 3.—**Antimony yellow**, yellow antimony. See *antimony*.—**Cassel yellow**. Same as *mineral yellow*.—**Chinese yellow**. Same as *king's yellow*.—**Cobalt yellow**, a pigment used by artists, composed of the double nitrite of potassium and cobalt. It is permanent, and more closely resembles the yellow of the spectrum than any other pigment.—**Fast yellow**. Same as *acid-yellow*.—**Fol's yellow**, a color formerly used in dyeing, made by heating carbolic acid and arsenic in a pot. It dyes wool and silk yellow, and gives red shades with lime.—**Imperial yellow**, in *ceram.*, a variety of Chinese porcelain having a uniform yellow glaze, said to be reserved for the use of the imperial family or court; also, by extension, porcelain of any make supposed to resemble this in color.—**Indian yellow**, a bright yellow pigment obtained in India. It is supposed to be the earth dug up from the stables where cows have been housed during the winter and fed on mango-leaves. In its crude form it comes in commerce in balls of from 3 to 5 inches, having an offensive urinous odor. It is an impure magnesium salt of exanthic acid. For artistic purposes it is washed and levigated, the foreign material being carefully separated. Thus purified it gives an orange-yellow of great depth and beauty. It is quite permanent, and is used both as an oil and as a water color.—**King's yellow**, a pigment formed by subliming a mixture of arsenious acid and sulphur. It consists of arsenious acid and arsenic trisulphid, or orpiment. Also *Chinese yellow*.—**Madder-yellow**, a lake prepared from madder-root. It is bright in tone, somewhat similar to Indian yellow, but more transparent.—**Manchester yellow**, a coal-tar color used in dyeing, being the sodium or calcium salt of dimitro-alpha-naphthol. It is applicable to silk and wool, producing shades from pale lemon to deep orange. It is not fast to light. It is also known as *Mor-tius's yellow*, *naphthol yellow*, *golden yellow*, *saffron yellow*, *naphthalene yellow*.—**Mars yellow**, an artificially prepared oxid of iron, resembling the natural yellow ochre. It is used by artists as a pigment.—**Martius's yellow**. Same as *Manchester yellow*.—**Mineral yellow**. See *mineral*.—**Montpellier yellow**. Same as *mineral yellow*.—**Naples yellow**, a light-yellow pigment of various shades and of varying composition. The true pigment is a basic antimoniate of lead, but it is imitated by mixtures, as of cadmium-yellow and zinc-white, or of white lead and chrome-yellow. It has a good body, and is quite permanent.—**Paris yellow**. Same as *chrome-yellow*.—**Patent yellow**. Same as *mineral yellow*.—**Perfect yellow**, chromate of zinc, used as a pigment by artists. It is a light, bright yellow, and is quite permanent.—**Resorcinol yellow**. Same as *tropæolin*.—**Speckled yellow**. See *speckled*.—**Strontian yellow**. See *strontian*.—**Turner's yellow**, an oxychlorid of lead employed as a yellow pigment; same as *mineral yellow*.

yellow (yel'ô), *v.* [C *yellow*, *a.*] **I. trans.** To render yellow.

yellow-covered (yel'ô-kuv'êrd), *a.* Covered with yellow; especially, covered or bound in yellow paper.—**Yellow-covered literature**, trashy or sensational fiction, periodicals, etc.: in allusion to the form in which such matter was formerly commonly issued. [Collor.]

yellowcrown (yel'ô-krown), *n.* The yellow-rump or myrtle-bird, *Devilraea coronata*.

yellow-crowned (yel'ô-kround), *a.* Having the top of the head yellow, or yellow on the crown, as various birds; yellow-polled: as, the *yellow-crowned* night-heron. See *night-heron*.—**Yellow-crowned thrush.** See *Trachycoccyzus*.—**Yellow-crowned warbler.** See *warbler*.—**Yellow-crowned weaver.** See *weaver-bird*.

yellow-duckwing (yel'ô-duk'wing), *a.* Noting a variety of duckwing game-fowls whose distinguishing color-mark on the wing of the cock is golden or yellow. The back of the cock is orange or crimson. Compare *silver-duckwing*.

yellow-eyed (yel'ô-îd), *a.* Having yellow eyes, or a yellow eye, in any sense; also, yellow around the eyes.—**Yellow-eyed grass.** See *Xyris*.

yellowfin (yel'ô-fin), *n.* Same as *redfin*, 2.

yellowfish (yel'ô-fish), *n.* A chiroid fish of the coast of Alaska, *Hexagrammus* (*Pleurogrammus*) *monopterygius*. This is one of the rock-trouts, and a food-fish of some importance, locally known as *Atka mackerel*. It is dark-olive above and yellowish below, cross-banded on the sides with the color of the back; the fins are nearly plain dusky, the pectorals with blackish margin, and the dorsal fin is continuous or but slightly emarginate.

yellow-footed (yel'ô-fût'ed), *a.* Having yellow feet: as, the *yellow-footed* armadillo, the poyon; the *yellow-footed* rock-kangaroo, *Petrogale xanthopus*: specific in phrase-names of various animals.

yellow-fronted (yel'ô-frun'ted), *a.* In *ornith.*, having the front (of the head) yellow, or having yellow there: as, the *yellow-fronted* warbler.—**Yellow-fronted warbler.** See *warbler*.

yellow-golds (yel'ô-gôldz), *n.* A golden-flowered plant, probably the marigold, *Calendula officinalis*. See *gold*, 6.

yellow-gum (yel'ô-gum), *n.* 1. The jaundice of infants (*icterus infantum*).—2. Same as *black-gum*.

yellowham (yel'ô-ham), *n.* The European yellowhammer.

Yellow hammer, with its abbreviation *yellow Ham*. *Yarrell*, Brit. Birds (4th ed.), II, 43, note. (*Encyc. Diet.*)

yellowhammer (yel'ô-ham'êr), *n.* [Cf. dial. *yellowhumber*, *yellowomber*; < *yellow* + *hammer*³, prop. *ammer*: see *hammer*³.] 1. The yellow bunting, *Emberiza citrinella*, one of the commonest birds of the western Palearctic region. It is about 7 inches long; the head, cheeks, front of the neck, belly, and lower tail-coverts are of a bright yellow; the upper surface is partly yellow, but chiefly brown, the feathers on the top of the back being blackish in the middle, and the tail-feathers also blackish. The yellowhammer is a resident in Great Britain, and generally throughout Europe. In summer the well-known notes of the male are almost incessantly heard from the roadside hedge. Also called *goldhammer*, *yellowhammer*, *yellowham*, *yellow-*

Yellowhammer (*Emberiza citrinella*).

omber, *yellow yeldring*, *yellow yorling*, *yellow yowley* (and with variants *yeldring*, *yeldrock*); also *scribbling lark* and *writing lark* (from the scratchy markings of its eggs); and by various other local or provincial names, as *yite*.

2. In the United States, a local misnomer of the flicker, or golden-winged woodpecker, *Colaptes auratus* (see cut under *flicker*²). No bird much like or congeneric with the true yellowhammer exists in North America; but popular ignorance would have it otherwise, and pitched upon this woodpecker as a subject for the name, or perhaps the name was given because the bird is extensively yellow and "hammers" trees. The European yellowhammer resembles and is congeneric with the oriole of that country, *Emberiza hortulana*; and the United States bird which really looks something like the yellowhammer is the bobolink in the fall, when it is called *reed-bird*, *rice-bird*, and *ortolan*. 3†. A gold coin; a yellow boy. [Old slang.]

Is that he that has gold enough? would I had some of his *yellow-hammers*! *Shirley*, Bird in a Cage, ii, 1.

yellow-headed (yel'ô-hed'ed), *a.* Having the head yellow, or yellow on the head: as, the *yellow-headed* blackbird. See cut under *Xanthocephalus*.—**Yellow-headed tit** or *titmouse*, the gold tit, *Auriparus flaviceps*.

yellow-horned (yel'ô-hôrned), *a.* Having yellow antennæ: as, the *yellow-horned* moth, *Cyrtophora flavicornis*, a British noctuid.

yellowing (yel'ô-ing), *n.* [Verbal *n.* of *yellow*, *v.*] In *pu-manuf.*, the operation of boiling the pins in an acid solution preparatory to nurling or tinning.

yellowish (yel'ô-ish), *a.* [*yellow* + *-ish*.] Tending to be yellow; somewhat yellow: yellow: as, the *yellowish* monitor, *Varanus flavescens*.

In his youth he was unhealthy, and of an ill complexion (*yellowish*). *Aubrey*, Lives (Thomas Hobbes).

yellowishness (yel'ô-ish-nes), *n.* The state or property of being yellowish. *Boyle*.

yellow-jack (yel'ô-jak), *n.* See *yellow Jack*, under *jack*¹.

yellow-jacket (yel'ô-jak'et), *n.* Any one of several species of true social wasps or hornets of the genus *Vespa*, which have the body more or less marked with yellow; any hornet, as *V. crabro*. See cut under *hornet*. *Vespa vulgaris*, an importation from Europe, is the common yellow-jacket of the United States.

The mellow, perfumed apples dropped heavily on the grass, and the busy *yellow-jackets* rioted among them. *The Atlantic*, LXVI, 775.

yellowleg, yellowlegs (yel'ô-leg, -legz), *n.* A tattler of the family *Scolopacidae* and genus *Totanus* (section *Gambetta*); the *T.* or *G. flavipes*: so called from the color of its legs. The form *yellowlegs* is the more common. It inhabits the greater part of North America, migrating in winter

Greater Yellowlegs (*Totanus melanoleucus*).

into Central and South America, and is an abundant and well-known game-bird, especially during the autumnal migration, when it is found in flocks about the marshes, feeding upon fish-fry, mollusks, crustaceans, etc., and becoming fat and highly prized for the table. It is about 11 inches long, the bill 1½ inches, the tarsus about 2 inches. The name extends to a similar but larger species, the *T.* or *G. melanoleucus*, the two being distinguished as the *lesser* and *greater yellowlegs*. The latter is decidedly larger, beyond dimensions ever reached by the former, as length 13 to 14 inches, bill 2 or more, tarsus 2½, etc. These birds are also called *lesser* and *greater yellowshanks* and by various other names. See *tattler* and *Totanus*.

yellow-legged (yel'ô-leg'ed or -legd), *a.* Having yellow legs: as, the *yellow-legged* clearwing, a British hawk-moth, *Sesia cymipiformis* or *Trochilium cymipiforme*. The yellow-legged herring-gull is *Larus cachinnans* of Pallas. The so-called yellow-legged plover of the United States is the lesser yellowlegs, *Totanus flavipes*.—**Yellow-legged goose.** See *goose*.—**Yellow-legged sandpiper.** See *sandpiper*, and cut under *ruff*².

yellow-legger (yel'ô-leg'êr), *n.* 1. The yellow-legs.—2. A fisherman from Eastham. [Provincetown, Massachusetts.]

yellowhammer (yel'ô-om'bêr), *n.* Same as *yellowhammer*, 1.

yellowpoll (yel'ô-pôl), *n.* The male widgeon or goldenhead. *Mareca penelope*. [Ireland.]—**Yellowpoll warbler.** Same as *yellow-polled warbler*.

yellow-polled (yel'ô-pôld), *a.* In *ornith.*, yellow-crowned: as, the *yellow-polled* warbler. See *warbler*.

yellow-ringed (yel'ô-ringd), *a.* Ringed with yellow: as, the *yellow-ringed* carpet, *Larentia flavicincta*, a British geometrid moth.

yellow-rocket (yel'ô-rok'et), *n.* The common winter-cress, *Barbarea vulgaris*. Also called *bitter winter-cress* and *winter rocket*.

yellowroot (yel'ō-rōt), *n.* 1. Same as *shrub-yellowroot*.—2. An American herb, *Hydrastis Canadensis*, named also *orange-root*, *yellow puecoon*, *Indian paint*, *turmeric-root*, and especially (in medicine) *goldenseal*. Its rootstock contains hydrastine and berberine, and is an official remedy of an unquestioned tonic property and with various powers less settled, applied in dyspepsia, in jaundice and other disorders of the liver, as a laxative, alterative, etc. See *Hydrastis* and *hydrastine*.—**Shrub yellowroot**. See *Xanthorrhiza* and *shrub-yellowroot*.

yellowrump (yel'ō-rump), *n.* The yellow-rumped warbler, *Dendroica coronata*, the yellow-crowned warbler, or myrtle-bird. See *warbler* and *myrtle-bird*.—**Western yellowrump**, Audubon's warbler, *Dendroica auduboni*. See *warbler*.

yellow-rumped (yel'ō-rumpt), *a.* Having the rump (or upper tail-coverts in some cases) yellow, as various birds. (See *yellowrump*.) The yellow-rumped seed-eater is a certain finch, *Crithagra chrysopyga*.

yellow-sally (yel'ō-sal'i), *n.* See *yellow sally*, under *sally*, 2.

yellowseed (yel'ō-sēd), *n.* A species of peppergrass, *Lepidium campestre*, native in the Old World, introduced in North America; mitridate pepperwort.

yellow-shafted (yel'ō-shāf'ted), *a.* Having the shafts of certain feathers yellow: as, the *yellow-shafted flicker*, or golden-winged woodpecker, *Colaptes auratus*. See cut under *flicker*, 2, and compare *red-shafted*.

yellowshank, yellowshanks (yel'ō-shangk, -shangk), *n.* Same as *yellowlegs*. Compare *greenshank, redshank*.

yellowshell (yel'ō-shel), *n.* A British geometrid moth, *Camptogramma bilineata*, whose yellow wings are marked with white lines.

yellowshins (yel'ō-shinz), *n.* Same as *yellow-legs*.

yellow-shouldered (yel'ō-shōl'derd), *a.* In *ornith.*, having the bend of the wing yellow, or having yellow on the carpal angle of the wing: as, the *yellow-shouldered amazon*, a South American parakeet, *Chrysotis amazilia*.

yellow-spotted (yel'ō-spot'ed), *a.* Spotted with yellow: as, the *yellow-spotted tortoise* of the Ganges.—**Yellow-spotted willow-slug**. See *willow-slug*.

Yellowstone trout. See *trout*, 1.

yellowtail (yel'ō-tāl), *n.* and *a.* 1. *n.* 1. An earthworm yellow about the tail. *Topsoil, Serpents*, p. 307. (*Hallucell.*)—2. One of various fishes. (a) A carangoid fish of the genus *Seriola*, as *S. dorsalis*. See cut under *amber-fish*. [U. S.] (b) A carangoid fish, *Elagatis pinnulatus*. [Florida.] (c) A carangoid fish, *Caranz georgianus*. [Auckland, New Zealand.] (d) A scolenoid fish, *Bairdiella chryseura*, the silver-perch. [U. S.] (e) A sparoid fish, *Lagodon rhomboides*, the pinfish. See cut under *Lagodon*. [U. S.] (f) A scorpenoid fish, *Sebasticthys flavivus*, one of the rockfishes. [California.] (g) A elupeioid fish, *Brevoortia tyrannus*, the menhaden. See cut under *Brevoortia*. [U. S.] (h) A eirritoid fish, *Loatris hecateia*, the trumpeter. (i) A gadoid fish, *Lotella bachus*. [New Zealand.]

II. *a.* Yellow-tailed.—**Yellowtail moth**, *Liparis auriflua*, a British species.—**Yellowtail warbler**. See *warbler*.

A tree of the genus *Taxus*, the common yew being *T. baccata* of temperate Europe and Asia. This is a slow-growing and long-lived evergreen of moderate height and spreading habit, with a thick irregular trunk and dark thick foliage. In Europe the yew has long been planted in graveyards. There are several dwarf, weeping, and variegated varieties. The golden yew has the edge of the leaves in spring of a bright-golden yellow. The Irish yew (var. *fastigiata*) has erect branches, and is more hardy than the typical form, which will not endure the winter in the northern United States.

Yew (*Taxus baccata*).

The wood of the yew is heavy, fine-grained, and elastic, and was formerly much used for bows, the supply being protected by government. It is considered a very choice cabinet-wood, the heart being of a fine orange-red or deep brown, and the sap-wood white. The leaves of the tree are poisonous.

The shelter *ew*, the asp for shaftes pleyne.
Chaucer, *Parliament of Fowls*, l. 180.

The twigs and leaves of *yew*, though eaten in a very small quantity, are certain death to horses and cows, and that in a few minutes.

A contrivance of great antiquity, by which

yoke

a pair of draft-animals, particularly oxen, are fastened together, usually consisting of a piece

Yoke.

a, body; b, bows of bent wood; c, keys for fastening bows; d, clip; e, draft-ring.

of timber, hollowed or made curving near each end, and fitted with bows for receiving the necks of the animals. From a ring or hook fitted to the body a chain extends to the thing to be drawn, or to the yoke of another pair of animals behind.

A red heifer . . . upon which never came yoke.

Nun. xix. 2.

In time the savage bull doth bear the yoke.

Shak., Much Ado, i. 1. 263.

2. Hence, something resembling this apparatus in form or use. (a) A frame made to fit the shoulders and neck of a person, used for carrying a pair of buckets or panniers, one at each end of the frame.

She had seized and adjusted the wooden yoke across her shoulders, ready to bear the brimming milk-pails to the dairy.

Mrs. Gaskell, Sylvia's Lovers, xv.

(b) A frame of wood attached to the neck of an animal to prevent it from creeping under a fence or gate, or from jumping over a fence. (c) A cross-bar or curved piece from which a large bell is suspended for ringing. (d) *Naut.*, a bar attached to the rudder-head, and projecting in each direction sidewise. To the ends are attached the yoke-ropes or yoke-lines, which are pulled by the steersman in rowboats, or pass to the drum on the axis of the steering-wheel in larger craft. (e) A kind of band or supporting piece to which are fastened the plaited, gathered, or otherwise falling and depending parts of a garment, and which by its shape causes these parts to hang in a certain way; as, the yoke of a shirt, which is a double piece of stuff carried around the neck and over the shoulders, and from which the whole body of the shirt hangs; the yoke of a skirt, which supports the fullness from the hips downward.

There was a yoke of mulberry colored velvet, which was applied also at the tops of the sleeves.

The Spectator (St. Louis), XI. 327.

(f) A branch-pipe, or a two-way coupling for pipes, particularly twin hot- and cold-water pipes that unite in their discharge. (g) In a grain-elevator, the head-frame or top of the elevator, where the elevator-belt or lifter passes over the upper drum, and where the cups discharge into the shoot. (h) A carriage-clip for uniting two parts of the running-gear. (i) A double journal-bearing having two journals united by bars or rods, that pass on each side of the pulley, the shafting being supported by both journals: used in some forms of dynamo to carry the armature; a yoke-arbor. (j) A pair of iron clamps of semicircular shape, with a cross screw and nut at each end for tightening them around heavy pipes or other objects, for attaching the ropes when hoisting or lowering into position by power. *J. S. Phillips*, Explorers' Companion. (k) In *wheelwrighting*, the overlap fire-bolt washer used at the joints of the felloes. *E. H. Knight*. (l) In an electromagnet consisting of two parallel cores joined across one pair of ends to form a U- or horse-shoe-shaped magnet, the cross-bar joining the ends is called the yoke of the magnet.

3. An emblem, token, or mark of servitude, slavery, and sometimes of suffering generally. As a mark of humiliation and entire submission, the Romans caused their prisoners of war to pass under a yoke. This yoke was sometimes an actual ox-yoke, and was sometimes symbolized by a spear resting across two others fixed upright in the ground.

Take my yoke upon you, and learn of me. . . . For my yoke is easy and my burden is light.

Mat. xi. 29, 30.

Like foolies, they doe submit their necke
Vnto the slavish yoke & proudest checke
Of Romes insulting tyrant.

Times' Whistle (E. E. T. S.), p. 52.

4. Something which couples, connects, or binds together; a bond of connection; a link; a tie.

Companions . . .

Whose souls do bear an equal yoke of love.

Shak., M. of V., iii. 4. 13.

You see I am tied a little to my yoke;
Pray, pardon me; would ye had both such loving wives!

Fletcher, Rule a Wife, ii. 2.

5. A chain or ridge of hills: also, a single hill in a chain: obsolete, but still retained in some place-names: as, Troutbeck Yoke. [Lake District, Eng.]—6. A pair; couple; brace: said of things united by some link, especially of draft-animals: very rarely of persons, in contempt.

Another a non ryght nede seyde he hadde

To folwen fit yokes, . . . and greithliche hem dryne.

Piers Plowman (C), viii. 295.

These that accuse him . . . are a yoke of his discarded men.

Shak., M. of W., ii. 1. 151.

7. As much land as may be plowed by a pair of oxen in a day; hence, as much work generally as is done at a stretch; also, a part of the working-day, as from meal-time to meal-time, in

which labor is carried on without interruption. Compare *yokelet*.

Ploughmen in this county have been in the habit of making two yokes a day in summer—that is, ploughing from morning until dinner-time, which is usually at twelve o'clock; then, when dinner is over, resuming their work, which is continued till half-past five or six.

N. and Q., 7th ser., X. 19.

Spring yoke, in a railroad-car, a wrought-iron bar shaped like an inverted U, placed on a journal-box as a support for a spring. Also called *spring saddle*. See cut under *car-truck*. = *Syn. 6. Brace*, etc. See *pair*.

yoke¹ (yōk), v.; pret. and pp. *yoked*, ppr. *yoking*. [Formerly also *yok*; < ME. *gōken*, *gōken* (LG. *jōken* = G. *jochen* = L. *jugare*); from the norm.] I. *trans.* 1. To put a yoke on.

Away she hies,

And yokes her silver doves.

Shak., Venus and Adonis, l. 1190.

The gentle Birds bow'd down their willing heads,

Not to be yoked, but adorned by

The dainty harness. *J. Beaumont*, *Psyche*, iii. 63.

2. To join or couple by means of a yoke.

For o Griffoun there wil bere, fleyng to his Nest, a gret Hors, or 2 Oxen zoked to gidere, as thei gon at the Plowhe.

Mandeville, Travels, p. 269.

3. To join; couple; link; unite.

O then . . . my name

Be yoked with his that did betray the Best!

Shak., W. T., i. 2. 419.

But, O Israel!

Alas! why yokest thou God with Baal?

Sylvester, tr. of Du Bartas's Weeks, ii., The Schisme.

Rather than to be yoked with this bridegroom is appointed me, I would take up any husband.

B. Jonson, Bartholomew Fair, iv. 2.

4. To restrain; confine; oppress; enslave.

They thought it better to be somewhat hardly yoked at home than forever abroad discredited.

Hooker, Eccles. Polity, Pref., ii.

Then were they yoked with Garrisons, and the places consecrate to their bloodie superstitious destroy'd.

Milton, Mfist. Eng., ii.

As well be yoked by Despotism's hand

As dwell at large in Britain's charter'd land.

Cooper, Table-Talk, l. 258.

5. To put horses or other draft-animals to. Compare the colloquial phrase *to harness a wagon*.

They hae yoked carts and wains,

To ca' their dead away.

Auld Maitland (Child's Ballads, VI. 226).

Ye need na yoke the plough.

Burns, Death and Dr. Hornbook.

Yoked bottle, in *ceram.*, a double bottle: so called from the band or bar of baked clay which connects the two vessels comprising it.

II. *intrans.* To be joined together; go along with.

The care

That yokes with empire.

Tennyson, To the Queen.

But you heed me no more than a goss-hawk minds a yellow yoldring.

Scott, Abbots, xvii.

yolet, v. i. An obsolete variant of *yawl*.

yolk¹ (yōk), n. [Also *yelk*; < ME. *yolke*, *yelke*, < AS. *geolca*, yolk, lit. 'the yellow part,' < *geol*, yellow; see *yellow*.] 1. The yellow and principal substance of an egg, as distinguished from the white; that protoplasmic content of the ovum of any animal which forms the embryo in germination, with or without some additional substance which serves to nourish the embryo during its formation, as distinguished from a mass of albumen which may surround it, and from the egg-pod or shell which incloses the whole; the vitellus, whether formative wholly or in part. In holoblastic ova, which are usually of minute or microscopic size, the whole content of the cell-wall is yolk which undergoes complete segmentation, and is therefore formative or germinal vitellus, or morpholecithus. In large meroblastic eggs, however, such as those we eat of various birds and reptiles, the true germ-yolk forms only the nucleus and a relatively small part of the whole yolk-hall, which then consists mainly of food-yolk or tropholecithus. This is the yolk of ordinary language, forming a relatively large ball of usually yellow and minutely granular substance which floats in a mass of white or colorless albumen, inclosed in a delicate pellicle, or vitelline membrane, and is steaded or stayed in position by certain strands of stringy albumen forming the chalazae. The quantity of germ- and of food-yolk relatively to each other and also to the amount of white varies much in different eggs, as does also the relative position of the two kinds of yolk. (See *ectolecithal*, *centrolecithal*.) In the largest eggs, as of birds, the great bulk results from the copiousness of the white and of the food-yolk, and the germ-yolk appears only at a point on the surface of the latter, where it forms the so-called tread or cicatricula. Some eggs contain more than one yolk, but this is rare and anomalous. See *egg, ovum*, and *vitellus*; also *segmentation of the vitellus* (under *segmentation*), and *cuts under gastrulation*.

The tother [man] was galowere thene the *golke* of a naye [an egg]. *Morte Arthure* (E. E. T. S.), l. 324.

2. The vitellus, a part of the seed of plants, so named from its supposed analogy with the yolk of an egg.—3. The greasy sebaceous secretion or unctuous substance from the skin of the sheep, which renders the fleece soft and pliable; wool-oil.

Is not the yoke, or natural illness of the weel in the animal, more efficacious?

Agric. Surv. of Galloway, p. 283. (*Jamieson*.)

Food yolk. See *food-yolk*, *meroblastic*, and *tropholecithus*.—**Formative yolk**, germinal yolk, which enters into the formation of the embryo, as distinguished from the food-yolk, which does not undergo segmentation; morpholecithus; vitellus germinativus. See *holoblastic*.—**Glycerite of yolk of egg**, a mixture of yolk of egg (45 parts) with glycerin (55 parts), used as a vehicle for medicinal oils and resins.

yolk², *v.* See *yoke²*. *Halliwell*.

yolk-bag (yök'bag), *n.* Same as *yolk-sac*.

yolk-cleavage (yök'klé'vāj), *n.* In *embryol.*, segmentation of the vitellus (which see, under *segmentation*). See *cut* under *gastrulation*.

yolk-duct (yök'dukt), *n.* In *embryol.*, the ductus vitellinus, or vitelline duct, which conducts from the cavity of the umbilical vesicle to that of the intestine through a constriction, at and near the navel, of the original globular cavity of the yolk-sac. See *cut* under *embryo*.

yolked (yökt), *a.* [*< yolk + -ed²*.] Furnished with a yolk or vitellus: frequently used in composition: as, a double-yolked egg.

The effect of the loss of a large food-yolk . . . was shown to resemble a similar loss of food-yolk in the eggs of *Micrometrus* as compared with other large-yolked oviparous fish eggs. *Amer. Nat.*, XXIII, 923.

yolk-gland (yök'gland), *n.* Same as *vitellarium*.
yolk-sac (yök'sak), *n.* The umbilical vesicle (which see, under *vesicle*). Also called *yolk-bag*. See *cuts* under *embryo* and *uterus*.

While the yolk in the latter is minute as compared with that of the former, the *yolksack* is just as large. *Amer. Nat.*, XXXIII, 926.

yolk-segmentation (yök'seg-men-tā'shon), *n.* Same as *yolk-cleavage*. See *segmentation* of the *vitellus* (under *segmentation*), and *cut* under *gastrulation*.

yolk-skin (yök'skin), *n.* The vitelline membrane; the delicate pellicle which incloses the yolk of an egg, especially when this is large.

yolky (yö'ki), *a.* [*< yolk + -y¹*.] 1. Resembling or consisting of yolk; having the nature of yolk.

In addition to the minute yolk-spherules scattered through the protoplasm, there are a few larger bodies, . . . probably of a *yolky* nature. *Microsc. Sci.*, XXX, 5.

2. Greasy or sticky, as unwashed wool. *Halliwell*. [*Prov. Eng.*]

Because of the *yolky* fleece.

New York Semi-weekly Tribune, Aug. 16, 1887.

yollt, *v.* An obsolete variant of *yell¹*.

yolling (yöl'ing), *n.* See *yowley*.

yon (yon), *a.* and *pron.* [*Also dial. yon*; *< ME. yon, zon, zoon*, *< AS. geon* (rare) = OHG. MHG. *G. joner*, that, = Icel. *enn, inn*, often written *hinu*, the, = Goth. *jains*, that; with adj. formative *-na*, from a pronominal base seen in Gr. *ós*, who, orig. that, Skt. *ya*, who. Cf. *yond¹*, *yonder*.] That or those, referring to an object at a distance; *yonder*: now chiefly poetic.

yore² (yör), *a.* Same as *yare¹*. *Halliwell*.

Yoredale rocks. In *Eng. geol.*, the upper portion of the Carboniferous limestone series. In this—as in the Pennine area—the massive limestone (the Thick, Scour, or Main limestone) is succeeded by a series of flagstones, grits, shales, limestones, with a few seams of coal, the whole varying greatly in thickness in localities not far distant from each other. This series was named from Yoredale, in Yorkshire, where it has a development of from 500 to 1,500 feet. In its paleontological features it does not differ much from the Carboniferous limestone series generally. In the Yoredale rocks are the celebrated lead-mines of Alston Moor and others. Also called *Yoredale group* and *Yoredale series*.

York-and-Lancaster rose. See *rose¹*.

Yorkish (yör'kish), *a.* [*< York* (see *def.*) + *-ish¹*.] 1. Pertaining to the city of York or to the county of York, in England.—2. Adhering to the house of York. See *Yorkist*.

So far as I know, but a tree and truth.
O. W. Holmes, The Deacon's Masterpiece.

2. The age from puberty up to the attainment of full growth. In a general sense, youth denotes the whole early part of life, from infancy to maturity; but it is not unusual to divide the stages of life into infancy, childhood, youth, and manhood. Thus limited, youth includes that early period of manhood or womanhood upon which one enters at puberty, with the establishment of the sexual functions, and in which one continues until the skeleton is completely ossified by the consolidation of the epiphyses of the long bones, so that there is no further increase in stature, and all the teeth are in permanent functional position.

Therefore take hede bothe nygt & day
How fast zoure *youth* dooth assuage.

Hymns to Virgin, etc. (E. E. T. S.), p. 79.

Resoneth of his *yowling* and clamour.

Chaucer, *Knight's Tale*, l. 420.

The man [milkman] comes *yowling* regularly at the stroke of seven. *Carlyle*, in *Froude*, *Life in London*, I. iii.

yowl (yowl), *n.* [*< yowl, v.*] A long distressful or mournful cry, as that of a dog.

yowley (you'li), *n.* [One of numerous variant forms (see below), ult. *< AS. geolu, yellow; see yellow*.] The yellow bunting, *Emberiza citrinella*: more fully called, by reduplication, *yellow yowley*. Also *yeldring, yeldrin, yeldrock, yoldring, yoldring, yoldrin, yolling, yorling*; also *yite, yoit*. See *out* under *yellowhammer*. [Scotland and North of Ireland.]

yowling (you'ling), *n.* [*< ME. zowlyng; verbal n. of yowl, v.*] A howling; crying.

And with a greet *zowlyng* he wepte.

Wyclif, *Gen.* xvii. 38.

Then the wind set up a howling,

And the poodle-dog a *yowling*.

Thackeray, *White Squall*.

yowp, *v. i.* A dialectal form of *yawp*2. *Hallivell*.

yoxi, *v. i.* A Middle English form of *yex*.

Yphantes, *n.* See *Hyphantes*, l. *Vieillot*, 1816.

ypight. Same as *pitch*, an obsolete past participle of *pitch*1.

ypicked, *a.* Same as *piked* for *picked*1.

ypocrite, *n.* An old spelling of *hypocrite*.

ypointing (i-point'ing), *a.* [*< y-, i-, + pointing.* Like Shakspeare's *yavish*, an infelicitous attempt at archaism, the prefix *y* being confined to ME. use and there to words of AS. origin (or to verbs from early OF., some of which, in the pp., have *y-*); there may have been a ME. **ypointed*, but there could be no ME. **ypointing*. Milton herein, like Thomson later, was imitating Spenser, who archaized on principle but without knowledge.] *Pointing*. [Poetical.]

What needs my Shakspeare, for his honour'd bones,

The labour of an age in piled stones?

Or that his hollow'd reliques should be hid

Under a star-*ypointing* pyramid?

Milton, *Epitaph on William Shakspeare*.

Yponomeuta (i-pon-ō-mū'tā), *n.* [NL. (Latreille, 1796), prop. *Yponomeuta*, < Gr. ὑπονομεύειν, undermine, < ὑπόνομος, going underground, underground, as a noun an underground passage, < ὑπό, under, + νέμειν, drive.] A notable genus of tineid moths, typical of the family *Yponomeutidae*, comprising a number of rather large slender-bodied species, usually white or gray, and often with many small black spots. The larvae live gregariously in a light web, and feed upon the foliage of different plants. About a dozen species are found in Europe and 7 in North America. *Y. cognatella* is exceedingly destructive to apple-trees, depriving them of their leaves.

Yponomeutidae (i-pon-ō-mū'ti-dē), *n. pl.* [NL. (Stephens, 1829), < *Yponomeuta + -idae*.] A family of tineid moths, based chiefly upon venational characters, but having a recognizable facies. The larvae have 16 legs, and in general feed like those of the type genus. Those of *Atmetia*, however, bore into buds and young twigs. Some 14 genera have been placed in this family by Standing, but the important genus *Argyresthia* and its allies are removed to a distinct family, *Argyresthiidae*, by Heinemann and others. Also *Yponomeutidae*.

ypresidēt, *a.* An obsolete form of the past participle of *praise*.

For the more a man may do by so that he do hit,
The more he is worth and worthi of wyse and goode
ypresidēt. *Piers Plowman* (C), xl. 310.

Ypres lace. See *lace*.

Ypsiliform (ip'si-li-fōrm), *a.* [*< Gr. ὑψίλον* (see *hypsiloid*) + *L. forma*, form.] Shaped like the Greek capital letter *Υ*; Y-shaped. The figure is also called *arietiform*, the symbol of the zodiacal sign *Aries* being the same.

The T-shaped [germinal spot] gradually passes into the *ypsiliform* figure, so called from its resemblance to the Greek *Υ*. *Encyc. Brit.*, XX. 417.

ypsiloid. For words so beginning, see *hypsilo-*.

ypsiloid, *a.* Same as *hypsiloid*.

Ypsilophus (ip-sil'ō-fus), *n.* [NL. (Oken, 1815).] Same as *Ypsolophus*.

Ypsipetes (ip-sip'e-tēz), *n.* [NL. (Stephens, 1829), prop. *Ypsipetes*, < Gr. ὑψίπετης, fallen from heaven, < ὑψι, on high, + πέτεσθαι, fly.]

A genus of geometrid moths, of the family *Larentidae*, of wide distribution, but having few species.

Ypsolophus (ip-sol'ō-fus), *n.* [NL. (Fabricius, 1798), *Ypsilophus* (Oken, 1815), prop. *Ypsilophus*, < Gr. ὑψιλόφος, having a high crest, < ὑψι, on high, + λόφος, crest.] A prominent genus of tineid moths, of the family *Gelechiidae*, having ocelli, and both fore and hind wings turned forward at tip. The larvae are leaf-rollers. Nine species are known in Europe and thirteen in the United States.

yr. An abbreviation (a) of *year*; (b) of *your*; (c) of *younger*.

yravish (i-rav'ish), *v. t.* A pseudo-archaic form of *ravish*. Compare *ypointing*.

The sun of this,

Brought hither to Pentapolis,

Yravished the regions round,

And every one with claps can sound,

"Our heir-apparent is a king!"

Shak., *Pericles*, iii., *Prol.*, l. 35.

yrant, *yrant*, *n.* and *a.* Old spellings of *iron*.

Yrs. An abbreviation of *years* and of *yours*.

ysēt, *n.* An old spelling of *ice*.

ysenet, *pp.* A Middle English form of *seen*.

Fnl longe were his legges and ful lene,

Ylik a staf; ther was no calf *ysene*.

Chaucer, *Gen. Prolog.* to C. T., l. 592.

yslaked. An obsolete preterit and past participle of *slake*.

Now sleep *yslaked* hath the rout.

Shak., *Pericles*, iii., *Prolog.*, l. 1.

ystler, *n.* See *istle*.

ythe1, *n.* Same as *ithe*.

ythe2, *adv.* Same as *cath*.

Y-track (wi'trak), *n.* A short track laid at right angles (or approximately so) to a line of railway, with which it is connected by two switches — the whole resembling the letter *Y*. It is used instead of a turn-table for reversing engines or cars. In

Y-track.

operating it, an engine or car advancing toward *A* (heading as shown by the arrow) is switched at *A* to the track *B*, and then backed up over the switch *C* to the main track again, heading now in the reverse direction.

ytterbite (it'er-bit). *n.* [*Ytterby*, in Sweden, + *-ite*².] Same as *gadolinite*.

ytterbium (i-ter'bi-um), *n.* [NL., < *Ytterby*, in Sweden.] Chemical symbol, Yb; atomic weight, 173 (?). An element discovered by Marignac in gadolinite, in regard to which little is known. The spectrum of this metal is believed to be peculiar, and to justify its claim to be recognized as a distinct element.

yttria (it'ri-ä), *n.* [NL., < *Ytter* (*by*), in Sweden.] A metallic oxide or earth, having the appearance of a white powder, which is insipid, insoluble in water, and infusible. It dissolves in acids, forming sweetish salts, which have often an amethyst color. It has no action on vegetable colors. Yttria is the aequivalent of yttrium, Y₂O₃. It occurs in certain rare minerals, and was first detected in gadolinite found at Ytterby, in Sweden.

yttrianite (it'ri-äl-it), *n.* [*yttria* + *-ite*.] A silicate of thorium and the yttrium earths, occurring in massive forms of a dark olive-green color. It is found with gadolinite and other rare species in Llano county, Texas.

yttric (it'rik), *a.* [*yttrium* + *-ic*.] Related to or containing yttrium.

yttriferous (it-ri-f'e-rus), *a.* [NL. *yttrium*, *q. v.*, + *L. ferre* = *E. bear*1.] Containing or yielding yttrium.

yttrious (it'ri-us), *a.* [*yttria* + *-ous*.] Pertaining to yttria; containing yttria: as, the *yttrious* oxide of columbium.

yttrium (it'ri-um), *n.* [NL., < *Ytter* (*by*), in Sweden.] Chemical symbol, Y; atomic weight, 89 (?). A metal, the base of the earth yttria. But little is known of this metal, and its atomic weight has never been satisfactorily determined. As obtained by Cleve, yttrium is a dark-gray powder exhibiting a metallic luster under the burnisher. It belongs, with various other rare metals, to the cerium group, in regard to most of which, from their scarcity and their resemblance to one another, but little has been definitely made out.

yttrium-garnet (it'ri-um-gär'net), *n.* A variety of garnet containing a small amount of the yttrium earths.

yttrocerite (it-rö-së-rit), *n.* [*yttrium* + *cerium* + *-ite*².] A mineral occurring very sparingly at Finbo and Broddbo, near Falun, in Sweden, embedded in quartz. Its color is violet-blue, inclining to gray and white. It occurs crystallized and massive, and is a fluoride of yttrium, cerium, and calcium.

yttrrocolumbite (it'rö-kö-lum'bit), *n.* [*yttrium* + *columbic* + *-ite*².] Same as *yttrrotantalite*.

yttrrogummite (it-rö-gum'it), *n.* [*yttrium* + *gummit*.] A mineral formed by the alteration of eleveite, and related to it as is ordinary gummit to uraninite.

yttrrotantalite (it-rö-tan'täl-it), *n.* [*yttrium* + *tantalite*.] A rare mineral found at Ytterby, Sweden, of a black or brown color. It is a tantalate of yttrium, uranium, and iron, with calcium.

yttrrotitanite (it-rö-ti'tän-it), *n.* [*yttrium* + *titanite*.] Same as *keilhaute*.

Experiments for its discovery are to be undertaken on rutiles, *yttrrotitanites*, *wohlerites*, etc.

Jour. Franklin Inst., CXXV. 338.

yu, yuh (yö), *n.* The Chinese name for nephrite or jade.

Yucatecan (yö-kä-tek'an), *a.* [*Sp. Yucateco* (< *Yucatan*, *Yucatan*) + *-an*.] Pertaining to or belonging to Yucatan, a region in southeastern Mexico.

A fair sample of Yucatecan agriculture. *U. S. Cons. Rep.*, 1886, No. lxvii. p. 495.

yucca (yuk'ä), *n.* [*Sp. yucca*, now *yuca* (NL. *yucca*); from the Amer. Ind. name.] 1. A plant of the genus *Yucca*.—2. [*cap.*] [NL. (Dillenius, 1719).] A genus of liliaceous plants, of the tribe *Dracaceæ*. It is characterized by a distinct woody stem, numerous panicle roundish or bell-shaped flowers with nearly or quite separate perianth-segments, small anthers sessile on a club-shaped filament, and an ovary with numerous ovules. There are about 20 species, natives of the United States, Mexico, and Central America. They are low upright perennials, sometimes trees, often with numerous branches. Their leaves are linear-lanceolate and thick, usually rigid and spiny-tipped, and crowded at the apex of the stem or branch. The handsome pendulous flowers are large and usually white or cream-colored, attaining a length of 3 inches in *Y. baccata*, and form a showy terminal inflorescence often several feet long, seated among clustered leaves or raised on a pedicel peduncle. The fruit is either a dry loculicidal capsule or a pendulous berry which is fleshy or pulpy, sometimes cylindrical and elongated; in *Y. brevifolia* it becomes dry and apony. The rootstock is apocarpous, and in *Y. Treculleana* and other species is much used by the Mexicans for soap—being included with various similar products under the name *amole*. The leaves yield a coarse fiber; the taller species also produce a fibrous wood which is heavy, apony, and difficult to cut or work; it shows distinct concentric rings, unlike that of most monocotyledonous plants. Some species are said to reach the height of 50 feet and the thickness of 5 feet. The species are most numerous in the southern United States and northern

Mexico; one, *Y. angustifolia*, extends from New Mexico to the Dakotas; three are Californian; three are well-known plants of the Southern States, *Y. filamentosa*, *Y. alofolia*, *Y. gloriosa* (including *Y. recurvifolia*), all decorative plants, mostly stemless, thriving in poor soil, even in drifting sand of the coast; their flowers are white, tinged sometimes with green, yellow, or purple; they furnish a harsh, brittle, but very strong fiber, called *dagger-fiber*, used for packing and as a rude cordage. From their sharp-pointed leaves with threads hanging from their edges, *Y. filamentosa* and *Y. alofolia* are known as *Adam's needle* and *Eve's thread*; the former is also called *silk-grass* (which see), and sometimes *bear-grass*, its young pulpy stems being eaten by bears. *Y. alofolia* is also known in the Southern States and in the West India as *Spanish dagger* and *dagger-plant*. *Y. gloriosa* is the dwarf palmetto, or mound-hily. The preceding and several others are favorites in cultivation, chiefly under the name *yucca*; 8 species cultivated near Nice now begin to form a characteristic feature of some parts of the Mediterranean coast. Some species yield an edible fruit, as *Y. baccata*, the Spanish bayonet, or Mexican banana, a native of Mexico, extending into western Texas, New Mexico, and southern parts of Colorado and California; a strong coarse fiber, made into rope by the Mexicans, is procured from the leaves by macerating them in water. The name *Spanish bayonet* is also applied to other species, especially to *Y. constricta* (*Y. elata*), which occurs in Mexico and the United States from western Texas to Utah, grows from 9 to 15 feet high, and produces a light-brown or yellowish wood; and to *Y. Treculleana* (including *Y. canaliculata*), a long-leaved species of Texas and Mexico, sometimes 25 feet high and 2 feet thick, producing a bitter but sweetish fruit which is cooked and eaten by the Mexicans. It has its branches all near the top, produces great numbers of showy white flowers of a porcelain luster, followed by an edible berry. *Y. brevifolia*, known as *Joshua-tree*, native of Arizona and southern parts of Utah, Nevada, and California, a tree sometimes 40 feet high and about 3 feet in diameter, forms in the Mohave desert a straggling open forest; its light soft wood is sometimes made into paper-pulp. *Y. whipplei* of southern California is much admired for its beauty in cultivation. *Y. Yucatanica* of Central America is branched from the base.

Yucca gloriosa.

yucca-borer (yuk'ä-bör'er), *n.* 1. A large North American eastnoid moth, *Megathymus yuccæ*, whose larva bores into the roots of plants of the genus *Yucca*.—2. A Californian weevil, *Yuccaborus frontalis*.

Yuccaborus (yu-kab'ö-rus), *n.* [NL. (Leconte, 1876), < *Yucca* + Gr. *βορῆς*, devouring, gluttonous.] A genus of weevils, of the family *Curculionidae*, containing a single species, *Y. frontalis*, of California, the yucca-borer.

yucca-fertilizer (yuk'ä-fër'ti-li-zër), *n.* A tineid moth, *Pronuba yuccasella*, which, by means of curiously modified mouth-parts, is enabled to pollinize and thus fertilize the ovary of plants of the genus *Yucca*, causing a development of the seed-pod, in which its larva feeds. Also called *yucca-pollinizer*.

yuchten, *n.* Same as *juchten*.

yuck (yuk), *v. i.* [Also *yuke*, *yook*, *youk*; an unassimilated form (perhaps after *D. jucken*, *joken* = LG. *jucken* = G. *jucken*) of *itch*, ult. AS. *gicean*, *itch*; see *itch*.] To itch. [Prov. Eng. and Scotch.]

yuck (yuk), *n.* [*Yuck*, *r.*] The itch, mange, or scabies. [Prov. Eng.]

yuckel (yuk'el), *n.* Same as *yoekel* for *hick-walk*. Also *yukkel*. [Prov. Eng.]

I feels sunnow as peert as a *yuckel*. *T. Hughes*, [Tom Brown, at Oxford, II. xviii.]

yucker (yuk'er), *n.* [Imitative, but prob. connected with *yuckel*.] The flicker, or golden-

a, larva; *b*, moth with wings folded; *c*, female moth with wings expanded (all natural size); *d*, side view of one joint of larva; *e*, head of larva, from below; *f*, same, from above; *g*, leg of larva; *h*, maxilla; *i*, mandible; *j*, labial palpi and spinneret; *k*, antenna (all enlarged).

winged woodpecker, of eastern North America. *Colaptes auratus*. See ent under *flicker*². [Loeal. U. S.]

yuft, *n.* Same as *juft* for *juchten*.

yug, yuga (yug, yö'gä), *n.* [Hind. *yug*. < Skt. *yuga*, an age, < √ *yuj*, join; see *yoke*¹.] One of the ages into which the Hindus divide the duration or existence of the world.

yuh, *n.* See *yu*.

Yuhina, *n.* [NL. (Hodgson, 1836), from a native name.] A genus of timeline birds, also

Yuhina gularis.

called by Hodgson *Polyodon*, and by Cabanis *Odonterus*. Four species occur in the Himalayan region and western China—*Y. gularis*, *Y. diademata*, *Y. occipitalis*, and *Y. nigrimentum*.

yuke, *r.* and *n.* Same as *yuck*.

yukkel, *n.* Another spelling of *yuckel* for *hick-walk*.

yulan (yö'lan), *n.* [Chinese, < *yu*, *yuh*, a gem (jade), + *lan*, plant.] A Chinese magnolia, *Magnolia conspicua*, with abundant large white flowers, appearing in spring before the leaves. It is a fine ornamental tree, in China 30 or 40 feet high, but in Europe and America smaller; in the United States it is only half-hardy at the north. A kindred hardy species, also from China, is *M. obovata* (*M. purpurea*), with flowers pink-purple on the outside and white within, beginning to appear before the leaves.

Yule (yöl), *n.* [Also dial., in comp., *yu*- (*yubatch*, *yu-block*, etc.); more prop., according to the ME. form, spelled **yool*; early mod. E. sometimes *ewle*; < ME. *yol*, *yole*, *zol*, December, < AS. *geól*, *gehol*, *gehel* (ML. *Giulus*), December (*se ærra geóla*, December, *se æftera geóla*, January, the months beginning respectively before and after the winter solstice), = Icel. *jól* = Sw. Dan. *júl* (> MLG. *júl*), Yule, the Christmas feast; = Goth. *juleis* in *fruma juleis* (appar. 'first Yule'), applied, in a fragment of a calendar, appar. to November. The mod. E. use seems to be due to Scand. rather than to the AS. Origin unknown; according to a common view, the word is identified with Icel. *hjól*, wheel, with the explanation that it refers to the sun's 'wheeling' or turning at the winter solstice. This notion, absurd with regard to the alleged connection of thought, is also phonetically impossible; the AS. word for *wheel* was *hwéol*, and could have no connection with *geól*. Another explanation connects the word with *gawil*, *yowl*, howl, cry; as if *yule* was orig. the 'noise' of revelry. This is also untenable. The Goth. *juleis* implies an AS. **jüle*, an unstable form variable to **geóle* or *geól* (= Icel. *jól*); the forms *gehhol*, *gehhel*, are rare, and may be mere blunders.] The season or feast of Christmas.

I craue in this court a cryatemas gomen [sport]. For hit is *gól* & *nwe* yer.

Sir Gawayne and the Green Knight (E. E. T. S.), I. 284.

He made me gomeane at *gole*, and gafe me gret gyftes. *Morte Arthure* (E. E. T. S.), I. 2629.

At *ewle* we wenten gambole, daunce, To carrolle, and to sing, To haue gud spiced aewe, and roste, And plum-pices for a king.

Warner, Albion's England, v. 113.

They bring me sorrow touch'd with joy, The merry merry bells of Yule.

Tennyson, In Memoriam, xxviii.

Yule block, clog, or log. Same as *Christmas log*. See *Christmas*.

A small portion of the *yule-block* was always preserved till the joyous season came again, when it was used for lighting the new Christmas block.

Hone, Year Book, col. 1110.

The burning of the *Yule log* is an ancient Christmas ceremony, transmitted to us from our Scandinavian ancestors, who, at their feast of Jaul, at the winter solstice, used to kindle huge bonfires in honour of their god Thor.

Chambers's Book of Days, II. 735.

An enormous log glowing and blazing, and sending forth a vast volume of light and heat, . . . was the *Yule clog*, which the squire was particular in having brought in and illumined on a Christmas eve, according to ancient custom. *Ireing, Sketch-Book*, p. 247.

Yule cake. Same as *Yule dough*. *Hone, Every-Day Book*, I. 1638.—**Yule candle**, a large candle used for light during the festivities of Christmas eve. In many places the exhaustion of the candle before the end of the evening was believed to portend ill luck, and any piece remaining was carefully preserved to be burnt out at the owner's like-wake.

As an accompaniment to the Yule log, a candle of monstrous size, called the *Yule candle*, or Christmas candle, shed its light on the festive board during the evening. *Chambers's Book of Days*, II. 735.

Yule dough (dialectal *doo, dow*), a cake made especially for Christmas time. Also called *baby-cake* (because representing in shape a baby, probably the infant Christ) and *Yule cake*.

The *Yule-Dough* (or *Dow*), a Kind of Baby or little Image of Paste, which our Bakers used formerly to bake at this Season, and present to their Customers, in the same Manner as the Chandlers gave Christmas Candles. *Bourne's Pop. Antiq.* (1777), p. 163.

In the north of England the common people still make a sort of little Images at Christmas, which they call *Yule Doos*. *The Listener* (1886), I. 62 (quoted in N. and Q., [7th ser., XI. 6].

Yule (yöl), *v. i.*; pret. and pp. *Yuled*, ppr. *Yuling*. [*< Yule, n.*] To celebrate Yule or Christmas. *Halliwel; Jamieson*. [Prov. Eng. and Scotch.]

Yule-tide (yöl'tid), *n.* The time or season of Yule or Christmas.

In the old clog almanacs, a wheel is the device employed for marking the season of *Yule-tide*. *Chambers's Book of Days*, II. 746.

Yuncinæ (yun-si'nē), *n. pl.* [NL., prop. *Iynginæ*; *< Fuur*, prop. *Iynx* (*Iyng-*), + *-inæ*.] Same as *Iynginæ*. *G. R. Gray*, 1840.

yungan (yung'gan), *n.* [Native name.] The dugong. *E. P. Wright*.

Yungidæ, Yunginæ, n. pl. Same as *Iyngidæ, Iynginæ*.

Yunx (yungks), *n.* [NL. (Linnaeus, 1766 or earlier), also *Jynx* and *Iynx*, *< Gr. iuyx*, the wryneck.] 1. Same as *Iynx*.—2. [*l. c.*] The wryneck, *Iynx torquilla*. See cut under *wryneck*.

The *Yunx*, a genuine Woodpecker, hath a tail as long in proportion to his body, and marked with crosse-bars too. *John Ray*, in *Ellis's Lit. Letters*, p. 200.

yupon (yö'pon), *n.* Same as *yapon*. *Sportsman's Gazetteer*.

yure (yör), *n.* See *ewer*³. [Prov. Eng.]

yurt (yört), *n.* [Siberian.] One of the houses or huts, whether permanent or movable, of the natives of northern and central Asia. Also *yourta, yourte, jurt*.

It [the lake] is ten miles in circumference, and here and there are *yourtes* inhabited by the Mongols. *Hue, Travels* (trans. 1852), I. 206.

yutu (yö'tö), *n.* [Peruv.] A species of tinamou, found in Peru.

A partridge called *yutu* frequents the long grass. *Encyc. Brit.*, XVIII. 673.

yux, *v. and n.* An obsolete variant of *yex*.

yvet, *n.* An old spelling of *ivy*¹.

yvel, *a., n., and adv.* An old spelling of *evil*¹.

yvoiret, yvoryt. Old spellings of *ivory*¹.

ywist, *adv. and n.* See *iwis*.

ywraket. An obsolete preterit of *wreak*¹.

ywriet. An obsolete past participle of *wry*².

ywroket. An obsolete preterit of *wreak*¹.

yyet, *n.* A Middle English form of *eye*¹.

1. The twenty-sixth character in the English alphabet, and the last, as in that of the later Romans. In the Phœnician system, from which ours comes through the Latin and Greek, it was the seventh sign. The comparison of ancient forms, including the Egyptian as perhaps the original (compare *A*), is as follows:

The same character has a corresponding place as *zeta* in the Greek series, and went over in that place to the Italic alphabets; but, about the third century B. C., it was dropped out by the Romans as not needed, and the newly devised *G* (see *G*) was put in its place. Then finally, some two centuries later, it was taken back (together with or soon after *Y*: see *Y*) to express in borrowed Greek words the peculiar double sound (*ds* or *sd*) which it had won in Greek usage, and so appeared anew in its old company, but with greatly altered position. It was not used in the oldest English, but came gradually in out of the French in the fifteenth century and later. With us, as in French, it has lost its value of a compound consonant, and expresses the sonant or voiced sibilant sound corresponding to *s* as surd or breathed sibilant. The proper *z*-sound is also, and even much oftener, written by *s*, as in *roses*, and in a few words (as *posse*, *dissolve*) by double *s*, and yet more rarely (for example, *sacrifice*) by *c*. The sound is a common one in our English pronunciation—not much less than 3 per cent. (the surd *s* being 43 per cent.). As initial, the character *z* is written mostly in words of Greek origin, but as final (almost always with silent *e* added) it is found in many Germanic words, as *freeze*, *graze*. It occurs sometimes double, as in *buzz*, *buzzard*. The corresponding sonant to our other sibilant (written in this work with *zh*, after the example of *sh*) is spelled with either *s* or *z*, as in *pleasure*, *azure*. It is the rarest of our consonant sounds, counting for only a fiftieth of 1 per cent. of our utterance. In certain Scotch words and names, as *capecauzie*, *Dalziel*, *z* is written for the *y*-sound. In the United States the character *z* is generally called *zee*; in England, generally *zed* (from *zeta*); *izzard* (which see) is an old name for it. 2. As a symbol, in *math.*: (*a*) [*l. c.*] In algebra, the third variable or unknown quantity. (*b*) [*l. c.*] In analytical geometry, one of the system of point-coördinates in space. (*c*) In mechanics, the component of a force in the direction of the axis of *z*.

zaf (zä), *n.* [An arbitrary syllable.] In *solmization*, a syllable once used for *B*.

za-. [Gr. *ζα-*, inseparable prefix, intensive and augmentative.] An intensive or augmentative prefix sometimes used in forming modern scientific words to emphasize the character or quality noted by the element to which it is prefixed (like *E. very, a.*), as in *zalambdodont*, having teeth with a very V-shaped ridge, *Zalophus*, *Zamelodia*, *Zapus*, etc.

Zabaism, Zabism (zä'mi'ä-izm, zä'bizm), *n.* Same as *Sabaism*.

zabra (zä'brä), *n.* [Sp. and Pg.] A small vessel used on the coasts of Spain.

Portugal furnished and set forth . . . ten Galeons, two *Zabraes*, 1300. Mariners. *Hakluyt's Voyages*, I. 592.

Of the tenders and *zabras* seventeen were lost and eighteen returned. *Motley, Hist. Netherlands*, II. 507.

Zabridæ (zab'ri-dē), *n. pl.* [NL. (Hope, 1838), < *Zabrus* + *-idæ*.] A family of caraboid beetles, named from the genus *Zabrus*.

Zabrus (zä'brus), *n.* [NL. (Clairville, 1806), < Gr. *ζαβρός*, gluttonous.] An extensive genus of caraboid beetles. They are of medium or large size, black with metallic reflections, and remarkable in that many of them are rather phytophagous than carnivorous, particularly in the larval state. *Z. gibbus* of Europe is a noted enemy to cereal crops, its larva feeding on the stems just above the ground, and the beetle devouring the grain. Over 60 species are known, each occupying a narrowly restricted region in the Mediterranean fauna, except *Z. gibbus*, which extends into northern Europe.

zac (zak), *n.* Same as *zebuder*.
zacatilla (zä-kä-tē'lyä), *n.* See *cochineal*, 1.
zaffer, zaffre (zaf'er), *n.* [Also *zaffar, zaffir, zaf-fra, zaphara*, and *suphara*; < F. *zafre, saffre, saffre* = Sp. *zafre* = It. *zaffera*; of Ar. origin; cf. *saffron*.] The residuum of cobalt-producing ores after the sulphur, arsenic, and other vol-

atile matters have been more or less completely expelled by roasting. As the result of this process a grayish oxid of cobalt is left behind, which is mingled with various impurities, and usually with some sand. Zaffer is used in the manufacture of smalt, and in various other ways, as in furnishing the beautiful color known as *cobalt blue*, which is still of importance, although much less so since the discovery of a method of making artificial ultramarine.

zaffer-blue (zaf'er-blö), *n.* Same as *cobalt blue* (which see, under *blue*).

Zaglossus (za-glos'us), *n.* [NL. (Gill, 1877), < Gr. *ζά-* intensive + *γλῶσσα*, tongue.] The proper name of that genus of prickly ant-eaters which is better known by its synonym *Acanthoglossus* (which see).

Zaitha (zä'thü), *n.* [NL. (Amyot and Ser-ville, 1843), < Heb. *zaith*.] A genus of water-bugs, of the family *Belostomatidæ*, peculiar to America. They somewhat resemble the species of *Belostoma*, but have a prolonged tapering head and long rostrum. *Z. huminea* is a very common and wide-spread insect, of a yellowish color, found in the mud or among the weeds of ponds and streams from Maine to Texas.

zalambdodont (za-lam'dō-dont), *a.* [Gr. *ζα-* intensive + *λάβδα*, the letter *z*, + *ὀδόντις* (*ὀδόντ-*), = *E. tooth*.] Having short molar teeth with one V-shaped ridge; specifically, noting the *Zalambdodonta*: as, a *zalambdodont* dentition; a *zalambdodont* mammal: opposed to *dilambdodont*.

The insectivores with *zalambdodont* dentition are the most primitive, or at least are generally so considered. *Stand. Nat. Hist.*, V. 136.

Zalambdodonta (za-lam-dō-don'tä), *n. pl.* [NL.: see *zalambdodont*.] A group or series of insectivorous mammals; a division of the suborder *Bestiæ*, or *Insectivora vera*, having short molars whose crowns present one V-shaped transverse ridge, a formation characteristic of the insectivores of tropical regions, which are thus contrasted with temperate and northerly forms (*Dilambdodonta*). The Madagascar tenrecs, the African golden moles, and the West Indian solenodons are examples. See cuts under *agouti*, *Chrysochloris*, *sok'nah*, and *tenrec*.

Zalophus (zaf'ō-fus), *n.* [NL. (Gill, 1867), < Gr. *ζα-* intensive + *λόφος*, crest.] A genus of otaries, or eared seals: so named from the high parietal crest or ridge of the skull. The common

California Sea-lion (*Zalophus californianus*).

sea-lion of California is *Z. californianus* (formerly *Z. gil-lespiei*), and another inhabits Australia and New Zealand.

zamang (za-mang'), *n.* [S. Amer.] Same as *rain-tree*.

zambo, *n.* See *sambo*.

zambomba (Sp. pron. thäm-bom'bü), *n.* [Sp.] A rude Spanish musical instrument, consisting of an earthen jar the top of which is covered with parchment, through which a stick is inserted. It is sounded by rubbing the stick with the finger, so as to set the air within the jar into sympathetic vibration.

Zamelodia (zam-e-lō'di-ä), *n.* [NL. (Coates, 1880), < Gr. *ζα-* intensive + *μελῳδία*, a singing, melody: see *melody*.] A genus of American song-grosbeaks. Two species occurring in the United

States are the rose-breasted and the black-headed, *Z. ludoviciana* and *Z. melanocephala*. (See cut under *rose-breasted*.) The latter inhabits the western United States from the plains to the Pacific, where the former is not found, and extends into Mexico. The adult male has the crown and sides of the head, the back, the wings, and the tail black, the wings and tail much varied with white, and the neck all around and the under parts rich orange-brown, inclining to pure yellow on the belly and the lining of the wings. The bill and feet are grayish-blue. The length is about 8½ inches, the extent 12½. The female differs much from the male, but has the same rich yellow under wing-coverts. Also called *Habia*.

Zamia (zä'mi-ä), *n.* [NL. (Linnæus, 1767), < L. *zamia*, assumed to mean 'a fir-cone.'] 1. A genus of gymnospermous plants, of the order *Cycadaceæ*, type of the tribe *Zamiæ*. It is characterized by a naked trunk partly or wholly above the

a, scale with one seed; *b*, the young female flower.

soil, pinnate leaves, and naked truncate strobile-scales, both the male and female cones being oblong and cylindrical and their scales similar. There are about 30 species, natives of tropical and subtropical North America. They produce a simple, lobed or branching caudex, sometimes a low trunk, often covered with scars. The stems increase in height by the yearly development of a crown of stiff fern-like leaves with firm rigid segments which are entire or serrate, parallel-nerved, and jointed at the broad base. *Z. integrifolia* (*Z. pumila*), with a short globular or oblong, chiefly subterranean stem, occurs in low grounds in southern Florida, and is the only cycad found within the United States; it yields a starch known as *Florida arrowroot*; the plant is called *coontie* (which see). *Z. furfuracea* and the preceding are known as *wild sago* in Jamaica. From these and other dwarf species an excellent arrowroot is made in the Bahamas and elsewhere in the West Indies. Many species cultivated under glass as *zamia* are now classed as *Encephalartos*, and *Z. spiralis* as *Macrozamia*.

2. [*l. c.*] A plant of this genus.

Zamiæ (zä-mi'ē-ē), *n. pl.* [NL. (Miquel, 1842), < *Zamia* + *-æ*.] A tribe of gymnospermous plants, of the order *Cycadaceæ*. It is characterized by a deciduous fertile strobile with pettate uniovulate scales; and by leaf-segments straight in the bud, not circulate as in *Cycas* and in ferns. It includes 68 species, of 9 genera, or all the plants of the order except the genus *Cycas*. They are singular plants, usually with a thick woody trunk and pinnate leaves; the principal genera are *Zamia* (the type), *Macrozamia*, *Ceratozamia*, *Dioon*, and *Sangeria*. They are chiefly tropical, and occur mostly in North America, South Africa, and Australia.

zamindari (zam'in-där), *n.* Same as *zemindar*.
zamindari (zam'in-dä-ri), *n.* Same as *zemindary*, 2.

Zamiostrobus (zä-mi-os'trō-bus), *n.* [NL., < L. *zamia*, assumed to mean 'a fir-cone,' + Gr. *στρόβος*, a top, cone: see *strobile*.] The generic name given by Endlicher to certain fossil cones which resemble the fruit of the living genus *Zamia*. They have been found in the Lower Lias, the Coralline limestone, the Wealden, and the Mioene.

Zamites (zam-i'tēz), *n.* [NL., < L. *zamia*, assumed to mean 'a fir-cone.'] The name given by Brongniart to certain fossil plants belonging

to the cycads, and considered to be more or less closely allied to the living *Zamiaceae*. The genus *Zamites* first appears in the Trias, but is especially well developed in the Jurassic; it continued through the Cretaceous, and finally disappeared in the Miocene. There have been about 30 species described. The cycadaceous flors played an important part in the vegetation of Greenland and Spitzbergen during the Jurassic epoch, giving an almost tropical aspect to the forests of that region and epoch. Various other genera of cycads allied to *Zamites* have been established, chiefly, if not entirely, based on the forms of the leaves and their segments. Among these are *Glossozamites*, a genus with long elliptical leaves, found in the Lower Cretaceous; and *Otozamites*, with small elliptic-lanceolate leaves, divided into several groups in accordance with the very varying form of the segments of the leaf. The latter genus runs through the whole of the Jurassic, as far as the lower division of the Upper or White Jura, when it gives way to the genus *Zamites*. It has not been observed in the Jurassic rocks of the arctic regions. *Ptilophyllum*, *Ctenophyllum*, *Pterophyllum*, *Ptilozamites*, *Pterozamites*, *Anonozamites*, and *Sphenozamites* are other genera of cycads more or less allied to *Zamites* and to one another.

zamosé (za-mōs'), n. [W. African.] A West African buffalo, or bush-ox, found in Sierra Leone, *Bos brachyceros*, the short-horned buffalo, having the ears fringed with hair, short horns depressed at base, and no dewlap.

zampogna (tsām-pō'nyā), n. [It.] 1. Same as *bagpipe*.—2. Same as *shavem*.

zanana (za-nā'nā), n. Same as *zenana*.

Zanclodon (zang'klō-don), n. [NL. (Plein), < Gr. ζάγκλον, sickle, + ὄδους (όδουτ-) = E. tooth.] A genus of dinosaurs, typical of the family *Zanclodontidae*, having both fore and hind feet five-toed, no ascending astragal process, broad and long pubes, and biconcave vertebrae.

Zanclodontidae (zang-klō-don'ti-dē), n. pl. [NL., < *Zanclodon* (t-) + -idae.] A family of carnivorous theropod dinosaurs, typified by the genus *Zanclodon*, from the Trias of Europe.

Zanclognatha (zang-klog'nā-thā), n. [NL. (Lederer, 1857), < Gr. ζάγκλον, sickle, + γνάθος, jaw.] A genus of small noctuid moths resembling pyralids. Ten European and several North American species are known. *Z. minutalis* feeds in the larval state on the dead leaves of oak and maple in the United States.

Zanclostomus (zang-klos'tō-mus), n. [NL. (Swainson, 1837), < Gr. ζάγκλον, sickle, + στόμα, mouth.] A genus of cuckoos, the type of which is *Z. javanicus* of Java, and to which were formerly referred some related African forms. The species named has exposed nostrils, bare orbits, no crest, white-tipped tail-feathers, and the mantle, wings, and tail glossed with bluish-green; the under parts are gray, buff, and chestnut-brown; the orbits are bright blue, the eyes blackish, and the beak coral-red. The length is 18 inches, of which the tail makes more than half. This handsome cuckoo ranges from Tenasserim down the Malay peninsula, and also occurs to Sumatra, Borneo, and Java.

Zanclus (zang'klus), n. [NL. (Cuvier and Valenciennes, 1831), < Gr. ζάγκλον, sickle.] A genus of carangoid fishes based on a Pacific species, *Z. cornutus*, a small fish of striking form and color.

zander (zan'dēr), n. [G.] The European pike-perch, *Stizostedion lucioperca* (formerly *Lucioperca sandra*). It inhabits fresh waters of central Europe. Also *sander* and *zant*.

zand-mole (zand'mōl), n. [*D. zandmol*; < zand, sand, + mol, mole.] Same as *sand-mole*. See cuts under *Bathyrergus* and *Georychus*.

zanella (zā-nel'ā), n. A twilled fabric used for covering umbrellas. *Drapers' Dict.*

Zannichellia (zan-i-ke-li'ā), n. [NL. (Micheli, 1729), named after *Zannichelli* (1662-1729), author of a flora of Venice.] A genus of plants, of the order *Naiadaceae*, type of the tribe *Zannichelliaceae*. It is characterized by the absence of a perianth, by a single stamen, with slender filament, and slightly curved carpels. The only species (by some considered as forming 9 species), *Z. palustris*, is a native of brackish ditches and salt water throughout the world. It is a submerged slender aquatic with a filiform creeping stem, the capillary branches becoming twisted into matted floating masses. The leaves are chiefly opposite, linear or filiform; the flowers are minute, at first terminal, but becoming axillary. See *horned pondweed*, under *pondweed*.

Zannichelliæ (zan'i-ke-li'ā), n. pl. [NL. (Bentham and Hooker, 1883), < *Zannichellia* + -æ.] A tribe of monocotyledonous plants, of the order *Naiadaceae*. It is characterized by axillary unisexual flowers, the male with a single stamen and globose pollen, the female with its two to nine carpels each

containing a single pendulous orthotropous ovule. It includes 3 genera, of which *Zannichellia* is the type; the others, salt-water plants with a perianth of three hyaline segments, occur in the Mediterranean region (*Athenia*) and in Australia (*Lepilena*). All are slender submerged aquatics growing from a filiform nodose creeping rootstock, and producing thread-like leaves and minute flowers.

Zanonía (zā-nō'ni-ā), n. [NL. (Linnæus, 1737), by transfer from an endogen so named by Plumier (1703) from Giacomo Zanoni (1615-82), author of a flora of Bologna, and director there of the botanic garden.] A genus of plants, of the order *Cucurbitaceae*, type of the tribe *Zanonieæ*. It is characterized by entire leaves, and flowers with three calyx-lobes, five stamens, and three two-cleft styles. The 2 species are natives of India and the Malayan archipelago. They are shrubby climbers with petioled ovate or oblong entire leaves and unbranched tendrils. The small flowers are borne in loose pendulous panicles. The fruit is cylindrical, club-shaped, or hemispherical, with a broadly three-angled apex, and containing large pendulous broadly winged seeds; that of *Z. Indica* is known as *bantoleer-fruit* (which see).

Zanonieæ (zan-ō-ni'ē-ē), n. pl. [NL. (Blume, 1825), < *Zanonía* + -æ.] A tribe of polypetalous plants, of the order *Cucurbitaceae*. It is characterized by flowers with five stamens, free filaments, oblong one-celled anthers opening by a longitudinal slit, and an ovary with three thick placenta on which the ovules are irregularly inserted. It includes 17 species, of 3 genera, of which *Zanonía* is the type; the others are also tropical climbing shrubs—one, *Gerrardanthus*, occurring in Africa, the other, *Alsomitra*, including most of the species, extending through Asia, America, and Australia.

Zanora palm. See *palm* 2.

zant (zant), n. Same as *zander*.

Zante (zan'te), n. A contraction of *Zante-wood*.

Zantedeschia (zan-tē-des'ki-ā), n. [NL. (Sprengel, 1826), named from Francesco Zantedeschi, who wrote on the plants of Brescia and Bergamo in 1824.] A plant genus now known by the earlier name *Richardia* (which see).

Zante fustic. Same as *young fustic* (which see, under *fustic*). See also cut under *smoke-tree*.

Zante-wood (zan'te-wūd), n. 1. Same as *Zante fustic*.—2. Same as *satinwood*, *Chloroxylon Swietenia*.

zanthin, n. An erroneous form of *zanthin*.

zantho-. For words so beginning, see *zantho-*.

Zantiote (zan'ti-ōt), n. [*Zante* (see def.) + -ote.] A native of Zante (ancient *Zacynthus*), one of the Ionian Islands.

zany (zā'ni), n.; pl. *zanies* (-niz). [*F. zani*, < *It. zanni*, *zane*, a zany or clown; abbr. of *Giovanni*, John; see *John*, and cf. *E. Jack* in similar use.] 1. A comic performer, originating on the Italian stage, whose function it is to make awkward attempts at mimicking the tricks of the professional clown, or the acts of other performers; hence, an apish buffoon in general; a merry-andrew; an amusing fool.

He's like a zany to a tumbler,
That tries tricks after him to make men laugh.
B. Jonson, Every Man out of his Humour, iv. 1.

He teach thee; thou shalt like my Zany be,
And feigne to do my cunning after me.

Heywood, Four Prentises of London (Works, ed. 1874, II. 203).

The English apes and very zantes be
Of everything that they do hear and see.

Drayton, To Henry Reynolds.
Prescher at once, and zany of thy sge!
Pope, Dunciad, lii. 206.

He (Granville) had been wont, in the days of his greatest insolence, to speak of the most eminent nobles as *zantes*, lunatics, and buffoons. *Molley*, Dutch Republic, I. 402.

2†. An attendant.

Lady, Imperia the courtesan's zany hath brought you this letter from the poor gentleman in the deep dungeon, but would not stay till he had an answer.

Middleton, Blurt, Master-Constable, iii. 1.

= *Syn* 1. *Clown*, *Fool*, *Buffoon*, *Mimic*, *Zany*. "The zany in Shakespeare's day was not so much a buffoon and mimic as the obsequious follower of a buffoon and the attenuated mime of a mimic. He was the vice, servant, or attendant of the professional clown or fool, who, dressed like his master, accompanied him on the stage or in the ring, following his movements, imitating his tricks, and adding to the general merriment by his ludicrous failures and comic ineptitude. . . . The professional clown or fool might be clever and accomplished in his business, a skillful tumbler and mountebank, doing what he undertook to do thoroughly and well. But this was never the case with the zany. He was always slight and thin, well-meaning, but comparatively helpless, full of readiness, grimace, and alacrity, but also of incompetence, eagerly trying to imitate his superior, but ending in failure and absurdity. . . . We have ourselves seen the clown and the zany in the ring together, the clown doing clever tricks, the zany provoking immense laughter by his ludicrous failures in attempting to imitate them. Where there is only a single clown, he often combines both the characters, doing skillful tumbling on his own account, and playing the zany to the riders." (*Edinburgh Rev.*, July, 1869, art. 4.)

zany (zā'ni), v. t.; pret. and pp. *zanied*, ppr. *zanying*. [*Zany*, n.] To play the zany to; mimic; imitate apishly.

All excellence
In other madams do but zany hers.
Fletcher (and another?), *Queen of Corinth*, I. 2.

Laughs them to scorn, as man doth busie apes
When they will zanie men.
Marston, *Antonio and Mellida*, II., iv. 1.

zanyism (zā'ni-izm), n. [*Zany* + -ism.] 1. The act or practice of imitation or mimicry.—2. The condition or habits of a buffoon or a low clown; often used contemptuously.

Zanzalian (zan-zā'li-an), n. [*Zanzalus* (see def.) + -ian.] A Jacobite of the East: so called occasionally from Zanzalus, a surname of Jacobus Baradæus. See *Jacobite*, 2.

zanze, n. [African.] An African musical instrument consisting of a wooden box in which a number of sonorous tongues of wood or metal are fixed. These are sounded by the finger or a stick.

Zanzibari (zan-zī-bā'ri), a. and n. I. a. Of or pertaining to Zanzibar, a sultanate of eastern Africa. It was in 1890 made a British protectorate, confined chiefly to the island of Zanzibar, while the coast of the neighboring mainland was ceded to Germany.

The country is practically in the hands of Arabs and Zanzibari slavers and traders.
Appleton's Ann. Cyc., 1886, p. 372.

II. n. An inhabitant of Zanzibar.

zapateado (Sp. pron. thā-pā-tē-ā'dō), n. [Sp.] A Spanish dance in which the rhythm is marked by blows of the foot on the ground.

zaphara (zaf'ā-rā), n. Same as *zaffer*.

Zaphrentinæ (zaf-ren-ti'nē), n. pl. [NL. (Edwards and Haime, 1850), < *Zaphrentis* + -inæ.]

A subfamily of Paleozoic rugose stone-corals, of the family *Cyathophyllidae*, typified by the genus *Zaphrentis*. They have a free and simple corallum, and a well-developed septal fossula formed by a tubular inflection of the tabulae on one side, or replaced by a cristiform process. The tabulae are complete, but the septa are deficient or irregular, and there is usually no columella.

Zaphrentis (zaf-ren'tis), n. [NL. (Rafinesque and Clifford, 1820), prob. < Gr. ζα- intensive + φρήν, brain.] 1. The typical genus of *Zaphrentinæ*. The species are deeply cupped, with many septa, and a peculiar pit on one side of the interior. *Z. cassedayi* is an example. They lived in the Silurian and Carboniferous periods.

2. [l. c.] A species of this genus. *Webster's Dict.*, 1890.

Zapodidæ (zā-pod'i-dē), n. pl. [NL., < *Zapus* (-pod-) + -idæ.] A family of rodent mammals, of the myomorphic series of the order *Rodentia*, framed by Coues for the reception of the jumping mouse of North America, *Zapus hudsonius*, a small mouse-like quadruped intermediate in some respects between the *Muridæ*, or mice proper, and the *Dipodidæ*, or jerboas of the Old World. By some the family is considered as a subfamily of *Dipodidæ*, under the names *Zapodinae* and *Jacudinæ*. See *Zapus*, and cut under *deer-mouse*.

Zapodinae (zā-pō-dī'nē), n. pl. [NL., < *Zapus* (-pod-) + -inæ.] The *Zapodidæ* as a subfamily of *Dipodidæ*.

zapotilla (zap-ō-til'ā), n. Same as *sapodilla*.

zaptieh (zāp'ti-e), n. [Turk.] A policeman.

Zapus (zā'pus), n. [NL. (Cones, 1876), < Gr. ζα- intensive + πούς = E. foot.] The only genus of *Zapodidæ*. *Z. hudsonius* is the common jumping mouse, or deer-mouse, of North America. See cut under *deer-mouse*.

Zaragoza mangrove. See *mangrove*.

zarape (za-rā'pe), n. [Sp. Amer.] Same as *serape*.

Men wearing vermilion zarapes about their shoulders.
The Nation, XLVII. 311.

Zarathustrian (zar-ā-thōs'tri-ān), a. and n. [*Zarathustra* + -ian.] Same as *Zoroastrian*.

Zarathustrianism (zar-ā-thōs'tri-ān-izm), n. [*Zarathustrian* + -ism.] The religion of Zarathustra; Zoroastrianism.

Zarathustic (zar-ā-thōs'trik), a. Same as *Zoroastric*.

It cannot be denied that the Zarathustic dogmas are pure old Aryan myths in a new shape.
Encyc. Brit., XX. 361.

Zarathustrism (zar-ā-thōs'trizm), n. [*Zarathustra* (see *Zarathustrian*) + -ism.] Same as *Zarathustrianism*.

Modern Brahmanism, Zarathustrism, and Buddhism.
E. B. Tyler, *Prim. Culture*, I. 49.

zaratite (zar'ā-tit), n. [After Señor *Zarate*, a Spaniard.] A hydrous carbonate of nickel, occurring as an emerald-green incrustation on chromite. Also called *emerald nickel*.

zareba (zā-rē'bā), n. In Sudan and adjoining parts of Africa, an inclosure against enemies or wild animals, as by a thorn-hedge; a forti-

Zanclus cornutus.

fied camp in general. Also written *zareeba*, *zereba*, *zeriba*, etc.

We employed ourselves until the camels should arrive in cutting thorn branches and constructing a *zareba* or fenced camp, to protect our animals during the night.

Sir S. W. Baker, Heart of Africa, p. 85.

zarf (zärf), *n.* [Also *zurf*; < Ar. *zarf*, a vessel, a case.] A holder for a coffee-cup: a term used throughout the Levant.

These holders are usually of metal and of ornamental design in openwork. Their immediate object is to prevent the hot cup from burning the fingers.

Some *zarfs* are of plain or gilt silver filigree. E. W. Lane, Mod. Egyptians, I. 169, note.

zarnich (zär'nik), *n.* [Also *zarneck*, etc.;

< Ar. *zarnikh*, *azzer-nikh*, arsenic, < Gr. *ἀρσενικόν*, *arsenie*: see *arsenic*.] 1. In alchemy, orpiment.—2. An old term embracing the native sulphids of arsenic, sandarac (or realgar) and orpiment.

zarzuela (Sp. pron. thär-thö-ä-lä), *n.* [Sp.] A short drama with incidental music, like a vaudeville. It is said to have been first introduced into Spain at Zarzuela in the seventeenth century.

zastruga (zas-trö'gä), *n.* [Russ.] One of a series of ridges, with corresponding depressions, rising in wave-like succession above the general level of the snow when this has been blown across by a long-continued wind.

zataint, *n.* An old spelling of *satın*.

zati (zä'ti), *n.* [E. Ind.] The capped macaque of India and Ceylon, *Macacus pileolatus*.

Zauschneria (zäsh-né'ri-ä), *n.* [NL. (Presl, 1836), named for Zauschner, a German botanist.] A genus of polypetalous plants, of the order *Anagraceæ*. It is characterized by flowers with four petals, eight stamens, and a four-celled ovary with numerous ovules, and, distinguishing it from the similar genus *Epilobium*, by a calyx with the tube suddenly expanding above the ovary into a funnel-shaped limb globose at the base. The only species, *Z. Californica*, a handsome plant of California, is cultivated under the names of *Californian fuchsia* and *humming-bird's trumpet*. It is a low branching shrub with sessile entire or minutely toothed leaves, and bright-crimson flowers which are solitary and sessile in the axils.

zax (zaks), *n.* [Perhaps a var. of *sax* (< AS. *seax*, etc.), a knife.] An instrument used by slaters for cutting and dressing slates; a kind of hatchet with a sharp point on the pole for perforating the slate to receive the nail or pin.

Z-cranks (zē'- or zed'krangk), *n.* A peculiarly shaped crank in the cylinder of some marine

steam-engines: so named from its zigzag form. *Simmonds*.

Zea (zē'ä), *n.* [NL. (Linnaeus, 1737; used earlier by Brünfels, 1530). < Gr. *ζέα*, *ζεία*, a sort of grain used as fodder for horses.] A genus of grasses, type of the tribe *Maydeæ*. It is characterized by monoecious flowers, the male forming a terminal panicle, the female a large axillary sessile spike wrapped in numerous leaf-like bracts or husks, and consisting of pistillate flowers densely aggregated in many rows upon a thick unjointed rachis. The only species, *Z. Mays*, the well-known Indian corn or maize, long cultivated throughout many warm and temperate regions, is supposed to be a native of America, but is not now known in a wild state. It is a tall plant with unbranched robust stems, large light-green leaves, a handsome long-stalked terminal panicle (known as the *tassel*), and very thick fertile spikes from the husks of which project long green slender styles known as the *silk*. The fruit is a hard roundish caryopsis (known as the *kernel*) partly inclosed by the chaffy remains of the four glumes and broad palea—the kernels and their rachis (the *cob*) forming the spike or ear of corn. The seeds furnish an invaluable food to man and to domestic animals; the stalks and leaves are used for fodder, and the husks are much used for filling mattresses and horse-collars, and for making door-mats; a coarse textile fabric, also, and paper of excellent quality, have been experimentally made from them. The cob, and sometimes the whole ear, is used as fuel. The chief value lies of course in the kernel. See *maize*, cut in preceding column, and cut under *husk*. Compare *corn*.

zeal (zēl), *n.* [Early mod. E. *zele*; < OF. *zele*, F. *zèle* = Sp. Pg. It. *zelo*, < L. *zelus*, < Gr. *ζῆλος*, *zeal* (for **ζεός*), < *ζέω* (√ *ζεσ*), boil, akin to E. *yeast*: see *yeast*.] Passionate ardor in the pursuit of anything; intense interest or endeavor; eagerness to accomplish or obtain some object.

They have a *zeal* of [for, R. V.] God, but not according to knowledge. Rom. x. 2.

Let not my cold words here accuse my *zeal*. *Shak.*, Rich. II., i. 1. 47.

Controversial *zeal* soon turns its thoughts on force. *Burke*, Rev. in France.

His fervent *zeal* for the interests of the state. *Macaulay*, Warren Hastings.

= *Syn.* *Earnestness*, *Enthusiasm*, etc. (see *eagerness*), warmth, fervor, heartiness, energy.

zeal† (zēl), *v. i.* [*< zeal, n.*] To entertain zeal; be zealous.

Stiff followers, and such as *zeal* marvellously for those whom they have chosen for their masters. *Bacon*, Controversies of Church of Eng.

zealant†, *n.* See *zealant*.

zealed† (zēld), *a.* [*< zeal + -ed*.] Filled with zeal; characterized by zeal.

Zealed religion. *Fletcher* (and another), *Love's Pilgrimage*, iv. 2.

zealfull† (zēl'fūl), *a.* [*< zeal + -ful*.] Full of zeal; zealous.

These days of Ours may shine In *zeal-full* knowledge of the Truth divine. *Sylvester*, tr. of Du Bartas's Weeks, ii., The Decay.

zealless (zēl'les), *a.* [*< zeal + -less*.] Lacking zeal. *Bp. Hall*.

zealot (zēl'ot), *n.* [*< OF. zelote*, < LL. *zelotes*, < Gr. *ζηλωτής*, a zealot, < *ζῆλος*, *zeal*: see *zeal*.] 1. One who is zealous or full of zeal; one carried away by excess of zeal; an immoderate partizan: generally in a disparaging sense.

He was one of those furious *zealots* who blow the bellows of faction until the whole furnace of politics is red-hot with sparks and cinders. *Irving*, Knickerbocker, p. 299.

Like all neutrals, he is liable to attack from the *zealots* of both parties. *Whipple*, Ess. and Rev., I. 62.

2. [*cap.*] One of a fanatical sect or party (the *Zelotæ*) among the Jews of Palestine under Roman dominion, who on account of their excesses in behalf of the Mosaic law were also called *Sicarii* or *Assassins*. The *Zealots* gained the ascendancy in a civil war, and withstood the Romans so fiercely as to bring about the total destruction of Jerusalem, A. D. 70. *Zealots* are also mentioned (perhaps by confusion) as a sect of the Essenes, similarly characterized by fanatical zeal for their ascetic practices.

That desperate Faction of the *Zealots*, who, like so many Fircbrands scattered up and down among them [the Jews], soon put the whole Nation into Flames. *Stillington*, Sermons, I. viii.

zealotical (zē-lot'i-kal), *a.* [*< zealot + -ic-al*.] Having the character of a zealot; belonging to a body of zealots.

One Levison, a *zealotical* Scotsman, a tailor, came with a gray suit of apparel [for a disguise] under his cloak. *Court and Times of Charles I.*, II. 80.

zealotism (zēl'ot-izm), *n.* [*< zealot + -ism*.] The character or conduct of a zealot. *Gray*.

zealotist (zēl'ot-ist), *n.* [*< zealot + -ist*.] A zealous partizan; one of a body of zealots. *Howell*.

zealotry (zēl'ot-ri), *n.* [*< zealot + -ry* (see *-ery*).] Behavior as a zealot; excessive or undue zeal; fanaticism.

Inquisitorial cruelty and party *zealotry*. *Coleridge*. (*Imp. Dict.*)

Herod is outheroded, Sternhold is out-sternholded, with a *zealotry* of extravagance that really seems like wilful burlesque. *De Quincey*, *Style*, i.

zealous (zēl'us), *a.* [*< L. ML. zelosus*, full of zeal, < *zelus*, *zeal*: see *zeal*. Cf. *jealous*, an older form of the same word.] 1. Full of or incited by zeal; jealous for the good or the promotion of some person or object; ardent; eager; fervent; devoted.

That man loves not who is not *zealous* too. *Herrick*, *Zeal Required in Love*.

The learned and pious Bishop of Alexandria, Dicoysius, wrote to the *zealous* and factious Presbyter Novatus. *Bp. Gauden*, *Tears of the Church*, p. 100. (*Davies*.)

The clergy of New England were, for the most part, *zealous* promoters of the revolution. *Emerson*, *Hist. Disc. at Concord*.

2. Caused by or manifesting zeal; due to earnest devotion; of an ardent character or quality.

So sweet is *zealous* contemplation. *Shak.*, *Rich. III.*, iii. 7. 94.

I will study Service and friendship, with a *zealous* sorrow For my past incivility towards ye. *Ford*, *Broken Heart*, v. 1.

= *Syn.* 1. Forward, enthusiastic, fervid, keen. See *zeal*.

zealously† (zēl'us-i), *adv.* In a zealous manner; with passionate ardor; fervently; earnestly.

It is good to be *zealously* affected always in a good thing. *Gal. iv.* 18.

Sir, I will amply extend myself to your use, and am very *zealously* afflicted, as not one of your least friends, for your crooked fate. *Beau. and Fl.*, *Honest Man's Fortune*, ii. 2.

zealousness (zēl'us-nes), *n.* The quality of being zealous; ardor; zeal.

zealousy† (zēl'us-i), *n.* [Early mod. E. *zealousie*; < *zealous + -y*. Cf. *jealousy*.] 1. Zealousness.

His hand eternity, his arm his force, His armour *zealousy*, his breast-pole heaven. *Middleton*, *Solomon Paraphrased*, v. 2.

2. An old form of *jealousy*.

The *zealousie* and the eagle feathers of Olimpias. *Udall*, tr. of Apophthegms of Erasmus, p. 200, note.

zebec, **zebeck**, *n.* Same as *zebee*.

zebra (zē'brä), *n.* and *a.* [= F. *zèbre*, < African *zebra*.] 1. *n.* An African solidungulate mammal, related to the horse and ass, of the genus *Equus* and subgenus *Hippotigris*, having the body more or less completely striped. There are at least 3 well-marked species. One of these is the quagga. The second is the bonté-quagga, or Burchell's zebra. (See cut under *dawu*.) The third is the true zebra, *E. (H.) zebra*, of southern Africa, of a whitish color,

a, the Zarf; b, the Cup.

Flowering Plant of Maize (*Zea Mays*). a, male flower; b, female flower.

Zebra (*Equus* or *Hippotigris zebra*).

very fully and regularly striped with black: it is specifically called the *mountain zebra*. This zebra stands about 4½ feet high at the shoulder; the head is light, the ears are moderately large, the limbs slender; the mane is short, and the tail tufted. The general form is light and symmetrical, like that of most wild asses, and seems to indicate speed rather than bottom. The zebra is one of the most beautiful of animals, as it is also one of the wildest and least tractable. It has often been kept in confinement, and occasionally tamed, but generally retains its indomitable temper. It inhabits in herds the hilly and mountainous countries of South Africa, seeking the most secluded places; so that from the nature of its haunts, as well as its watchfulness, swiftness, and the acuteness of its senses, it is difficult to capture. It is, however, much hunted, and seems destined to extermination.

II. *a.* Resembling the stripes of a zebra; having stripes running along the sides: as, the *zebra* markings on certain spiders. *Staveley*.

zebra-caterpillar (zē'brä-kat'ēr-pil'ār), *n.* The larva of *Mamestra picta*, a North American noctuid moth: so called from the longitudinal black and yellow stripes. It feeds on clover, peas, beans, cabbages, turnips, and various other cultivated plants. See cut on following page.

zebra-opossum (zē'brä-ō-pos'um), *n.* The zebra-wolf. See cut under *thylacine*.

Zebra-caterpillar and Moth (*Mamestra picta*).

zebra-parrakeet (zē'brī-par'a-kēt), *n.* A kind of grass-parrakeet, *Melospitacus undulatus*, much of whose plumage is barred. It is a common cage-bird. See cut under *Melospitacus*.

Zebrapicus (zē-brā-pī'kus), *n.* [NL. (Malherbe, 1849), also *Zebrapicus* (Bonaparte, 1854), < *zebra*, *q. v.*, + NL. *Picus*.] A genus of woodpeckers: so called from the extensive striping of the plumage. It has covered a number of American forms, but was based on the common red-bellied woodpecker of the United States, and is thus a synonym of *Centurus* (itself often merged in *Melanerpes*). See cut under *Centurus*.

zebra-plant (zē'brī-plant), *n.* A striped-leaved plant, *Maranta zebra*. See *Maranta*.

zebra-poison (zē'brī-poi'zū), *n.* A succulent tree, *Euphorbia arborea*, of South Africa. The milky juice is so poisonous as to kill zebras which drink water in which the branches have been placed, and it is sometimes used as an arrow-poison. *J. Smith, Dict. of Economic Plants.*

zebra-shark (zē'brī-shārk), *n.* The tiger-shark.

zebra-spider (zē'brī-spi'dēr), *n.* A hunting-spider or wolf-spider. See *Lycosidæ*, and cuts under *tarantula* and *wolf-spider*.

zebra-swallowtail (zē'brī-swol'q-tāl), *n.* The ajax, *Papilio* (or *Iphiclidæ*) *ajax*, a large swallow-tailed butterfly of North America, having yellowish-white wings barred with black. It is a handsome species, and occurs from Pennsylvania southward. The larva feeds on the papaw.

zebra-wolf (zē'brī-wūlf), *n.* The pouched dog or thylacine dasyure of Tasmania, *Dasyurus thylacinus* or *Thylacinus cynocephalus*, a large predaceous and carnivorous marsupial quadruped somewhat resembling a wolf, having the back and rump transversely striped (whence the name). See cut under *thylacine*.

zebra-wood (zē'brī-wūd), *n.* 1. The wood of *Conarus Guianensis* (*Omphalobium Lambertii*), of the *Conaraceæ*, a tall tree of Guiana; also, the tree itself. The wood is hard and beautifully marked, and is much sought for use in making furniture.—2. The wood of a small evergreen, *Guettarda speciosa*, of the *Rubiaceæ*, found on tropical shores in both hemispheres.—3. In the West Indies, a shrub or small tree, *Myrtus* (*Eugenia*) *fragrans*, var. *cuneata*.

zebra-woodpecker (zē'brī-wūd'pēk-ēr), *n.* Any one of the striped woodpeckers of Malherbe's genus *Zebrapicus*—that is, of *Centurus* in a usual sense. See cut under *Centurus*.

zebrine (zē'brin), *a.* [*zebra* + *-ine*.] Resembling or related to the zebra; striped like a zebra; pertaining to the subgenus *Hippotigris*: correlated with *equine* and *asinine*. *Darwin*.

Zebu (*Bos indicus*, var.).

zebu (zē'bū), *n.* [*F. zebu*, a name accepted by Buffon from the exhibitors of the animal at a French fair, and supposed by him to be an African word. If not invented, it is prob. intended to represent the E. Ind. *zobo*, *q. v.*] The Indian bull, ox, or cow; any individual or breed of *Bos indicus*, having a hump on the withers. The zebu has been domesticated from time immemorial, and is now known only in its artificial breeds. These are numerous, and very various in size, shape, and color, the processes of artificial selection having modified the original stock in almost every particular. The characteristic hump is sometimes double. The flesh is considered a delicacy. The size of different breeds of zebs varies much. Some are as large as ordinary cattle, others no larger than a common calf a month or two old. The color is usually light gray, varying to pure white. The bulls of the latter color are consecrated to Siva, and become Brahminy bulls, exempt from labor or molestation. Zebs are bred particularly in India, but also in China, Japan, and some parts of Africa. They are used as beasts of burden and of draft, and as riding-animals, as well as for beef. The stock from which they have descended is by some naturalists supposed to represent only a variety of *Bos taurus*, the original of the ordinary domestic ox. See cut in preceding column.

zebug (zē'bub), *n.* [*Ar. zubāb, dhubāb*, Heb. *zebūb*, fly. Cf. *Beelzebub*.] A large Abyssinian fly noxious to cattle, like the isette and the zimb.

zebu-cattle (zē'bū-kat'li), *n.* The cattle of the eastern hemisphere which have a hump, like the zebu. *Darwin*.

zebuder, *n.* The Caucasian ibex. Also called *zac*.

zecchino (tsek-kē'nō), *n.* [It.: see *sequin*.] A gold coin of the Venetian republic, worth

Obverse. Reverse. Zecchino of Paolo Raniero, Doge of Venice 1778-1789.—British Museum. (Size of original.)

rather more than 9s. English, or about \$2.25: same as *sequin*.

zechin, *n.* A variant of *sequin*.

Zechstein (zek'stin), *n.* [*G.*, < *zeche*, a mine, + *stein*, stone.] In *geol.*, the uppermost of the two divisions of the Permian, the lower being the so-called "Rothliegende." This twofold character of the Permian is a well-marked feature of the system in Germany, especially in the central part of that country; hence it is not infrequently called the *Dyas*, a word coined in imitation of the name *Trias*. At the bottom of the Zechstein is the "Kupferschiefer," a thin bed of dark-colored, bituminous, and cupriferrous shale. The Zechstein proper is a calcareous rock, becoming dolomitic in its upper section, and containing, especially in Prussia, masses of rock-salt of extraordinary thickness. The Permian covers an extensive area in Russia, where, however, its dual character is much less distinctly marked than it is in Germany. In the east of England this feature of the Permian is clearly exhibited, and the so-called "Magnesian Limestone group" is the equivalent of the German Zechstein. No separation of the Permian into divisions has been satisfactorily made out in North America, where the break between that formation and the Carboniferous is far less distinct than it is in the regions of its typical development in Germany.

zed (zed), *n.* [= *F. zède*, < *L. zeta*, < *Gr. ζῆτα*, the name of the letter Z.] 1. The letter Z, also called *zee* and sometimes *izzard*.

Zed, thou unnecessary letter! *Shak.*, *Lear*, ii. 2. 69.

2. A metal bar rolled so as to have a cross-section resembling the letter Z.

Angles, *Zeds*, Channels, Beams, Bars. *The Engineer*, LXXI. p. xxxviii. of adv'ts.

Zedland (zed'lānd), *n.* [*Zed* + *land*.] A designation of the western part of England, from the dialectal use there of the sound of *z* for that of *s*. *Halliwel*.

zedoary (zed'ō-ā-ri), *n.* [*F. zédoaire* = Sp. *Pg. zedoaria* = It. *zettovario*: see *setwall*.] An East Indian drug, known in two varieties as *long* and *round zedoary*. According to some authorities these are both the product of *Curcuma Zedoaria* (the *C. Zerenbet* of Roxburgh); according to others, only the long zedoary belongs to this species, the round to *C. aromatica* (the *C. Zedoaria* of Roxburgh). Both varieties are aromatic, with a strong camphoraceous flavor and the odor of ginger. In medicine, zedoary acts like ginger, but is less effective. It is used in India in various alterative decoctions and in preparing kinds of incense. The rhizome of *C. aromatica*, like the related turmeric, is used in dyeing—its chief application.

Zedæ (zē'ā-dē), *n. pl.* [NL. (Swainson, 1839), < *Zeus* + *-idæ*.] A family of acanthopterygian fishes, so named from the genus *Zeus*, but usually called *Zenidæ*. See cut under *dory*, 1.

zein (zē'in), *n.* [*Zea* + *-in*.] A proteid obtained from maize, said to be allied to gluten.

It has a yellowish color, and is soft, insipid, and elastic. It differs essentially from the gluten of wheat. Also *zeine*.

zeitgeist (tsit'gīst), *n.* [*G.*; < *zeit*, time (= E. *tide*), + *geist*, spirit (= E. *ghost*).] The spirit or genius of the time; that general drift of thought or feeling which particularly characterizes any period of time: a German word occasionally used in English.

zel (zel), *n.* [*Turk. Pers. zil*, a bell, cymbal.] An Oriental form of cymbal.

Where, some hours since, was heard the swell
Of trumpet and the clash of *zel*,
Bidding the bright-eyed sun farewell.

Moore, *Lalla Rookh*, The Fire-Worshippers.

Zelanian (zē-lā'ni-an), *a.* [*< NL. Zelandia* (*Nova Zelandia*, New Zealand) + *-an*.] In *zoögeog.*, of or pertaining to New Zealand: more fully *Novo-Zelanian*. See *New Zealand subregion*, under *subregion*.

zelant, *n.* [Also *zealant*; < *LL. zelant(t)-s*, pp. of *zelare*, have zeal for; < *L. zelus*, zeal: see *zeal*.] A zealot. Also *zealant*.

To certain *zealants* all speech of pacification is odious.
Bacon, *Unity in Religion* (ed. Spedding, Ellis, and Heath).

Advertisement touching an Holy War written (by Bacon) in the form of a Dialogue, in which the interlocutors represent a Moderate Divine, a Protestant *Zelant*, a Romish Catholic *Zelant* . . . *E. A. Abbott*, *Bacon*, p. 426.

zelator (zel'ā-tōr), *n.* [*< LL. zelator*, < *zelare*, have zeal for: see *zelant*.] A zealous partizan or promoter; a zealot.

Many *zelators* or fauourers of the publyke weale haue benne discouraged. *Sir T. Elyot*, *The Governour*, iii. 27.

Zele (zē'lō), *n.* [NL. (Curtis, 1831), said to be < *Gr. ζῆλον*, a female rival.] A genus of hymenopterous parasites, of the family *Braconidæ*, distinguished from *Macrocentrus* principally by having the abdomen inserted between the posterior coxæ. Ten North American and three European species have been described. They are parasitic upon small lepidopterous larvae.

Zelkova (zel-kō'vā), *n.* [NL. (Spach, 1841), from the Cretan name *zelkova*.] A genus of apetalous trees, of the order *Urticaceæ* and tribe *Celtidæ*. It is characterized by monoecious or polygamous flowers, the male with a short-lobed perianth, the female with an eccentric two-parted style and uniovulate ovary, in fruit somewhat ventricose and drupaceous, smooth or velvety on the surface, and often keeled on the back, containing a compressed concave seed with broad cotyledons. There are 4 species, natives respectively of Crete, the Caucasian and Caspian region, Japan, and China. They are trees bearing alternate serrate or crenate feather-veined leaves, with narrow slender stipules. The flowers are sessile or short-pedicelled, the male in small clusters, the female solitary in the upper axils. *Z. crenata* (formerly known as *Planera Richardi*), the zelkova- or zelkova-tree of the Caucasus, reaches a considerable size, sometimes 80 feet high and 4 feet in diameter; in its scaly bark it resembles the plane-tree, in its leaves the elm; the small greenish-brown flowers have the odor of the elder, and are followed by roundish fruits of the size of a pea. Its timber is much prized; the sap-wood is light-colored and elastic; the hard heavy reddish heart-wood takes a good polish, and is valued for furniture. For *Z. acuminata*, see *kegaki*.

zeloso (dze-lō'sō), *a.* [It.: see *zealous*.] Zealous; in *music*, marking passages to be rendered with zeal, enthusiasm, or energy.

zelotypia (zel-ō-tip'i-ā), *n.* [NL., < *Gr. ζῆλοτυπία*, jealousy, rivalry, < *ζῆλος*, zealous, < *ζῆλος*, zeal, + *τύπειν*, strike: see *type*.] The exercise of morbid perseverance and energy in the prosecution of a project, especially one of a political or religious nature; a form of monomania sometimes manifesting itself in overzeal in attempts to gain supporters to any public cause.

zelotypic (zel-ō-tip'ik), *a.* [*zelotypia* + *-ic*.] Pertaining to, characterized by, or exhibiting zelotypia.

zelousiet, *n.* See *zealousy*.

zemindar (zem'in-dār), *n.* [Also *zamindar*; < *Pers. zemindār*, a landholder, < *zemīn*, land, + *-dār*, holding.] Originally, one of a class of farmers of the revenue from land held in common by its cultivators, established by the Mogul government of India, every one in a specially assigned tract or district; now, in many provinces, a native landlord, regarded as a successor of the preceding, and similarly responsible for the land-tax, who under British regulations has become the actual proprietor of the soil under his jurisdiction, often with right of primogeniture.

The *Zemindars* of Lower Bengal, the landed proprietary established by Lord Cornwallis, have the worst reputation as landlords, and appear to have frequently deserted it. *Maine*, *Village Communities*, p. 163.

zemindary (zem'in-dī-ri), *n.*; *pl. zemindari* (*-riz*). [*< Pers. zemindārī*, < *zemindār*, *zemindar*.] 1. The office or jurisdiction of a zemindar.—2. The tract of territory administered

or controlled by a zemindar; also, the system of landholding and revenue-collection under zemindars. Also written *zamindari*, *zemindari*, *zemindarce*, *zemindarry*, etc.

Lord Cornwallis, with the best intentions, stereotyped the zemindary system in Bengal by giving to the middlemen or farmers of the revenue permanent rights of possession, subject to a quit rent to the Government.

Contemporary Rev., I, 61.

zemmi, zemni (zem'i, -ni), *n.* The blind mole-rat, *Spalax typhlus*. See cut under *mole-rat*.

zemstvo (zems'tvō), *n.* [Russ.] In Russia, a local elective assembly, of recent institution, for the oversight and regulation of affairs within its territory. There are zemstvos for the districts into which the governments are divided, and also for the governments themselves, with nominal jurisdiction of local taxation, schools, roads, public sanitation, etc., but subject to arbitrary interference by the provincial governors.

Zenaida (zē-nā'i-dā), *n.* [NL. (Bonaparte, 1838), < *Zenaidē*, daughter of Joseph Bonaparte, and wife of Charles Lucien Bonaparte.] A genus of American ground-doves, typical of the subfamily *Zenaidinae*, containing such species as the West Indian *Z. amabilis*.

zenaidē (zē-nā'id), *n.* A dove of the genus *Zenaida*.

Zenaidinae (zē-nā-i-dī'nē), *n. pl.* [NL., < *Zenaida* + *-inae*.] A subfamily of pigeons or doves, of the family *Columbidae*; the ground-pigeons of America, distinguished from the more arboreal pigeons, or *Columbinae* proper, by the greater size of the feet and the denudation of the scutellate tarsi. Numerous genera and species inhabit the warmer parts of America; 6 are found in the United States, of which the Carolina dove, *Zenaidura carolinensis*, is the best-known and most widely distributed. *Zenaida amabilis* is a West Indian species, found also in Florida. The group embraces the smallest birds of the family, as the diminutive ground-dove of the Southern States, *Chamaepelia* (or *Columbigallina*) *passerina*. See cuts under *dove*, *ground-dove*, *Melopelia*, and *Scardafella*.

zenaidine (zē-nā'i-din), *a.* [*Zenaidinae*.] Pertaining to or resembling the genus *Zenaida*.

Zenaidura (zē-nā-i-dī'nū), *n.* [NL. (Bonaparte, 1854), < *Zenaida*, *q. v.*, + Gr. *οἰπά*, tail.] That genus of *Columbidae* which contains the Carolina dove, or mourning-dove, *Z. carolinensis*: so called from the peculiarity of the tail, which has fourteen instead of twelve feathers. The long crenate tail gives this genus the aspect of *Ectopistes* (which belongs to a different subfamily). See cut under *dove*, and compare that under *passenger-pigeon*. Also, incorrectly, *Zenaidura*.

zenana (ze-nā'nā), *n.* [Also *zanana*; < Pers. *zenāna*, belonging to women, < *zen*, a woman, = Gr. *γυνή*, a woman; see *queen*.] In India, that part of the house in which the females of a family are secluded; an East Indian harem.

I wandered through a zenana which was full of women's clothes, fans, shippers, musical instruments, flowers, gilt chairs, and damask curtains.

W. H. Russell, *Diary in India*, I, 338.

Zenana missions, Protestant Christian missions to the women of India, conducted by female missionaries from Great Britain and the United States.

Zend (zend), *n.* [See *Zend-Avesta*.] The name commonly given to the language of the Avesta: an ancient form of Iranian or Persian. It was deciphered in the present century, largely by means of its resemblance to Sanskrit. See *Zend-Avesta*.

zendal silk. Same as *sendal*.

Zend-Avesta (zen-dā-ves'tā), *n.* [More properly *Avesta*, since *Zendavesta* is literally the Avesta with its *Zend* or commentary.] The sacred scriptures of the Zoroastrian religion, ascribed to Zoroaster, and consisting of the *Vendidad*, the *Yasna* (including the *Gāthās*), the *Yashts*, and a few other pieces. Compare *Zend*.

zendel (zen'del), *n.* Same as *sendal*.

zendik (zen'dik), *n.* [Ar. *zendiq*.] A name given in the East not only to disbelievers in revealed religion, but also to such persons as are accused of magical heresy.

zenick, zenik (zē'nik), *n.* [African.] The African suricate, *Rhynchota tetradactyla* or *Suricata zenick*. See cut under *suricate*.

Zenidae (zen'i-dē), *n. pl.* [NL., < *Zeus* (Zen-) + *-idae*.] A family of physoclistous acanthopterygian fishes, typified by the genus *Zeus*; the dorics. The body is short, high and deep, and much compressed; the large mouth is terminal, with protractile upper jaw and small teeth in narrow bands or single file; the dorsal fin is emarginate or divided, with strong apices anteriorly; the anal is spined or spineless; the ventrals are thoracic, and have one spine and five to eight rays; the caudal is usually not forked; the lateral line is obscure and unarmed; pyloric caeca are extremely numerous; and the vertebrae are about thirty-two. These are fishes of warm seas, of singular appearance, represented by 5 genera and about 10 species. Also called *Cyttidae*,

Zenopsis ocellatus, of the family Zenidae.

and formerly *Cyttina*. The name is also written *Zeida*. See *Zeus*, 2, and cut under *dory*.

Zeninae (zē-nī'nē), *n. pl.* [NL., < *Zeus* (Zen-) + *-inae*.] A subfamily of *Zenidae*, without palatine teeth, with scales minute if present, and very strong anal spines. See *Zeus*, 2.

zenith (zē'nith), *n.* [ME. *senyth*, < OF. *cenith*, *zenith*, F. *zénith* (> G. *zenith* = D. Sw. *zenit* = Russ. *zenitū*), < Sp. *zenit*, OSP. *zenith* = Pg. *zenith*, *zenit*, a corruption (prob. due to a misreading of *n* as *m*) of **zēnt*, < Ar. *semt*, *samt*, in *semt er-ras*, *samt ur-ras*, the zenith, vertical point of the heavens, lit. 'way of the head': *semt*, *samt*, way, road, path, tract, quarter; *al*, the; *ras*, head. Cf. *azimuth*.] 1. The vertical point of the heavens at any place, or the point directly above an observer's head; the upper pole of the celestial horizon. The opposed pole is the nadir.—2. Figuratively, the highest point, or summit, as of one's fortune; the culmination.

By my prescience
I find my zenith doth depend upon
A most auspicious star.

Shak., *Tempest*, i. 2. 181.

Dead! in that crowning grace of time,
That triumph of life's zenith hour!

Whittier, *Rantoul*.

Reflex zenith-tube. See *reflex*.

zenithal (zē'nith-əl), *a.* [*Zenith* + *-al*.] Of or pertaining to the zenith.

The deep zenithal blue. Tyndall, *Glaciers of the Alps*, v.

Zenith map-projection. See *projection*.

zenith-collimator (zē'nith-kol'i-mā-tor), *n.* A collimator arranged so that its optical axis is vertical, instead of horizontal as usually is the case. In Kater's vertical collimator the telescope is carried by an annular iron float, floating upon mercury. Other forms are also used in which the adjustment to verticality is made by means of spirit-levels. Also called *vertical collimator*.

zenith-distance (zē'nith-dis'tāns), *n.* The arc intercepted between any body and the zenith, being the same as the co-altitude of the body.

zenith-sector (zē'nith-sek'tor), *n.* An astronomical instrument for measuring with great accuracy the zenith-distances of stars which pass near the zenith. It is specially used for this purpose in English trigonometrical surveys in determining latitudes. It consists essentially, as its name implies, of an arc of a divided circle, with appliances for determining accurately its zenith-reading. See *sector*.

zenith-telescope (zē'nith-tel'e-skōp), *n.* An important geodetical instrument for measuring the difference of zenith-distances of pairs of stars north and south of the zenith. It consists of a somewhat large telescope pointing nearly to the zenith, but having a moderate range of motion in altitude regulated by a fine tangent screw. The instrument also carries a vertical setting-circle with a very delicate level, having its tube perpendicular to the horizontal axis of the telescope. There is at the eyepiece a thread micrometer, working vertically. The telescope, with its horizontal axis, is mounted upon a very long vertical axis arranged with two stops, so that the telescope can be carried round from the north to the south part of the meridian. The difference of zenith-distances of a pair of stars, one north and the other south, having been observed, the latitude of the station is equal to the mean of their declinations added to half the excess of the southern over the northern zenith-distance. The instrument is the invention of Captain A. Talcott, U. S. A.; but it is said the principle is due to the early astronomer Horrocks.

Zenker's degeneration. Same as *waxy degeneration* (b). See *waxy*.

zenoid (zē'noid), *a.* and *n.* [*Zeus* (Zen-) + *-oid*.] 1. *a.* Of or relating to the *Zenidae*.

2. *n.* One of the *Zenidae*.

Zenonian (zē-nō'nī-an), *a.* and *n.* [*Z. Zeno* (n-), < Gr. *Ζήνων*, *Zeno* (see def.), + *-ian*.] 1. *a.* Of or pertaining to any one of the name of *Zeno*. Specifically—(a) Pertaining to the doctrines and arguments of

Zeno of Elea, a philosopher of the fifth century B. C. *Zeno's* four arguments against motion, which are celebrated, are as follows: First, a body passing over any space must first pass the middle point, and before it can do that it must pass the point midway between that and the starting-place, and so on *ad infinitum*. This *regressus ad infinitum* was regarded as in some way absurd. The second argument is called the *Achilles* or *Achilles and the tortoise*. Achilles cannot overtake the tortoise, because it will take him a certain time to reach the starting-point of the tortoise, and when he has reached it the tortoise will still have the start, and so on *ad infinitum*; and thus he will be the sum of an infinite series of times in reaching the tortoise, which will be an infinite time. The third argument is that a flying arrow at any time occupies a space no larger than itself, and in this space it has no room for motion, and therefore at no time has it any motion. The fourth argument is quite obscure, but it concludes from the consideration of relative motions that the whole of a time is equal to its half. *Zeno* may have come upon the difficulty that half an infinite number is equal to the number itself. Aristotle calls *Zeno* the inventor of dialectic—that is, of abstract logical reasoning reposing upon the principle of contradiction, as opposed to mere inference by vague association with some general experience. The *Zenonian* arguments are in point of fact attempts at such reasoning; but they are gross logical fallacies, arising from the fact that the reasoning is not carried out abstractly, but contents itself with reaching contradictions with ordinary inexact experience. They have been considered wonderful by those students who have come to philosophy by the way of theology or natural history without proper training in mathematics and logic; and fallacies of the same nature are committed every day, even in mathematical works. *Zenonian* minds find some difficulty in reasoning either about discrete or about continuous infinity, because these characters are neither of them directly presented to us in experience, and therefore elude associational reasoning. With finite quantity they find no such difficulty. But in really logical reasoning, since finite quantity is distinguished from infinite quantity in being subject to a certain general and complicated condition to which the latter is not subject, the latter is more simple than the former; and from a similar cause continuous infinity is more easily reasoned about, with logical accuracy, than discrete infinity.

Gorgia's sceptical development of the *Zenonian* logic. *Encyc. Brit.*, XXIV, 779.

(b) Pertaining to *Zeno of Citium*, the founder of the Stoic school of philosophy, who lived between 350 and 250 B. C. He committed suicide at an advanced age.

2. *n.* A Stoic.

Zenonic (zē-non'ik), *a.* [*Zeno* (n-) + *-ic*.] Same as *Zenonian*.

Heraclitus's system was the polar antithesis to this *Zenonic* position. *The Academy*, April 21, 1888, p. 278.

Zenopsis (zē-nop'sis), *n.* [NL. (Gill, 1862), < *Zoos* (Zen-) + Gr. *ὄψις*, aspect.] A genus of dorics, of the subfamily *Zeninae*, differing from *Zeus* mainly in having only three instead of four anal spines. The type is *Z. nebulosus* of Japan; another species is *Z. ocellatus* of the New England coast, of a nearly plain silvery color, but with a black lateral ocellus. See cut under *Zenidae*.

zenu (zē'nō), *n.* The goitered antelope, or yellow goat, *Procavia guttuosa*. See *dzeren*.

zeolite (zē'ō-lit), *n.* [So called by Cronstedt from boiling and swelling when heated by the blowpipe; < Gr. *ζέω*, boil, foam, + *λίθος*, stone.] A generic name of a group of hydrated double silicates in which the principal bases are aluminium and calcium or sodium. They are closely allied to the feldspars among anhydrous silicates. They are decomposed by acids, often with gelatinization; and most of them intumesce before the blowpipe. Among them are analcite, chabazite, harmotome, stilbite, etc. They occur most commonly in cavities and veins in basic igneous rocks, as basalt or diabase, as at Bergen Hill, New Jersey; they thus often fill the cavities in amygdaloid.

zeolitic (zē'ō-lit'ik), *a.* [*zeolite* + *-ic*.] Pertaining to zeolite; consisting of zeolite or resembling it.

zeolitiform (zē'ō-lit'i-fōrm), *a.* [*zeolite* + *L. forma*, form.] Having the form of zeolite.

zeolitization (zē'ō-lit-i-zā'shōn), *n.* [*zeolite* + *-ize* + *-ation*.] The process by which a mineral is converted into a zeolite by alteration—for example, nepheline into thomsonite.

zeorine (zē'ō-rin), *a.* [*Zeorra*, a genus of lichens, + *-ine*.] In bot., noting, in lichens, an apothecium in which a proper exiple is included in the thalline exiple.

Zephiroth (zef'i-roth), *n. pl.* Same as *Sephiroth*.

Zephronia (zef-rō'nī-ā), *n.* [NL. (J. E. Gray, 1842).] Same as *Sphaerotherium*.

Zephroniidae (zef-rō'nī-i-dē), *n. pl.* [NL., < *Zephronia* + *-idae*.] Same as *Sphaerotheriidae*. J. E. Gray.

zephyr (zef'ēr), *n.* [*F. zéphire* = Sp. *zéfiro* = Pg. *zephyro* = It. *zéfiro*, *zéfiro*, < *L. zephyrus*, < Gr. *Ζέφυρος*, the west wind; cf. *ζόφος*, darkness, gloom, the west.] 1. The west wind; poetically, any soft, mild, gentle breeze.

As gentle
As zephyrs blowing below the violet,
Not wagging his sweet head.

Shak., *Cymbeline*, iv. 2. 172.

2. In *entom.*, a butterfly of the genus *Zephyrus*.

—3. A trade-name for a textile fabric or yarn,

very fine and light of its kind, and for some other things of similar qualities: chiefly in distributive use: as, *zephyr* worsted; *zephyr* crackers (that is, biscuits).

Homespun, Flannels, *Zephyrs*, Challies.

Zephyr cloth, a thin, finely spun woolen cloth made in Belgium, thinner than tweed, and employed for women's gowns. *Dict. of Needlework*.—**Zephyr flannel**. See *fannel*.

Zephyranthes (zef-i-ran'thēz), *n.* [NL. (Herbart, 1821), so called in allusion to the slender, easily agitated stalks; < Gr. *ζέφυρος*, the west wind, + *άνθος*, flower.] A genus of monocotyledonous plants, of the order *Amaryllidaceae* and tribe *Amaryllideae*. It is characterized by one-flowered scapes, and flowers with a short or rather long perianth-tube, sometimes with small scales around the stamens, slender separate filaments, oblong or linear versatile anthers, and numerous biseriate ovules in the three ovary-cells. There are about 30 species, natives of America from Texas to the Argentine Republic, with one in western tropical Africa, the latter formerly known as *Habranthus*. They are bulbous plants with a few linear or thong-shaped leaves, and an elongated scape bearing a handsome erect or slightly declined solitary flower, either pink, white, purple, or yellowish. They are known in general as *swamp-lily*. *Z. Atamasco*, found from Mexico to Pennsylvania, with rose-colored flowers, is cultivated under the name of *fairy-lily* or *atamasco-lily*; and *Z. candida*, of Lima and Buenos Ayres, with white flowers and small rush-like leaves, under the name of *Peruvian swamp-lily*.

Zephyrus (zef'i-rus), *n.* [*L. Zephyrus*, < Gr. *Ζέφυρος*, a personification of *ζέφυρος*, the west wind.] 1. In *classical myth.*, a personification of the west wind, poetically regarded as the mildest and gentlest of all the sylvan deities.

When *Zephyrus* eek with his sweet breath
Inspired hath in every bolt and heath
The tendre croppes.

Chaucer, Gen. Prol. to C. T., l. 5.

Courteous Zephyrus

On his dewy wings carries perfumes to cheer us.

Fletcher (and another), Sea Voyage, ii. 1.

2. [NL. (Dalman, 1816).] In *entom.*, a genus of butterflies, of the family *Lycenidae*, chiefly of Europe and Asia, characterized by peculiarities of the wing-venation; the zephyrs.

zerda (zēr'dā), *n.* A small African fox; a fennec. The name is applied to two very different animals: (a) *Vulpes* or *Fennecus zerda*, a small true fox. See *fox*; and cut under *fennec*. (b) *Otocyon* or *Megalotis latandi*. See *Megalotinae*.

zereba, zeriba, n. See *zariba*.

Zerene (zēr-rē'nē), *n.* [NL. (Hübner, 1816; Treitschke, 1825), prop. *Xerene*, < Gr. *ξηραίνω*, dry up.] A notable genus of geometrid moths, typical of a family *Zerenidae* or subfamily *Zereninae*. They have broad, entire, and slightly hyaline wings; the body is slender, and the male antennae are plumose, with the branches long, slender, and slightly frizzled. The most noted species is *Z. catinaria* of the northern United States, a white moth, often with blackish dots, whose greenish-yellow black-spotted larva feeds on a variety of forest-plants.

Zerenidae (zēr-ren'i-dē), *n. pl.* [NL. (Guenée, 1844), < *Zerene* + *-idae*.] A family of geometrid moths, comprising many beautiful forms, usually white or yellow, spotted with black. It includes 20 genera, of which *Abraxas* is the most important. From their maculation they are known as *panther*, *jayuar*, or *maggie*-moths, and one genus is called *Pantherodes*.

Zereninae (zēr-ē-nī'nē), *n. pl.* [NL., < *Zerene* + *-inae*.] The *Zerenidae* as a subfamily of *Geometridae*.

zero (zēr'ō), *n.* [*F. zéro*, < *It. Sp. zero*, contr. of *zefro*, *zifro*, < *Ar. sifr*, cipher: see *cipher*, of which *zero* is a doublet.] 1. Cipher; the figure 0, which stands for naught in the Arabic notation for numbers.

As to number, they [the teeth of fishes] range from zero to countless quantities. *Owen, Anat., § 70.*

2. The defect of all quantity considered as quantity; the origin of measurement stated as at a distance from itself; nothing, quantitatively regarded. Upon a thermometer or any similar scale zero is the line from which all the divisions are measured in the positive and negative directions. Upon the centigrade and Réaumur's thermometers. It is the point at which the mercury stands when the thermometer is plunged into a mass of melting ice coarsely pulverized, from which some makers allow the water to drain off, but it is better not to do so. For some years after a thermometer is made the zero is said to rise—that is, the melting-point of ice stands higher and higher upon the scale. Upon the Fahrenheit thermometer the distance on the glass stem between the melting-point of ice and the temperature of steam at one English atmosphere of tension is divided into 180 degrees, and 32 such degrees below the melting-point of ice is marked as zero.

If the directions of all the external forces pass through the origin, their moments are zero, and the angular momentum of the system will remain constant.

Clerk Maxwell, Matter and Motion, art. lxxi.

Hence—3. Figuratively, the bottom of the scale; the lowest point or ebb; a state of nullity or inanition.

The diplomatic circle [in Constantinople] was at zero. *Stratford Canning, in Dict. Nat. Biog., VIII. 432.*

Absolute zero of temperature. See *absolute*.—**Displacement of zero.** See *displacement*.—**Zero magnet,** a magnet used for adjusting the zero reading of a galvanometer or similar instrument.—**Zero potential,** in *elect.* See *potential*.

zeroaxial (zēr-rō-ak'si-āl), *a.* [*< zero + axial*.] Having an axis composed of zeros.—**Zeroaxial determinant.** See *determinant*.

zerumbet (zēr-rum'bet), *n.* An East Indian drug—according to some, the same as *cassumunar*. It has sometimes been confounded with the round zedoary.

zest (zest), *n.* [*< OF. zeste*, one of the partitions which divide the kernel of a walnut, also the peel of an orange or lemon, < *L. schistos*, < *Gr. σχιστός*, divided, cleft; see *schist*.] 1. The dry woody membrane covering or forming the partitions of a walnut or other nut or fruit, as an orange or a lemon. [Obsolete, or only French.]—2. A piece of the outer rind of an orange or lemon used as a flavoring or for preserving; also, oil squeezed from such a rind to flavor liquor, etc. *Imp. Diet.*—3. Relish imparted or afforded by anything; piquant nature or quality; agreeableness; charm; piquancy.

The zest
Of some wild tale or brutal jest
Hath to loud laughter stirred the reat.

Scott, Rokeby, iii. 15.

4. Keen relish or enjoyment of anything; stimulated taste or interest; hearty satisfaction; gusto.

Some forms of hypochondria, in which this extreme somatic insensibility and absence of zest leave the intellect and memory unimpaired. *J. Ward, Encyc. Brit., XX. 84.*

zest (zest), *v. t.* [*< zest, n.*] 1. To add a zest or relish to; make piquant, literally or figuratively.

My Lord, when my wine's right I never care it should be zested. *Cibber, Careless Husband, iii. (Davies).*

Hundreds sunk to the bottom by one broadside furnish out the topic of the day, and zest his coffee. *Goldsmith, Abuse of our Enemies.*

2. To cut, as the peel of an orange or a lemon from top to bottom into thin slips, or to squeeze, as orange-peel, over the surface of anything. *Imp. Diet.*

zeta¹ (zē'tā), *n.* [*Gr. ζήτα*, the letter z, ζ; see *Z, zed*.] The sixth letter of the Greek alphabet, corresponding to the English Z.—**Zeta function,** one of a series of functions connected with elliptic integrals of the second kind, and derived from Jacobi's zeta function, *Zu*, which differs only by a multiple of *u* from *fd₂u.du*, so that

$$Zu + Zv - Z(u + v) = k^2 \sin u. \sin v. \text{ an } (u + v).$$

zeta² (zē'tā), *n.* [*< LL. zeta* for *dieta*, a chamber, dwelling, < *Gr. διαίτα*, way of living, mode of life, dwelling; see *diet*.] A little closet or chamber: applied by some writers to the room over the porch of a Christian church where the porter or sexton lived and kept the church documents. *Britton.*

zetetic (zē-tet'ik), *a. and n.* [*< Gr. ζητητικός*, < *ζητέω*, seek, inquire.] 1. *a.* Proceeding by inquiry; seeking.—**The zetetic method, in math.**, the analytical method used in endeavoring to discover the value of unknown quantities or to find the solution of a problem. [Rare.]

II. *n.* A seeker: a name adopted by some of the Pyrrhonists.

zetetics (zē-tet'iks), *n.* [*Pl. of zetetic* (see *-ics*).] That part of algebra which consists in the direct search after unknown quantities. [Rare.]

Zeutocœlomata (zūk'tō-sē-lō-mā-tā), *n. pl.* [NL., < *Gr. ζευκτός*, joined, + *κοίλωμα*, a hollow, cavity; see *caloma*.] Animals having a primitive archenteron in the embryo, with paired or yoked cœlomatic sacs or diverticula, as mollusks, worms, crustaceans, insects, and vertebrates: more fully called *Metazoa zeutocœlomata*. *A. Hyatt.*

zeutocœlomatic (zūk-tō-sē-lō-mat'ik), *a.* [*< Zeutocœlomata + -ic*.] Of or pertaining to the *Zeutocœlomata*.

zeutocœlomic (zūk'tō-sē-lō-m'ik), *a.* Same as *zeutocœlomatic*.

zeugite (zū'gīt), *n.* See *zygite*.

Zeuglodon (zūg'lō-don), *n.* [NL. (Owen), < *Gr. ζεύγω*, the strap or loop of a yoke (< *ζευγνύω*, yoke, join), + *ὀδούς* (ὀδοντ-) = *E. tooth*.] 1. The typical genus of the family *Zeuglodontidae*. Several species have been described from the Eocene of the United States and of England, as *Z. cetoides* of the former country, said to have attained a length of 70 feet. The genus had before been named *Basilosaurus* by Harlan, on the supposition that these fossils were reptiles, and has also been called *Hydrochous* (by Koch), *Polypthychodon* (by Emmos), *Phocodon*, and *Zygodon*. See cut under *Zeuglodontia*.

2. [*l. c.*] A member of this genus; a zeuglodon.

zeuglodon (zūg'lō-dont), *a. and n.* [As *Zeuglodon* (*t*).] 1. *a.* Having teeth (apparently) yoked in pairs; having the characters of, or pertaining to, the *Zeuglodontia*.

II. *n.* A fossil cetacean of the suborder *Zeuglodontia*; a zeuglodon.

Zeuglodontia (zūg-lō-don'shi-ä), *n. pl.* [NL.; see *Zeuglodon*.] A suborder of *Cete* or *Cetacea*, represented by the zeuglodonts: sometimes made to consist of two families, the *Basilosauridae* (or *Zeuglodontidae*) and *Cymoriceae*. The intermaxillaries were expanded forward, normally interposed between the maxillaries, forming the terminal as well as anterior margin of the upper jaw; and the nasal apertures were produced forward, with freely projecting nasal bones. The teeth of the intermaxillaries were conic, and those of the maxillaries were two- or three-rooted. Also called *Phocodontia* and *Archæoceti*. Also *Zeuglodontes*.

Zeuglodontidæ (zūg-lō-don'ti-dē), *n. pl.* [NL., < *Zeuglodon* (*t*) + *-idæ*.] A family of fossil toothed cetaceans, typified by the genus *Zeuglodon*, and representative of the *Zeuglodontia*. These primitive cetaceans in some respects approached the seals, or pinniped mammals, and some of the characters of the fragmentary remains first discovered caused them to be mistaken for reptiles. Also called *Basilosauridæ*. See cut under *Zeuglodontia*.

zeuglodontoid (zūg-lō-don'toid), *a. and n.* [As *Zeuglodon* (*t*) + *-oid*.] Same as *zeuglodon*.

zeugma (zūg'mā), *n.* [*< Gr. ζεύγω*, lit. a yoking, < *ζευγνύω*, yoke, join; see *yoke*, *join*.] 1. A figure in grammar in which two nouns are joined to a verb suitable to only one of them, but suggesting another verb suitable to the other noun; or in which an adjective is similarly used with two nouns.—2. [*cap.*] [NL.] In *entom.*, a genus of hemipterous insects. *Westwood.*

zeugmatic (zūg-mat'ik), *a.* [*< zeugma* (*t*) + *-ic*.] Pertaining to, or of the nature of, *zeugma*.

Zeugobranchia (zū-gō-brang'ki-ä), *n. pl.* [NL., < *Gr. ζεύγω*, yoke, + *βράγχια*, gills.] Same as *Zygobranchiata*.

Zeugophora (zū-gōf'ō-rā), *n.* [NL. (Kunze, 1818), < *Gr. ζεύγω*, a yoke, + *-φορος*, < *φέρω* = *E. bear*.] A genus of leaf-beetles, of the family *Chrysomelidae*, having a lateral prothoracic tubercle and emarginate eyes. The geographical distribution of this genus is remarkable, for of the 20 or more species known two are found in Ceylon and farther India, while the rest are North European and North American.

zeunerite (zēr'nēr-it), *n.* [Named after Director *Zeuner*, of Freiberg.] A hydrous arseniate of copper and nranim, occurring in bright-green tetragonal crystals, isomorphous with *torbernite*.

Zeus (zūs), *n.* [*< Gr. Ζεύς* (gen. *Διός*, also *Ζηνός*) = *L. Jovis* (gen.), *Ju-piter*, etc.: see *Jove*, *Jupiter*, *deity*.] 1. In *Gr. myth.*, the chief and master of the gods, the supreme deity, omnipres-

eut and all-powerful, generally looked upon as the son of Kronos and Rhea, and held to have dethroned and succeeded his father. In a narrower sense, he was the god of the heavens, and controlled all celestial phenomena, as rains, snows, and tempests, heat and cold, and the lightning. His consort was Hera. Zeus was worshiped universally; but the most renowned of his sanctuaries were those of Olympia in Elis and Dodona in Epirus. In art Zeus was represented as a majestic and powerful figure, with full beard and flowing hair, in early works sometimes fully draped, but in later art, in general, only lightly draped in the himation. The type fixed by Phidias in the second half of the fifth century B. C., in his great chryselephantine statue for the temple at Olympia, influenced all artists who came after him. The usual attributes of the god are a long staff or scepter, the thunderbolt, the eagle, and sometimes a figure of Victory borne on one hand. The head is generally encircled by a fillet or a wreath; in later sculptures the hair rises from the brow in luxuriant locks like a crown, and falls in masses on either side of the face. Compare *Jupiter*. See cut on preceding page, and cut under *thunderbolt*.

2. [NL. (Linnæus, 1758).] In *Ichth.*, a genus of acanthopterygian fishes, typical of the family *Zenidae*. It includes several fishes of remarkable appearance, as the John-dory, *Z. faber*, well known in classic times. See cut under *dory*, 1.

Zeuzera (zū-zē'ra), *n.* [NL. (Latreille, 1805): a corrupt form of unascertained origin.] A genus of bombycid moths, of the family *Cossidae*, or typical of a family *Zeuzeridae*, having the antennæ of the male unequally pectinate and bare at the tips. The genus has a wide distribution, and comprises about 30 species. *Z. pyrina*, the wood-leopard, is common to Europe and the United States; its larva bores into the branches of the elm, maple, linden, ash, and many other trees.

zeuzerian (zū-zē'ri-an), *a.* and *n.* [*Z. Zeuzera* + *-ian*.] **I. a.** Resembling or related to a moth of the genus *Zeuzera*; of or pertaining to the *Zeuzeridae*.

II. n. A moth of this genus or family. **Zeuzeridae** (zū-zē'ri-dē), *n. pl.* [NL. (Newman, 1833), < *Zeuzera* + *-idae*.] A family of bombycid moths, founded on the genus *Zeuzera*: synonymous with *Cossidae*. Also *Zeuzerides* and *Zeuzeridi*.

zeylanite (zē'lan-it), *n.* Same as *ceylonite*. **zibeline** (zib'e-lin), *n.* and *a.* [F., < It. *zibellino*, < ML. *sabellinus*, < *sabellum*, sable; see *sable*.] **I. n.** A fur, generally thought to be the same as *sable*.

II. a. Of, pertaining to, or related to the *sable*, *Mustela zibellina*. See *sable*.

In 1188 or thereabout no person was allowed to wear garments of vair, gray, *zibeline*, or scarlet color. W. A. Hammond, in Pop. Sci. Mo., XXXVII. 34.

zibet (zib'et), *n.* [See *civet*.] A digitigrade carnivorous quadruped, of the family *Ferridae*, *Viverra zibetha*, a kind of civet found in India and some of the adjacent islands; the Asiatic or Indian civet. It secretes an odoriferous substance like that of other civets, and when tamed in the countries where it is found it lives in the houses like a domestic cat. The zibet is upward of 2 feet long, the tail about 10 inches. The form resembles that of other civets, and the fur is similarly marked in spots and lines of black and white, with rings of the same on the tail. It is sometimes reared for its civet in establishments conducted for that purpose. Also *zibeth*.

zibetum (zib'e-tum), *n.* [NL., < *zibet*.] The odoriferous substance of the zibet; a sort of civet.

ziczac, *n.* See *sicsac*.

ziega (zē'gā), *n.* Curd produced from milk by adding acetic acid after rennet has ceased to cause coagulation. *Brande and Cox*.

Zieria (zēr'i-ā), *n.* [NL. (Sir J. E. Smith, 1798), named after J. Zier, member of the Linnean Society of London.] A genus of polyptetalous plants, of the order *Rutaceæ* and tribe *Boroniceæ*. It is characterized by opposite leaves usually of three leaflets, and flowers with four spreading free petals, and four stamens inserted on the glands of the disk. They are shrubs and trees, sometimes warty or covered with woolly or stellate hairs, bearing petioled glandular-dotted leaves, which are trifoliate or the upper ones sometimes undivided. The small white flowers are usually grouped in axillary or terminal panicles. There are 7 species, perhaps 10, all Australian. *Z. Smithii* (*Z. lanceolata*), a shrub or small tree found also in Tasmania, is known as *sandy-bush* and, from the fetid wood, as *stinkwood*.

Ziervogel's process. See *process*.

zietrisikite (zē-tri-sē'kit), *n.* [*Zietrisika* (see *def.*) + *-ite*.] In *mineral*, a mineral resin closely related to ozocerite, found at Zietrisika in Moldavia.

Zif (zif), *n.* [*Heb. Zif*.] A Hebrew month: same as *Iyar*. 1 Ki. vi. I [*Ziv*, R. V.].

Ziffus (zif'us), *n.* A misspelling of *Xiphias*.

Huge *Ziffus*, whom Mariners eschew. *Spenser*, F. Q., II. xii. 24.

ziganka (zi-gan'kā), *n.* [Russ.] **1.** A Russian country-dance.—**2.** Music for such a dance, which is quick in pace and usually founded on a drone-bass.

zigzackt, *n.* See *zigzag*.

zigzag (zig'zag), *n.* and *a.* [Formerly also *zig-zack*; < F. *zigzag*, < G. *zickzack*, *zigzag*, a varied redupl. of *zacke*, a sharp point, prong, tooth, dentil; see *tack*. Cf. G. *zickzack segeln*, 'sail zigzag,' *tack*.] **I. n.** **1.** A sharp turning back and forth or in and out; an irregular, abrupt angulation; one of a series of sharp turns in a linear or curvilinear course: nearly always in the plural.

Cracks and *zigzags* of the head. *Pope*, *Dunciad*, i. 124.

I looked wistfully, as we rattled into dreary Andermatt, at the great white *zigzags* of the Oberalp road climbing away to the left. *H. James, Jr.*, *Trans. Sketches*, p. 248.

2. A formation with a succession of sharp turnings or angles; something that has a number of abrupt angulations, like those of chain-lightning.

A *zigzag* . . . will be seen to be simply a twill worked backwards and forwards. *A. Barlow*, *Weaving*, p. 99.

Long brown kaftans, upon the breasts of which had been sewn *zigzags* of red cloth. *G. Kennan*, *The Century*, XXXVIII. 69.

Specifically—(a) A winding path with sharp turns, as up the side of a steep mountain.

How proudly he talks
Of *zigzags* and walks!
Swift, *My Lady's Lamentation*.

(b) In *fort.*, a trench of approach against a fortress, so constructed that the line of trench may not be enfiladed by the defenders: same as *boyau*. (c) In *arch.*, same as *chevron*, 2. (d) In the *fisheries*, a salmon-stair or fish-way.

3. In *entom.*, a British moth, *Bombyx dispar*.—**Billet** and **zigzag**. See *billet*.

II. a. Having sharp and quick turns or flexures; turning frequently back and forth; in *bot.*, angularly bent from side to side.

The road is steep and runs on *zigzag* terraces. *Longfellow*, *Hyperion*, iii. 2.

I went through the *zigzag* passages [of a sap]. *J. K. Hosner*, *The Color-Guard*, xiv.

Zigzag molding, in *arch.* See *chevron*, 2, *dancette*, 2.

zigzag (zig'zag), *adv.* [*Zigzag*, *a.*] In a *zigzag* manner; with frequent sharp turns.

We patrolled about, *zig-zag*, as we could; the crowd . . . having no chief or regulator. *Mme. D'Arbly*, *Diary and Letters*, IV. 235.

What you, Reader, and I
Would call going *zig-zag*.
Barham, *Ingoldsby Legends*, II. 173.

zigzag (zig'zag), *v.*; pret. and pp. *zigzagged*, ppr. *zigzagging*. [*Zigzag*, *n.*] **I. intrans.** To move or advance in a *zigzag* fashion; form *zigzags* in a course; turn sharply back and forth.

It was only by *zigzagging* in the most cautious manner . . . that we avoided getting floated altogether. *O'Donovan*, *Merv*, xv.

Dread, uncanny thing,
With fuzzy breast and leathern wing;
In mad, *zigzagging* flight.
J. W. Riley, *The Bat*.

II. trans. To form in *zigzags*, or with short turns or angles. *T. Warton*.

zigzagery (zig'zag-ēr-i), *n.* [*Zigzag* + *-ery*.] The character of being *zigzag*; angular crookedness. [Rare.]

When my uncle Toby discovered the transverse *zigzagery* of my father's approaches towards it [his coat-pocket], it instantly brought into his mind those he had done duty in before the gate of St. Nicholas. *Sterne*, *Tristram Shandy*, iii. 3.

zigzaggy (zig'zag-i), *a.* [*Zigzag* + *-y*.] Having sharp and quick turns; *zigzag*.

The *zigzaggy* pattern by Saxons invented
Was cleverly chisel'd, and well represented.
Barham, *Ingoldsby Legends*, II. 295.

zillah (zil'ā), *n.* [Hind.] In Hindustan, an administrative division of a province.

zimb (zim'b), *n.* [Ar. *zimb*, a fly.] A dipterous insect of Abyssinia, resembling and related to the tsetse of southern Africa, and very destructive to cattle.

zimbi (zim'bi), *n.* [E. Ind.] A money-cowry, as *Cypræa moneta*. See cut under *cowry*.

The cowry shells, which, under one name or another—*chamgos*, *zimbis*, *boiges*, *porcelanes*, etc.—have long been used in the East Indies as small money. *Jevons*, *Money and Mech.* of Exchange, p. 24.

ziment-water (zi-ment'wā'tēr), *n.* [After G. *ziment*, *ceiment-wasser*, 'cement-water,' cf. *ceimentkupfer*, copper deposited in water.] Water found in copper-mines; water impregnated with copper.

Zimmermann's corpuscles, **Zimmermann's particles**. Blood-plates.

zimocca (zi-mok'ā), *n.* A kind of commercial sponge, *Euspongia zimocca*, a bath-sponge of fine quality.

zimome, *n.* See *zymome*.

zinc (zingk), *n.* [Also sometimes *zink*, the spelling *zinc* being after the F. forms of the original; < F. *zinc* = Sw. Dan. *zink* = Russ. *tsinkū* (NL. *zincum*), < G. *zink*, *zine*; connection with G. *zinn*, = E. *tin*, is doubtful.] Chemical symbol, Zn; atomic weight, 65.4. One of the useful metals, more tenacious than lead and tin, but malleable only at a temperature between 200° and 250° F. Its ore has long been known, and the manufacture of brass from it has been practised to a considerable extent. Zinc is believed to have been first distinctly recognized as a metal by Paracelsus about the beginning of the seventeenth century; but in the metallic state it has been of importance in the arts only since the beginning of the present century. Native zinc is not positively known to occur; if existing at all, it is exceedingly rare. Its ores, however, are widely disseminated, especially the combination with sulphur, called *blende*, which is almost as invariably present in greater or less quantity in metalliferous veins as is *galena*. The localities where zinc ore are abundant enough to be worked with profit are, however, not numerous. The uses of zinc are numerous and important. In combination with copper it forms the well-known alloy called *brass*, which has been known for an indefinite period; it is also one of the ingredients of German silver. Zinc is largely used in the metallic form for roofing and for cornices and the like, also for coating or "galvanizing" sheet-iron to protect it from rusting, and as the electropositive element in many batteries. It is also somewhat extensively used as a paint, in the form of the oxide. This metal is usually a little more expensive than lead, and from half to a third as valuable as copper. Zinc belongs to the magnesium group of metals, in which are comprised glucinum, magnesium, zinc, and cadmium; these are all volatile, burning with a bright flame when heated in the air; they all form one chlorid and one oxide only. The common commercial name of zinc, as offered for sale in flat cakes or ingots, is *spelter*.—**Butter of zinc**. See *butter*.—**Chlorid-of-zinc paste**. See *paste*.—**Flowers of zinc**, *zinc oxide*.—**Granulated zinc**, zinc reduced to the form of granules by pouring the molten metal into water.—**Oleate-of-zinc ointment**. See *ointment*.—**Precipitated carbonate of zinc**. See *precipitate*.—**Red oxide of zinc**, *red zinc ore*. Same as *zinkite*.—**Ruby of zinc**. See *ruby*.

—**Zinc ash**, the impure gray oxide formed when zinc is heated in contact with air.—**Zinc caustic**, a mixture of 1 part of zinc chlorid to 2 or 3 of flour.—**Zinc cement**, a cement composed of zinc oxide made into a paste with a solution of zinc chlorid. It hardens quickly, and may be used for stopping teeth and for other purposes. A cheaper form of zinc cement is made from commercial zinc white mixed with an equal weight of fine sand and made into a paste with a solution of zinc chlorid, and is used to fill cracks in metallic apparatus, and to cement glass, crockery, etc. *E. H. Knight*.—**Zinc colloid**, a solution of 4 parts of zinc sulphate in 100 parts of styptic colloid.—**Zinc green ointment**, **plaster, soap, white**. See the nouns.—**Zinc-oxide ointment**. See *ointment*.

zinc (zingk), *v. t.*; pret. and pp. *zincbed*, ppr. *zincing*. [*Zinc*, *n.*] To coat or cover with zinc.

All the conditions under which the *zincbed* pipe is to be used should be carefully considered. *Jour. Franklin Inst.*, CXXX. 401.

zinc-amyl (zingk'am'il), *n.* A colorless transparent liquid, Zn(C₅H₁₁)₂, composed of zinc and amyl. When exposed to the air it absorbs oxygen rapidly, emitting fumes, but does not take fire spontaneously.

zinc-blende (zingk'blend), *n.* Native sulphid of zinc; sphalerite. Also called simply *blende*.

zinc-bloom (zingk'blōm), *n.* Same as *hydro-zinkite*.

zinc-colic (zingk'kol'ik), *n.* A form of colic thought to be caused by zinc-oxide poisoning.

zinc-ethyl (zingk'eth'il), *n.* A colorless volatile liquid, Zn(C₂H₅)₂, having a peculiar but not unpleasant smell, composed of zinc and the radical ethyl. It has powerful affinities for oxygen, igniting spontaneously on exposure to air. It is formed by heating zinc with ethyl iodide under pressure. *Brande and Cox*.

zincic (zin'sik), *a.* See *zincic*.

zinciferous, **zincification**, **zincify**, **zincite**. See *zinkiferous*, etc.

zinckenite (zing'ken-it), *n.* [Named after J. K. L. *Zincken* (1790–1862), a German metallurgist, mineralogist, and mining official.] A steel-gray mineral consisting of the sulphids of antimony and lead.

zincic (zing'kik), *a.* [*Zinc* (*zink*) + *-ic*.] Related to, containing, or consisting of zinc. Also *zincic*.

zinciferous (zing-kif'g-rus), *a.* See *zinkiferous*.

zincing (zingk'ing), *n.* [Verbal *n.* of *zinc*, *v.*] The act of coating iron with a weak solution of sulphate of zinc, or one of the double salts of chlorid of zinc and salt ammoniac.

zincite, *n.* See *zinkite*.

zinky, *a.* See *zinky*.

zinc-methyl (zingk'meth'il), *n.* A disagreeable-smelling mobile liquid, Zn(CH₃)₂, fuming in the air and readily igniting.

zinc (zing'kō), *n.* [Short for *zincograph*.] A plate in relief for printing, made by etching with acid a design on prepared zinc. [Eng.]

zinc (zing'kō), *v. i.* [*< zinc*, *n.*] To etch with acid a zinc plate containing on its surface a design intended for printing by typographic methods. [Eng.]

Drawings Wanted (on litho paper for *zincing*) for a Provincial Journal. *Athenæum*, No. 3235, p. 591.

zincode (zing'kōd), *n.* [*< NL. zincum*, *zinc*, + *Gr. ödōs*, way (cf. *anode*, *cathode*).] The negative pole of a voltaic battery; the anode of an electrolytic cell.

zincograph (zing'kō-gráf), *n.* [See *zincography*.] A plate or a picture produced by zincography. Also *zincotype*.

Reproduced in *zincograph* by the aid of photography. *Edinburgh Rev.*, CXLV, 231.

zincograph (zing'kō-gráf), *v. t.* [*< zincograph*, *n.*] To transfer a design to the surface of a zinc plate with intent to etch it and make therefrom a plate in relief.

zincographer (zing-kog'ra-fēr), *n.* [*< zincograph-y* + *-er*.] One who makes zincographic plates.

zincographic (zing-kō-gráf'ik), *a.* [*< zincograph-y* + *-ic*.] Relating to zincography.

zincographical (zing-kō-gráf'i-kál), *a.* [*< zincographic* + *-al*.] Same as *zincographic*.

zincography (zing-kog'ra-fī), *n.* [*< NL. zincum*, *zinc*, + *Gr. -γραφία*, *< γραφειν*, write.] The art of producing on zinc a printing surface in relief by etching with dilute acid the unprotected parts of the plate. Compare *paniconography*.

zincoid (zing'koid), *a.* [*< NL. zincum*, *zinc*, + *Gr. είδος*, form.] Of, pertaining to, or resembling zinc.—**Zincoid pole** of a voltaic cell, the negative pole, or zincode, constituted by the zincous plate connected with a copper plate which forms the positive pole; the anode of an electrolytic cell. See *chlorous pole*, under *chlorous*.

zincolysis (zing-kol'is-sis), *n.* [*< NL. < zincum*, *zinc*, + *Gr. λύσις*, dissolving.] A mode of decomposition occasioned by an electrical current; electrolysis.

zincolyte (zing'kō-lit), *n.* [*< NL. zincum*, *zinc*, + *Gr. λύσις*, verbal adj. of *λύειν*, dissolve.] A body decomposable by electricity; an electrolyte.

zincopolar (zing'kō-pō'lār), *a.* [*< NL. zincum*, *zinc*, + *E. polar*.] Having the same polarity as the zinc plate in a galvanic cell.

zincotype (zing'kō-tip), *n.* [*< NL. zincum*, *zinc*, + *Gr. τύπος*, type.] Same as *zincograph*.

The two volumes are copiously illustrated by a *zincotype* process. *Athenæum*, No. 3233, p. 492.

zincous (zing'kus), *a.* [*< zinc* + *-ous*.] Pertaining to zinc, or to the negative pole of a voltaic battery.—**Zincous element**, the basic or primary element of a binary compound.—**Zincous pole**, that pole of a particle of zinc, or of hydrochloric acid, which has the attraction or affinity which is characteristic of zinc, or the zincous attraction.

zinc-plating (zingk'plā'ting), *n.* Plating in zinc, executed with a preparation made of coarse rasped or granulated zinc boiled in a mixture of sal ammoniac and water. The deposit has a silvery brightness, and can be used as a first coat for articles to be twice plated, since any other metal can be deposited upon zinc. *E. H. Knighl.*

zinc-salt (zingk'sált), *n.* A salt of which zinc is the base.

zinc-spinel (zingk'spin'el), *n.* Same as *gahnite*.

zinc-vitriol (zingk'vit'ri-ol), *n.* In *chem.*, zinc sulphate; white vitriol ($ZnSO_4 + 7H_2O$). It is found as a native mineral (goslarite), as a product of the oxidation of zinc-blende, and can also be prepared by dissolving zinc in dilute sulphuric acid, and by roasting native zinc sulphuret. It is used as a dryer in oil-paints and varnishes, as a mordant in dyeing, as a disinfectant, and sometimes as a source of oxygen.

Zingaro, Zingano (zing'ga-rō, -nō), *n.*; pl. *Zingari, Zingani* (-rē, -nē). [It.: see *Gipsy*.] A Gipsy.

zingel (zing'el), *n.* [G.; cf. *wanzingeln*, encircle (see *ingle*).] A fish of the family *Percidæ* and

zinghot, *n.* [Appar. intended for *zinc*, It. form of *zinc*.] Same as *zinc*.

For cobolt and *zingho*, your brother and I have made all inquiries. *Walpole*, To *Mann*, July 31, 1743.

Zingian (zin'ji-an), *a.* and *n.* A name sometimes given to the South African family of tongues: same as *Bantu*.

Zingiber (zin'ji-bér), *n.* [NL. (Adanson, 1763; used earlier by Lobel, 1576, and as *Gingiber*, by Mattioli, about 1554), *< L. zingiber*, *< Gr. ζγγίβρις*, ginger; see *ginger*.] A genus of plants, type of the order *Zingiberaceæ* and of the tribe *Zingiberæ*. It is characterized by a cone-like inflorescence, each flower having a three-celled ovary and a stamen composed of a short filament and an anther with contiguous cells having the connective extended into a long linear appendage—the two lateral stamens either absent or represented by two small adnate staminodes. About 33 species have been described, of which perhaps 23 are distinct. They are natives of India and of islands of the Pacific and Indian Oceans. They are leafy plants with horizontal tuberous rootstocks, the sterile stems differing from the flower-bearing ones. The dense cone of flowers is composed of imbricated bracts, each with from one to three flowers and spatheous bractlets. The inflorescence is sometimes borne on a leafless scape, more or less covered with sheaths, in other species terminating a leafy stem, or apparently lateral upon a recurved peduncle. Each flower produces a membranous or hyaline tubular calyx, and a cylindrical corolla-tube dilated into narrow spreading lobes, the posterior one erect and incurved. The fruit is a globose or oblong capsule, finally irregularly ruptured, and discharging rather large oblong seeds with a lacerate aril which is sometimes much larger than the seed. The pungently aromatic roots of several species are the source of the ginger of commerce, especially those of *Z. officinale*, the ginger-plant of India (see cut under *ginger*). The root of *Z. Cassiniana*, of India, is used as a tonic and stimulant, and is cultivated under the name of *casuarinar ginger* or *Bengal root*. Also *Zingber*.

Zingiberaceæ (zin'ji-be-rā'sē-ē), *n. pl.* [NL. (Richard, 1808), *< Zingiber* + *-acæ*.] An order of monocotyledonous plants, of the series *Epigynæ*, distinguished from the order *Musacæ* by its single perfect stamen. It is characterized by irregular flowers with distinct calyx and corolla, inferior ovary, usually arillate seeds, and an embryo in a canal in the center of the albumen. There are over 470 species, of 36 genera, classed in 3 tribes, of which *Zingiber*, *Maranta*, and *Canna* are the types. They are perennial tropical herbs growing from a horizontal thickened rootstock, their leaves chiefly radical, large and ornamental, with numerous parallel veins diverging obliquely from the midrib. Their flowers are often of great beauty, as in species of *Hedyotis*, *Alpinia*, *Curcuma*, *Kaempferia*, and *Canna*; in many, especially *Mantisia*, they resemble orchids. They have a strong tendency to petaloid development, producing richly colored bracts in *Curcuma*; three petaloid staminodes and two scales usually represent the five imperfect stamens. The order contains many of the most stimulating aromatics, products derived chiefly from the root or rhizome of the plants ginger, galangale, and zedoary, of the genera *Zingiber*, *Alpinia*, and *Curcuma*; also from the fruit or seeds, as cardamoms and grains-of-paradise, from species of *Annonum* and *Elettaria*. The order also yields the valuable dye turmeric from *Curcuma*, a purple dye from *Canna*, and arrowroot from *Maranta* and *Curcuma*. The mucilaginous juice of species of *Costus* is used in medicine; edible tubers are produced by species of *Maranta*, an edible fruit by *Glozza*, and a tough fiber by *Phrymum* and *Calathea*. Also *Zingiberaceæ*.

zingiberaceous (zin'ji-be-rā'shi-us), *a.* Of or pertaining to ginger, or the *Zingiberaceæ*.

Zingiberæ (zin-ji-bē'rē-ē), *n. pl.* [NL. (Bentham and Hooker, 1883), *< Zingiber* + *-æ*.] A tribe of plants, of the order *Zingiberaceæ*, typified by the genus *Zingiber*. It is characterized by flowers with a tubular or spatheous calyx and a single stamen, the two lateral undeveloped stamens being often represented by petaloid staminodes; and by an ovary with three cells or three parietal placentae, and a slender free style which at its apex clasps the two anther-cells. It embraces 23 genera, principally tropical, including the large and important aromatic genera *Annonum*, *Curcuma*, and *Alpinia* (besides *Zingiber*), as also many of the most highly ornamental plants of the order.

zink, *n.* See *zinc*.

zinke (tsing'ke), *n.* [G. *zinke*, a cornet.] A small cornet of wood or horn, once very common in Germany. It had usually seven finger-holes, and a cupped mouthpiece. It was made in several sizes, and both straight and curved. The serpent is properly a development of the old zinke or cornetto.

zinkiferous (zing-kif'e-rus), *a.* [Also *zinciferous*, *zackiferous*; *< zinc* (*zink*) + *L. ferre* = *E. bear*.] Containing or producing zinc: as, *zinkiferous ore*.

zinkification (zing'ki-fi-kā'shon), *n.* [Also *zincification*; *< zinkify* + *-ation* (see *-fy*).] The process of coating or impregnating an object with zinc, or the state resulting from such process.

zinkify (zing'ki-fi), *v. t.*; pret. and pp. *zinkified*, pp. *zinkifying*. [Also *zincify*; *< zinc* (*zink*) + *L. facere*, *< facere*, make.] To cover or impregnate with zinc.

zinkite (zing'kit), *n.* [Also *zincite*, *zincite*; *< zinc* (*zink*) + *-ite*.] A native oxid of zinc, found at Franklin Furnace and Stirling Hill, near Ogdenburg, in Sussex county, New Jersey. It is

brittle, translucent, of a deep-red color, sometimes inclining to yellowish. Also called *red zinc ore*, or *red oxid of zinc*.

zinky (zing'ki), *a.* [Also *zincy*; *< zinc* (*zink*) + *-y*.] Pertaining to zinc; containing zinc; having the appearance of zinc.

The *Zincy Ores* [of common galena] are said to be greyer than other Ores. *Kirwan*, *Mineralogy* (1766), II, 218.

Zinnia (zin'i-ä), *n.* [NL. (Linnaeus, 1763), named after J. G. Zinn (1727-59), who wrote on the plants of Göttingen.] 1. A genus of composite plants, of the tribe *Helianthoidæ*, type of the subtribe *Zinnieæ*. It is characterized by solitary radiate flower-heads with a conical or cylindrical receptacle, the flowers both of the disk and ray being fertile, and those of the ray almost or quite without a tube, and persistent upon the ripened achene; the achenes of the inner flowers each bear from one to three awns. There are 12 species, natives of Mexico, Texas, and Arizona, 2 of which, long cultivated in gardens, are now widely naturalized. They are annuals, perennials, or sometimes shrubby plants, bearing opposite entire leaves and rather large and showy flower-heads peduncled at the ends of the branches or in the forks between them. Five species occur within the United States, mostly with light-yellow or sulphur-colored rays. The cultivated species are chiefly of various shades of deep red; they have been called *youth-and-old-age*, from the lasting and somewhat rigid rays and the continued production of new disk-flowers; but are more usually known by the generic name *zinnia*, especially in the common double form. 2. [l. c.] A plant of this genus.

Zinn's corona. An arterial plexus about the optic nerve, in the sclerotic.

Zinn's ligament. See *ligament of Zinn*, under *ligament*.

Zinn's membrane. The anterior lamella of the iris of the eye.

Zinn's zonule. See *zonule of Zinn*, under *zonule*.

zinnwaldite (zin'wol-dit), *n.* [*< Zinnwald* (see *def.*) + *-ite*.] A kind of mica related to lepidolite, but containing both lithium and iron: it is often found associated with tin ores, as at Zinnwald in the Erzgebirge.

Zinzier, Zinzieraceæ, etc. Same as *Zingiber*, etc.

Zion (zi'on), *n.* [Also *Sion*, J.L. *Sion*, *Gr. Ζιών*, Heb. *Tsiyōn*, orig. a hill.] Figuratively, the house or household of God, as consisting of the chosen people, the Israelites; the theocracy, or church of God; hence, the church in general, or heaven as the final gathering-place of true believers: so called from Mount Zion, the holy hill of Jerusalem, the center of ancient Hebrew worship.

Zion spreadeth forth her hands, and there is none to comfort her. *Lam. i. 17.*

Let *Zion* and her sons rejoice. *Watts.*

Zionward (zi'on-wārd), *adv.* [*< Zion* + *-ward*.] Toward *Zion*, in the figurative sense; toward the goal of salvation; heavenward.

If I were like you, I should have my face *Zionward*, though prejudice and error might occasionally fling a mist over the glorious vision before me. *Charlotte Brontë*, in *Mrs. Gaskell*, viii.

zip (zip), *n.* [Imitative.] The sound of a bullet passing through the air or striking against an object.

The ping, zip, zip, of bullets, and the wounded men flumping from the front, . . . were a prelude to the storm to come. *The Century*, XXX, 134.

Ziphiidæ (zi-fi'i-dē), *n. pl.* [NL., *< Ziphius* + *-idæ*.] The *Ziphiinæ* rated as a family apart from *Physeteridæ*, and divided into *Ziphiinæ* and *Anarucinæ*. Also, more properly, *Xiphiidæ*.

ziphiiform (zif'i-i-fōrm), *a.* Same as *ziphioid*.

Ziphiinæ (zif-i-i'nē), *n. pl.* [NL., prop. **Xiphiinæ*; *< Ziphius* + *-inæ*.] A subfamily of *Physeteridæ*, named from the genus *Ziphius*, often elevated to the rank of a family; the ziphioid or

Bottle-nosed Whale (*Ziphius cowerbiensis*), one of the *Ziphiinæ*.

ziphiiform cetaceans, among those known as *bottlenoses* and *cow-fishes*. They have most of the lower teeth rudimentary or concealed, a distinct lacrimal bone, and a prolonged snout or rostrum above which the rest of the head rises abruptly in globose form; there is a small falcate dorsal fin; the flippers are small, with five digits; and the single median blow-hole is crescentic, as in dolphins. Several genera besides *Ziphius* have been recognized, of which *Hyperoodon* is the most prominent; but their synonyms are involved, and some distinctions which have been drawn are not clear.

Zingel (*Aspro zingel*).

genus *Aspro*; specifically, *A. zingel* of the Danube and its tributaries. This fish is sometimes a foot long, and is of a greenish-brown color, lighter on the side and whitish on the belly, and marked with four brownish-black bands.

ziphoid (zif'i-oid), *a.* and *n.* **I.** *a.* Resembling or related to a cetacean of the genus *Ziphius*.

II. *n.* Any member of the *Ziphiidae* or *Ziphiinae*.

Also written *ziphoid*.

ziphisternum, *n.* See *ziphisternum*.

Ziphius (zif'i-us), *n.* [NL. (Cuvier, 1834), prop. *Ziphius*, < Gr. ζιφίος, the sword-fish, < ζήφος, a sword.] **1.** A genus of odontocete cetaceans, or toothed whales, taken as type of the *Ziphiinae*: used with varying restrictions, and in some acceptations synonymous with *Mesoplodon*. It was based originally on a skull discovered in 1804 on the coast of France, and supposed to be fossil; the species was named *Z. cavirostris* by Cuvier. Numerous living individuals have since been found in various seas. There is normally one conical tooth on each side of the lower jaw; the vertebrae are forty-nine in number; and the anterior cervicals are ankylated, but the posterior are free. These whales are among those known as *bottle-nosed whales* and *cow-fishes*, and attain a length of from 15 to 20 feet. The genus is distinct from *Hyperoodon*; but variations in the dentition have been noted, and the relations of some forms known as *Mesoplodon* are in question. Also called *Diodon*.

2. [*l. e.*] A whale of this genus.

Ziphorhynchus, *n.* See *Xiphorhynchus*.

zippeite (zip'e-it), *n.* [Named after F. X. M. Zippe, a German mineralogist.] A basic sulphate of uranium, occurring in delicate needle-like crystals of a bright-yellow color: it is found at Joachimsthal.

zircon (zér'kon), *n.* [Cf. Sp. *azarcon* = Pg. *azarcão*, *zarcão*, < Ar. *zarkūn*, cinnabar, vermilion, < Pers. *zargūn*, gold-colored; see *jargon*².] A mineral occurring in tetragonal crystals of adamantine luster and yellowish to brownish or reddish color: its hardness is somewhat greater than that of quartz. The reddish-orange variety is sometimes called *hyacinth* in jewelry. The colorless, yellowish, or smoky zircon of Ceylon is there called *jargon*. Zircon consists of the oxides of silicon and zirconium (SiO₂ZrO₂), and is usually regarded as a silicate of zirconium, though sometimes classed with the oxides of titanium (rutile) and tin (cassiterite), which have a similar form. See *zirconium*.

zirconate (zér'kō-nāt), *n.* [*zircon*(ic) + *-ate*¹.] A salt of zirconic acid.

zirconia (zér'kō-ni-ā), *n.* [NL., < *zircon*.] An oxid, ZrO₂, of the metal zirconium, resembling alumina in appearance. It is so hard as to scratch glass.—**Zirconia light**, an intensely brilliant light, differing from the ordinary oxyhydrogen light or lime-light only in that it is produced from zircon cones acted on by oxygen and a highly carburated gas, in place of the less durable lime balls of the other method.

zirconian (zér'kō-ni-an), *a.* [*zirconia* + *-an*.] Same as *zirconic*. *Pop. Sci. News*, XXIII, 60.

zirconic (zér'kon'ik), *a.* [*zirconia*, *zirconium*, + *-ic*.] Of, pertaining to, or containing zirconia or zirconium.—**Zirconic acid**, an acid containing zirconium, not capable of existing in the free state, but forming definite salts.

zirconite (zér'kon-it), *n.* [*zircon* + *-ite*².] A variety of zircon.

zirconium (zér'kō-ni-um), *n.* [NL., < *zircon*.] Chemical symbol, Zr; atomic weight, 90.5. The metal contained in zirconia. It is commonly obtained in the form of a black powder, but is also known in the crystalline state, forming highly lustrous blackish-gray laminae, having a specific gravity of 4.15. The amorphous metal takes fire when gently heated in the air, but the crystalline variety requires an intense heat for its ignition. The common acids do not attack it. Zirconium is a remarkable element in that it is very widely and generally diffused in nature, but nowhere, so far as is known, found in any one locality in large quantity; in this respect it has a decided resemblance to titanium. The form in which it occurs is that of the silicate (zircon), and usually in minute or even microscopic crystals, which have been detected in many granitic and syenitic rocks, as well as in various gneisses and crystalline schists. Zircon has been found also, but less abundantly, in some eruptive rocks, both ancient and modern. Zirconium is chemically most closely related to titanium, and both these metals have certain affinities with silicon, forming dioxides and volatile tetrachlorides, as does that non-metallic element.

zirconoid (zér'kō-neid), *n.* [*zircon* + *-oid*.] In *crystal*, a double eight-sided pyramid belonging to the tetragonal system: so called because it is a common form with zircon.

zircon-syenite (zér'kon-si'e-nit), *n.* See *elæolite-syenite*.

Z-iron (zē' or zed'ī'ern), *n.* See *angle-iron*.

Zirphæa (zér-fē-ā), *n.* [NL. (J. E. Gray, as *Zirphæa*).] In *conch.*, a genus of bivalves, of the family *Pholadidae*. *Z. crispata* is called *date-fish* in California, where it is available for food.

zither (zith'ēr), *n.* [*G. zither* = *E. cithar*, *cithara*, *q. v.*] Same as *cithern*.

zitherist (zith'ēr-ist), *n.* [*zither* + *-ist*.] A player on the cithern.

zithern (zith'ēr'n), *n.* [Altered form of *zither*, after *cithern* as related to *cithar*, *cithara*.] Same as *cithern*.

Zizania (zī-zā'ni-ā), *n.* [NL. (Linnaeus, 1753), < LL. *zizania*, pl. tares, < Gr. ζίζανιον, darnel, tare.] A genus of grasses, of the tribe *Oryzæe*.

It is characterized by numerous narrow unisexual spikelets in a long loose androgynous panicle, each spikelet having two glumes and six stamens or two more or less connate styles. Four or five species have been described, of which two, *Z. aquatica* and *Z. miliacea*, are usually considered distinct; both are natives of North America, the former also occurring in Japan and eastern Russia. They are tall aquatic grasses with long flat leaves and large terminal panicles with numerous slender elongated branches, made highly ornamental by the pendent red or purplish anthers. They are the favorite food of wild ducks, and the seeds are sold to plant in artificial fish-ponds to shade the young fish, and along watercourses to attract fowl. They are known as *wild water*, or *Indian rice*. See *Indian rice*, under *rice*¹.

Flowering Plant of *Zizania aquatica*.
a, branch of the panicle with male flowers;
b, branch of the panicle with female flowers;
c, male flower; d, female flower.

They all stand or fall to their own masters, and many holy and excellent persons God has dispersed, as wheat among the tares and *zizany*.

Evelyn, True Religion, II. 314.

Zizany (ziz'ā-ni), *n.* [*F. zizanie*, < LL. *zizania*; see *Zizania*.] Darnel.

They all stand or fall to their own masters, and many holy and excellent persons God has dispersed, as wheat among the tares and *zizany*.

Evelyn, True Religion, II. 314.

Ziziphora (zī-zif'ō-rā), *n.* [NL. (Linnaeus, 1753).] A genus of gamopetalous plants, of the order *Labiata* and tribe *Monardæe*. It is characterized by a tubular thirteen-nerved two-lipped calyx, with the throat villous within, and commonly closed after flowering by connivent teeth. There are about 12 species, natives of eastern and central Asia and of southern parts of the Mediterranean region. They are low annuals or spreading undershrubs, usually hoary with close hairs, and bearing small leaves which are nearly or quite entire. The flowers form small axillary clusters, commonly crowded upon the upper part of the stem.

Zizyphæ (zī-zif'ē-ē), *n. pl.* [NL. (Bentham and Hooker, 1862), < *Zizyphus* + *-æ*.] A tribe of polypetalous plants, of the order *Rhamnacæe*. It is characterized by a superior or half-superior ovary, by a disk filling the calyx-tube, and by a drupaceous juicy or fleshy fruit with a one- to three-celled stone. It includes 9 genera, of which *Zizyphus* is the type. They are shrubs or trees, mainly of the northern hemisphere; one, *Berberchemia*, becomes a shrubby climber in *B. volubilis*, the supple-jack of the southern United States.

Zizyphus (ziz'ī-fus), *n.* [NL. (Tournefort, 1700), < L. *zizyphus*, < Gr. ζίζυφος, the jujube-tree; see *jujube*.] A genus of polypetalous plants, of the order *Rhamnacæe*, type of the tribe *Zizyphæe*. It is characterized by thorny branches, triple-nerved leaves, and cymose flowers each with five petals, and by a usually two-celled ovary immersed in the disk, and bearing two or three conical divergent styles. There are 65 species, natives chiefly of tropical Asia and America, occurring rarely in Africa and Australia. They are shrubs or trees, often decumbent or sarmentose, commonly covered with hooked spines. The leaves are alternate, coriaceous, entire or crenate, three- to five-nerved, and mostly arranged in two ranks. One or both of the stipules are spinescent, often ending in a hook. The small greenish flowers form short few-flowered axillary cymes. The fruit is a globose or oblong drupe, with a woody or bony stone, containing one to three seeds. The species are known in general as *jujube-tree*; the name *jujube* is given especially to the fruit of *Z. sativa* (*Z. vulgaris*) of the Mediterranean region, which is there commonly eaten fresh, or used as a cough remedy when dried. *Z. Jujuba*, of India and China, also furnishes an excellent fruit, cultivated in numerous forms by the Chinese; a variety is known as the *Chinese date*. The true jujube does not now usually enter into the confection known as *jujube-paste*, but is commonly replaced by gum arabic or gelatin. *Z. Lotus*, the sadr, is one of the reputed sources of the classical lotus-fruit. (See *lotus-tree*, 1, and *lotus-tree*.) Many other species bear edible fruit, as *Z. Baobé*, of Africa, which is there made into bread and into a pleasant beverage; several are valued for ornament on account of their foliage, or for hedges on account of their spines, especially *Z. sativa*, and also *Z. Spina-Christi*, one of the Christ's-thorns (for which see *nebbak-tree*), *Z. nummularia*, of Persia and India, is known as *camel's-thorn* (which see). *Z. Chloroxydon*, a recently determined species, is an important timber-tree of Jamaica, there known as *cog-wood*. *Z. Parryi* occurs in southern California and Cerroa Island; two former species of Florida, *Z. emarginatus*, or black iron-wood, and *Z. Domingensis*, or naked-wood, are now known respectively as *Rhamnidium ferreum* and *Cotubrina rectinata*. See *jujube*, and cut under *nerivation*.

Zn. In *chem.*, the symbol for zinc.

zoa, *n.* Plural of *zoön*.

zoadula (zō-ad'ū-lā), *n.*; pl. *zoadulae* (-lē). [NL., < Gr. ζωή, life, + *-ād*² + *dim. -ula*.] In *bot.*, the locomotive spore of some *Confervæe*.

zoæa, zoæal. See *zoëa, zoëal*.

zoamylin (zō-am'i-lin), *n.* [*Gr. ζωή, life, + amylin*.] Same as *glycogen*.

Zoanthacea (zō-an-thā'sē-ā), *n. pl.* [NL., < *Zoanthus* + *-acea*.] A suborder of *Actiniaria*, containing permanently attached forms, as *Zoanthus* and related genera.

zoanthacean (zō-an-thā'sē-an), *a.* and *n.* [*zōanthacea* + *-an*.] **I.** *a.* Of or pertaining to the *Zoanthacea*; zoanthoid.

II. *n.* Any member of the *Zoanthacea*.

Zoantharia (zō-an-thā'ri-ā), *n. pl.* [NL. (De Blainville, 1830), < Gr. ζών, animal (see *zoön*), + *ἀνθος*, flower, + *-aria*.] A division (order or subclass) of *Actinozoa*, containing the hexamerous or hexacoralline forms; the helianthoid polyps, or animal-flowers, contrasted with the *Aleyonaria*, and characterized by the normal disposition of their soft parts in sixes, or multiples of six (not in eights, as in the *Aleyonaria* or *Otocoralla*), and by the possession of simple (not fringed) and usually numerous tentacles: so called from the resemblance of some of them, as the sea-anemones, to flowers. The *Zoantharia* correspond to the *Hexacoralla* or *Coralligena*, and were divided by Milne-Edwards into three suborders (or orders): *Malacodermata*, with the corallum absent or rudimentary, as in sea-anemones; *Sclerobasicea*, with external non-calcareous corallum, as the black corals of the family *Antipathidae*; and *Sclerodermata*, with internal calcareous corallum, as the ordinary hard corals, or stone-corals. See the technical names.

zoantharian (zō-an-thā'ri-an), *a.* and *n.* **I.** *a.* Having the characters of or pertaining to the *Zoantharia*.

II. *n.* A member of the *Zoantharia*, as a sea-anemone.

Zoanthidæ (zō-an'thi-dē), *n. pl.* [NL. (J. E. Gray, 1840), < *Zoanthus* + *-idæ*.] A family of zoantharian or hexacoralline actinozoans, typified by the genus *Zoanthus*. They are sea-anemones in which the individual polyps are ordinarily united by a common creeping stolon, or connective cœnosarc; they multiply by buds which remain thus adherent. They have no true corallum, but a pseudo-skeleton of hard particles or spicules embedded in the ectoderm; the mesenteric septa are numerous, and of two sorts (one small and sterile, the other large and perfect and furnished with reproductive organs), generally alternating. Like most other sea-anemones, these are fixed organisms, incapable of locomotion; and they include all the colonial forms. Also *Zoanthæe*.

Zoanthinæ (zō-an'thi-nē), *n. pl.* [NL., < *Zoanthus* + *-inæ*.] The *Zoanthidæ* named as a subfamily. *Edwards and Haime*, 1851.

zoanthodeme (zō-an'thō-dēm), *n.* [*Gr. ζωών, animal, + ἄνθος, a flower, + δέμα, a bundle*; literally, 'a bundle of animal-flowers.'] A compound zoantharian; the whole organism constituted by the coherent zooids produced by the budding of a single actinozoan polyp.

zoanthodemæ (zō-an'thō-dem'ik), *a.* [*zoanthodeme* + *-ic*.] Of the nature of or pertaining to a zoanthodeme.

zoanthoid (zō-an'thō'id), *a.* [*Zoanthus* + *-oid*.] Same as *zoantharian*.

zoanthropic (zō-an'throp'ik), *a.* [*zoanthrop-y* + *-ic*.] Of the nature of or pertaining to zoanthropy: as, *zoanthropic mania* or *delusion*; *zoanthropic literature*. This is the generic name of such delusions, which take various forms, some of which are specified according to the animal concerned, as lycanthropy.

zoanthropy (zō-an'thrō-pi), *n.* [*Gr. ζωών, animal, + ἄνθρωπος, man. Cf. lycanthropy*.] A form of insanity in which a person believes himself to be one of the lower animals.

Zoanthus (zō-au'thus), *n.* [NL. (Cuvier, 1827), < Gr. ζωών, animal, + *ἄνθος*, flower.] The typical genus of *Zoanthidæ*. The individual polyps are lengthened, and elevated upon a footstalk springing from the connective cœnosarc common to the several zooids of the compound organism; the mouth is linear and transverse, and surrounded by short slender rays or tentacles. The best-known species is *Z. couchi* of the European coasts; numerous others inhabit tropical seas, as *Z. solanderi*.

Also *Zoanthas* (Lamarck, 1810), *Zoantha*.

Zoanthus couchi, two thirds natural size.
a, polyp, closed; b, the same, expanded;
c, stolon.

Zoarcēs (zō-ār'sēz), *n.* [NL. (Cuvier, 1829), also *Zoarcēs*, *Zoarchus*, and *Zoarcus*, < Gr. ζωαρκής, life-supporting, < ζωή, life, + ἀρκέω, assist, defend.] The name-giving genus of *Zoarcidae*, including such species as *Z. viviparus*, the so-called viviparous blenny (formerly *Blennius viviparus*). This is a large eelpout, with an elongate compressed body, tapering behind, heavy oblong head, a large mouth, strong conic teeth in several series, a long low dorsal fin some of the hinder rays of which are developed as sharp spines, broad pectoral fins, and jugular ventrals of three or four soft rays; the scales are small, not imbricated, but embedded in the skin. Another species, with an increased number of fin-rays and vertebrae, is *Z. (Macrozoarcēs) anguillaris*, known as *mutton-fish* and *mother of eels*, found from Labrador to the Middle States, 20 inches long, of a reddish-brown color mottled with olive, with a dark streak across the cheek.

Zoarcidae (zō-ār'si-dē), *n. pl.* [NL., < *Zoarcēs* + *-idae*.] A family of fishes, named from the

Lycodes vahli, one of the *Zoarcidae* (or *Lycodidae*).

genus *Zoarcēs*: now generally called *Lycodidae* (which see). Also *Zoarcidae*, *Zoarchidae*.

zoaria, *n.* Plural of *zoarium*.

zoarial (zō-ā'ri-āl), *a.* [*zoari-um* + *-al*.] Of or pertaining to a zoarium; composing or composed of a zoarium.

zoarium (zō-ā'ri-um), *n.*; *pl. zoaria* (-ā). [NL., < Gr. ζωάριον, dim. of ζῷον, an animal.] A polyzooary; the colony or aggregate of the polypides of a polyzooan; the polypidom or polypary of the moss-animalcules.

zobo (zō'bō), *n.* [Also *zhobo*, *dsomo*, etc., < Tibetan *mdzobo*, the male, *mdzomo*, the female of the *mdzo*, a hybrid of the yak and the so-called zebu. Cf. *zebu*.] A breed of zebu-cattle, supposed to be a hybrid of the common zebu with the yak, reared in the western Himalayan region for its flesh and milk, and also as a beast of burden.

zocco (zok'ō), *n.* [It., < L. *soccus*, sock: see *socle*, *socle*.] A socle.

zoccolo, **zocle** (zok'ō-lō, zō'kl), *n.* [*It. zoccolo*, < *zocco*: see *zocco*.] A socle.

zodiac (zō'di-ak), *n.* [Formerly also *zodiack*; < ME. *zodiac*, *zodiak*, < OF. *zodiac*, *zodiague*, F. *zodiague* = Sp. *zodiaco* = Pg. It. *zodiaco*, < L. *zodiacus*, the zodiac (L. *orbis signifer*), also adj., of the zodiac, < Gr. ζωδιακός, the zodiac, prop. adj., 'of animals,' sc. κύκλος, also called ὁ κύκλος ὁ τῶν ζωδίων, or ὁ τῶν ζωδίων κύκλος, 'the circle of animals' (also ἡ ζωδιακή, se. ὁδός, way), the ref. being to the constellations figured as animals; < ζωδίων, dim. of ζῷον, animal: see *zōon*.] 1. A belt of twelve constellations, extending about 8° on each side of the ecliptic. The constellations are ♈, Aries; ♉, Taurus; ♊, Gemini; ♋, Cancer; ♌, Leo; ♍, Virgo; ♎, Libra; ♏, Scorpio; ♐, Sagittarius; ♑, Capricornus; ♒, Aquarius; ♓, Pisces. The zodiac is also divided into twelve equal parts called *signs*, named after these constellations, and the first point of the sign Aries begins at the vernal equinox. The above symbols refer to the signs. The signs have been carried back by the precession of the equinoxes until they are now 25° behind the corresponding constellations on the average. But the position of the vernal equinox was originally, no doubt, between Aries and Taurus. There is strong evidence that the zodiac was formed at Babylon about 2100 B. C. There is a poetical description of the heavens written by Aratus in Macedonia in latitude about 41°, and about 270 B. C. But the appearances described were never to be seen in that latitude, nor in any latitude in that age. Thus, he mentions that the head of the Dragon—that is, Etamin (β Draconis)—and the waist of Cepheus—that is, Pleares (γ Cephei)—are on the circle of perpetual apparition. Now, this was true only in the latitude of Babylon, 22½° N., about 2200 B. C. He also describes pretty carefully the most southerly stars seen, mentioning the star now called the *Peacock's eye* (α Pavonis), as well as Canopus (α Argus), but saying that there are no bright stars between the latter and Cetus, so that a Phoenix must have been invisible. Now these descriptions will suit only a station of latitude 32° N. to 35° N., and an epoch between 1500 B. C. and 2200 B. C. Aratus also describes the course of the tropics among the stars. That of the tropic of Cancer best agrees with 2200 B. C., that of the tropic of Capricorn with 2000 B. C. The equator is also described in a manner which answers perfectly to 2100 B. C. Finally, there are twelve descriptions of the appearances of the heavens at the rising of each of the constellations of the zodiac, which, while not very decisive, are not in positive disagreement with the other indications. But there is no doubt that the early part of the poem (written long before the precession of the equinoxes was suspected) copies indirectly early Acadian records. The zodiac was, therefore, formed before 2000 B. C. It cannot have been formed very long before, since there is much reason to believe that the constellation Aries either contained the sun or rose just before the sun at the time of the vernal equinox. Now, it was about 2400 B. C. when the vernal equinox fell upon the last point of Aries, and the other constellations were in similar mean positions. Some highly competent writers, however, regard the first formation of the zodiac as vastly more ancient. Several of the ancient constellation figures have a remarkably Babylonian character, as

Virgo, Capricornus, Sagittarius, Centaurus, and Ophiuchus; one (Cepheus) has a barbarian name; and nearly all may be explained from Babylonian mythology. Two at least of the symbols for signs, those of Gemini and Scorpio, much resemble the Babylonian ideographs for the corresponding months. Yet the origin of the Bears, Auriga, Pegasus, Lyra, and Corona was probably not Babylonian. Moreover, certain subjects of common Babylonian fable, such as the tree of life, are not found among the constellations. It is noticeable that it was about 2300 B. C. that He and Ho are said to have reformed the Chinese calendar and divided the heavens into seasons; but the attempt to connect our constellations with the Chinese asterisms has conspicuously failed. The figures of the Chinese zodiac are Tiger, Rabbit, Dragon, Serpent, Horse, Ram, Ape, Cock, Dog, Pig, Rat, Bull. The zodiac was marked out by the ancients as distinct from the rest of the heavens because the apparent places of the sun, moon, and the planets known to them were always within it. This, however, does not hold good of all the newly discovered planetoids. See cuts under constellations named.

2. Figuratively, a round or circuit; a zone; a complete course.

The Poet . . . goeth hand in hand with Nature, not inclosed within the narrow warraot of her guifts, but freely ranging only within the *Zodiack* of his owne wit.

Sir P. Sidney, Apol. for Poetrie.

In your yeares *zodiacke* may you fairly mone,
Shin'd on by angels, blest with goodness, lone.
Dekker, Londons Tempe.

3. In *her.*, a bearing representing a part of the imaginary zodiacal circle, forming an arched bend or bend sinister, and with several of the signs upon it, the number being specified in the blazon.—**Lunar zodiac**, a circle of 27 or 28 asterisms, or groups of stars, selected and established to mark the moon's daily progress around the heavens. It was used in ancient India, in China, and in Arabia, with only minor variations in the star-groups selected. Its place of origin is uncertain and disputed.—**Zodiac ring**, a ring decorated with one of the signs of the zodiac, either as the sign under which the possessor was born, or perhaps the sign influencing a certain part of the body.

zodiacal (zō-dī'a-ka), *a.* [*zodiac* + *-al*.] Of or pertaining to the zodiac: as, the *zodiacal* signs; *zodiacal* planets.—**Zodiacal light**, a luminous tract of the sky, of an elongated triangular figure, lying nearly in the ecliptic, its base being on the horizon, and its apex at varying altitudes, seen at certain seasons of the year either in the west after sunset or in the east before sunrise. It appears with greatest brilliance within the tropics, where it sometimes rivals the Milky Way. Its nature is unknown; the most plausible hypothesis, supported by many of the most eminent modern astronomers, is that it is the glow from a cloud of meteoric matter revolving round the sun.—**Zodiacal parallel**. See *parallel*.

zodiophilous (zō-dī-ōf'i-lus), *a.* [*zōdion*, dim. of ζῷον, animal, + φιλέω, love.] In *bot.*, animal-loving: applied to those flowers which from their structure are especially adapted for fertilization by insects: it is the converse of *anthophilous*, said of the insects concerned.

zoëa, **zoëa** (zō-ē'ā), *n.*; *pl. zoëæ*, *zoëæ* (-ē), rarely *zoëas* (-jz). [NL., < Gr. ζῷον, animal.] The name given by Bose (1802) to the larvæ of certain decapod crustaceans under the impression that they were adults constituting a distinct genus. The name is retained for the zoëa-stage, and for the animal itself in this stage. The zoëa is also called the *copepod-stage*, intervening in some crustaceans between the nauplius-stage and the schizopod-stage; in others, in which a nauplius-stage is apparently wanting, the zoëa passes into the megalopa-stage. Also *zoëa*, *zœa*.

zoëa-form (zō-ē'ā-fōrm), *n.* The zoëa or zoëa-stage of a crustacean.

zoëal, **zoëal** (zō-ē'al), *a.* Of the nature of a zoëa; pertaining to a zoëa or to the zoëa-stage; zoëform. Also *zoëal*.

zoëa-stage (zō-ē'ā-stāj), *n.* That early stage of certain crustaceans which is a zoëa. In this stage of development the cephalothorax is relatively stout and usually spined, with conspicuous eyes, and long fringed antennæ and mouth-parts serving as swimming-organs; the thoracic legs are undeveloped; and the abdomen is long and slender and with or without appendages. This stage usually passes into that of the megalopa.

zoëform, **zoëform** (zō-ē'fōrm), *a.* [*zōëa*, *q. v.*, + L. *forma*, form.] Having the form of a zoëa; being or resembling a zoëa.

zoëpraxiscope (zō-ē-prak'si-skōp), *n.* Same as *zoëpraxinoscope*.

zoëther (zō-ē'thēr), *n.* [*zōë*, life, + E. (*e*)ther.] A supposed substance which manifests the phenomena of animal magnetism and the like: same as *protyle*.

zoëtheric (zō-ē'thēr'ik), *a.* [*zoëther* + *-ic*.] Having the character of zoëther; relating to zoëther in any way.

zoëtic (zō-ēt'ik), *a.* [Irreg. < Gr. ζωή, life, + *-tic*.] Pertaining to life; vital.

zoëtrope (zō-ē-trōp), *n.* [*zōë*, life, + τροπή, a turning.] An optical instrument which exhibits pictures as if alive and in action, depending, like the thaumatope, the phenakistoscope, etc., on the persistence of vision. It consists of a cylinder open at the top, with a series of slits in its circumference. A series of pictures representing the different attitudes successively assumed by an object in performing any act from its beginning to its close, as by a horseman in leaping a gate or an acrobat in performing a somersault, is arranged along the interior circumference. The instrument is then set in rapid motion, and the person applying his eye to the slits sees through them the figure appearing as if endowed with life and activity and performing the act intended. Compare *zoëpraxiscope* and *zoëpraxinoscope*. Also *zoëtrope* and *wheel of life*.

zoëtropic (zō-ē-trop'ik), *a.* [*zoëtrope* + *-ic*.] Pertaining to or resembling the zoëtrope; adapted to or shown by the zoëtrope.

zoïatria (zō-i-at'ri-ā), *n.* [NL., < Gr. ζῷον, an animal, + ἰατρεία, healing, < ἰατρέω, heal, < ἰατρός, a physician: see *iatric*.] Veterinary surgery.

zoïc (zō'ik), *a.* [*zōikos*, of animals, < ζῷον, animal.] Of or pertaining to animals or living beings; relating to or characterized by animal life; marked by the presence of life.

Zoilean (zō-il'ē-an), *a.* [*L. Zoilus*, < Gr. Ζώϊλος, Zoilus (see def.).] Characteristic of Zoilus, a Greek critic (about the fourth century B. C.), noted for his severe criticism of Homer; having the character of Zoilism.

Zoilism (zō'i-lizm), *n.* [*Zoilus* (see *Zoilean*) + *-ism*.] Criticism like that of Zoilus; illiberal or carping criticism; unjust censure.

Bring candid eyes unto the perusal of men's works, and let not *Zoilism* or detraction blast well-intended labours.

Sir T. Browne, Christ. Mor., ii. 2.

Zoïlist (zō'i-list), *n.* [*Zoïlus* (see *Zoilean*) + *-ist*.] An imitator of Zoilus; one who practises Zoilism; a carping critic.

Out, rhyme; take 't as you list!

A fco for the sour-brow'd *Zoïlist*!

Marston, What You Will, ii. 1.

zoïsité (zoi'sit), *n.* [Named by Werner in 1805 after Baron von Zois, from whom he received his specimen.] A mineral closely related to epidote, but orthorhombic in crystallization. It occurs in prismatic crystals, often deeply striated and rounded, also massive; it varies in color from white to yellow, greenish, and rose-red. Its composition is similar to that of epidote, except that it contains calcium and but little iron. Thulite is a variety of a rose-red color, found in Norway. Also called *suavite*.

zoïsm (zō'izm), *n.* [*zōë*, life, + *-ism*.] The doctrine that the phenomena of life depend upon a peculiar vital principle; any vitalistic theory. [A word current from about 1840 to 1850.]

zoïst (zō'ist), *n.* [*zōë*, life, + *-ist*.] One who studies the phenomena of life from the standpoint of zoïsm; one who upholds the theory or doctrine of zoïsm. See *zoïsm*.

zoïstic (zō-is'tik), *a.* [*zoïst* + *-ic*.] 1. Pertaining to zoïsm or to the zoïsts: as, *zoïstic* views. See *zoïsm*.—2. Pertaining to living organisms or to vitality; vitalistic; animal: as, *zoïstic* magnetism (that is, animal magnetism). Scoresby.

Zoïalism (zō'lā-izm), *n.* [*Zola* (see def.) + *-ism*.] The characteristic quality of the works of Émile Zola (born 1840), a French novelist characterized by an excessively "realistic" treatment of the grosser phases of life; coarse "realism" or "naturalism."

Set the maiden fancies wallowing in the troughs of *Zoïalism*—
Forward, forward, ay and backward, downward too into the abyss.

Tennyson, Lockley Hall Sixty Years After.

Zöllner's lines. Parallel lines which seem not

Zöllner's Lines.

to be parallel by reason of oblique intersecting lines. Also called *Zöllner's pattern*. **zollverein** (tsōl'fēr-in'), *n.* [G., < *zoll* (= E. *toll*), custom, + *verein*, union, < *ver-* (= E. *for-*) + *ein* (= E. *one*), one.] 1. A union of German states for the maintenance of a common tariff, or uniform rates of duty on imports from other countries, and of free trade among themselves.

It began with an agreement in 1828 between Prussia and the grand duchy of Hesse, received a great development in 1834 and succeeding years, ultimately including all the German powers excepting Austria and a few small states, and is now coextensive with the German empire.
Hence—2. A commercial union, or customs-union, in general; any arrangement between a number of states for regulating rates of duty with reference to their common benefit.

The result would be a Protectionist group and an Australian Zollverein. *Fortnightly Rev.*, N. S., XXXIX. 296.

zomboruk (zom' bō-ruk), *n.* Same as *zumbooruk*.
zona (zō'nā), *n.*; pl. *zonæ* (-nā). [L.] 1. In *anat.*, a zone, belt, or girdle, or part likened to a zone: chiefly used in human anatomy.—2. Herpes zoster (which see, under *herpes*).—**Zona alba**, the white zone of the eyeball—a thickening of the sclerotic where the muscles are attached.—**Zona arcuata**, the inner zone of the basilar membrane, extending from the lower edge of the spiral groove of the cochlea to the external edge of the base of the outer rods of Corti.—**Zona cartilaginea**, the limbus of the spiral lamina.—**Zona choriocæva**. Same as *zona cartilaginea*.—**Zona ciliaris**, the ciliary zone of the eye; the ring or belt of ciliary processes, or their impression upon the vitreous humor. See cut under *eye*.—**Zona denticulata**, the inner zone of the basilar membrane together with the limbus of the spiral lamina.—**Zona fasciculata**, the layer of the cortical part of the suprarenal body, just beneath the zona glomerulosa.—**Zona ganglionaris**, a collection of gray matter on the filaments of the cochlear branch of the auditory nerve.—**Zona glomerulosa**, the outer layer of the cortical part of the suprarenal body.—**Zona ignea**. Same as def. 2.—**Zona incerta**, a continuation of the formatio reticularis forward under the optic thalamus.—**Zona levis**. Same as *zona arcuata*.—**Zona mediana**. Same as *zona cartilaginea*.—**Zona membranacea**. Same as *basilar membrane* (which see, under *basilar*).—**Zona nervea**. Same as *zona arcuata*.—**Zona orbicularis**, a collection of circular fibers in the capsular ligament of the hip-joint.—**Zona pectinata**, the outer zone of the basilar membrane, extending from the rods of Corti to the spiral ligament.—**Zona pellucida**, a transparent membrane surrounding the yolk of the ovum; so called from its appearance in the human ovum under the microscope. It is simply the wall of the ovum, corresponding to any other cell-wall. It is traversed by numerous, more or less evident, radiating pore-cana, through which spermatozoa are supposed to enter the ovum.—**Zona perforata**, the lower edge of the spiral groove of the cochlea.—**Zona radiata**, the zona pellucida when the radiating pore-cana are especially distinct.—**Zona repens**. Same as *herpes zoster*. See *herpes*.—**Zona reticularis**, the inner layer of the cortical portion of the suprarenal body.—**Zona serpigiosa**. Same as def. 2.—**Zona spongiosa**, the extreme dorsal tip of the posterior horn of the gray matter of the spinal cord.—**Zona tecta**, the inner part of the lamina spiralis membranacea, covered by the organ of Corti.—**Zona tendinosa**, a fibrous ring situated at each auriculoventricular opening in the heart.—**Zona Val-salvæ**, the membranous spiral lamina of the cochlea.—**Zona volatica**. Same as def. 2.

zonal (zō'nāl), *a.* [*L. zonalis*, < *L. zona*, zone: see *zone*.] 1. Having the character of a zone or belt.

Frequently storm clouds appeared zonal—that is, alternate portions positively and negatively electrified.
G. J. Symons, in *Modern Meteorology*, p. 163.

2. Of or pertaining to the rings, somites, or body-segments of an articulate or annulose animal; arthromeric; metameric: as, *zonal* symmetry, the serial homology or metameric symmetry of a segmented animal, as an arthropod or an annelid. See *symmetry*, 5 (b).

3. In *crystal.*, arranged in zones: as, the *zonal* structure of a mineral.—4. In *bot.*, noting that view of a diatom in which the zone or suture of the valves is presented to the eye—the “front view” of some writers.—5. In *hort.*, marked on the leaves with a zone or circle, as many pelargoniums, also called *horseshoe* geraniums.—**Zonal harmonic**. See *harmonic*.—**Zonal stratum**. See *stratum zonale*, under *stratum*.

zonally (zō'nāl-i), *adv.* In a zonal manner; in zones, or in the form of a zone.

Crystals of the hyacinth variety of quartz . . . contain numerous inclusions of anhedral arranged zonally.
Amer. Nat., XXIII. 814.

Zonaria¹ (zō-nā'ri-ä), *n.* [NL. (Agardh, 1824), fem. of *L. zonarius*: see *zonary*.] A small genus of widely distributed phæosporous algæ, of the order *Dictyotaceæ*, having a more or less fan-shaped frond obscurely marked with concentric zones, and roundish or linear sori formed beneath the cuticle of the frond.

Zonaria² (zō-nā'ri-ä), *n. pl.* [NL., neut. pl. of *L. zonarius*: see *zonary*.] One of two primary groups (the other being *Discoidia*) into which Huxley divided the deceduate *Mammalia*, consisting of those *Decidua* which have a zony placenta; the *Zonoplacentalia*.

zonarioid (zō-nā'ri-oid), *a.* [*Zonaria*¹ + *-oid*.] In *bot.*, pertaining to or resembling the genus *Zonaria*.

zonary (zō'nā-ri), *a.* [*L. zonarius*, < *zona*, a zone: see *zone*.] Pertaining to or characterized by a zone; having or presenting the form of a belt or girdle. A zony placenta is one

in which the fetal villi form a belt or zone. See *Zonaria*², *Zonoplacentalia*, and *zonular*.

The placenta of the dugong is zony and non-deciduate.
Nature, XL. 611.

zonate (zō'nät), *a.* [*L. zonatus*, < *L. zona*, zone: see *zone*.] 1. In *bot.*, marked with zones or concentric bands of color.—2. In *zool.*, having zones of color or texture; belted, girdled, or ringed; zoned.

zonda (zon'dä), *n.* [Named from the village of *Zonda*.] A local foehn wind occurring at the eastern base of the Andes, in the vicinity of San Juan, Argentine Republic. It is a hot dry west wind blowing down from the Cordillera, and carrying clouds of dust and fine sand. It may occur at any season, but is especially frequent during July and August (mid-winter), when its high temperature and parching effects are especially noticeable. The name is also applied to a hot dry north wind occurring on the Argentine plains during the summer, and reported especially from the vicinity of Mendoza. This is essentially a desert wind, charged with sand, and oppressive and suffocating in its effects.

zone (zōn), *n.* [*F. zone*, < *Sp. Pg. It. zona*, < *L. zona*, < *Gr. ζώνη*, a girdle, belt, one of the zones of the sphere, < *ζώννυμι*, gird.] 1. A girdle or belt worn as an article of dress. [Now only poetical.]

Germination, in green, with a zone of gold about her waist.
E. Jonson, *Masque of Beauty*.

White as Hebe's, when her side
Slit its golden clasp, and down
Fell her kirtle to her feet. *Keats*, *Fancy*.

2. A belt or band round anything, as a stripe of different color or substance round an object; figuratively, any circumscribing or surrounding line, real or imaginary; a circuitous line, path, or course; an inclosing circle.

That milky way,
Which nightly, as a circling zone, thou seest
Powder'd with stars. *Milton*, *P. L.*, vii. 580.
And four great zones of sculpture, set betwixt
With many a mystic symbol, gird the hall.
Tennyson, *Holy Grail*.

Very frequently the colors form stripes or zones in the stone (Egyptian jasper), which are probably the result of decomposition of the upper surface.

E. W. Streeter, *Precious Stones*, p. 201.

3. Specifically, in *geog.*, one of five arbitrary divisions of the earth's surface, bounded by lines parallel to the equator, each named according to its prevailing temperature; a climatic belt. These climatic zones are (a) the *torrid zone*, extending from tropic to tropic, or 23½° north and 23½° south of the equator; (b) two *temperate zones*, extending from the tropics to the polar circles—that is, from the parallel of 23½° north or south to that of 66½° north or south, and therefore called the *north temperate* and *south temperate zones*; and (c) two *frigid zones*, extending from the polar circles to the north and south poles respectively.

4. Any continuous tract or belt differing in character from adjoining tracts; a definite area or region within which some distinguishing circumstances exist or are established: as, the *zones* of natural history, distinguished by special forms of vegetable or animal life; a *zone* of free trade; a *free zone* on the border of a country or between adjoining states. Naturalists formerly divided the sea-bottom into five zones in accordance with the depth of water covering each, which was supposed to determine its fauna and flora. They were called respectively *littoral*, *circumlittoral*, *median*, *inframedian*, and *abyssal*. Later researches have proved that the assumed factors were to a great extent erroneous, organisms supposed to be confined to the littoral zone having been found at the greatest depths. In geology *zone* has nearly the same meaning as *horizon*. A stratum, or a group of strata, may be characterized by the presence of a certain assemblage of fossils, or by one particular fossil; in such cases the most abundant or typical fossil may give a name to the subdivision in which it occurs, which will then be designated as the *zone* of that particular species. Thus, the Lower and the Middle Lias have together been divided into twelve zones, each characterized by the presence of a certain species of ammonite: as, the “zone of the *Arietites* (*Ammonites*) *varicosatus*,” etc.

They [the people of Savoy] would . . . lose their commercial zone or free frontier with Switzerland.
C. K. Adams, *Democracy and Monarchy*, ix.

The zone of youthful fancy . . . is now well passed; the zone of cultured imagination is still beyond us.
Stedman, *Vict. Poets*, p. 15.

How vast must have been that earlier period wherein were deposited those fine alternations of lime and clay which form hills, such as Mont Perrier, several hundred feet in height, divisible into distinct zones, each characterized by peculiar assemblages of fossils.
Geikie, *Geol. Sketches*, v.

Attacks of a spasmodic or of a lethargic nature in hysterical patients can often be excited by touching or pressing upon certain spots or zones on the surface of the body.
Lancet, 1886, II. 1243.

5. In *math.*, a part of the surface of a sphere included between two parallel planes.—6. In *crystal.*, a series of planes having their lines of intersection parallel.—**Annual zone**. Same as *annual ring* (which see, under *ring*).—**Bathymetric zone**. See *bathymetric*.—**Cervical zone**, that part of the preg-

nant uterus, embracing about the lower fourth, within which attachment of the placenta is dangerous, as liable to cause alarming hemorrhage during childbirth. The centric attachment of the placenta in this zone constitutes placenta prævia (which see, under *placenta*).—**Ciliary zone**, *anat.* See *ciliary*.—**Coralline zone**. See *coralline*.—**Epileptic zone**, an area of the skin covering the lower part of the face and the neck, irritation of which will excite an epileptic paroxysm. Brown-Séquard found that section of the spinal cord in the lumbar region in animals, usually guinea-pigs, was followed by epilepsy, and that the progeny of animals so treated had these epileptic zones.—**Epileptogenic or epileptogenic zone**. Same as *epileptic zone*.—**Hyperæsthetic zone**, a hyper-sensitive portion of the integument, sometimes found, in cases of spinal paralysis, at the border of the affected part.—**Hypogonic zone**, a place or region on the surface of the body stimulation or irritation of which tends to induce hypnotism. [Recent.]

Spots which have been described by Pitres as *hypogonic zones*. *Björnström*, *Hypnotism* (trans.), p. 18.

Hystero-genic zone, a part of the surface of the body pressure upon which will excite a paroxysm in cases of hystero-epilepsy.—**Intermediary zone of the stomach**, that part of the wall of the stomach, near the pylorus, where the peptic glands begin to disappear.—**Isothermal zones**. See *isothermal*.—**Lissauer's zone**. Same as *Lissauer's tract* (which see, under *tract*).—**Marginal zone**, the border where the synovial membrane is gradually converted into articular cartilage.—**Neutral, pectinate, pellucid, primordial zones**. See the adjectives.—**Posterior marginal zone**. Same as *Lissauer's tract* (which see, under *tract*).—**Three-mile zone**. See *mile*.—**Zone of defense**, in *fort.*, the belt of territory around a fortification which falls under the effective fire of the besieged.—**Zone of Haller**. Same as *zone of Zinn*.—**Zone of Lissauer**. Same as *Lissauer's tract*. See *tract*.—**Zone of operations** (*milit.*), the region containing the lines of operations of an army, extending from the base of operations to the objective point. See *strategy*.—**Zone of vegetation**, a belt of characteristic vegetable growth following a particular line of altitude on mountain sides.—**Zone of Zinn**. Same as *zone of Zinn*. See *zone*.

zone (zōn), *v.*; pret. and pp. *zoned*, ppr. *zoning*. [*L. zona*, *n.*] 1. *trans.* To encircle with or as if with a zone; bring within a zone, or divide into zones or belts, in any sense.

I could hear he loved
Some fair immortal, and that his embrace
Had zoned her through the night.
Keats, *Endymion*, ii.

II. *intrans.* To be formed into zones.

What Mr. Lockyer had called the *zoning* of colour in the heavens. *Nature*, XXXVIII. 225.

zone-axis (zōn'ak'sis), *n.* In *crystal.*, the line in which all the planes of a zone would intersect if they were supposed to pass through the same point.

zoned (zōnd), *a.* [*L. zona* + *-ed*.] 1. Wearing a zone, as a woman.—2. Having zones, or bands resembling zones; zonate.

zoneless (zōn'les), *a.* [*L. zona* + *-less*.] Without a zone or girdle; ungirt; hence, loosely robed.

That reeling goddess with the zoneless waist.
Cowper, *Task*, lli. 52.

zonic (zō'nik), *n.* [*L. zona* + *-ic*.] A girdle; a zone; a belt. [Rare.]

I know that the place where I was bred stands upon a *zonic* of coal. *Smollett*, *Travels*, iv. (*Davies*.)

zoniferous (zō-nif'ē-rus), *a.* [*L. zona*, zone, + *ferre* = *E. bear*.] Having or bearing a zone; zoned.

Zonites (zō-nī'tēz), *n.* [NL. (Montfort, 1810), < *Gr. ζώνιτης*, girdled, < *ζώνη*, girdle: see *zone*.] In *conch.*, a genus of pulmonate gastropods, referred to the family *Helicidæ*, or to the *Limacidæ*, or to the *Vitrinidæ*, and giving name to the *Zonitinae*. The species are numerous, as *Z. cellaria* (see *cellaria*), *Z. miltium* is a very small species of the United States; *Z. umbilicata* is known as the *open snail*. The genus in a broad sense includes species of *Hyalina* and related forms; but it is also restricted to about a dozen species of the Mediterranean region, as *Z. algerus*.

Zonitidæ (zō-nit'ī-dē), *n. pl.* [NL., < *Zonites* + *-idæ*.] A family of terrestrial gastropods, typified by the genus *Zonites*: same as *Vitrinidæ*. *Trans. New Zealand Inst.*, 1883.

Zonitinae (zō-ni-tī'nē), *n. pl.* [NL., < *Zonites* + *-inæ*.] A subfamily of *Vitrinidæ* or another family, typified by the genus *Zonites*, and including forms with a helicoid shell (into which the animal can completely withdraw) and with lateral biuspid and marginal acute teeth.

Zonitis (zō-nī'tis), *n.* [NL. (Fabricius, 1775), < *Gr. ζώνιτης*, fem. of *ζώνιτης*: see *Zonites*.] A genus of blister-beetles, of the family *Cantharidæ*, of wide distribution and comprising about 40 species, of which 6 are North American. They are very variable in color and size, but are distinguished by having the outer lobe of the maxilla not prolonged.

zonochlorite (zō-nō-klō'rīt), *n.* [*L. ζώνη*, girdle, + *χλωρός*, greenish-yellow, + *-ite*.] A zeolitic mineral, perhaps related to thomsonite, occurring in massive form in cavities in amygdaloid: it often shows bands of different colors.

zonociliate (zō-nō-sil'ī-āt), *a.* [*L. zona*, zone, + NL. *ciliatus*, ciliate.] Zoned with a circlet

of cilia; encircled with cilia, as a trochosphere or telotrocha. See these words, and cut under *veliger*.

The fertilized egg of the *Phylactolæma* does not give rise to a *zonociliate* larva. *Encyc. Brit.*, XIX. 437.

zonoid (zō-noid), *a.* [*Gr. ζωνοειδής*, like a girdle, *ζώνη*, girdle, + *ειδός*, form.] Like a zone; pertaining to zones; zonular. [Rare.]

zonoplacental (zō-nō-plā-sen'tal), *a.* [*L. zona*, girdle, + *NL. placenta* + *-al.*] In mammal., having a zony deciduate placenta; or pertaining to the *Zonoplacentalia*.

Zonoplacentalia (zō-nō-plas-en-tā'li-ä), *n. pl.* [*NL.*: see *zonoplacental.*] Those deciduate mammals in which the placenta is zony, as contrasted with *Discoplacentalia*; the *Zonaria*. The carnivores, the elephant, and the hyrax are examples.

Zonotrichia (zō-nō-trik'i-ä), *n.* [*NL.* (Swainson, 1831), *Gr. ζώνη*, girdle, + *θρίξ* (τριχ-), hair.] A genus of large and handsome American finches, of the family *Fringillidae*; the crown-sparrows. The white-crowned is *Z. leucophrys*, abundant in many parts of North America. More numerous and familiar is the white-throated, or peabody-bird, *Z. albicollis*, whose white throat is sharply contrasted with the dark ash of the

Zonure (*Zonurus giganteus*).

genus of *Zonuridae*: so named from the rings of spiny scales on the tail, as of *Z. giganteus*.

Zoo (zō), *n.* [The first three letters of *zoölogical*, taken as forming one syllable.] With the definite article, the Zoölogical Gardens in London: also used of any similar collection of animals. [From a mere vulgarism, this corruption has passed into wide colloquial use.]

zoöamylin (zō-ō-am'i-lin), *n.* [*Gr. ζῳων*, animal, + *E. amylin.*] Same as *glycogen*.

zoöbiotism (zō-ō-bi'ō-tizm), *n.* [*Gr. ζῳων*, animal, + *βίος*, life, + *-t* + *-ism.*] Same as *biotics*.

zoöblast (zō-ō-blást), *n.* [*Gr. ζῳων*, animal, + *βλαστός*, germ.] An animal cell; a bioplast (which see).

Zoöcapsa (zō-ō-kap'sä), *n.* [*NL.*, *Gr. ζῳων*, animal, + *L. capsä*, box, chest; see *capsule.*] A genus of fossil barnacles of the Liassic period, representing the oldest known form of *Balanidae*.

zoöcarp (zō-ō-kärp), *n.* [*Gr. ζῳων*, animal, + *καρπός*, fruit.] Same as *zoöspore*.

zoöcaulon (zō-ō-kä'lon), *n.* [*NL.*, *Gr. ζῳων*, animal, + *καυλός*, stem, stalk; see *caulis*, *caulis*.] The erect branching tentaculiferous colony-stock of some infusorians, as of the genus *Dendrostroma*. *W. S. Kent.*

zoöchemical (zō-ō-kem'i-käl), *a.* [*zoöchem-y* + *-ic-al.*] Of or pertaining to zoöchemistry.

zoöchemistry (zō-ō-kem'is-tri), *n.* [*Gr. ζῳων*, animal, + *E. chemistry.*] Animal chemistry; the chemistry of the constituents of the animal body.

zoöchemy (zō-ō-kem-i), *n.* [*Gr. ζῳων*, animal, + *E. chemy* (*F. chimie*); see *alchemy.*] Same as *zoöchemistry*. *Dunglison.*

zoöchlorella (zō-ō-klō-rel'ä), *n.*; pl. *zoöchlorellæ* (-ë). [*NL.*, *Gr. ζῳων*, animal, + *χλωρός*, pale-green, + *dim. -ella.*] One of the green pigmentary particles, or minute corpuscles of green coloring matter, which are found in various low invertebrates, as the hydras among polyps and the stentors among infusorians. Compare *zoöxanthella*.

zoöcyst (zō-ō-sist), *n.* [*Gr. ζῳων*, animal, + *κύστις*, bladder.] A cyst, formed by various protozoans and protophytes, whose contents break up into many germinal granules or spores; a kind of sporecyst.

zoöcystic (zō-ō-sis'tik), *a.* [*zoöcyst* + *-ic.*] Pertaining to or of the nature of a zoöcyst.

zoöcytial (zō-ō-sit'i-al), *a.* [*zoöcytium* + *-al.*] Pertaining to or of the nature of a zoöcytium.

zoöcytium (zō-ō-sit'i-um), *n.*; pl. *zoöcytia* (-ä). [*NL.*, *Gr. ζῳων*, animal, + *κύτος*, cavity.] The common gelatinous matrix or support of certain compound or colonial infusorians, composed of a substance secreted by and containing the individual animalcules; an infusorial syncytium; a zoöthecium. Compare *zoöendrium*. See cut under *Epistylis*.

zoöendrial (zō-ō-den'dri-al), *a.* [*zoöendri-um* + *-al.*] Of the nature of or pertaining to a zoöendrium.

zoöendrium (zō-ō-den'dri-um), *n.*; pl. *zoöendria* (-ä). [*NL.*, *Gr. ζῳων*, animal, + *τέρον*, tree.] The zoöcytium or zoöthecium of certain infusorians, which is much branched or of arborescent form. *W. S. Kent.* See cut under *Epistylis*.

zoödynamic (zō-ō-dī-nam'ik), *a.* [*Gr. ζῳων*, animal, + *δυναμικός*, dynamic; see *dynamic.*] Of or pertaining to zoödynamies.

zoödynamics (zō-ō-dī-nam'iks), *n.* [Pl. of *zoödynamic* (see *-ics*).] The dynamics of the animal body: the science of the vital powers of animals; animal physiology, as a branch of biology: correlated with *zoöphysics*.

zoœa, zoœal, n. See *zoœa, zoœal*.

zoœcial (zō-ō-shi-al), *a.* [*Gr. zoœci-um* + *-al.*] Having the character of a zoœcium; of or pertaining to the zoœcia of polyzoans.

zoœcium (zō-ō-shi-um), *n.*; pl. *zoœcia* (-ä). [*Gr. ζῳων*, animal, + *οἰκία*, house.] The ectocyst, or outer chitinous or calcified cell, in which a polypide of the *Polyzoa* is lodged, and into which a polypide can be retracted after protrusion; one of the cells of the cœnoœcium, containing a polypide. It is the cuticle of the polypide itself, dense and tough, or hard, changing without solution of continuity into the soft delicate pellicle at the mouth of the animalcule. In the ectoproctous polyzoans it forms a case or shield into which the soft protrusible parts of the polypide can be withdrawn. See *ectocyst*, and cut under *Plumatella*.

zoœform, a. See *zoœform*.

zoœerythrin (zō-ō-e-rith'rin), *n.* [*Gr. ζῳων*, animal, + *ερυθρός*, red, + *-ine*.] 1. A red coloring matter obtained from the plumage of the *Musophagidæ* or turakoos, giving a continuous spectrum. See *turacin*.—2. A kind of red pigment of the lipochrome series widely diffused in sponges, and regarded as having a respiratory function. *W. J. Sollas, Encyc. Brit.*, XXII. 420. Also *zoœnerythrin*.

zoöfulvin (zō-ō-ful'vin), *n.* [*Gr. ζῳων*, animal, + *L. fulvus*, tawny, + *-in*.] A yellow coloring matter obtained from the plumage of the *Musophagidæ* or turakoos, showing two absorptive bands not the same as those of turacin.

zoögamete (zō-ō-ga-mē'te), *n.* [*NL.*, *Gr. ζῳων*, animal, + *γαμετή*, a wife, etc.] In *bot.*, a motile gamete. Also *plauogamete*.

zoögamous (zō-ō-gā-mus), *a.* [*zoögam-y* + *-ous*.] Of or pertaining to zoögamy; noting the pairing of animals or their sexual reproduction.

zoögamy (zō-ō-gā-mi), *n.* [*Gr. ζῳων*, animal, + *γάμος*, marriage.] The coupling, mating, or pairing of animals of opposite sexes for the purpose of reproduction or propagation of their kind; sexual reproduction; gamogenesis.

zoögen (zō-ō-jen), *n.* [*Gr. ζῳων*, animal, + *-γενής*, producing; see *-gen.*] A glairy organic substance found on the surface of the thermal waters of Baden and elsewhere. Also called *zoöidin*.

zoögenic (zō-ō-jen'ik), *a.* [*zoögen* + *-ic.*] Of or pertaining to zoögeny, or the origination of animals.

zoögeny (zō-ō-jē-ni), *n.* [*Gr. ζῳων*, animal, + *-γενεα*, production; see *-geny.*] The fact or the doctrine of the origination of living beings and the formation of their parts or organs. Also *zoögony*.

zoögeog. An abbreviation, used in this work, of *zoögeography*.

zoögeographer (zō-ō-jē-ōg'ra-fēr), *n.* [*zoögeograph-y* + *-er*.] One who studies the geographical distribution of animals, or is versed in zoögeography.

It is therefore . . . the business of the *zoögeographer*, who wishes to arrive at the truth, to ascertain what groups of animals are wanting in any particular locality. *Encyc. Brit.*, III. 738.

zoögeographic (zō-ō-jē-ō-graf'ik), *a.* [*zoögeograph-y* + *-ic.*] Of or pertaining to zoögeography; faunistic; chorological.

zoögeographical (zō-ō-jē-ō-graf'i-kal), *a.* [*zoögeographic* + *-al.*] Same as *zoögeographic*.

zoögeography (zō-ō-jē-ōg'ra-fi), *n.* [*Gr. ζῳων*, animal, + *E. geography.*] The science or the description of the distribution of animals on the surface of the globe; faunal or faunistic zoölogy; animal chorology: correlated with *phytogeography*. This is an important branch of zoölogy, of much intrinsic interest in several respects, and of special significance in its bearing upon the questions of the origin of species and their modification under climatic and other physical conditions of environment. It has been much studied of late years, with the result of mapping the land-surface of the globe into several major and numerous minor areas, which can be bounded and graphically represented in colors with almost the precision attained in depicting civil or political boundaries. Zoögeography is related to paleontology as the distribution of animals in space is related to their succession in time; but the principles of zoögeography are of course as applicable to any former as to the present dispersion of species on the face of the globe. See *province*, 6, and *region*, 7.

zoöglœa (zō-ō-glē'ä), *n.*; pl. *zoöglœæ* (-ë). [*NL.*, *Gr. ζῳων*, animal, + *γλοιός*, a sticky substance.] 1. A peculiar colony of *Schizomyces* in which they form a jelly-like mass by the swelling up of their cell-membranes. It was formerly regarded as a distinct genus, but is now known to be a kind of resting-stage in which the various elements are glued together by their greatly swollen and diffused cell-walls becoming contiguous. It corresponds to the palmella stage of certain of the lower algae.

White-throated Sparrow, or Peabody-bird (*Zonotrichia albicollis*).

breast. In the adult the head is striped with black and white, there is a distinct yellow spot before each eye, and the edge of the wing is yellow. The length is 6½ inches, the extent 9½. This sparrow abounds in shrubbery of the eastern half of North America, and has a limpid pleasing song, some notes of which are rendered in the word *peabody*. *Z. querula* is Harris's Finch, of the Missouri and Mississippi region; the male when adult has nearly the whole head hooded with jet-black. *Z. coronata*, of the Pacific slope, is the golden-crowned.

zonula (zō-nū-lä), *n.*; pl. *zonulæ* (-lë). [*NL.*: see *zonule.*] In *anat.* and *zool.*, a small zone, belt, or ring; a zonule.—**Zonula ciliaris**. Same as *zonule* of *Zinn*.—**Zonula of Zinn**. Same as *zonule* of *Zinn*.

zonular (zō-nū-lär), *a.* [*zoönule* + *-ar*.] 1. Of or pertaining to a zone or zonule; zony; zoned.—2. In *zool.*, specifically, diffuse: applied to a diffuse form of placenta. See *zony*.

The *zonular* type of a placenta.

Dana.

Zonular cataract, a form of cataract, occurring usually in young children, in which the opacity is situated between the cortex and the nucleus of the lens.

zonule (zō-nūl), *n.* [*L. zonula*, dim. of *zona*, girdle; see *zonæ.*] A little zone, belt, or band; a zonula.—**Zonule of Zinn**, the suspensory ligament of the crystalline lens of the eye. See under *suspensory*.

zonulet (zō-nū-let), *n.* [*zoönule* + *-et.*] A little zone or girdle.

That riband 'bout my Julia's waste,
. . . that *zonulet* of love.

Herrick, Upon Julia's Riband.

zonure (zō-nūr), *n.* [*NL.* *Zonurus*.] Any lizard of the genus *Zonurus* in a broad sense, or of the family *Zonuridae*: as, the rough-tailed *zonure*, *Zonurus cordylus*.

Zonuridae (zō-nū-ri-dē), *n. pl.* [*NL.*: *Zonurus* + *-idae*.] A South African and Madagascar family of agamoid eriglossate lacertilians, with cruciform interclavicles, short, simple tongue, and roofed-over supratemporal fosse, typified by the genus *Zonurus*. The family was formerly much more loosely characterized, and then contained various forms from different parts of the world, which have since been separated as types of other families.

Zonurinae (zō-nū-ri-nē), *n. pl.* [*NL.*, *Gr. ζῳων*, + *-inae*.] A subfamily of *Zonuridae*, containing normally lacertiform species with well-developed limbs, and including the greater part of the family: distinguished from *Chamaesaurinae*.

Zonurus (zō-nū-rus), *n.* [*NL.* (Merrem), *Gr. ζώνη*, a belt, zone, + *οπίς*, tail.] The typical

Bacteria sometimes form a jelly-like mass by the swelling up of their cell-membranes; this is the *zoöglæa* stage. *Bessey, Botany, p. 212.*

2. A massing together of micro-organisms which occurs in a certain stage of their development, the collection being surrounded by a gelatinoid envelop.

Liquids in which any of these Schizomyces are actively developing themselves usually bear on their surface a gelatinous scum, which is termed by Prof. Cohn the *Zoöglæa*. *W. B. Carpenter, Micros., § 303.*

zoöglæic (zō-ō-glē'ik), *a.* [*< zoöglæa + -ic.*] Of the nature of *zoöglæa*; pertaining to *zoöglæa*.

zoöglæoid (zō-ō-glē'oid), *a.* [*< zoöglæa + -oid.*] In *bot.*, resembling, characteristic of, or belonging to the *zoöglæa* stage or condition of a micro-organism.

zoögonidium (zō-ō-gō-nid'ī-um), *n.*; pl. *zoögonidia* (-ī). [NL., *< Gr. ζῳον, animal, + NL. gonidium.*] In *bot.*, a locomotive gonidium; a gonidium provided with cilia, and hence capable of locomotion.

Each *zoögonidium* breaks itself up into sixteen new *zoögonidia*, forming sixteen small and new colonies. *Bessey, Botany, p. 221.*

zoögonous (zō-ō-gō-nūs), *a.* [*< Gr. ζῳον, animal, + -γῳνος, producing; see -gonous.*] Same as *zōiparous*.

zoögonia (zō-ō-gō-nī), *n.* [*< Gr. ζῳον, animal, + -γῳνία, production; see -gonia.*] Same as *zoögonia*.

zoögraft (zō-ō-grā'f), *n.* [*< Gr. ζῳον, animal, + E. graft.*] In *surg.*, a piece of living tissue taken from one of the lower animals to supply a defect in the human body by grafting it on the latter. Also *zoöplastic graft*.

zoögrapher (zō-ō-grā-fēr), *n.* [*< zoögraph-y + -er.*] A zoögraphist.

zoögraphic (zō-ō-grā'fik), *a.* [*< zoögraph-y + -ic.*] Descriptive of animals; pertaining to zoögraphy.

zoögraphical (zō-ō-grā'fik), *a.* [*< zoögraphic + -al.*] Same as *zoögraphic*.

zoögraphist (zō-ō-grā-fist), *n.* [*< zoögraph-y + -ist.*] One who describes or depicts animals; a descriptive zoölogist.

zoögraphy (zō-ō-grā'fī), *n.* [*< Gr. ζῳον, animal, + -γραφία, < γραφειν, write.*] The description of or a treatise on animals; descriptive zoölogy.

zoögyroscope (zō-ō-jī-rō-skōp), *n.* [*< Gr. ζῳον, animal, + E. gyroscope.*] An application of the principle of the zoötrope in which a series of pictures are placed in a rotating frame, and, as they pass between a lantern and a lens, are thrown in extremely rapid succession on a screen, so as to form a continuous but constantly changing picture. This device is used in the exhibition of continuous series of instantaneous pictures of animals in motion, etc. *E. H. Knight.*

zoöid (zō'oid), *a.* and *n.* [*< Gr. ζῳοειδής, like an animal, < ζῳον, animal, + εἶδος, form.*] **I. a.** Like an animal; of the nature of animals; having an animal character, form, aspect, or mode of existence, as an organism endowed with life and motion. See **II.**

II. n. In *biol.*, something like an animal; that which is of the nature of an animal, yet is not an animal in an ordinary sense, and is not the whole of an animal in a strict sense; one of the "persons" or recognizably distinct entities which compose a zoön; that product of any organism, whether of animal, vegetable, or equivocal character, which is capable of spontaneous movements, and hence may have an existence more or less apart from or independent of the parent organism. The biological conception of a zoöid is a fundamental one, bordering upon an almost metaphysical definition of what may constitute individual identity or non-identity in a given case: the term covers a multitude of cases which seem at first sight to have little in common, and its use in ordinary zoölogy and botany is consequently various. The general sense of the word is subject to the following specifications: (a) An ambiguous or equivocal organic body intermediate between a plant and an animal, and not distinctly either one or the other; a micro-organism or microbe not amenable to ordinary classification in natural history, as bacteria, bacilli, and micrococci; a protoplast, as a moner; one of the lowest protozoans; a protophyte. Such zoöids are microscopic, and for the most part of extreme minuteness. See the distinctive names, and *Movera, Prinnalia, Protista, Protophyta, Protozoa.* (b) One of certain peculiar cells of multicellular animals and plants which are endowed with special activities, have as it were an individuality of their own, and are capable of a sort of separate existence. Zoöids of this class are mainly germinal or reproductive. The female germ (ovum) and the corresponding male element are respectively types of the whole. They occur under many modifications, which receive distinctive names; many of the smallest and simplest forms are indifferently known as *spores*. See *spore, spore-formation, oöspore, zoöspore, sporozoöid, antherozoöid, spermatozoöid, and sper-*

matozoöin, with various cuts. The foregoing definitions are independent of any distinction to be drawn between plants and animals; the following are zoölogical. (c) Any animal organism which has acquired separate existence from another by partition of that other into two or more in the processes of fission, gemmation, and the like. Such cases are numerous and diverse. Viewing the zoön or zoölogical unit as the entire product of an impregnated ovum, the parts or persons into which it may be subsequently separated, without any true sexual generation, and consequently without the origination of a new zoön, are appropriately termed *zoöids*. The simplest case is when a zoön breaks into two or more pieces, and every piece proceeds to grow the part which it lacks, and thus becomes wholly like the organism from which it was detached. Various annelids offer a case in point. Another and large class of cases is furnished by hydrozoans which suffer segmentation directly, or detach from their main stock various parts, as free medusoids and the like, these zoöids serving to found new organisms. Allman defines the zoöid of a hydrozoan as a more or less independent product of non-sexual reproduction. Proliferation or strobilation of parts which may become detached is also well illustrated in the proglottides or deutoscöices which form the joints of tapeworms; these are zoöids in so far as the parent worm is concerned, consisting of detachable genitals containing the elements of a new sexual generation. A similar multiplication by zoöids without generation takes place among tunicates; it is unknown of true vertebrates. One of the most interesting cases is afforded in the parthenogenesis of some insects, as aphids, in which, by a sort of internal gemmation, swarms of zoöidal aphids are budded in succession from one another to several removes from the original impregnation. The term *zoöid* with some writers specifies all these "inferior individuals" which thus intervene in alternation of generation between the products of proper sexual reproduction; and such have been described as "the detached portions of an individual in discontinuous development." (d) Any one of the recognizably distinct persons of a compound organism, whether actually detached or detachable or not; any member of a colonial or social aggregate, as the polypites of a polypoid, the polypides of a polyzoary, and the like. Such zoöids offer every degree of separateness or separability. In some cases they are extremely numerous, all alike, and inseparable from the common stock which they fabricate and inhabit, as the members of a coral or sea-mat. In other cases they are less numerous, and but slightly connected, and all alike, as the several members of a composite sea-anemone of the genus *Zoanthus* (see cut there). But the zoöids of many hydrozoans, for instance, are quite different in both form and function, in the same individual, for the purpose of division of labor; and the zoöids which thus act as the different organs of one individual are commonly distinguished by name, as *gonozoöids, gastrozoöids, dactylozoöids, spermatozoöids*, etc. See the distinctive names. Also *zoömite* (a mistaken use).

zoöidal (zō-oi'dal), *a.* [*< zoöid + -al.*] Same as *zoöid*.

zoöks (zōks), *interj.* A minced oath: same as *gad:zoöks*. [Obsolete or (rarely) archaic.]

Zoöks! see how brave they march. *Sheridan (?)*, *The Camp, i. 2.*

Zoöks! are we pilchards, that they sweep the streets, And count fair prize what comes into their net? *Browning*, *Fra Lippo Lippi*.

zoöil. An abbreviation of *zoölogy*.

zoölater (zō-ol'a-tēr), *n.* [*< zoölatry, after idolater.*] One who worships animals or practises zoölatry.

zoölatria (zō-ō-lā'tri-ā), *n.* [NL.] Same as *zoölatry*.

The system of *zoölatria*, or animal worship, was said to have been introduced into Egypt by King Kekau of the 11th dynasty. *W. R. Cooper, Archæol. Dict., p. 57.*

zoölatrous (zō-ol'a-trūs), *a.* [*< zoölatry + -ous.*] Worshipping animals; practising zoölatry; of or relating to zoölatry.

zoölatry (zō-ol'a-trī), *n.* [*< NL. zoölatria, < Gr. ζῳον, animal, + λατρεία, worship.*] The worship of particular animals, as in the religion of the ancient Egyptians and of many other primitive peoples, either as representatives of deities, or on account of some fancied qualities or relations.

zoölite (zō-ō-līt), *n.* [*< Gr. ζῳον, animal, + λίθος, stone (see -lite).*] A fossil animal; an animal substance petrified. Also *zoöolith*.

zoölith (zō-ō-lith), *n.* Same as *zoölite*.

zoölithic (zō-ō-lith'ik), *a.* [*< zoölith + -ic.*] Same as *zoölithic*.

zoölitic (zō-ō-lit'ik), *a.* [*< zoölite + -ic.*] Having the character of a zoölite; relating to zoölites. Also *zoölithic*.

zoöloger (zō-ol'ō-jēr), *n.* [*< zoölog-y + -er.*] A zoölogist. [Now rare.]

zoölogical (zō-ō-loj'ik), *a.* [*< zoölogy + -ic.*] Same as *zoölogical*.

zoölogical (zō-ō-loj'ī-ikal), *a.* [*< zoölogie + -al.*] Of or pertaining to zoölogy.—**Zoölogical garden**, a park or other large inclosure in which live animals are kept for public exhibition.—**Zoölogical province, region, etc.**, in *zoögeog.*, one of the faunal areas, varying in extent, into which the land-surface of the globe is naturally divisible with reference to the geographical distribution of animals. (See *province, 6, region, 7, and zoögeography*.) Corresponding divisions of the waters of the globe may take the same name when their surface-extent is considered, or are distinctively named (see *Arctalia, etc.*). Zoölogical areas regarded vertically, or as to depth of water, are often called *zones* or *belts*. See *zone, n., 4.*

zoölogically (zō-ō-loj'ī-ikl-i), *adv.* In the manner of a zoölogist; on the principles or according to the doctrines of zoölogy; from a zoölogical standpoint.

zoölogist (zō-ol'ō-jist), *n.* [*< zoölog-y + -ist.*] One who is versed in zoölogy; a biologist.

zoölogize (zō-ol'ō-jiz), *v. i.* To study zoölogy practically.

zoölogy (zō-ol'ō-jī), *n.* [= F. *zoologie* = Sp. *zoología* = Pg. It. *zoologia* = G. *zoologie*, < NL. *zoölogia*, < Gr. ζῳον, animal, + -λογία, < λέγειν, speak; see -ology.] **1.** The science of animals; the natural history of the animal kingdom; the body of fact and doctrine derived from the scientific study of that series of organisms whose highest term is man; correlated with *phytology* (or *botany*) as one of the two main branches of biology. The connotation which the term has acquired during the last fifty years is very extensive, as a result of the application to zoölogical science of the most general laws and principles of biology. So far is zoölogy freed from the former restriction of its scope to the mere formalities of description, classification, and nomenclature (which constitute only *systematic zoölogy*) that it now includes the results of all the biological sciences in so far as these are applicable to the study of animal structure and function. Such are *phylogeny*, or the origination of species, genera, etc.; *ontogeny*, or the origination of the individual animal; *embryology*, or the prenatal life-history of organisms; *paleontology* or *paleozoölogy*, the history of animals in geologic time; *zoögeography*, the history of animals as to their spatial relations; *zoötony* or *zoöphysics*, the comparative anatomy of animals; *zoödynamic* or *biodynamics*, animal physiology; *zoöchemistry*, the chemistry of animal substances and tissues; *zoöpsychology*, the science of animal instincts; *zoötechnics, bionomics, or threnmatology*, which regards the relations of living animals to man; and various other cognate branches of the general science. The name *zoölogy* is an old one, and some of its branches have been cultivated from antiquity. One of the earliest classifications of animals in which a modern zoölogical group can be clearly recognized is that ascribed to Moses, which was based primarily upon certain hygienic and sacerdotical considerations: for the "clean" beasts that "cleave the hoof" are ruminants; certain "unclean" birds are carrion-feeding birds of prey, as the vulture; and the non-ruminant artiodactyls (swine) are characterized with special emphasis. The germ of modern zoölogy, as of other sciences, is commonly ascribed to Aristotle. Though he tabulated no scheme, his three treatises on zoölogical subjects include a classification which shows great discernment. He divided the animal kingdom into two main branches: (1) *Ἐναεμα, Ἐναεμα*, or "blooded" animals, in the four classes of mammals, birds, reptiles, and fishes—th; *Vertebrata*, and nearly as they stand to-day; (2) *Ἄναεμα, Ἄναεμα*, or "bloodless" animals, exactly the *Invertebrata*, of which he had four classes, his *Μαλάκια* being cephalopods; *Μαλακόστρακα*, crustaceans; *Ἔντομα*, insects (other arthropods than crustaceans); and *Ὀστρακοδέματα*, univalve and bivalve mollusks (together with sea-urchins). Pliny the naturalist was an industrious and indiscriminate compiler; and no name of special note in zoölogy appears again until the middle of the sixteenth century, when the almost simultaneous works of three authors securely founded the science and greatly enlarged its scope. Wotton (1525) followed Aristotle, but added to the system the *Zoöphyta* (which long afterward became the *Vermes* of Linnæus and the *Radiata* of Cuvier, and continue to be the "zoöphytes" of the present day); Gesner and Belon published treatises in 1555; and in 1560 was started at Naples a society which had zoölogy among its objects, the *Academia Secretorum Naturæ*, suppressed by the church. The period between Gesner and Linnæus is sometimes styled the "heroic age" of zoölogy. The advance upon Gesner was comparatively unmarked for a hundred years from his death in 1565; but the latter half of the seventeenth century witnessed great progress. The collection of animals from distant parts of the world increased; such anatomical examinations as had been practicable and had long been practised without the aid of the microscope were carried on with that instrument; and several still-existing societies were founded—the *Academia Naturæ Curiosorum* (in 1651), the *Royal Society* (chartered in 1662), and soon afterward the *Paris Academy*, under Louis XIV. The immediate predecessor of Linnæus in this period was John Ray (1628-1705), who fixed the word *species* in the sense it was to bear from his day to Darwin, and did more than any other person to make the "Systema Naturæ" of the Swedish naturalist possible. This work passed through twelve editions (1735-68) in the lifetime of its author; the present binomial system of nomenclature was first applied consistently to zoölogy in the tenth edition (1758). Linnæus also gave fixity to certain graded groups above the species—namely, the genus, order, and class of the "Regnum Animale"—and he recognized the variety below the species. The classes in 1766 were six: *Mammalia*, with orders; *Aves*, 6 orders; *Amphibia*, 3 orders; *Pisces*, 4 orders; *Insecta*, 7 orders; *Vermes*, 5 orders. The Linnæan diagnoses were always crisp and sententious, if not always correct; and, faulty or inadequate as any of them may now appear to be, the practical convenience of this machinery of classification and nomenclature is inestimable. Though the notion of the fixity of species and other groups as special creations, to which this system gave rise, is now known to be radically fallacious, the Linnæan classification acquired almost the character of dogma, as had many centuries before attached to the writings of Aristotle and to the Mosaic traditions. This system may be said to have culminated with the close of the eighteenth century; and the early years of the nineteenth wrought important changes, both in form and substance, notably at the hands of Lamarck and Cuvier. Lamarck was the pivot upon which zoölogy turned from Linnæus to Darwin. His "Zoölogical Philosophy" of 1809 is separated by a half-century to a year from the "Systema Naturæ" of 1758, and by exactly a half-century from Darwin's "Origin of Species," which was first published in November, 1859. Lamarckianism brought up the whole subject of modern

evolution as opposed to special creation, and the variability of organisms by their aptency, as opposed to their fixity in character. Lamarck recognized the two Aristotelian main branches as *Vertebrata* and *Invertebrata*, the former with 4, the latter with 12 classes, and both with many ordinal and lower groups. Cuvier was profoundly versed in comparative anatomy, gave also special prominence to paleontology, and reached the conclusion (1812) that all animals are modeled upon four types, for which he adopted the names *Vertebrata*, with 4 classes; *Mollusca*, 6 classes; *Articulata*, 4 classes; *Radiata*, 5 classes—each with more or fewer orders. Except the first of these (borrowed from Lamarck and so from Aristotle), none of these "types" are found to hold; and few of the classes or orders are now accepted as framed by Cuvier, whose views and methods in the main were upheld in England by Owen. Cuvier's system was completed in 1829. Among the last notable views of classification before the appearance of Darwinism are those of Leuckart (1848), giving 5 types and 14 classes of invertebrates (without the protozoans); of H. Milne-Edwards (1855); and of L. Agassiz (1859). The period between Lamarck and Darwin was one of extraordinary activity in all branches of zoological investigation, involving the accumulation of a wealth of material, the description of thousands of new genera and species, and the multiplication of distinctions founded upon little difference; but philosophical generalizations did not keep pace with the elaboration of analytical details. Zoological systems in various departments became almost as numerous as the specialists engaged; and the subject acquired a huge literature, descriptive, iconographic, and classificatory, as well as controversial. This aspect of zoology has continued during the past thirty years or so (1859-96); but the real history of the zoology of this period is the history of Darwinian evolution, or the application of general principles of individual development (ontogeny) to the solution of broader biological problems (phylogeny)—the development of the theory of evolution being itself an illustration of its own underlying principle.

2. Zoögraphy; the written description of animals; a treatise on animals, especially a systematic treatise, or zoological system. Several of the main classificatory divisions of the animal kingdom represent formally named departments of systematic zoology. Such are *mammalogy* or *mastology* or *therology*, the formal science of mammals; *ornithology*, of birds; *herpetology*, of reptiles, including amphibians; *ichthyology*, of fishes in their several classes; *conchology* or *malacology*, of mollusks; *carcinology* or *crustaceology*, of crustaceans; *entomology*, of insects (more extensive than all the others combined); *helminthology*, of worms; and *zoöphytology*, of zoöphytes. From some of these again subdivisions are formed, in consequence either of the intrinsic importance of certain of their subjects or of the special activity of investigation of these subjects—as, for example, *anthropology* (including *ethnography* and *sociology*), or the particular study of man from a biological standpoint; *cetology*, the study of whales as differing much from ordinary mammals; *selachology*, of one of the classes of fishes; *acidology*, of the connecting links between invertebrates and ordinary vertebrates; and especially of *bacteriology*, the lately created science of microbes or micro-organisms, which probably of all the departments of zoology has the most direct and important bearing upon human welfare and happiness.

Zoöloog, *n.* and *a.* See *Zulu*.

zoömagnetic (zō-ō-mag-net'ik), *a.* [*zoömagnet(ism) + -ic.*] Of or pertaining to zoömagnetism.

zoömagnetism (zō-ō-mag'ne-tizm), *n.* [*Gr. ζῶον, animal, + E. magnetism.*] Animal magnetism.

Turning to the other subjects of which Dr. Liébeault treats in his *Thérapeutique Suggestive*, Paris, 1891, the most remarkable, and almost the most puzzling, chapter is on *zoömagnetism*.

Proc. Soc. Psychical Research (London), July, 1891, p. 291.

zoömancy (zō-ō-man-si), *n.* [*Gr. ζῶον, animal, + μαντεία, divination.*] The pretended art of divination from observation of animals, or of their actions under given circumstances.

zoömantic (zō-ō-man'tik), *a.* [*zoömancy (-mant) + -ic.*] Of or pertaining to zoömancy.

zoömehchanics (zō-ō-mē-kan'iks), *n.* [*Gr. ζῶον, animal, + E. mechanics.*] Same as *zoödynamics*.

zoömelanin (zō-ō-mel'a-nin), *n.* [*Gr. ζῶον, animal, + μέλας (μελαν-), black, + -in².*] A black pigment derived from the feathers of some birds.

zoömetric (zō-ō-met'rik), *a.* [*zoömétr-y + -ic.*] Of or pertaining to zoömetry.

zoömety (zō-ō-m'e-tri), *n.* [*Gr. ζῶον, animal, + μετρία, κ μέτρον, measure.*] Measurement of the proportionate lengths or sizes of the parts of animals: correlated with *anthropometry*.

zoömorphic (zō-ō-mōr'fik), *a.* [*Gr. ζῶον, animal, + μορφή, form.*] 1. Representative of animals, or of their characteristic forms, as a work of art; of or pertaining to zoömorphism: correlated with *anthropomorphic*.—2. Especially, representing or symbolizing the conception of a god under the form of an animal whose characteristic traits or habits suggest the idea attached to the god. The most thoroughly zoömorphic religion was probably that of the ancient Egyptians, resulting in a complex system of zoölatry, many elements of which were appropriated and adapted by the Greeks and Romans.

Oghams, as is well known, occur on some of the crosses bearing the interlaced ornamentation and *zoömorphic* designs found on the Manx crosses.

N. and Q., 7th ser., II, 240.

Under Dyaety XII, the gods that had previously been represented in art as beasts appear in their later shapes, often half anthropomorphic half *zoömorphic*, dog-headed, cat-headed, hawk-headed, bull-headed men and women.

Nineteenth Century, XX, 428.

zoömorphism (zō-ō-mōr'fizm), *n.* [*zoömorphic + -ism.*] 1. The character of being zoömorphic; zoömorphic state or condition; representation or exhibition of animal forms as distinguished from the human form; especially, the characterization or symbolization of a god in animal form. Compare *anthropomorphism*.—2. The conception or representation of men or supernatural beings under the form of animals, or of men or gods transformed into beasts; the attribution of human or divine qualities to beings of animal form; worship of the images of animals; zoötheism.

Zoomorphism is much more absurd than *Anthropomorphism* after all. Surely the rational mode is to employ the highest conceptions you can, while freely acknowledging their utter inadequacy.

Micart, *Nature and Thought*, p. 205.

zoömorphy (zō-ō-mōr-fi), *n.* [*zoömorphic + -y³.*] Same as *zoömorphism*.

zoön (zō'on), *n.*; pl. *zoa* (-ä). [*NL., κ Gr. ζῶον, an animal; cf. ζωή, life; κ ζᾶεν, ζῆν, Ionic ζᾶεν, live.*] An animal form containing all the elements of a typical organism of the group to which it belongs; a morphological individual regarded as the whole product of an impregnated ovum, which may or may not be divided into persons or zoöids without true generation. See *zoöid*.

It is urged that whether the development of the fertilized germ be continuous or discontinuous is a matter of secondary importance; that the totality of living tissue to which the fertilized germ gives rise in any one case, is the equivalent of the totality to which it gives rise in any other case, and that we must recognize this equivalence, whether such totality of living tissue takes a concrete or a discrete arrangement. In pursuance of this view a zoological individual is constituted either by any such single animal as a mammal or bird, which may properly claim the title of a *zoön*, or by any such group of animals as the numerous Medusæ that have been developed from the same egg, which are to be severally distinguished as zoöids.

H. Spencer, *Prin. of Biol.*, § 73.

Zoa impersonalia, organisms resulting from the coalescence or concrescence of zoöns, as of many sponges, which thus lose their "personality."

The remarkable cases [among sponges] of *zoa impersonalia*, or what we should call degraded colonies.

A. Hyatt, *Proc. Bost. Soc. Nat. Hist.* 1884, p. 99.

zoönal (zō-ō-nal), *a.* [*Irreg. κ zoön + -al.*] Having the character of a zoön; of or pertaining to *zoa*.

zoönerithrin (zō-ō-ne-rith'rin), *n.* [*Irreg. κ Gr. ζῶον, animal, + ἐρυθρός, red, + -in².*] Same as *zoöerythrin*. Also *zoöerythrine*.

zoönik (zō-on'ik), *a.* [*Irreg. κ Gr. ζῶον, animal, + -ic.*] Relating to animals; obtained or derived from animal substance: as, *zoönik acid*.—**Zoönik acid**, a name given by Berthollet to acetic acid in combination with animal matter, obtained by distilling animal matter.

zoönite (zō-ō-nit), *n.* [*Irreg. κ Gr. ζῶον, animal, + -ite².*] 1. One of the rings, segments, or somites of which the body of a worm, crustacean, insect, vertebrate, or other segmented or articulated animal is composed; a zönule; a metamere or an arthromere of an articulated invertebrate; a diarthromere of a vertebrate: used generically of any segment, to which special names are given in special cases.—2. Same as *zoöid*: a mistaken use of the word. *Eng. Cyclop. (Zool.)*, IV, 561. (*Eneyc. Dict.*)

zoönitic (zō-ō-nit'ik), *a.* [*zoönite + -ic.*] Of or pertaining to a zoönite; somitic.

zoönomia (zō-ō-nō-mi-i), *n.* [*NL. (the title of a celebrated treatise by Dr. Erasmus Darwin): see zoönomy.*] Same as *zoönomy*.

zoönomic (zō-ō-nom'ik), *a.* [*zoönomy + -ic.*] Of or pertaining to zoönomy.

zoönomist (zō-on-ō-mist), *n.* [*zoönomy + -ist.*] One who is versed in zoönomy; a biologist, in a broad sense.

zoönomy (zō-on-ō-mi), *n.* [*NL. zoonomia, κ Gr. ζῶον, animal, + νόμος, law.*] The laws of animal life collectively considered; the science which treats of the causes and relations of the phenomena of living animals; the vital economy of animals; animal physiology.

zoönosis (zō-on-ō-sis), *n.*; pl. *zoönoses* (-sēz). [*NL., κ Gr. ζῶον, animal, + νόσος, disease.*] A disease communicated to man from the lower animals. Hydrophobia and glanders are examples of zoönoses.

zoönosology (zō-ō-nō-sol'ō-ji), *n.* [*Gr. ζῶον, animal, + E. nosology.*] The classification of diseases affecting the lower animals; a system of zoöpathology; zoöphyty.

zoöparasite (zō-ō-par'a-sit), *n.* [*Gr. ζῶον, animal, + παράσιτος, parasite.*] A parasitic animal.

zoöpathology (zō-ō-pā-thol'ō-ji), *n.* [*Gr. ζῶον, animal, + E. pathology.*] The study of disease in animals; veterinary pathology.

zoöpathy (zō-op'a-thi), *n.* [*Gr. ζῶον, animal, + πάθος, suffering.*] Animal pathology; the science of the diseases of animals, excepting man. See *zoötherapy*.

Zoöphaga (zō-ō-f'a-gā), *n.*, pl. [*NL., neut. pl. of zoöphagus: see zoöphagous.*] 1. [*l. c.*] Flesh-eating or carnivorous animals collectively considered: a term of no exact classificatory meaning.—2. The carnivorous and insectivorous marsupials, as collectively distinguished from the herbivorous marsupials, or *Botanophaga*. The opossum is an example.—3. A division of gastropods including carnivorous forms. *Lamarck*, 1822.

zoöphagan (zō-ō-f'a-gan), *n.* A carnivorous animal; a sarcophagous; especially, a member of the *Zoöphaga*, 2.

zoöphagous (zō-ō-f'a-gus), *a.* [*NL. zoöphagus, Gr. ζοοφάγος, living on animal food, κ ζῶον, animal, + φαγεῖν, eat.*] Devouring animals; sarcophagous; carnivorous: opposed to *phytophagous*. Specifically applied by Blyth, in editing Cuvier, to one of two primary types of placental *Mammalia*, including man, *Quadrumania*, *Carnivora*, and *Cetecea*; the last constituting the order *Isodontia*, the first three the order *Typodontia*.

zoöphilist (zō-ō-f'i-list), *n.* [*zoöphil-y + -ist.*] A lover of animals or living creatures; one whose sympathy embraces all living creation.

Our philosopher and *zoöphilist*. . . advised those who consulted him as to the best manner of taking and destroying rats. *Southey*, *The Doctor*, cxxviii. (*Darvies*.)

The *zoöphilists* vowed their determination to force through Parliament a prohibitory act.

N. A. Rev., CXL, 207.

zoöphily (zō-ō-f'i-li), *n.* [*Gr. ζῶον, animal, + φιλία, love, κ φιλεῖν, love.*] A love of animals; a sympathy or tender care for living creatures which prevents all unnecessary acts of cruelty or destruction. *Cornhill Mag.*

zoöphoric (zō-ō-for'ik), *a.* [*zoöphor-us + -ic.*] Bearing a living being, or a figure or figures of one or more men or animals: as, a *zoöphoric* column.

zoöphorus (zō-ō-f'ō-rus), *n.* [*NL., κ Gr. ζωοφόρος, a frieze bearing the figures of living beings, κ ζῶον, animal, + φορός, κ φέρειν = E. bear¹.*] In *anc. arch.*, a continuous frieze, unbroken by triglyphs, carved in relief with figures of men and animals, as the Panathenaic frieze of the Parthenon, or the frieze of Phigaleia. Also *zophorus*. See cuts under *Doric* and *Hellenic*.

zoöphysics (zō-ō-fiz'iks), *n.* [*Gr. ζῶον, animal, + φυσικά, physics.*] The study of the physical structure of animals; comparative anatomy as a branch of zoölogy: correlated with *zoödynamics*, or animal physiology.

Zoo-Dynamics, Zoo-Physics, Zoo-Chemistry.—The pursuit of the learned physician—*anatomy and physiology*: exemplified by Harvey, Haller, Hunter, Johann Müller.

Eneyc. Brit., XXIV, 803.

Zoöphyta (zō-ō-f'i-tā), *n.*, pl. [*NL., pl. of zoöphyton: see zoöphyte.*] The alternative name of the Cuvierian *Radiata*; the *Phytozoa*; the animal-plants, or plant-like animals. In later systems, especially following the classification of Cuvier, the name has been much used for a large artificial and heterogeneous assemblage of the lower invertebrates, many of which, like the corallines, have a plant-like habit, and branch from a fixed base. It thus covers, or has covered, all the true coelenterates (actinozoans, hydrozoans, and ctenophorans), all the echinoderms (starfishes, sea-urchins, holothurians, and crinoids), the polyzoans, the sponges, some of the worms which used to be classed as radiates, and all the infusorians and other protozoans known having thus no better standing than "the radiate moll" of Cuvier. (See *Radiata*, 1.) In some of its various restricted applications, however, it has excluded certain forms that obviously belonged elsewhere, and the tendency has been to adapt the name to the coelenterates, with or without the sponges. Quite recently the proposition has been made, and by some accepted, to use the name in this strict sense, and instead of *Coelentera* or *Coelenterata*; in which case it would cover the *Actinozoa*, *Hydrozoa*, *Ctenophora*, and *Spongiae*. The New Latin form of the term is attributed to Wotton (1492-1555), who in his "De Differentiis Animalium" (Paris, 1552) included under this name practically its present content: namely, holothurians, starfishes, jellyfishes, sea anemones, and sponges.

zoöphyte (zō-ō-f'i-ti), *n.* [*NL. zoöphyton, κ Gr. ζωοφύτον (Aristotle), lit. 'animal-plant,' κ ζῶον, animal, + φυτόν, plant.*] A member of the *Zoöphyta*, in any sense; a radiate; a phytozoan.

posite species in which the African zoril was confounded with some American skunks: whence also the two senses of *zoril* (which see).

2. [*l. c.*] A zoril.

Zorillinae (zor-i-lī'nē), *n. pl.* [NL., < *Zorilla* + *-inae*.] An African subfamily of *Mustelidae*, represented by the genus *Zorilla*; the zorils, or skunk-like quadrupeds of Africa. They are closely related to the American skunks, or *Mephitinae*. See *ent* under *Zorilla*.

zorilline (zor'i-lin), *a.* Resembling or related to animals of the genus *Zorilla*; pertaining to the *Zorillinae*.

Zoroaster (zō-rō-as'tēr), *n.* [NL. (Thomas, 1873), pun on *Zoroaster* (see *Zoroastrian*), involving NL. *aster*, starfish.] In *zool.*, a genus of starfishes, giving name to the *Zoroasteridae*, and containing such species as *Z. fulgens*, of the North Atlantic.

Zoroasteridae (zō-rō-as'tēr-i-dē), *n. pl.* [NL., < *Zoroaster* + *-idae*.] A family of starfishes, typified by the genus *Zoroaster*. It contains forms with very small body, very long arms, and quadriseriate water-feet, attaining a diameter of 8 or 10 inches.

Zoroastrian (zō-rō-as'tri-an), *a. and n.* [*l. Zoroastres* (> *E. Zoroaster*), the *L.* form of the Old Pers. name *Zarathustra*, + *-ian*.] **I. a.** Of or pertaining to Zoroaster, the founder of the Mazdayasnan or ancient Persian religion; relating to or connected with Zoroastrianism.

II. n. One of the followers of Zoroaster, now represented by the Guebers and Parsees of Persia and India; a fire-worshiper.

Zoroastrianism (zō-rō-as'tri-an-izm), *n.* [*l. Zoroastrian* + *-ism*.] The system of religious doctrine taught by Zoroaster and his followers in the Avesta; the religion prevalent in Persia till its overthrow by the Mohammedans in the seventh century, and still held by the Guebers and Parsees, and commonly, though incorrectly, called *fire-worship*. The religion is dual, recognizing two creative powers—Ormuzd (Ahuramazda), the god of light and creator of all that is good, with six principal and innumerable inferior amshaspands, or ministers of good, and Ahriman (Angra-mainyus), the god of darkness and creator of evil, with a corresponding number of devils, or ministers of evil. Zoroaster taught that Ormuzd created man with free will; that his state after death depends upon the preponderance of good or evil in his life, an intermediate state being provided for those in whom these principles are evenly balanced; and that Ormuzd will finally prevail over Ahriman in the constant war between them, and redeem him and his ministers, as well as man, from all evil.

Zoroastrism (zō-rō-as'trizm), *n.* [*l. Zoroastres*, Zoroaster, + *-ism*.] Same as *Zoroastrianism*. [Rare.]

All these alleged facts conspire to prove that *Zoroastrism* and its Scripturae had their origin in eastern Iran before the rise of Median or Persian dominion.

Amer. Antiq., IX. 118.

zorra (zor'ā), *n.* [NL., < Sp. *zorra*, fem. of *zorro*, a fox.] A South American skunk: same as *atok*.

zorriño (zō-rē'nō), *n.* [Sp. Amer., dim. of Sp. *zorro*, fox.] A South American skunk. The skunks of the Neotropical region belong to the same subfamily (*Mephitinae*) as the others of America, but are generally different, and like the conepate.

ZORRO (zor'ō), *n.* [Sp., a fox.] One of the South American fox-wolves, as *Canis azaræ*. *Eneye*, *Brit.*, XVIII. 353.

zorrico, *n.* [Basque.] A kind of song in quintuple or septuple rhythm common among the Basques.

Zosmeridae (zos-mer'i-dē), *n. pl.* [NL. (Douglas and Scott, 1865), < *Zosmerus* + *-idae*.] A family of heteropterous insects, of the superfamily *Coreoidea*, forming a transition between the *Lygaeidae* and the *Tingitidae*, but by the structure of the abdomen more nearly related to the former than to the latter. It contains only the Old World genus *Zosmerus*.

Zosmerus (zos'me-rus), *n.* [NL. (Laporte, 1833), irreg. < Gr. *ζωα*, a girdle, < *ζωωιναι*, girdle.] A genus of Old World heteropterous insects, typical of the family *Zosmeridae*.

zoster (zos'tēr), *n.* [*l. Gr. ζωστήρ*, a girdle, < *ζωωιναι*, girdle; see *zonc*.] **I.** In *anc. Gr.* *costume*, a belt or girdle; originally, a warriors' belt round the loins, afterward any girdle or zone, but chiefly one of a kind worn by men.

The chiton . . . is girt round under the breast, to keep it from falling, by a girdle (*zoster*). *Eneye*, *Brit.*, VI. 453.

2. Same as *herpes zoster* (which see, under *herpes*).

Zostera (zos-tē'rā), *n.* [NL. (Linnæus, 1753), so called from the long tape-like leaves; < Gr. *ζωστήρ*, a girdle; see *zoster*.] A genus of aquatic plants, of the order *Naiadaceae*, type of the tribe *Zostereae*. It is characterized by monocious flowers and ovoid carpels. The 4 species are natives of marine waters of both the Old and the New World. They grow immersed

in shallow bays and other waters, often forming large masses, growing from slender creeping rootstocks. The long narrowly linear two-ranked leaves are the place of attachment of great numbers of algae, and the feeding-places of many of the smaller forms of animal life. *Z. marina* is known in America as *eel-grass* and in England

1, Flowering Plant of Grass-wrack or Eel-grass (*Zostera marina*); 2, the spadix; a, anther; b, pistil; c, fruit.

as *grass-wrack*, also as *turtle-grass*, *sweet-grass*, and *bell-ware*; when dried, it is used, under the name of *alva marina*, sea-sedge, or sea-hay, for stuffing mattresses and as bedding for horses. This, together with the related *Cymodocea sepiorea*, constitutes the glazier's-seaweed of England. *Z. nana* of Europe is known as *dwarf grass-wrack*.

Zostereae (zos-tē'rē-ē), *n. pl.* [NL. (Kunth, 1841), < *Zostera* + *-eae*.] A tribe of monocotyledonous plants, of the order *Naiadaceae*. It is characterized by unisexual flowers on a flattened spadix without a perianth, and with a subulate or capillary stigma. The 2 genera, *Phyllospadix* and *Zostera* (the type), are submerged grassy plants of sea-water, the former including 2 species, both natives of the Pacific coast of the United States.

Zosterops (zos-tē'rops), *n.* [NL. (Vigors and Horsfield, 1826), < Gr. *ζωστήρ*, a girdle, + *ὄψ*, eye.] **1.** A very extensive genus of *Meliphagidae* (also referred to the *Dicaeidae*), giving name to the subfamily *Zosteropinae*, characterized among related genera by the absence or spurious character of the first primary, and named from the conspicuous orbital ring of most of its members. The genus is now held to cover a number of forms which have been made types of several (about 8) other genera. They are known as *white-eyes* and *silver-eyes*. The range of the genus in this broad sense is very extensive, embracing most of Africa, all of India, Ceylon, Burma, China, and Japan, the Malay Peninsula and Archipelago, the Papuan Islands, Australia, Tasmania, and most of the Polynesian Islands, including New Zealand. The bill is about as long as the head, straight, and broad at the base. The pattern of coloration is characteristic, consisting of olives and yellows as the ground-colors, and the diagnostic white eye-ring of most species. The sexes are alike in plumage. The size is very small, only 4 or 5 inches. About 85 species are recognized as valid. The type is *Z. cerulea*, of Aus-

Silver-eye or White-eye (*Zosterops cerulea*).

tralia, the Chatham Islands, and New Zealand, the earlean creeper, and rusty-sided warbler of the older ornithologists. *Z. madagascariensis* is the white-eyed warbler of Latham. *Z. olivacea* is the olive creeper of Bourbon (Réunion). *Z. mauritiana* is the Maurice warbler of Mauritius. *Z. lugubris*, *Z. borbonica*, *Z. chloronota*, *Z. fallax*, *Z. leucophaea*, *Z. muelleri*, *Z. finchii*, and *Z. senegalensis* have severally been made types of other genera. Some of these birds have been placed in *Dicaeum*, and are among those known to the French ornithologists as *sou-mangas*.

2. [*l. c.*] Any bird of this genus.

zothea (zō-thē'kā), *n.*; *pl. zotheae* (-sē). [*l. Gr. ζοθήκη*, < *ζῆν*, live, + *θήκη*, a receptacle; see

theca.] In *anc. arch.*, a niche or an alcove; also, a small living-room, or room used by day, as opposed to a sleeping-room or dormitory.

Zouave (zō-āv'), *n.* [F., from the name of a tribe inhabiting Algeria.] **1.** A soldier belonging to a corps of light infantry in the French army, distinguished for their dash, intrepidity, and hardihood, and for their peculiar drill and showy Oriental uniform. The Zouaves were organized in Algeria in 1831, and consisted at first of two battalions chiefly of Kabyles and other natives, but ultimately became almost entirely French, with increased numbers. They served exclusively in Algeria till 1854, and afterward fought in European wars.

2. A member of one of the volunteer regiments of the Union army in the American civil war (1861-5) which adopted the name and to some extent imitated the dress of the French Zouaves.—**Papal or pontifical Zouaves**, a corps of French soldiers organized at Rome in 1860 for the defense of the temporal sovereignty of the Pope, under Gen. Lamoricière, one of the first commanders of the Algerian Zouaves. After obstinately resisting the entrance of the Italian government into Rome in 1870, they served in France against the Germans and the Commune, and in 1871 were disbanded.

Zouave-jacket (zō-āv'jak'et), *n.* **1.** A short jacket, not reaching to the waist, cut away in front: a part of the Zouave uniform.—**2.** A similar jacket, usually ornamented, with or without sleeves, worn by women.

zounds (zoundz), *interj.* [For 's wounds, abbr. of *God's wounds*, referring to the wounds of Christ on the cross; one of the innumerable oaths having reference to Christ's passion.] An exclamation formerly used as an oath or as an expression of anger or wonder.

Zounds, sir! then I insist on your quitting the room directly. *Sheridan*, *School for Scandal*, v. 3.

zouch (zouch), *v. t.* [Origin obscure.] To stew, as flounders, whittings, gudgeons, eels, etc., with just enough of liquid to cover them. [Prov. Eng.]

Zr. In *chem.*, the symbol for *zirconium*.

zucchetta (tsuk-ke'tā), *n.* [It. *zucchetta*, a small gourd, a skullcap, dim. of *zucca*, a gourd.] **1.** In the *Rom. Cath. Ch.*, the skullcap of an ecclesiastic, covering the tonsure. That of a priest is black, of a bishop purple, of a cardinal red, and of the Pope white. Also written *zucchetto*.—**2.** A late form of burbanet, distinguished by having a movable nasal, hinged cheek-pieces, and an articulated couvre nuque.

zufolo, **zuffolo** (zō'fō-lō), *n.* [It. *zufolo*, < *zufolare*, hiss, whistle.] A little flute or flageolet, especially such as is used in teaching birds.

Zuggun falcon. See *falcon*.

zuisin, *n.* The American widgeon, *Marca americana*. *Webster's Dict.*, 1890. [Local, U. S.]

zules, **zulis**, *n.* In *her.*, a chess rook used as a bearing.

Zulu (zō'lō), *n. and a.* [Also *Zooloo*; S. African.] **I. n.** A member of a warlike and superior branch of the Kafir race of South Africa, divided into many tribes. In the beginning of the nineteenth century several tribes of Zulus established a kingdom including the present British colony of Natal and the country north of it called Zululand, which was broken up and mostly absorbed by the British and the Boers during a succession of wars ending in 1883.

II. a. Of or pertaining to the Zulus: as, the *Zulu language* (a principal member of the Bantu group of languages) or government.—**Zulu cloth**, a fine twilled woolen cloth used as a background for embroidery. *Dict. of Needlework*.

Zulu-Kafir (zō'lō-kaf'ēr), *n.* Same as *Kafir*, 3.

zumbooruk (zum'bō-ruk), *n.* [Also *zumbooruck*, *zomboruk*, *zamboorak*; < Hind. Pers. Ar. *zambūrak*, < Turk. *zambūrak*, a small gun, dim. of Ar. *zambūr*, a hornet.] A small cannon mounted on a swivel, usually shorter and with larger bore than the zingal. In English writings the name is especially applied to such a piece carried on a camel, the pivot which supports it being erected on the saddle in front of the rider.

Eighteen or twenty camels, caparisoned in the Rajah's colours of red and white, with *zomboruks*, or swivel guns, mounted on their backs.

W. H. Russell, *Diary in India*, II. 237.

zumic (zū'mik), *a.* An improper form of *zymic*.

zumologic, **zumology**, etc. Same as *zymologic*, etc.

Zuñi (zō'nyē), *n.* [Amer. Ind.] A member of the best-known community or tribe of the semi-civilized Pueblo Indians of New Mexico, living in a village of the same name on the Zuñi river, composed of large communal houses.

Zuñian (zō'ni-an), *a. and n.* [*l. Zuñi* + *-an*.] **I. a.** Of or pertaining to the Zuñis.

2. All the *Zuñian* clay effigies of owls have horns on their heads. *Science*, VI. 266.

II. n. A Zuñi.

zunyite (zū'ni-it), *n.* [*< Zūiti* (see def.) + *-ite*².] A fluosilicate of aluminum, occurring in glassy transparent tetrahedral crystals of the hardness of quartz: found at the Zūiti mine in Colorado.

zurf (zērf), *n.* Same as *zarf*.

zwanziger (tswān'tsi-gēr), *n.* [*G.*, *< zwanzig*, twenty.] A silver coin of Austria of the nineteenth century, equivalent to 20 krentzers, and worth 8½ pence English (about 17 cents).

zwieselite (tswē'zel-it), *n.* [*< Zwiesel* (see def.) + *-ite*².] A variety of triplite found near Zwiesel in Bavaria.

Zwinglian (zwing'- or tswing'gli-an), *a. and n.* [*< Zwingli* (see def.) + *-an*.] **I.** *a.* Of or pertaining to Ulrich (Huldreich) Zwingli (1484-1531), a Swiss religious reformer, or his doctrines. Zwingli's revolt from the Roman communion took place at Zurich in 1516, a year before Luther's, with whom he differed in denying the real presence in the eucharist in any sense, and upon other points.

II. *n.* A follower of Zwingli.

Zygadenus (zī-gad'e-us), *n.* [NL. (Richard, 1803), named from the conspicuous pair of glands at the base of the sepals in *Z. glaberrimus*; *< Gr. ζυγών*, a yoke, + *ἀδών*, gland.] A genus of liliaceous plants, of the tribe *Feracæ*. It is characterized by pedicelled flowers with a flatish perianth nearly equaled in its length by the stamens, and narrow angled seeds without prominent wings. The 10 species are natives of Siberia, and of North America including Mexico. They are perennials with a horizontal rootstock or a coated bulb, producing an erect stem unbranched beneath the terminal raceme or panicle, which consists of numerous whitish or greenish flowers. The long linear leaves are radical or crowded toward the base of the stem. The poisonous root of *Z. venenosus* of the northwestern United States is known as *death camas* and as *hog's potato*, being innocuous to hogs and greedily eaten by them. *Z. glaucus* extends northward to Kotzebue Sound. *Z. glaberrimus* and *Z. teimanthoides*, sometimes referred to *Amianthium*, are tall wand-like species with conspicuous white or cream-colored compound racemes, resembling the black cohosh.

zygadite (zī-g'ā-dit), *n.* [*< Gr. ζυγάδων*, jointly, *< ζυγών*, a yoke: see *yoke*¹.] A variety of albite, occurring in thin tabular twin crystals: it is found at Andreasberg in the Harz.

Zygena (zī-jē'nā), *n.* [NL. (Fabricius, 1775), *< Gr. ζύγνα*, supposed to mean the hammer-headed shark.] **I.** In *entom.*, a genus of moths, typical of the family *Zygenidae*, the species of which are known as *burnet-moths*, as *Z. minos*, the transparent burnet; *Z. trifolii*, the five-spotted burnet; *Z. lonicerae*, the narrow-bordered burnet; *Z. filipendulae*, the six-spotted burnet; etc. It was at first coextensive with the family, but now includes only those forms that have the antennæ claviform, a little longer than the body; the wings elongate, and spotted; the palpi short, hairy, and acute; and the larvæ contracted, stout, hairy, and transforming in a fusiform parchment-like cocoon. Nearly 100 species are known, of which 52 occur in Europe, the others in Asia and Africa; 26 are British. The larvæ are remarkable in hibernating in the half-grown condition. Some entomologists change the name to *Anthrocera*, because it is the same as the genus *Zygena* in ichthyology; but this is a mistake, for entomology has the prior claim upon the name, and it is the genus of fishes that should not be named *Zygena*.

2. In *ichth.*, a genus of sharks, so named by Cuvier in 1817; the hammerheads: now called *Sphyrna* (which see). See cut under *hammerhead*.

zygenid (zī-jē'mid), *a. and n.* **I.** *a.* In *entom.* and *ichth.*, of or pertaining to the *Zygenidae*, as a moth or a shark.

II. *n.* A member of the family *Zygenidae*, whether in entomology or in ichthyology.

Also *zygenid*, *zygenoid*.

Zygenidae (zī-jē'ni-dē), *n. pl.* [NL. (Leach, 1819), *< Zygena*, 1, + *-idae*.] **I.** In *entom.*, a family of hawk-moths, named from the genus *Zygena*: also wrongly called *Anthroceridae*. The family comprises a more or less definite and characteristic series of moths intermediate between the *Bombycidae* and the *Castniidae*. By most modern authors a section of the old family *Zygenidae* is separated into a family *Agaristidae*. The *Zygenidae* proper have pectinate antennæ, rather narrow wings rounded at the tip, and a venation similar to the arctians. Their larvæ are short, hairy, and transform in cocoons composed entirely of silk or mainly of hair. The European forms belong mainly to *Zygena*, while the principal American genera are *Procris*, *Harrisiana*, *Ctenucha*, *Lycomorpha*, and *Glaucoptis*, the latter containing more than 100 South American species. *Euchromia* is another large genus, comprising more than 150 species, mainly South American. See cut under *Procris*. Also *Zygenæ*, *Zygenides*, *Zygenoidæ*, and *Zygenides*.

2. In *ichth.*, a family of sharks, named from the genus *Zygena*: now called *Sphyrnidae* (which see). See cut under *hammerhead*.

zygenine (zī-jē'nin), *a.* [*< Zygena* + *-ine*¹.] In *ichth.*, same as *zygenid*.

zygenoid (zī-jē'noïd), *a. and n.* [*< Zygena* + *-oid*.] Same as *zygenid*.

zygal (zī'gāl), *a.* [*< zyg-on* + *-al*.] **1.** Of or pertaining to a zygon; connecting, as a yoke. — **2.** Formed like the letter *H*, with a cross-bar connecting two other bars. See *zygon*.

The frequency of the *zygal* or H-shaped form of fissure [of the brain].

Buck's Handbook of Med. Sciences, VIII. 125.

[Rare in both uses.]

zygantrum (zī-gan'trum), *n.*; *pl. zygantra* (-trū). [NL., *< Gr. ζυγών*, yoke, + *ἀντρον*, cave.] In *herpet.*, the fossa upon the posterior face of the neural arch of a vertebra, for the reception of the zygosphenæ of the zygosphenæ of a succeeding vertebra, the series of vertebrae being more effectively interlocked thereby than is accomplished by the zygapophyses alone. Compare cut under *zygosphenæ*.

Posterior face of a dorsal vertebra of the python, showing *za*, the zygantrum; *ptz*, postzygapophysis; *nc*, neural canal; *c*, convex posterior face of centrum.

The anterior surface of the arch above the neural canal is produced into a strong wedge-shaped zygosphenæ, which fits into a corresponding zygantrum of the next preceding vertebra, and on the posterior surface of the arch there is a zygantrum for the zygosphenæ of the next preceding [read succeeding] vertebra. *Huxley*, *Anat. Vert.*, p. 201.

zygapophysial (zī-gap-ō-fiz'i-āl), *a.* [*< zygapophysis* + *-al*.] Of or pertaining to a zygapophysis; articular, as a vertebral process.

zygapophysis (zī-ga-pōf'i-sis), *n.*; *pl. zygapophyses* (-sēz). [NL., *< Gr. ζυγών*, yoke, + *ἀπόφύσις*, process: see *apophysis*.] A process upon the neural arch of a vertebra corresponding to that called *oblique* or *articular* in human anatomy, provided with a facet for articulation with the same process of a preceding or succeeding vertebra, thus serving to interlock the series of vertebral arches. There are normally two pairs of zygapophyses to a vertebra, the two processes (right and left) which are situated upon the anterior border of any arch being called *prezygapophyses*, and those upon the posterior border, *postzygapophyses*. Each pair of any one vertebra articulates with the other pair of the next vertebra. See cuts under *cervical*, *dorsal*, *endoskeleton*, *hypapophysis*, *lumbar*, *vertebra*, *zygantrum*, and *zygosphenæ*.

zygite (zī'git), *n.* [Also erroneously *zeugite*; *< Gr. ζυγίτης*, *< ζυγών*, yoke, cross-*i* am, thwart: see *zygon*.] In *Gr. antiq.*, an *α* sman of the second or middle tier in a trirel *α*. Compare *thranite* and *thalamite*.

Zygnema (zī-gē'mā), *n.* [NL. (Kützing, 1843), irreg. *< Gr. ζυγών*, yoke, + *νήμα*, thread.] A genus of fresh-water algæ, typical of the order *Zygnemaceæ*, having cells with two axile many-rayed chlorophyll-bodies near the central cell-nucleus, each containing a starch-granule, and the zygosporè undivided, mostly contracted, and developed in the middle space between two united pairing-cells or in one or the other of the conjugating-cells. Several of the species are among the commonest of fresh-water algae in both stagnant and running water, forming dense bright-green masses. See cuts under *chlorophyl* and *conjugation*.

Zygnemaceæ (zī-gē-mā'sē-ē), *n. pl.* [NL., *< Zygnema* + *-aceæ*.] A very distinct order of fresh-water algæ, of the class *Conjugatæ*. The individual consists of a usually simple and unbranched filament of cells placed end to end, and the individuals are joined in filamentous families. The chlorophyll-mass is diffused or of a definite form, often forming a spiral band. Propagation is by means of zoospores which result from conjugation. See *Conjugatæ*, *conjugation* (with cut), and cut under *chlorophyl*.

Zygnemææ (zī-gē'mē-ē), *n. pl.* [NL., *< Zygnema* + *-ææ*.] A subfamily or tribe of fresh-water algæ, of the order *Zygnemaceæ*, characterized by having a mostly contracted, undivided zoospore, which after a period of rest develops into a germ-cell.

zygobran (zī-gō-brang), *a. and n.* [*< Gr. ζυγών*, yoke, pair, + *βράγχια*, gills: see *branchia*.] **I.** *a.* Zygobranchiate.

II. *n.* A zygobranchiate mollusk.

Zygobranchia (zī-gō-brang'ki-ā), *n. pl.* [NL.: see *zygobran*.] Same as *Zygobranchiata*.

Zygobranchiata (zī-gō-brang'ki-ā'tā), *n. pl.* [NL., neut. *pl.* of **zygobranchiatus*: see *zygobranchiate*.] An order or suborder of *Gastropoda*, having paired gill-combs, or right and left tentacles, symmetrically disposed in the pallial chamber on each side of the neck, a pair

of oosphradia or olfactory tracts, paired nephridia of unequal size, and distinct sexes. As an ordinal group, it contains the ormers or sea-cars, the pleurotomariids, the keyhole-limpets, and the true limpets, and is divided into *Ctenidiobranchiata* and *Phyllidiobranchiata* (the latter being the *Patellidæ* alone). Also called *Zygobranchia*, *Zygobranchia*. See cuts under *abalone*, *Fissacellidæ*, *Patella*, *patelliform*, *Pleurotomaria*, *Pleurotomariidæ*, and *sea-ear*.

zygobranchiate (zī-gō-brang'ki-āt), *a. and n.* [*< NL. *zygobranchiatus*, *< Gr. ζυγών*, yoke, + *βράγχια*, gills: see *branchiate*.] **I.** *a.* Having paired and as it were yoked gills or ctenidia, as certain mollusks; having the characters of or pertaining to the *Zygobranchiata*; zygobran.

II. *n.* Any member of the *Zygobranchiata*.

zygocardiac (zī-gō-kār'di-ak), *a.* [*< Gr. ζυγών*, yoke, + *καρδία* = *E. heart*: see *cardiac*.] Noting a certain hard protuberance of the stomach of a crustacean, formed by a thickening of the chitinous lining of the cardiac division (in the crawfish an elongated posterolateral ossicle, connected with the lower end of the anterolateral ossicle, and passing upward and backward to become continuous with the pyloric ossicle): correlated with *ptero-cardiac* and *uro-cardiac*.

zygodactyl, **zygodactyle** (zī-gō-dak'til), *a. and n.* [*< NL. *zygodactylus*, *< Gr. ζυγών*, yoke, + *δάκτυλος*, finger, toe.] **I.** *a.* In *ornith.*, yoke-toed: noting those birds, or the feet of those birds, which have the toes disposed in pairs, two before and two behind. In all yoke-toed birds, excepting the trogons, it is the outer anterior toe which is reversed; in trogons, the inner anterior one. See cut under *pair-toed* and *parrot*.

II. *n.* A yoke-toed bird; a bird having the toes arranged in pairs.

Zygodactyla (zī-gō-dak'ti-lā), *n. pl.* [NL. (Brandt, 1835), fem. of **zygodactylus*: see *zygodactylous*.] **1.** A genus of aculephs, of the family *Æguroideæ*. It includes some large jellyfishes, 6 or 8 inches in diameter, with long violet streamers, found in the north Atlantic waters.

2. A section of pachydermatous mammals, corresponding to the *Suidæ* in a broad sense; the swine. The name implied the cloven hoof of these animals, in distinction from the solidungulate or multungulate hoof of the quadrupeds with which swine were formerly classed as *Pachydermata*. See *Artiodactyla* (with cut).

Zygodactylæ (zī-gō-dak'ti-lē), *n. pl.* [NL.: see *Zygodactyla*.] A group of arboricole non-passerine birds whose toes are yoked in pairs, two before and two behind: synonymous with *Scansores* (which see). The group is artificial, being framed with reference to the single character expressed in the name, insistence upon which brings together some birds which belong to different orders, as *Psittaci* and *Picariæ*, separates the picarian families which are not yoke-toed from their near relatives which are yoke-toed, and ignores the exceptional zygodactylism of the trogons. Various attempts — as by Blyth (1849), Smdvall (1872), and Selater (1880) — to restrict the name to a part of the birds it originally designated, and retain it in the system in a stricter sense, have not been entirely successful. Also *Zygodactylit*.

zygodactyle, *a. and n.* See *zygodactyl*.

zygodactylic (zī-gō-dak'til'ik), *a.* [*< zygodactyl* + *-ic*.] Same as *zygodactyl*.

zygodactylism (zī-gō-dak'ti-lizm), *n.* [*< zygodactyl* + *-ism*.] The yoking of the toes of a bird's foot in anterior and posterior pairs; the zygodactyl character or condition of a bird or its toes.

zygodactylous (zī-gō-dak'ti-lus), *a.* [*< zygodactyl* + *-ous*.] Same as *zygodactyl*.

Zygodon (zī-gō-don), *n.* [*< Gr. ζυγών*, yoke, + *δοτός* (δόνν-) = *E. tooth*.] In *zool.*, same as *Zyglodon*, 1. *Owen*.

zygodont (zī-gō-dont), *a.* [*< Gr. ζυγών*, yoke, + *δοτός* (δόνν-) = *E. tooth*.] Noting molar teeth whose even number of cusps are paired and as it were yoked together; having such molars, as a mammal or a type of dentition.

It is thus probable that trizonodontie is to be regarded as an earlier and more primitive form of molar than those of the *zygodont* (quadrifurcular) type.

Amer. Naturalist, XXII. 832.

Zygomphina (zī-gō-gom'fi-ā), *n. pl.* [NL., *< Gr. ζυγών*, yoke, + *μομῖος*, grinder-tooth.] In Ehrenberg's classification, a division of rotifers.

Zygomma (zī-gō-gram'ā), *n.* [NL. (Chevrolat, 1843), *< Gr. ζυγών*, yoke, + *γάμμα*, letter.] **1.** A notable genus of chrysomelid beetles, comprising about 70 American species, mainly from South America and Mexico. By most American coleopterists it is considered a subgenus of *Chrysomela*, from the typical forms of which it is separated by the possession of a tooth on the last tarsal joint.

2. A genus of reptiles. *Cope*, 1870.

zygoite (zī-gō-īt), *n.* [*< Gr. ζυγών*, yoke, + *-ite*².] An organism resulting from the process of zygo-sis or conjugation.

zygolabialis (zī-gō-lā-bi-ā'lis), *n.*; pl. *zygolabiales* (-lēz). [NL., < *zygo*(ma) + *labialis*, labial.] The lesser zygomatic muscle; the zygomatic minor. *Cowles*, 1887. See first cut under *muscle* 1.

zygoma (zī-gō-mā), *n.*; pl. *zygomata* (-mā-tā). [NL., < Gr. *ζυγωμα*, the zygomatic arch, also a yoke, bolt, bar, < *ζυγών*, yoke, join, < *ζυγόν*, a yoke, joining; see *yoke* 1.] 1. The bony arch or arcade of the cheek, formed by the malar or jugal bone and its connections: so called because it serves to connect bones of the face with those of the skull about the ear. In mammals, including man, the zygoma consists of a malar bone connected behind with the squamosal bone, usually by a zygomatic process of the latter, and abutting in front against a protuberance of the superior maxillary bone, or of the frontal or the lacrimal bone, or any of these. It is usually a stout

Skull of Mylodon, a gigantic extinct sloth, showing the massive zygoma *z*, with strong superior and inferior processes *a, a'*. (Greatly reduced.)

bony arch, sometimes with a strong descending process, giving principal origin to a masseter muscle, and bridging over the temporal muscle. It is sometimes a slender rod, and may be imperfect, as in shrews. The part taken in its formation by the malar bone is very variable in extent. (See cut under *skull*.) Below mammals the construction of the zygoma posteriorly is entirely altered. In birds the arch is articulated there with the quadrate bone, or suspensorium of the lower jaw, representing the malleus of a mammal, and an additional bone, the quadratojugal, intervenes between the quadrate and the malar proper. In such cases the anterior connection is more particularly with the maxillary bone, or with this and the lacrimal, and the zygoma is generally a slender rod-like structure. (See cut under *Gallinæ*.) In reptiles further modifications occur, such as the completion of the arch behind by union of the jugal bone with the postfrontal and squamosal; or there may be no trace of a structure to which the term *zygoma* is properly applicable, as in the *Ophidia*, in which there is no jugal or quadratojugal bone. Among batrachians, as the frog, a zygomatic arch is represented by the connection of the maxillary bone, by means of a quadratojugal bone, with a bone called *temporomastoid* (see cuts there and under *Anura*). In any case a zygoma consists of a suborbital or postorbital series of ossifications in membrane, or membrane-bones, developed on the outer side of the maxillary arch of the embryo (the same that gives rise to the pterygopalatine bar), and when best differentiated is represented by lacrimal, maxillary, jugal, and quadratojugal bones; and its connection with the sphenoid, as occurs in man, is quite exceptional.

2. The malar or jugal bone itself, without its connections. [Rare.]—3. The cavity under the zygomatic process of the temporal bone; the zygomatic fossa. *Brande*.

zygomatic (zī-gō-mat'ik), *a.* [< NL. *zygomatikus*, < *zygoma*, q. v.] In *zool.* and *anat.*, of or pertaining to the malar or jugal bone, or to this bone and its connections; constituting or entering into the formation of the zygoma; jugal.—**Zygomatic apophysis**. Same as *zygomatic process*.—**Zygomatic arch**, the zygoma. See cut under *skull*.—**Zygomatic bone**, the malar.—**Zygomatic canals**, two canals in the malar bone of man, through which pass branches of the superior maxillary nerve; the temporomalar canals: (a) the *zygomatofacial*, or malar, running between the orbital and anterior surfaces; (b) the *zygomatocotemporal*, or temporal, running between the orbital and temporal surfaces.—**Zygomatic crest**, that edge of the human alisphenoid which articulates with the malar.—**Zygomatic diameter**, the greatest distance between the zygomatic arches of the skull.—**Zygomatic fossa**. See *fossa* 1.—**Zygomatic glands**, lymph-nodes found along the course of the internal maxillary artery.—**Zygomatic muscle**. Same as *zygomatikus*.—**Zygomatic process**. See *process*, and cuts under *skull* and *temporal* 2.—**Zygomatic suture**, the squamoso-zygomatic suture; the immovable connection of the squamosal, usually of its zygomatic process, with the malar or jugal bone.—**Zygomatic tuberosity**, that protuberance of the superior maxilla which articulates with the malar.

zygomatiki, *n.* Plural of *zygomatikus*.

zygomatiko-auricular (zī-gō-mat'ikō-ā-rik'ū-lār), *a.* 1. In *anat.* and *zool.*, of or pertaining to the zygoma and the auricle; as, a *zygomatiko-auricular* muscle. See *zygomatiko-auricularis*.—2. In *craniom.*, noting the ratio between the zygomatic and auricular diameters of the skull, called the *zygomatiko-auricular index*.

zygomatiko-auricularis (zī-gō-mat'ikō-ā-rik'ū-lār'is), *n.* A muscle of the external ear of some animals, which arises from the zygoma and is inserted in the auricle; in man, the *atrahens aurem*.

A strong *zygomatiko-auricularis* is also seen as we remove the integuments of the head of the reindeer. *Proc. Acad. Nat. Sci. Phila.*, 1891, p. 232.

zygomatocofacial (zī-gō-mat'ikō-fā'shal), *a.* In *anat.*, of or pertaining to the zygoma and the face; specifying (a) the anterior connections of the zygoma, and (b) the anterior one of the two zygomatic canals which traverse the malar bone of man. See *zygomatic canals*, under *zygomatic*.

zygomatocotemporal (zī-gō-mat'ikō-tem'pō-ral), *a.* In *anat.*, of or pertaining to the zygoma and the temporal bone or fossa: specifying (a) the posterior connections of the zygoma with any element of the temporal bone, as the squamoso-zygomatic of a mammal, and (b) the posterior one of the two zygomatic canals which traverse the malar bone of man. See *zygomatic canals*, under *zygomatic*.

zygomatikus (zī-gō-mat'ik-us), *n.*; pl. *zygomatiki* (-sī). [NL.; see *zygomatic*.] One of several small subcutaneous muscles arising from or in relation with the zygoma, or malar bone.—**Zygomatikus auricularis**, a muscle of the external ear, the *atrahens aurem* of man, commonly called *zygomatiko-auricularis* (which see).—**Zygomatikus major**, **zygomatikus minor**, two muscles of the face, arising from the malar bone, inserted into the orbicularis oris at the corner of the mouth, and serving to draw the corner of the mouth upward and outward, as in the act of laughing. The former is sometimes called *distortor oris*, and the latter *zygolabialis*. See first cut under *muscle* 1.

Zygomaturus (zī-gō-mā-tū'rus), *n.* [NL., < Gr. *ζυγωμα*, the zygomatic arch, + *οὐρά*, tail.] 1. A genus of large fossil marsupials from the Post-tertiary deposits of Australia.—2. [l. c.] A member of this genus. *Imp. Dict.*

zygomorphic (zī-gō-mōr'fik), *a.* [< *zygomorphous* + *-ic*.] In *bot.*, same as *zygomorphous*.

zygomorphism (zī-gō-mōr'fizim), *n.* [< *zygomorphous* + *-ism*.] The character of being zygomorphous.

zygomorphous (zī-gō-mōr'fus), *a.* [< Gr. *ζυγόν*, yoke, + *μορφή*, form.] Yoke-shaped: specifically applied to flowers which can be bisected into similar halves in only one plane; monosymmetrical. Sachs extends the term to cases where bisection into similar halves is possible in two planes at right angles to one another, the halves of one section being different from the halves of the other. *Goebel*. Compare *actinomorphic*.

zygomorphy (zī-gō-mōr'fi), *n.* [< *zygomorphous* + *-y*.] In *bot.*, same as *zygomorphism*.

zygomycete (zī-gō-mī'sēt), *n.* In *bot.*, a fungus belonging to the group *Zygomycetes*.

Zygomycetes (zī-gō-mī-sē'tēz), *n. pl.* [NL., < Gr. *ζυγόν*, yoke, + *μύκηξ*, pl. *μύκητες*, a mushroom.] A group of fungi characterized by the production of zygospores. It embraces the *Mucorini*, *Entomophthoræ*, *Chytridiogæ*, *Ustilaginæ*, etc.

zygomycetous (zī-gō-mī-sē'tus), *a.* In *bot.*, of or pertaining to the *Zygomycetes*.

zygon (zī'gon), *n.* [NL., < Gr. *ζυγόν*, a yoke, cross-bar; see *yoke* 1.] 1. A connecting rod or bar; a yoke in general.

Zygal fissures are defined as "H-shaped or quadrilateral, presenting a pair of branches at either end of a connecting bar or yoke, the *zygon*." A zygal fissure contains a bar or *zygon*, a yoke in the most general sense. *B. G. Wilder*.

2. In *anat.*, an H-shaped fissure of the brain, as the paroccipital fissure. It consists of anterior and posterior stipes, anterior and posterior rami, and the connecting bar (the *zygon* in strictness). *B. G. Wilder*.

Zygonectes (zī-gō-nek'tēz), *n.* [NL. (Agassiz, 1854), so called because said to swim in pairs; < Gr. *ζυγόν*, yoke, + *νήκτης*, swimmer.] A large genus of small euryorvorous American euryodonts; the top-minnows. They are closely related to the killifishes (*Fundulus*), the technical difference being chiefly in the smallness and backwardness of the dorsal fin, which has usually less than ten rays and is commonly inserted behind the front of the anal fin. The top-minnows are on the average smaller than the killifishes, being usually only 2 or 3 inches long. They are surface swimmers, and feed on insects. The species are numerous, and individuals abundant. One of the best-known is *Z. notatus*, common in ponds from Michigan to Alabama and Texas.

Zygotepalum (zī-gō-pet'ā-lum), *n.* [NL. (Hooker, 1827), so called with ref. to the union of the perianth with the foot of the column; < Gr. *ζυγόν*, yoke, + *πέταλον*, leaf (petal).] A genus of epiphytic orchids, of the tribe *Vandee* and subtribe *Cyrtopodie*. It is characterized by showy solitary or loosely racemed flowers with spreading sepals, the lateral ones united to the short foot of the incurved column; by a flatish lip, bearing a transverse crest at its base; and by an anther with four obovoid pollen-masses, attached by a rather broad stalk or gland. There are about 50 species, natives of tropical America from the West Indies and Mexico to Brazil. They are handsome plants with short leafy stems finally thickened into pseudobulbs. Their leaves are two-ranked, membranous or somewhat rigid, and slightly plicate or with elevated veins. They are highly prized in cultivation under glass, especially *Z. Mackaui*, the original species.

Zygotyphæ (zī-gō-fis'ē-ē), *n. pl.* [NL., < Gr. *ζυγόν*, yoke, + *τύφος*, seaweed, + *-ææ*.] A group or order of unicellular or multicellular freshwater algae, not now generally accepted, with the cells single, or segregate, or geminate, or united in a series. Multiplication is effected by division in one direction, and by means of zygospores resulting from the conjugation of the cells. It embraces the families *Desmidiaceæ*, *Zygnemaceæ*, etc.

Zygotyphaceæ (zī-gō-fis'ē-ē), *n. pl.* [NL., < *Zygotyphum* + *-acææ*.] Same as *Zygotyphylææ*.

Zygotyphylææ (zī-gō-fil'ē-ē), *n. pl.* [NL. (R. Brown, 1814), < *Zygotyphum* + *-ææ*.] An order of polypetalous plants, the bean-caper family, belonging to the series *Discifloræ* and the cohort *Gerantiales*. It is characterized by flowers which usually bear a fleshy disk, five free glandless sepals, filaments augmented each by a small scale, and a furrowed angled or lobed ovary with two or more filiform ovules in each of the four or five cells. It includes about 110 species, classed in 18 genera, natives of tropical and warm climates, especially north of the equator. They are commonly shrubs or herbs with a woody base, bearing divaricate branches jointed at their nodes. Their leaves are usually opposite and pinnate or composed of two entire leaflets; the twin persistent stipules are sometimes developed into spines. The flowers are white, red, or yellow, very rarely blue, usually solitary in the axils of the stipules. The principal genera are *Zygotyphum* (the type), *Tribulus*, *Guaiacum*, and *Fagonia*; 10 genera are monotypic; two species of *Guaiacum* (lignum-vitæ) become moderate trees. The woody species are remarkable for the extreme hardness of their wood, and several, as *Guaiacum*, produce a bitter and acrid bark. Their detrusive foliage is used in the West Indies to scour floors. Some of the family are so abundant in the Egyptian desert as to constitute a characteristic feature of its vegetation.

Zygotyphyllum (zī-gō-fil'um), *n.* [NL. (Linnaeus, 1737), < Gr. *ζυγόν*, yoke, + *φύλλον*, leaf.] A genus of plants, type of the order *Zygotyphylææ*. It is characterized by opposite bifoliate leaves, flowers with four or five petals, and a sessile ovary with the ovules fixed upon the axis. There are about 60 species, natives of the Old World and of Australia. They are diminutive shrubs, often prostrate, and with spinescent branches. The leaves are opposite, usually composed of two fleshy leaflets armed at the base with spines which represent stipules. The flowers are white or yellow, usually marked near the base with a purple or red spot. *Z. Fabago* is the bean-caper of the Levant; its flower-buds are used as capers. The aromatic seeds of *Z. coccineum* are used by the Arabs as pepper. Several species are of local medicinal repute. *Z. Fabago* as a vermifuge, and *Z. simplex*, an Arabian plant of nauseous odor, as a remedy for diseases of the eye.

zygophyte (zī-gō-fit), *n.* [NL., < Gr. *ζυγόν*, yoke, + *φύον*, plant.] A plant characterized by the production of zygospores; a plant in which reproduction consists in a confluence of two similar protoplasmic masses. See cut under *conjugation*, 4.

In most of these *zygophytes* there is no plain distinction of sex. *G. L. Goodale*, *Physiol. Bot.*, p. 439.

zygopleural (zī-gō-plō'ral), *a.* [< Gr. *ζυγόν*, yoke, + *πλευρά*, side.] Bilaterally symmetrical in a strict sense. Zygopleural forms are distinguished as *dipleural* and *tetrapleural*.

Zygosaurus (zī-gō-sā'rus), *n.* [NL. (Eichwald, 1848), < Gr. *ζυγόν*, yoke, + *σαύρος*, lizard.] A genus of labyrinthodonts, based on *Z. lucius* from the Middle Permian of Perm in Russia.

zygose (zī'gōs), *a.* [< Gr. *ζυγόν*, yoke, + *-ose* after *zygosis*.] In *bot.*, pertaining to or characteristic of zygosis or conjugation.

Zygoselmidæ (zī-gō-sel'mi-dē), *n. pl.* [NL., < *Zygoselmis* + *-idæ*.] A family of dimastigote eustomatous flagellate infusorians, named from the genus *Zygoselmis*. They have two similar vibratile flagella, and the endoplasm includes no pigmentary bands.

Zygoselmis (zī-gō-sel'mis), *n.* [NL., < Gr. *ζυγόν*, yoke, + *σέλμης*, noose.] The typical genus of *Zygoselmidæ*. These animalcules are highly plastic and variable in form, with two unequal flagella from the fore end, at the base of which are the mouth and pharynx. *Z. nebulosa* and *Z. inaequalis* inhabit fresh water.

zygosis (zī-gō'sis), *n.* [NL., < Gr. *ζυγώσις*, a joining (used in sense of balancing), < *ζυγών*, join, yoke; see *zygoma* 1.] 1. Asexual intercourse of protoplasmic bodies, resulting in their confluence and coalescence; the process and result of conjugation in protozoans or other of the lowest organisms. See *conjugation*, 4.—2. [cap.] [NL. (Förster, 1869).] A genus of hymenopterous insects.—3. In *bot.*, conjugation; the fusion or union of two distinct cells or protoplasmic masses for reproduction. See *conjugation*, 4.

zygosperm (zī-gō-spér-m), *n.* [NL., < Gr. *ζυγόν*, yoke, + *σπέρμα*, seed.] In *bot.*, same as *zygospore*.

zygosphe (zī-gō-sfēn), *n.* [< Gr. *ζυγόν*, yoke, + *σφήν*, wedge.] In *herpet.*, the wedge-shaped process from the fore part of the neural arch

of the vertebræ of serpents and some lizards, which fits into a corresponding fossa, the zygogontrum, on the posterior part of the neural arch of a preceding vertebra, and serves thus to interlock the series of arches more effectually than would be done by zygapophyses alone. Compare cut under *zygantrum*.

Anterior face of a dorsal vertebra of the python, showing *zs*, zygosphe; *ns*, neural spine; *nc*, neural canal; *c*, centrum of the proœlian vertebra, whose convexity fits the convexity of the centrum shown under *zygantrum*.

zygosporangium

(zī'gō-spō-ran'-jī-um). *n.*; pl. *zygosporangia* (-iā). [NL., < Gr. ζυγόν, yoke, + σπορά, seed, + ἄγγειον, vessel.] In *bot.*, a sporangium in which zygospores are produced.

zygospore (zī'gō-spōr). *n.* [NL., < Gr. ζυγόν, yoke, + σπορά, seed.] In *bot.*, a spore formed in the process of reproduction in some algae and fungi by the union or conjugation of two similar gametes or protoplasmic masses: called *isospore* by Rostafinski. Also *zygosperm*, *zygote*. See *spore*, 2, conjugation, 4 (with eut).

Zygosporæ (zī'gō-spō-rē-ē). *n. pl.* [NL., < Gr. ζυγόν, yoke, + σπορά, seed, + -æ.] In Sachs's system of classification, a group of plants characterized by the production of zygospores. It is no longer maintained.

zygosporophore (zī'gō-spōr'ō-fōr). *n.* [NL., < Gr. ζυγόν, yoke, + σπορά, seed, + φέρειν = E. bear¹.] In *bot.*, a club-shaped or conical section of a hypha adjoining a gamete-cell after its delimitation. *De Bary*.

zygote (zī'gōt). *n.* [< Gr. ζυγώτης, yoked, < ζυγόν, yoke; see *zygoma*.] Same as *zygospore*.

Zygotrocha (zī-gōt'rō-kā). *n. pl.* [NL., < Gr. ζυγόν, yoke, + τροχός, wheel.] In Ehrenberg's classification, a division of rotifers: correlated with *Schizotrocha*.

zygotrochous (zī-gōt'rō-kus). *a.* Of or pertaining to the *Zygotrocha*.

zygozoidspore (zī'gō-zō'ō-spōr). *n.* [NL., < Gr. ζυγόν, yoke, + ζῴον, animal, + σπορά, seed.] In *bot.*, a motile zygospore.

zylo- For words so beginning, see *xylo-*.

zylonite, *n.* Same as *xylonite*.

Zylophagus (zī-lof'a-gus). *n.* The original (incorrect) form of *Xylophagus*. *Latreille*, 1809.

zymase (zī'mās). *n.* [< Gr. ζύμη, leaven, + -ase (after *diastase*).] Same as *enzyme*.

zyme (zīm). *n.* [< Gr. ζύμη, leaven, < ζέειν, boil: see *yeast*.] 1. A ferment.

A yeast and a ferment signify the same thing, and, as a *zyme* also means a ferment, the term *zymotic* has arisen to express a certain class of diseases.

Nineteenth Century, XXIV. 843.

2. The living germ or other poison, of whatever nature, which is believed to be the specific cause of a zymotic disease.

zymic (zīm'ik). *a.* [Also improperly *zunic*; < *zyme* + -ic.] Pertaining to or of the nature of leaven: applied by Pasteur to the microbes which act as ferments only when the air is excluded, as distinguished from those which require the presence of air.

zymogen (zī'mō-jen). *n.* [< Gr. ζύμη, leaven, + γενής, producing.] A substance from which an enzyme may be formed by internal change. Also *zymogene*.

A ferment is found to exist as a *zymogen* in the resting seed, which is readily developed by warmth and weak acids into an active condition. *Nature*, XLI. 380.

zymogenic (zī-mō-jen'ik). *a.* [As *zymogen* + -ic.] Exciting fermentation: as, *zymogenic organisms*.

zymogenous (zī-mōj'e-nus). *a.* [As *zymogen* + -ous.] Same as *zymogenic*.

zymoid (zī'moid). *a.* [< Gr. *ζυμοειδής, ζυμώδης, like leaven, < ζύμη, leaven, + εἶδος, form.] Resembling a *zyme* or ferment.

zymologic (zī-mō-loj'ik). *a.* [< *zymology* + -ic.] Of or pertaining to zymology. Also *zumologic*.

zymological (zī-mō-loj'i-kal). *a.* [< *zymologic* + -al.] Same as *zymologic*.

zymologist (zī-mol'ō-jist). *n.* [< *zymology* + -ist.] One who is skilled in zymology. Also *zumologist*.

zymology (zī-mol'ō-jī). *n.* [Also *zumology*; < Gr. ζύμη, leaven, + λογία, < λέγειν, speak: see -ology.] The science of or knowledge concerning fermentation.

zymolysis (zī-mol'i-sis). *n.* [< Gr. ζύμη, leaven, + λύσις, dissolving.] Same as *zymosis*, 1.

zymolytic (zī-mō-lit'ik). *a.* [< *zymolysis* (-lyt-) + -ic.] Same as *zymotic*.

Prof. Salkowski . . . concluded from his researches that fermentative (*zymolytic*) processes are continually taking place in living tissues. *Nature*, XLI. 599.

zymome (zī'mōm). *n.* [< Gr. ζύμμα, a fermented mixture, < ζυμοῦν, leaven, ferment, < ζύμη, leaven: see *zyme*.] An old name for the gluten of wheat that is insoluble in alcohol. Also *zimome*.

zymometer (zī-mom'e-tēr). *n.* [< Gr. ζύμη, leaven, + μέτρον, measure.] An instrument for ascertaining the degree of fermentation of a fermenting liquor. Also *zymosimeter*.

zymophyte (zī'mō-fit). *n.* [< Gr. ζύμη, leaven, + φυτόν, plant.] A bacterioid ferment that

liberates fatty acids from neutral fats. *Bil-lings*.

zymoscope (zī'mō-skōp). *n.* [< Gr. ζύμη, leaven, + σκοπεῖν, view.] An instrument, contrived by Zenneck, for testing the fermenting power of yeast, by bringing it in contact with sugar-water and observing the quantity of carbonic anhydrid evolved. *Watts*.

zymosimeter (zī-mō-sim'e-tēr). *n.* [< Gr. ζύμωσις, fermentation, + μέτρον, measure.] Same as *zymometer*.

zymosis (zī-mō'sis). *n.* [NL., < Gr. ζύμωσις, fermentation, < ζυμοῦν, ferment: see *zymome*.] 1. Fermentation of any kind. Also *zymolysis*.— 2. An infectious or contagious disease.

zymotechnic (zī-mō-tek'nik). *a.* [< Gr. ζύμη, leaven, + τέχνη, art.] Relating to the art of inducing and managing such fermentations as are useful in the arts; pertaining to zymotechnies.

zymotechnical (zī-mō-tek'ni-kal). *a.* [< *zymotechnic* + -al.] Same as *zymotechnic*.

zymotechnics (zī-mō-tek'niks). *n.* [Pl. of *zymotechnic* (see -ics).] The art of managing fermentation. Compare *zymurgy*.

zymotic (zī-mot'ik). *a.* and *n.* [< Gr. ζυμωτικός, < ζύμωσις, fermentation: see *zymosis*.] I. *a.* Pertaining to fermentation; of the nature of fermentation. Also *zymolytic*.—**Zymotic disease**, any disease, such as malaria, typhoid fever, or smallpox, the origin and progress of which are due to the multiplication within the body of a living germ introduced from without.—**Zymotic papilloma**, frambœsia.

II. *n.* Same as *zymotic disease*. See I.

zymotically (zī-mot'ik-ly). *adv.* [< *zymotic* + -al + -ly².] In a zymotic manner; according to the manner or nature of zymotic diseases.

zymurgy (zī'mēr-jī). *n.* [< Gr. ζύμη, leaven, + ἔργον, work (cf. *metallurgy*, etc.).] That department of technological chemistry which treats of the scientific principles of wine-making, brewing, and distilling, and the preparation of yeast and vinegar, in which processes fermentation plays the principal part. *Watts*.

Zyrichthys, *n.* See *Xyrichthys*. *Swainson*, 1839.

zythepsary (zī-thep'sā-ri). *n.* [Irreg. < Gr. ζύθος, beer, + ἔψευ, boil (related to πέσσειν, boil, cook: see *peptic*), + -ary.] A brewery or brew-house. [Rare.]

zythum (zī'thum). *n.* [< L. *zythum*, < Gr. ζύθος, beer, applied to the beer of Egypt and also to that of the northern nations (κόρυμ).] A kind of beer made by the ancient Egyptians.

Zygomma (zik-som'ā). *n.* [NL. (Rambur, 1842), prop. **Zexomma*, < Gr. ζεύξις, a joining (< ζεύγνυμι, join), + ὄμμα, eye: see *ommatidium*.] A genus of Indian dragon-flies, of the family *Libellulidæ*, having the head large, the face narrow, the eyes of great size, and the first three abdominal segments vesicular.

LIST OF AMENDED SPELLINGS

RECOMMENDED BY THE PHILOLOGICAL SOCIETY OF LONDON AND THE AMERICAN PHILOLOGICAL ASSOCIATION

THE American Philological Association, giving voice to the general opinion of the most eminent scholars in English philology, as reflected in previous discussions in that body and elsewhere and expressed in the annual reports of a special committee, adopted and published, in 1876, a declaration in favor of a reform in English spelling. That declaration, as printed in the List of Amended Spellings subsequently recommended by the Association, is as follows:

1. The true and sole office of alphabetic writing is faithfully and intelligibly to represent spoken speech. So-called "historical" orthography is only a concession to the weakness of prejudice.

2. The ideal of an alphabet is that every sound should have its own unvarying sign, and every sign its own unvarying sound.

3. An alphabet intended for use by a vast community need not attempt an exhaustive analysis of the elements of utterance and a representation of the nicest varieties of articulation; it may well leave room for the unavoidable play of individual and local pronunciation.

4. An ideal alphabet would seek to adopt for its characters forms which should suggest the sounds signified, and of which the resemblances should in some measure represent the similarities of the sounds. But for general practical use there is no advantage in a system which aims to depict in detail the physical processes of utterance.

5. No language has ever had, or is likely to have, a perfect alphabet; and in changing and amending the mode of writing of a language already long written regard must necessarily be had to what is practically possible quite as much as to what is inherently desirable.

6. To prepare the way for such a change, the first step is to break down, by the combined influence of enlightened scholars and of practical educators, the immense and stubborn prejudice which regards the established modes of spelling almost as constituting the language, as having a sacred character, as in themselves preferable to others. All agitation and all definite proposals of reform are to be welcomed so far as they work in this direction.

7. An altered orthography will be unavoidably offensive to those who are first called upon to use it; but any sensible and consistent new system will rapidly win the hearty preference of the mass of writers.

8. The Roman alphabet is so widely and firmly established in use among the leading civilized nations that it cannot be displaced; in adapting it to improved use for English, the efforts of scholars should be directed towards its use with uniformity, and in conformity with other nations.

In pursuance of this declaration, further action was taken by the Association from year to year; and, a similar declaration having been made by the Philological Society of London, the two bodies agreed, in 1883, upon certain rules (the Twenty-four Rules) for the correction of the orthography of certain words and classes of words. Subsequently an alphabetical list of the principal words covered by the rules was made. "The corrections are in the interest of etymological and historical truth, and are to be confined to words which the changes do not much disguise from the general reader." The rules are printed in the "Proceedings" of the American Philological Association for 1883. The list was printed in the "Transactions" for 1886, and later in the periodical "Spelling," in October, 1887, from which it is here reprinted, with some slight corrections.

In the following list, as in the Twenty-four Rules, many amendable words have been omitted for reasons such as these: 1. The changed word would not be easily recognized, as *nee* for *knee*. 2. Letters are left in strange positions, as in *edy* for *edge*, *casq* for *casque*. 3. The word is of frequent use. Final *g* = *j*, *v*, *g*, *z*, and syllabic *l* and *n*, are strange to our print but abundant in our speech. Many of them are in the list: *hav*, *freez*, *singl*, *eatn*, etc.; but *iz* for *is*, *ov* for *of*, and many other words, as well as the final *z* = *s* of inflections, are omitted. 4. The wrong sound is suggested, as in *vay* for *vague*, *acer* for *acre*. 5. A valuable distinction is lost: *casque* from *cask*, *dost* from *dust*.

Unusual words having a familiar change of ending, as *-le* to *-l*, and simple derivatives and inflections, are often omitted. Words doubtful in pronunciation or etymology, and words undecided by the Associations, however amendable, are omitted. Inflections are printed in italics.

The so-called Twenty-four Rules are many of them lists of words. The rules proper are as follows:

TEN RULES.

1. e.—Drop silent *e* when phonetically useless (writing *-er* for *-re*), as in *live* (liv), *single* (singl), *eaten* (eatn), *rained* (raind), etc. *theatre* (theater), etc.

The list is printed here as a record of an important movement which promises to be of special interest to lexicographers in the near future, and as a recognition, in addition to the remarks made in the Preface (p. ix), of the desirableness of correcting the anomalies and redundancies of English spelling in the directions indicated. It is the main office of a dictionary to record actual usage, not to recommend better usage; but in cases of unsettled usage it must adopt, and thus by inference recommend, one form as against the rest; and, in view of the fact that the amended spellings in question have been recommended by the highest philological authorities in the English-speaking world, and that they have been to a considerable extent already adopted, in whole or in part, by many respectable newspapers and other periodicals, and by a large number of persons in private use, besides those who take part in the agitation for spelling reform, they can hardly be ignored in a dictionary which records without wincing the varying orthography of times just past, and of earlier generations. The reformed orthography of the present, made with scientific intent and with a regard for historic and phonetic truth, is more worthy of notice, if a dictionary could discriminate as to worthiness between two sets of facts, than the oftentimes capricious and ignorant orthography of the past.

It need not be said in this dictionary that the objections brought on etymological and literary and other grounds against the correction of English spelling are the unthinking expressions of ignorance and prejudice. All English etymologists are in favor of the correction of English spelling, both on etymological grounds and on the higher ground of the great service it will render to national education and international intercourse. It may safely be said that no competent scholar who has really examined the question has come, or could come, to a different conclusion; and it may be confidently predicted that future English dictionaries will be able to recognize to the full, as this dictionary has been able in its own usage to recognize in part, the right of the English vocabulary to be rightly spelled.

It is to be noted that many of the corrected spellings in the following list are merely reversions to a simpler mode of spelling formerly common; indeed, such is largely the intent of the list. Examples are *engin*, *genuin*, *wil*, *shrill*, and the like, and especially verbal forms like *dropt*, *kist*, *mist*, *tost*, etc.—a mode of spelling in use for more than a thousand years (compare Anglo-Saxon *cyste*, English *kist*; Anglo-Saxon *miste*, English *mist*, etc.), and still familiar in the usage of the best modern poets, as Tennyson and Lowell (*leapt*, *mist*, *tost* are in Lowell's last poem, "My Brook," December, 1890). All considerations, historical, literary, and economical, are in favor of such corrected forms.

W. D. WHITNEY.

2. ea.—Drop *a* from *ea* having the sound of *e*, as in *feather* (fether), *leather* (lether), etc.
3. o.—For *o* having the sound of *u* in *but* write *u* in *abore* (abuv), *tongue* (tung), and the like.
4. ou.—Drop *o* from *ou* having the sound of *u* in *but* in *trouble* (trubl), *rough* (ruf), and the like; for *-our* unaccented write *-or*, as in *honour* (honor), etc.
5. u, ue.—Drop silent *u* after *g* before *a*, and in native English words, and drop final *ue*: *guard* (gard), *guess* (gess), *catalogue* (catalog), *league* (leag), etc.
6. Drop consonants may be simplified when phonetically useless: *baillif* (baillif) (not *hall*, etc.), *battle* (batl), *written* (writn), *traveller* (traveler), etc.
7. d.—Change *d* and *ed* final to *t* when so pronounced, as in *looked* (lookt), etc., unless the *e* affects the preceding sound, as in *chafed*, etc.
8. gh, ph.—Change *gh* and *ph* to *f* when so sounded: *enough* (enuf), *laughter* (lafter), *phonetic* (fonetic), etc.
9. a.—Change *s* to *z* when so sounded, especially in distinctive words and in *-ise*: *abuse*, verb (abuze), *advertise* (advertize), etc.
10. t.—Drop *t* in *tch*: *catch* (cach), *pitch* (pich), etc.

In the foregoing list of authorities those titles have been generally omitted which are cited in the Dictionary in full or in a self-explanatory form—especially the titles of daily newspapers, of numerous scientific periodicals, and of "Proceedings" and "Transactions" of learned societies.

SUPPLEMENTARY NOTE TO PREFACE.

DURING the publication of the dictionary but one change has occurred in the staff of specialists mentioned in the preface issued with the first part. While the proofs of "T" were coming from the press, Dr. James K. Thacher, who had labored upon the dictionary from its beginning, died, leaving his work upon the last letters of the alphabet unfinished. The task of completing it was taken up by Dr. Thomas L. Stedman, and has been carried through by him.

The dictionary has also received additional aid from many others not mentioned in the preface. Help has thus been given most notably by Prof. Charles A. Young, in many important definitions (in particular those of the words *sun*, *solar*, *telescope*, and *lens*) and in continuous criticism of the final proofs; by Prof. Thomas Gray, of Rose Polytechnic Institute, in electrical definitions; by Mr. George E. Curtis, of the Smithsonian Institution, and Prof. Cleveland Abbe, in definitions of meteorological terms; by Mr. Edward S. Burgess, Mr. E. S. Steele of the National Museum, Mr. F. V. Coville of the United States Department of Agriculture, Prof. N. L. Britton of Columbia College, and the late Dr. J. I. Northrop, also of Columbia, in botany; by Mr. Leicester Allen, in definitions of mechanical terms; by Prof. S. W. Williston, of the University of Kansas, in medicine and physiology; by Dr. Theobald Smith, of the United States Department of Agriculture, in veterinary pathology and surgery; by Lieut. Arthur P. Nazro, in naval and nautical definitions; by Capt. Joseph W. Collins, of the United States Fish Commission, in material relating to fishing and the fisheries; by Prof. William H. Brewer, of Yale University, in many definitions, particularly those of the gaits of horses; by Mr. A. D. Risteen, in certain mathematical definitions; by Rev. George T. Packard, in the preliminary arrangement of certain literary material; by Mr. Austin Dobson, in the definitions of the names of various forms of verse; by Prof. Douglas Sladen, in the collection of Australian provincialisms and colloquialisms; and in various special matters by Dr. Edward Eggleston, Mr. George Kennan, Mr. George W. Cable, Mr. G. W. Pettes, and many others.

The staff of editorial assistants has been enlarged by the addition of Miss Katharine G. Brewster, and of Rev. George M'Arthur, to whom special recognition is due for his efficient revision of the final proofs.
